Public Comment

Welcome to CMS Quality Measures Public Comment Page

This page serves as the designated site for CMS to solicit public comments on proposed quality measures that are included in the individual project pages. The public comment period provides an opportunity for the widest array of interested parties to provide input on the measures under development and can provide critical suggestions not previously considered by the measure contractor or its technical expert panel (TEP).

Details of the Public Comment Period:

- The public is encouraged to submit general comments relevant to both measures or comments specific to certain measures
- Information about each measure is found in the Downloads section below

EPA Seeking Public Comment on Enhancing Transparency for Chemicals and Mixtures Used in Hydraulic Fracturing

Release Date: 05/09/2014
Contact Information: Cathy Milbourn milbourn.cathy@epa.gov 202-564-7849 202-564-4355

WASHINGTON – EPA announced today that it will seek public comment on what information could be reported and disclosed for hydraulic fracturing chemicals and mixtures and the approaches for obtaining this information, including non-regulatory approaches. EPA is also soliciting input on incentives and recognition programs that could support the development and use of safer chemicals in hydraulic fracturing. A public process through an Advance Notice of Proposed Rulemaking (ANPR) will help inform EPA's efforts to promote the transparency and safety of unconventional oil and gas activities while strengthening protection of our air, water, land and communities.

"Today's announcement represents an important step in increasing the public's access to information on chemicals used in hydraulic fracturing activities," said James Jones, EPA's assistant administrator for the Office of Chemical Safety and Pollution Prevention. "EPA looks forward to hearing from the public and stakeholders about public disclosure of chemicals used during hydraulic fracturing, and we will continue working with our federal, state, local, and tribal partners to ensure that we complement but not duplicate existing reporting requirements."

EPA's ANPR includes a list of questions for stakeholders and the public to consider as they develop their comments. Following the 90-day comment period, the agency will evaluate the submitted comments as it considers appropriate next steps. Advance Notice of Proposed Rulemakings are intended to engage the public and solicit comments and/or information from the public for EPA's consideration in addressing a particular issue, including information that EPA could consider in developing non-regulatory approaches or a proposed rule.

Know Your Funder: Advocacy vs. Lobbying

▶ NIH

- Grassroots: No appropriated Federal funds can be used by NIH grantees for grassroots lobbying activity directed at inducing members of the public to contact their elected representatives to urge support of, or opposition to, proposed or pending legislation or appropriations or any regulation, administrative action, or order issued by the executive branch of any Federal, state or local government...
- Direct: ...[G]rantees are restricted from using Federal funds to attempt to influence deliberations or actions by Federal, state, or local legislative or executive branches. This includes communications to a legislator or executive official that refer to and reflect a view on specific measure (legislative or executive).

Know Your Funder: Advocacy vs. Lobbying

▶ Robert Wood Johnson Foundation

- Direct: Prohibited direct lobbying is a direct communication with a legislator or legislative staff that refers to pending or potential legislation and reflects a view on such legislation.
- Grassroots: Prohibited grassroots lobbying is any communication with the general public that refers pending or potential legislation and includes a call to action (e.g., urging contact with a legislator, providing contact information for a legislator, identifying a legislator as opposing pending or potential legislation, etc.)
