"The Boston Police Study" Albert J. Grudzinskas, Jr., J.D. (PI)

Funder: Sidney R. Baer, Jr. Foundation \$550,000.00 Period: 10/01/07 to 9/30/10

The study consists of two primary components and is a three year project. The first, to be completed in the first year, is the "Boston Police Training Initiative." It entails the development and manualization of a police training protocol for management of encounters with persons with mental illness whom police term "emotionally disturbed persons" (EDPs) and implements it alongside the highly touted "Memphis Crisis Intervention Team (CIT)" model in two comparable police districts in the City of Boston. There will also be a third police district which will act as a control, receiving only access to the same Crisis Triage Unit (CTU, described below) component that the two police training districts will have access to. The second component of this study, to be completed in years two and three, is the "Boston Police Evaluation." It will compare outcomes of the two protocols on a range of attitudinal, dispositional, operational, systemic and human resource factors. Our ultimate goal is to expand the range of choices available to police departments wishing to enhance their capacity in this area, and to provide evaluative information to standardize the training and to guide such choices.
