

Phenomena Supportive of Metaphysical Idealism

This work lists some of the problems that I find supportive of metaphysical/philosophy of mind idealism.

Alike “quantum non-locality”, some of the phenomena that I find supporting of idealism are mentioned below.

1. The problem of wave-particle duality (*See Feynman, Leighton, Sands (1965) The Feynman lectures on physics: vol. 3. Addison-Wesley, USA.*)
2. The problem of cell development and differentiation (*See Capra, Fritjof (1997) The web of life: a new synthesis of mind and matter. Flamingo, London.*)
3. The problem of newly minted protein folding
4. The Problem for the Mechanism behind the Phenomena of Telepathy, Premonitions, and the Sense of Being Stared At. (*See Sheldrake, Rupert (2004) The sense of being stared at: and other unexplained powers of the human mind. Three Rivers Press, New York.*)
5. Zeno’s paradoxes
 - a. The racecourse or dichotomy paradox
 - b. Achilles and the tortoise
6. The Problem for the Appropriate Mechanism behind Basic Physical Forces. (*See Joshi, Kedar (2005) Superultramodern Science and Philosophy. Red Lead Press, Pittsburgh, Pennsylvania, USA.*)
7. The Problem of Relativity of Mass
(*See Joshi, Kedar (2005) Superultramodern Science and Philosophy. Red Lead Press, Pittsburgh, Pennsylvania, USA.*)
8. The Problem for the Appropriate Mechanism behind Astrological Phenomena
(*See Joshi, Kedar (2005) Superultramodern Science and Philosophy. Red Lead Press, Pittsburgh, Pennsylvania, USA.*)

For the problem of quantum non-locality, as stated/taken/supposed in the NSTP theory, see *Nadeau, Robert and Kafatos, Menas (1999) The non-local universe: the new physics and matters of the mind. OUP, Oxford.*
