***Tenacity: Remarkable People  
of the Fur War 1765-1840***

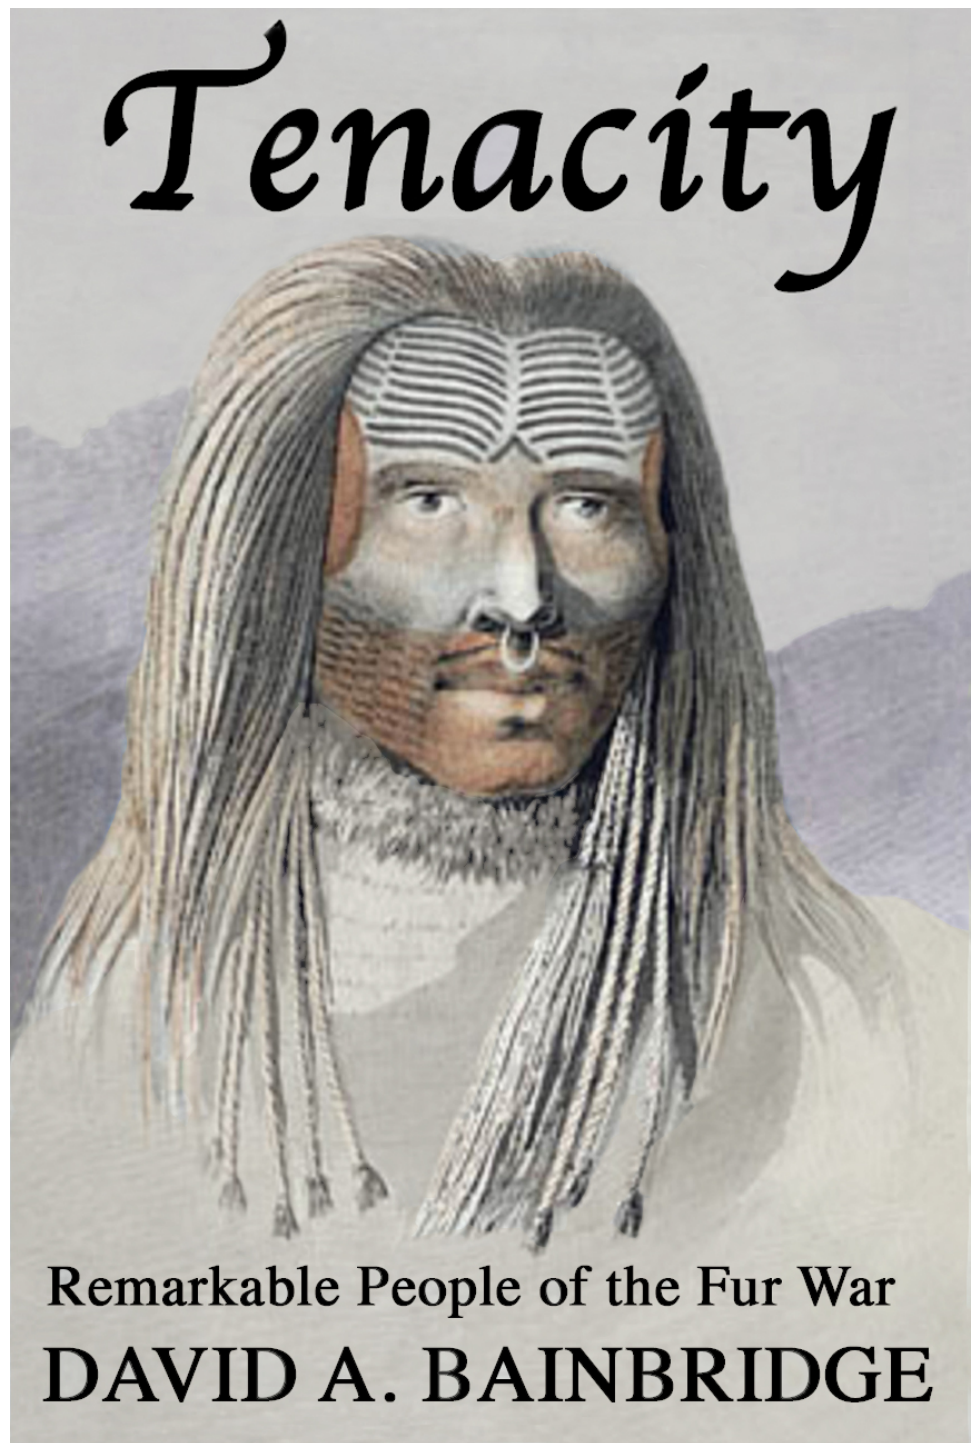

*Heroes, Oligarchs, Psychopaths, Survivors, Scoundrels, Observers*

David A. Bainbridge

The complex interaction of economics, politics, culture and ecology of the Fur War were described in Volume 1. This second volume reveals the remarkable people of the Fur War. The heroes, scoundrels, survivors, oligarchs, observers and psychopaths were far removed from the seats of power and often had to make decisions on their own. Learn how they shaped history.

The title “Tenacity” reflects the often seemingly impossible odds many of these individuals overcame. Physical and mental toughness and indomitable will contributed to their survival.

Consider yourself in their shoes. Could you command a ship around the world at the age of nineteen with twenty-two men (most of them older than you) as crew? Could you hike, ride, and camp in the snow for five months every year while caring for several children under the age of 15, preparing food, skinning beaver, and perhaps giving birth and nursing an infant? Could you continue after nine out of ten people in your family and village died of new diseases? Could you survive a 14-month drift across the north Pacific only to shipwreck on the coast — and be made a slave?
