FINAL BIBLIOGRAPHY

December 30, 2013

Project: Project 70363, Robert Wood Johnson Foundation Practice-Based Research Networks in Public Health

Period: November 1, 2007 to October 31, 2013

Purpose: This project seeks to expand the volume and quality of evidence on how best to organize, finance, and deliver public health services by: (1) helping to organize and develop practice-based research networks (PBRNs) comprised of public health agencies and skilled research institutions; (2) selecting grantees to receive funding and technical assistance for PBRN research projects; and (3) facilitating the successful development, implementation, and translation of research projects through PBRNs by providing technical assistance, fostering peer learning, and leading selected multi-network research activities.
