Graduate Students I Have Supervised in my Laboratory

From Fall, 2001 – Spring, 2008, I had 1-3 graduate students in my laboratory for whom I was their primary research mentor. Throughout that time, I funded at least two (if not three) of those students as research assistants each semester, and funded all of them as research assistants every summer.

Undergraduate Students I Have Supervised in my Laboratory

(includes Research Practicum & Advanced Research practicum)

From 2001-2009, I supervised approximately 50 undergraduate students as research assistants in my laboratory, and 10-15 per semester. These students conduct research practica in my lab – as research assistants, project coordinators, or independent researchers. I provide weekly didactics each semester and summer as part of their training (e.g., lectures, journal clubs, clinical interview training). I have also nominated five of these students for the UI Collegiate Scholars Award.
