Supplementary Table 1 of Poehler and Crowther 2018: Description of Paving Events

The following table presents the evidence for each of the 172 events of paving within Pompeii's lava stone streets. Street surfaces known to be in beaten ash (*battuto*) as well as those of unknown type are included in a separate table below. A paving event, abbreviated as PE or PE_(number), is a section of stone pavement defined by observable junctures with other paving events. This table supplements the article published as Poehler, E., and B. Crowther. 2018. "Paving Pompeii: The Archaeology of Stone-Paved Streets." *AJA* 122(4).

This table is organized by paving event number (column 1). PEs missing from the sequence in the first part of the table, Paving Events in Stone can be found in the second part of the table, Paving Events in Beaten Ash (*Battuto*) or with an Unknown Surface.

Supplementary table 1 is ordered by PE number rather than by street name (column 2)—despite the fact that the streets have definite locations and our PEs are more arbitrarily labeled spatially—in order to make specific PEs referred to in the article easier to find within this table. Readers seeking a specific street are encouraged to use the search function of the program they are using to view this file. Within column 2, larger, two-way streets are called "via," while the smaller, one-lane streets are called "vicolo."

Column 3 of this table indicates the chronological phase to which each PE is assigned. These phases are as follows:

Phase 1: Pre-Aqueduct Period (100–20 B.C.E.).

Phase 2: Augustan Fountain Period (20–1 B.C.E.).

Phase 3: Augustan Drainage Period (1–20 C.E.).

Phase 4: Early Imperial Period (20–40 C.E.).

Phase 5: Middle Imperial Period (40–62/3 C.E.).

Phase 6: Post-Earthquake(s) Period (62/3–79 C.E.).

Phase 7: Period immediately prior to eruption. New pavement partially laid, but unfinished (79 C.E.).

Phase 8: Period immediately prior to eruption. Street in preparation for repaving (79 C.E.).

The phase of the PE as it existed in 79 C.E. is presented first, followed by the phase during which the PE or PEs were repaired in parentheses, if applicable. For example, on via delle Terme, PE_004 was determined to be last paved in Phase 5, repairing an earlier pavement laid in Phase 2, which itself was a repair of a Phase 1 pavement. This is represented as 5 (2, 1) in column 3.

Column 4 indicates whether the extant surface observed was a new stone pavement (i.e., it replaced an earlier beaten ash surface) or was a repair of a surface that had previously been paved in stone. In only 14 examples is a PE observed to have been replaced twice. These are marked with an asterisk (*).

Column 5 indicates the length of each PE as categorized into types in relation to the length of the city blocks that the PE borders. These types are:

Intersection: The length of the PE accords with the space of an intersection of streets.

Partial Block: The length of the PE is less than the length of any city block it borders.

Block: The length of the PE accords with the lengths of all city blocks that it borders.

Multi-Block: The length of the PE is greater than the length of any city block it borders.

Unique: The shape of the PE is nonlinear and its length cannot be determined in relation to the city blocks it borders.

Column 6 records the estimated cost of each PE in sesterces (HS). We calculated cost as a proportion of each PE's area in relation to known costs for paving late republican and early imperial era roads. Therefore, cost is also a proxy for size by area. See Poehler and Crowther 2018 for a complete description of this calculation.

Column 7 provides a brief description of each PE and its relative chronological relationship to each adjacent PE (in italics), including the types of evidence used to make this chronological determination (in bold). These are abbreviated as follows:

DP: Differential Paving

LA: Linear Abutment

TR: Terminating Rut(s)

WA: Wearless Area

UK: Unknown

When absolute chronological information was available from excavations or from stratigraphic relationships to other dated structures, a note is added at the end of that PE's description. This note includes a reference to a specific row within Supplementary Table 2 of Poehler and Crowther 2018: Evidence of Absolute Chronology (which is referred to as "table 2" and is available here: <https://works.bepress.com/eric-poehler/103/>).

Paving Events in Stone

PE Number	Street	Phase	New or Repair	Length Type	Estimated Cost in Sesterces	Description
PE_001	via Consolare	2	New	Partial Block	2,679	PE_001 is defined by relatively later PEs to the north (DP , <i>PE_162</i>) and south (DP , <i>PE_002</i>).
PE_002	via Consolare	4 (2)	Repair	Multi-Block	8,969	PE_002 is defined by relatively earlier PEs to the north (DP , TR , <i>PE_001</i> ; DP , <i>PE_064</i> ; DP , <i>PE_065</i>) and south (DP , LA , TR , WA , <i>PE_126</i>) as well as relatively later PEs to the east (LA , <i>PE_161</i>) and south (DP , LA , <i>PE_004</i>). PE_002 is assigned to Phase 4 due to the terminating rut at vicolo del Farmacista, which indicates a short duration of use across the wearless area here prior to the blockage of vicolo del Farmacista at via delle Terme in Phase 5 or Phase 6. Its absolute date is determined by its relation to the fountains at the intersections with vicolo di Narciso (table 2, no. 42) and vicolo di Modesto (table 2, no. 43).
PE_003	via delle Terme	1	New	Block	1,852	PE_003 is defined by relatively later PEs to the west (DP , <i>PE_126</i>) and east (DP , LA , WA , <i>PE_004</i>).

PE_004	via delle Terme	5(2, 1)	Repair*	Multi-Block	3,607	PE_004 is defined by relatively earlier PEs to the west (DP , LA , WA , <i>PE_003</i>), north (DP , LA , <i>PE_002</i> and DP , LA , <i>PE_067</i>), east (DP , <i>PE_153</i>), and south (DP , <i>PE_010</i>).
PE_005	via del Vesuvio	1	New	Block	8,869	PE_005 is defined by relatively later PEs to the north (DP , <i>PE_213</i>), east (DP , LA , <i>PE_073</i>), south (DP , <i>PE_127</i>), and west (UK , <i>PE_063</i>). Its absolute date is determined by excavation (table 2, no. 13) and by its relation to the fountains at VI 16, 26 (table 2, no. 56) and at the intersection with vicolo di Mercurio (table 2, no. 57).
PE_006	via Stabiana	2 (1)	Repair	Multi-Block	13,921	PE_006 is defined by relatively later PEs to the west (DP , LA , <i>PE_144</i> ; DP , LA , <i>PE_149</i>), east (DP , <i>PE_104</i> ; UK , <i>PE_204</i> ; LA , <i>PE_203</i>), and south (DP , LA , <i>PE_207</i>) as well as a contemporary PE to the west (UK , <i>PE_091</i>). A street of unknown age (LA , <i>PE_057</i>) also intersects this PE. Its absolute date is determined by its relation to the Stabian Baths (table 2, no. 87) and to the fountain at via degli Augustali (table 2, no. 60).
PE_007	via dell'Abbondanza	5 (1)	Repair	Multi-Block	10,760	PE_007 is defined by relatively earlier PEs to the north (DP , LA , <i>PE_108</i> ; DP , LA , <i>PE_024</i> ; LA , <i>PE_020</i>), east (DP , LA , <i>PE_092</i>), and south (DP , LA , <i>PE_102</i> ; DP , LA , <i>PE_209</i> ; DP , LA , <i>PE_210</i>). Its absolute date is determined by its relation to the fountains at the intersections with vicolo di Eumachia (table 2, no. 49) and vicolo del Lupanare (table 2, no. 58).

PE_008	via dell'Abbondanza	4 (2)	Repair	Multi-Block	5,520	PE_008 is defined by a relatively earlier PE to the west (DP , <i>PE_107</i>). Streets of unknown age and condition (LA , <i>PE_051</i> ; UK , <i>PE_219</i>) also intersect this PE.
PE_009	via del Foro	3 (1)	New	Block	6,648	PE_009 is defined by a relatively earlier PE to the north (DP , LA , <i>PE_153</i>) and a later PE to the south (DP , LA , <i>PE_106</i>). Its absolute date is determined by excavation (table 2, no. 9) and by its relation to the Temple of Fortuna Augusta (table 2, no. 83).
PE_010	vicolo delle Terme	2	New	Block	2,730	PE_010 is defined by relatively later PEs to the north (DP , <i>PE_004</i>) and south (DP , LA , <i>PE_105</i>). Its absolute date is determined by its relation to the water tower and renovations of the Forum Baths (table 2, no. 81).
PE_011	via degli Augustali	5 (2)	Repair	Partial Block	1,144	PE_011 is defined by a relatively later PE to the west (DP , <i>PE_106</i>) and an earlier PE to the east (DP , <i>PE_142</i>). Its absolute date is determined by excavation (table 2, no. 14).
PE_012	vicolo del Farmacista; via Soprastanti; vicolo del Gigante	4 (2)	Repair	Multi-Block	5,439	PE_012 is defined by relatively earlier PEs to the north (DP , <i>PE_126</i>), east (DP , LA , <i>PE_013</i>), and south (DP , TR , <i>PE_014</i>), and by a later PE to the east (LA , <i>PE_105</i>).

PE_013	vicolo del Gallo; vicolo Storto Nuovo	2	New	Multi-Block	3,260	PE_013 is defined by relatively later PEs to the west (DP , LA , <i>PE_012</i>) and north (UK , <i>PE_105</i>). Its absolute date is determined by excavation (table 2, no. 2) and by its relation to the fountain at vicolo del Gigante (table 2, no. 41).
PE_014	vicolo del Gigante	2	New	Partial Block	506	PE_014 is defined by relatively later PEs to the north (DP , TR , <i>PE_012</i>) and south (DP , <i>PE_015</i>).
PE_015	via di Marina	5 (1)	Repair	Multi-Block	2,292	PE_015 is defined by a relatively earlier PE to the north (DP , <i>PE_014</i>) and a contemporary PE to the east (DP , LA , <i>PE_141</i>). Its absolute date is determined by its relation to the Porta di Marina (table 2, no. 76) and the Sanctuary of Venus (table 2, no. 77).
PE_017	via della Fortuna	5(2, 1)	Repair*	Multi-Block	2,303	PE_017 is defined by relatively earlier PEs to the west (DP , TR , <i>PE_052</i>) and east (DP , TR , <i>PE_121</i>), and by a relatively younger PE (DP , LA , <i>PE_099</i>) and a contemporary PE (DP , LA , <i>PE_069</i>) to the north.
PE_018	vicolo del Championnet	2	New	Block	2,494	PE_018 is defined by a relatively later PE to the west (UK , <i>PE_141</i>). Its absolute date is determined by its relation to the ramp (table 2, no. 79) and stairs (table 2, no. 80) of the Basilica.

PE_019	vicolo di Eumachia	1	New	Partial Block	549	PE_019 is defined by relatively later PEs to the north (DP , TR , <i>PE_151</i>) and south (DP , TR , <i>PE_108</i>). Its absolute date is determined by excavation (table 2, no. 16).
PE_020	vicolo del Lupanare	4	New	Block	1,647	PE_020 is defined by a relatively earlier PE to the north (LA , <i>PE_147</i>) and by a later PE to the south (LA , <i>PE_007</i>).
PE_021	vicolo del Balcone Pensile	2	New	Block	1,186	PE_021 is defined by relatively later PEs to the west (UK , <i>PE_151</i>), east (DP , <i>PE_168</i>), and south (DP , <i>PE_025</i>). Its absolute date is determined by its relation to the water tower at vicolo di Eumachia (table 2, no. 91).
PE_022	vicolo del Balcone Pensile	2	New	Partial Block	774	PE_022 is defined by relatively later PEs to the west (DP , <i>PE_155</i>) and east (DP , LA , <i>PE_151</i>).
PE_023	vicolo degli Scheletri	4	New	Multi-Block	2,427	PE_023 is defined by relatively earlier PEs to the west (DP , LA , <i>PE_151</i>), east (DP , LA , <i>PE_147</i>), and south (DP , LA , <i>PE_024</i>) and by a later PE to the north (LA , <i>PE_025</i>).
PE_024	vicolo della Maschera	3	New	Block	1,084	PE_024 is defined by relatively later PEs to the north (DP , LA , <i>PE_023</i>) and south (DP , LA , <i>PE_007</i>).

PE_025	vicolo della Maschera	5	New	Block	1,411	PE_025 is defined by relatively earlier PEs to the north (DP , <i>PE_021</i>) and south (LA , <i>PE_023</i>). Its absolute date is determined by its relation to the fountain at vicolo del Balcone Pensile (table 2, no. 55).
PE_026	vicolo di VIII 5–5	5	New	Partial Block	1,083	PE_026 is defined by a relatively earlier PE to the north (DP , LA , <i>PE_209</i>).
PE_027	vicolo dei 12 Dei	6 (3)	Repair	Multi-Block	2,148	PE_027 is defined by relatively earlier PEs to the north (DP , TR , <i>PE_210</i>), east (DP , LA , <i>PE_101</i>), and south (DP , <i>PE_028</i>).
PE_028	vicolo della Regina; via delle Scuole	5 (1)	Repair	Multi-Block	6,836	PE_028 is defined by a relatively earlier PE to the east (DP , <i>PE_100</i>) and a later PE to the north (DP , <i>PE_027</i>). Its absolute date is determined by its relation to the fountains at the forum (table 2, no. 47) and at the intersection with vicolo della Regina (table 2, no. 48).
PE_029	via del Tempio d'Iside	5 (2)	Repair	Partial Block	4,781	PE_029 is defined by relatively earlier PEs to the west (DP , LA , <i>PE_101</i>), north (DP , LA , <i>PE_167</i>), and east (DP , <i>PE_093</i>), and by a contemporary PE to the south (LA , <i>PE_154</i>). Its absolute date is determined by its relation to the fountain at the Ionic Propylon (table 2, no. 59).

PE_030	vicolo di Citarista	3	New	Block	2,225	PE_030 is defined by relatively later PEs to the north (DP , LA , <i>PE_124</i>) and south (DP , LA , <i>PE_202</i>).
PE_033	vicolo del Menandro	2	New	Partial Block	1,787	PE_033 is defined by relatively later PEs to the west (DP , LA , <i>PE_178</i>) and east (DP , <i>PE_202</i>).
PE_035	vicolo delle Conciapelle	8 (2)	Repair	Multi-Block	2,916	PE_035 is defined by relatively later PEs to the west (DP , <i>PE_136</i>) and east (DP , <i>PE_137</i>). A street of unknown age and condition (UK , <i>PE_036</i>) also intersects this PE. Note: This section of repair on vicolo delle Conciapelle was conceived as a multi-block-length event together with <i>PE_136</i> and <i>PE_137</i> . These are counted together as a single multi-block-length event in tabulations (e.g., fig. 19).
PE_038	via di Castricio	2	New	Multi-Block	2,380	PE_038 is defined by relatively later PEs to the west (DP , TR , <i>PE_201</i>), north (DP , <i>PE_041</i>), and east (DP , <i>PE_157</i>). Streets of unknown age and condition (UK , <i>PE_042</i> ; UK , <i>PE_200</i>) also intersect this PE. Its absolute date is determined by its relation to the fountain at the intersection with vicolo I 16–I 17 (table 2, no. 69).
PE_041	vicolo di I 8–I 9	6	New	Block	2,169	PE_041 is defined by relatively earlier PEs to the north (DP , <i>PE_190</i>) and south (DP , <i>PE_038</i>).

PE_046	via di Nocera	2	New	Partial Block	2,660	PE_158 is defined by relatively later PEs to the north (DP , LA , TR , <i>PE_120</i>) and south (DP , <i>PE_159</i>).
PE_047	via della Palestra; via di Nocera	5 (2)	Repair	Partial Block	557	PE_047 is defined by relatively earlier PEs to the north (DP , TR , <i>PE_197</i>) and south (DP , TR , <i>PE_195</i>). Streets of unknown age and condition (UK , <i>PE_198</i> ; UK , <i>PE_185</i>) also intersect this PE.
PE_052	via della Fortuna	2 (1)	Repair	Intersection	260	PE_052 is defined by relatively later PEs to the west (DP , TR , <i>PE_128</i>), north (DP , LA , <i>PE_099</i>), and east (DP , TR , <i>PE_017</i>).
PE_053	vicolo di Tesmo	2	New	Block	1,482	PE_053 is defined by relatively later PEs to the north (DP , <i>PE_169</i>) and south (DP , LA , TR , <i>PE_124</i>).
PE_054	via Mediana; vicolo di Tesmo	2	New	Multi-Block	4,693	PE_054 is defined by relatively later PEs to the west (DP , <i>PE_204</i>), north (DP , LA , <i>PE_075</i>), east (DP , <i>PE_058</i>), and south (DP , TR , <i>PE_169</i>). A street of unknown age (UK , <i>PE_057</i>) also intersects this PE. Its absolute date is determined by its relation to the Central Baths (table 2, no. 86).

PE_055	vicolo dei Vettii	2	New	Partial Block	1,810	PE_055 is defined by relatively later PEs to the west (DP , LA , <i>PE_089</i>), north (DP , TR , <i>PE_156</i>), and south (DP , <i>PE_072</i>), and by a contemporary PE to the east (LA , <i>PE_063</i>).
PE_056	vicolo di Balbo	5 (3)	Repair	Block	1,984	PE_056 is defined by relatively earlier PEs to the west (DP , TR , <i>PE_203</i>) and east (DP , LA , <i>PE_169</i>).
PE_058	vicolo IX 5–IX 6	5	New	Block	1,712	PE_058 is defined by a relatively earlier PE to the west (DP , <i>PE_054</i>) and a contemporary PE to the east (DP , <i>PE_076</i>).
PE_059	vicolo Storto	1	New	Partial Block	528	PE_059 is defined by relatively later PEs to the north (DP , <i>PE_149</i>) and south (DP , <i>PE_142</i>). Its absolute date is determined by excavation and geophysical prospection (table 2, no. 15).
PE_060	vicolo degli Scheletri	2	New	Partial Block	1,416	PE_060 is defined by a relatively later PE to the east (DP , LA , <i>PE_151</i>). Its absolute date is determined by its relation to the Eumachia Building (table 2, no. 85).

PE_061	vicolo di Mercurio	3	New	Multi-Block	3,232	PE_061 is defined by relatively later PEs to the west (DP , <i>PE_161</i>), north (DP , LA , <i>PE_066</i>), and east (DP , LA , <i>PE_068</i>), and by contemporary streets to the south (UK , <i>PE_067</i> ; DP , <i>PE_065</i>). A street of beaten ash (DP , <i>PE_016</i>) also intersects this PE.
PE_062	vicolo di Mercurio	3	New	Partial Block	766	PE_062 is defined by relatively later PEs to the west (DP , LA , <i>PE_068</i>) and east (DP , <i>PE_069</i>).
PE_063	vicolo di Mercurio	2	New	Block	2,025	PE_063 is defined by a relatively earlier PE to the east (UK , <i>PE_005</i>) and a contemporary PE to the west (LA , <i>PE_055</i>).
PE_064	vicolo di Narciso	3	New	Block	1,856	PE_064 is defined by a relatively later PE to the south (DP , LA , <i>PE_002</i>). Its absolute date is determined by excavation (table 2, nos. 5–6).
PE_065	vicolo di Modesto	3	New	Block	2,278	PE_065 is defined by a relatively later PE to the south (DP , <i>PE_002</i>) and a contemporary PE to the north (DP , <i>PE_061</i>).
PE_066	vicolo di Modesto	4	New	Block	4,323	PE_066 is defined by a relatively earlier PE to the south (DP , LA , <i>PE_061</i>).

PE_067	vicolo della Fullonica	3	New	Block	3,408	PE_067 is defined by a relatively later PE to the south (DP , LA , <i>PE_004</i>) and a contemporary PE to the north (UK , <i>PE_061</i>).
PE_068	via di Mercurio	6 (1)	Repair	Block	6,624	PE_068 is defined by relatively later PEs to the west (DP , LA , <i>PE_061</i>), north (DP , <i>PE_214</i>), east (DP , LA , <i>PE_062</i>), and south (DP , LA , <i>PE_153</i>). Its absolute date is determined by its relation to the fountains at the so-called Arch of Caligula (table 2, no. 45) and at the intersection of vicolo di Mercurio (table 2, no. 44).
PE_069	vicolo di Mercurio; vicolo del Labirinto	5 (3)	Repair	Multi-Block	12,356	PE_069 is defined by relatively earlier PEs to the west (DP , <i>PE_062</i>) and east (DP , <i>PE_089</i>) and by a younger PE (DP , <i>PE_099</i>) and a contemporary PE to the south (DP , LA , <i>PE_017</i>). A street of beaten ash (DP , <i>PE_070</i>) also intersects this PE. Its absolute date is determined by its relation to the fountain at the intersection at vicolo di Mercurio (table 2, no. 51).
PE_071	vicolo di III 10–III 11	3	New	Unknown	204	PE_071 is defined by a relatively earlier PE to the north (UK , <i>PE_081</i>). Its absolute date is determined by its relation to the fountain at the intersection at via di Nola (table 2, no. 71).
PE_072	vicolo dei Vettii	5	New	Multi-Block	3,158	PE_072 is defined by relatively earlier PEs to the north (DP , <i>PE_055</i>) and south (UK , <i>PE_121</i>).

PE_073	vicolo delle nozze d'Argento	2	New	Multi-Block	2,922	PE_073 is defined by a relatively earlier PE to the west (DP , LA , <i>PE_005</i>) and a later PE to the south (UK , <i>PE_075</i>). Its absolute date is determined by excavation (table 2, no. 17).
PE_074	via di Nola	2	New	Partial Block	2,443	PE_074 is defined by relatively later PEs to the west (DP , TR , <i>PE_075</i>) and east (DP , TR , <i>PE_135</i>).
PE_075	vicolo di Caecilius Jucundus; via di Nola	5 (2)	Repair	Multi-Block	4,857	PE_075 is defined by relatively earlier PEs to the west (DP , <i>PE_104</i>), north (UK , <i>PE_073</i>), east (DP , TR , <i>PE_074</i>), and south (DP , LA , <i>PE_054</i>).
PE_076	vicolo del Centenario	5	New	Unknown	1,296	PE_076 is defined by a relatively earlier PE to the north (DP , LA , <i>PE_135</i>) and a contemporary PE to the west (DP , <i>PE_058</i>). Its absolute date is determined by excavation (table 2, no. 30).
PE_077	vicolo del Centenario North	2	New	Unknown	54	PE_076 is defined by a relatively later PE to the south (DP , LA , <i>PE_135</i>).
PE_078	vicolo di M.L. Frontone	6	New	Partial Block	1,671	PE_078 is defined by a relatively later PE to the south (DP , <i>PE_205</i>). A street of unknown age and condition (DP , <i>PE_193</i>) also intersects this PE. Its absolute date is determined by excavation (table 2, nos. 31–32).

PE_079	vicolo di M.L. Frontone South	5	New	Partial Block	202	PE_079 is defined by a relatively earlier PE to the north (DP , LA , <i>PE_133</i>). A street of unknown age and condition (DP , <i>PE_206</i>) also intersects this PE.
PE_080	vicolo dei Gladiatori	3	New	Unknown	202	PE_080 is defined by a relatively later PE to the south (DP , <i>PE_131</i>).
PE_081	via di Nola	2	New	Multi-Block	4,515	PE_081 is defined by relatively later PEs to the west (DP , <i>PE_131</i>), east (DP , <i>PE_130</i>), and south (UK , <i>PE_071</i>). Streets of unknown age and condition (UK , <i>PE_145</i> ; UK , <i>PE_152</i> ; UK , <i>PE_088</i>) also intersect this PE.
PE_088	vicolo di III 9–III 10	4	New	Unknown	134	PE_088 is defined by a relatively earlier PE to the north (UK , <i>PE_081</i>).
PE_089	vicolo di Mercurio	3	New	Partial Block	380	PE_089 is defined by a relatively earlier PE to the east (DP , LA , <i>PE_055</i>) and a later PE to the west (DP , <i>PE_069</i>).
PE_090	via della Fortuna	6(2, 1)	Repair*	Partial Block	1,036	PE_090 is defined by relatively earlier PEs to the west (DP , TR , <i>PE_129</i>) and east (DP , TR , <i>PE_091</i>).
PE_091	via della Fortuna	2 (1)	Repair	Partial Block	1,263	PE_091 is defined by relatively later PEs to the west (DP , TR , <i>PE_090</i>), north (UK , <i>PE_127</i>), and east (UK , <i>PE_104</i>), and by a contemporary PE to the south (UK , <i>PE_006</i>).

PE_092	via dell'Abbondanza	3 (1)	Repair	Partial Block	5,398	PE_092 is defined by relatively later PEs to the west (DP , LA , <i>PE_007</i>) and east (DP , LA , <i>PE_207</i>). Its absolute date is determined by its relation to the Tetrapylon of M. Holconius Rufus (table 2, no. 88).
PE_093	via del Tempio d'Iside	2	New	Partial Block	2,538	PE_093 is defined by relatively later PEs to the west (DP , <i>PE_029</i>) and east (DP , LA , <i>PE_178</i>).
