SHORT BIOGRAPHY

Dr Matthew Rimmer is a Professor in Intellectual Property and Innovation Law at the Faculty of Business and Law, at the Queensland University of Technology (QUT). He has published widely on copyright law and information technology, patent law and biotechnology, access to medicines, plain packaging of tobacco products, intellectual property and climate change, Indigenous Intellectual Property, intellectual property and trade, and 3D printing regulation. He is undertaking research on intellectual property and sustainable development (including the debate over the right to repair); greenwashing; intellectual property, access to essential medicines, and public health (particularly looking at the COVID-19 crisis), and tobacco endgame policies. His work is archived at [QUT ePrints](#), [SSRN Abstracts](#), [Bepress Selected Works](#), and [Open Science Framework](#).

Rimmer has published four major research monographs. Rimmer is the author of a research monograph, *The Trans-Pacific Partnership: Intellectual Property and Trade in the Pacific Rim* (Edward Elgar, 2020), *Intellectual Property and Climate Change: Inventing Clean Technologies* (Edward Elgar, 2011), *Intellectual Property and Biotechnology: Biological Inventions* (Edward Elgar, 2008), and *Digital Copyright and the Consumer Revolution: Hands off my iPod* (Edward Elgar, 2007). His *PhD Dissertation* is on *The Pirate Bazaar: The Social Life of Copyright Law* (UNSW, 2001).

Rimmer has also edited a number of collections. In collaboration with Bitu Amani and Caroline B. Ncube, Rimmer is the editor of *The Elgar Companion to Intellectual Property and the Sustainable Development Goals* (Edward Elgar, 2024). Along with Dinusha Mendis and Mark Lemley, Rimmer is the editor of the collection, *3D Printing and Beyond: Intellectual Property and Regulation* (Edward Elgar, 2019). Rimmer is the editor of the collection, *Intellectual Property and Clean Energy: The Paris Agreement and Climate Justice* (Springer, 2018). Rimmer has edited a special issue of the *QUT Law Review* on the topic, *The Plain Packaging of Tobacco Products* (2017) - which featured a foreword by former Minister for Health and Attorney-General Nicola

Roxon. Rimmer is the editor of the collection, *Indigenous Intellectual Property: A Handbook of Contemporary Research* (Edward Elgar, 2015). Rimmer is also a co-editor of *Intellectual Property and Emerging Technologies: The New Biology* (Edward Elgar, 2012), and *Incentives for Global Public Health: Patent Law and Access to Essential Medicines* (Cambridge University Press, 2010). Rimmer edited the thematic issue of Law in Context, entitled *Patent Law and Biological Inventions* (Federation Press, 2006).

Over the past two decades, Rimmer's research has been supported by a number of nationally competitive research grant applications. Rimmer has been a chief investigator in an Australian Research Council Discovery Project, 'Gene Patents In Australia: Options For Reform' (2003-2005), an Australian Research Council Linkage Grant, 'The Protection of Botanical Inventions' (2003); an Australian Research Council Linkage Grant, 'Unlocking IP' (2006-2008) and an Australian Research Council Discovery Project, 'Promoting Plant Innovation in Australia' (2009-2011). He was an Australian Research Council Future Fellow, working on Intellectual Property and Climate Change from 2011 to 2015. Rimmer was a Chief Investigator on an ARC Discovery Project on 'Inventing The Future: Intellectual Property and 3D Printing' (2017-2021). He is a chief investigator of the NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) (2020-2025). Rimmer has experience in directing large-scale collaborative research projects on intellectual property and global challenges.

Rimmer is a chief investigator in the QUT Centre for Behavioural Economics, Society, and Technology (QUT BEST); and the QUT Australian Centre for Health Law Research (QUT ACHLR). He is an associate investigator in the QUT Energy Transition Centre. He is a chief investigator in the NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) (2020-2025) - a transnational research network. Rimmer was previously the leader of the QUT Intellectual Property and Innovation Law Research Program from 2015-2020 (QUT IPIL). He was also a member of the QUT Digital Media Research Centre (QUT DMRC), the QUT Centre for the Digital Economy, the QUT Centre for Justice, the QUT Centre for Clean Energy

Technologies and Processes, and the QUT International Law and Global Governance Research Program.

Dr Matthew Rimmer holds a BA (Hons) and a University Medal in literature (1995), and a LLB (Hons) (1997) from the Australian National University. He received a PhD in law from the University of New South Wales for his dissertation on *The Pirate Bazaar: The Social Life of Copyright Law* (1998-2001). Dr Matthew Rimmer was a lecturer, senior lecturer, and an associate professor at the ANU College of Law, and a research fellow and an associate director of the Australian Centre for Intellectual Property in Agriculture (ACIPA) (2001 to 2015). He was an Australian Research Council Future Fellow, working on Intellectual Property and Climate Change from 2011 to 2015. He was a member of the ANU Climate Change Institute.

LONG BIOGRAPHY

Dr Matthew Rimmer is a Professor in Intellectual Property and Innovation Law at the Faculty of Business and Law, at the Queensland University of Technology (QUT). He has published widely on copyright law and information technology, patent law and biotechnology, access to medicines, plain packaging of tobacco products, intellectual property and climate change, Indigenous Intellectual Property, intellectual property and trade, and 3D printing regulation. He is undertaking research on intellectual property and sustainable development (including the debate over the right to repair); greenwashing; intellectual property, access to essential medicines, and public health (particularly looking at the COVID-19 crisis), and tobacco endgame policies. His work is archived at [QUT ePrints](#), [SSRN Abstracts](#), [Bepress Selected Works](#), and [Open Science Framework](#).

In collaboration with Bitu Amani and Caroline B. Ncube, Rimmer is the editor of *The Elgar Companion to Intellectual Property and the Sustainable Development Goals* (Edward Elgar, 2024).

Over the past two decades, Rimmer has investigated intellectual property and access to medicines in a range of contexts. He has considered conflicts in relation to HIV/AIDS, malaria, tuberculosis, tropical diseases, non-communicable diseases such as cancer, the SARS virus, avian influenza, ebola, and the coronavirus COVID-19. Rimmer is a co-editor of a collection on access to medicines entitled *Incentives for Global Public Health: Patent Law and Access to Essential Medicines* (Cambridge University Press, 2010). The work considers the intersection between international law, public law, and intellectual property law, and highlights a number of new policy alternatives – such as medical innovation prizes, the Health Impact Fund, patent pools, open source drug discovery, and the philanthropic work of the (Red) Campaign, the Gates Foundation, and the Clinton Foundation. Rimmer is also a co-editor of *Intellectual Property and Emerging Technologies: The New Biology* (Edward Elgar, 2012). Rimmer has undertaken extensive research on intellectual property and access to essential medicines. He has written about the Race to Patent the SARS Virus (*Melbourne Journal*

of *International Law*, 2004). Rimmer has analysed Canada's pioneering regime for the export of pharmaceutical drugs (*Public Health Ethics*, 2008). He has also evaluated the system for priority review vouchers (*WIPO Journal*, 2012). Rimmer has also considered the impact of the *Trans-Pacific Partnership* on access to essential medicines (*IP Journal*, 2017). Rimmer has been providing expert commentary on intellectual property, access to essential medicines, and the coronavirus COVID-19.

Rimmer has undertaken a range of research work and public policy engagement on the relationship between intellectual property, international trade, and globalisation. He has investigated the *TRIPS Agreement* 1994, and considered its implications for various global issues – such as technology transfer, food security, public health, and climate change. Rimmer has undertaken extensive analysis of the *Australia-United States Free Trade Agreement* 2004 – particularly focusing upon its impact upon the duration of the copyright term, and the evergreening of pharmaceutical drugs. He has also considered other bilateral trade agreements – such as the *Chile-Australia Free Trade Agreement*, the *Korea-Australia Free Trade Agreement*, the *Japan-Australia Economic Partnership Agreement*, and the *China-Australia Free Trade Agreement*. Rimmer was a critic of the *Anti-Counterfeiting Trade Agreement* 2011. Rimmer has written extensively about the various iterations of the *Trans-Pacific Partnership*. He has been particularly interested in the relationship between intellectual property and investor-state dispute settlement. He published a research monograph on *The Trans-Pacific Partnership: Intellectual Property and Trade in the Pacific Rim* (Edward Elgar, 2020-1). Rimmer has also been exploring other mega-regional trade agreements – such as the *Regional Comprehensive Economic Partnership*, the *United States-Mexico-Canada Agreement* 2020, and the *Trade in Services Agreement*.

Rimmer is a chief investigator of the NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) (2020-2025). He is a co-director of the legal project of the research network. He is a researcher and commentator on the topic of intellectual property, public health, and tobacco control. He is the co-author of the influential article 'The Case for the Plain Packaging of Tobacco Products' (2008), which has been a high impact piece of research and public policy in Australia and the world.

Rimmer has undertaken research on intellectual property and the plain packaging of tobacco products, and given evidence to an Australian parliamentary inquiry on the topic. He has edited a special issue of the *QUT Law Review* on the topic, *The Plain Packaging of Tobacco Products* (2017). Rimmer has considered the development and implementation of the *WHO Framework Convention on Tobacco Control* 2003. He has been an advocate of tobacco control measures - such as tobacco advertising bans, graphic health warnings, plain packaging of tobacco products, tobacco divestment, and tobacco endgame strategies.

Rimmer was a Chief Investigator on an ARC Discovery Project on ‘Inventing The Future: Intellectual Property and 3D Printing’ (2017-2021). This project sought to provide guidance for industry and policy-makers about intellectual property, 3D printing, and innovation policy. It considered the evolution of 3D printing, and examine its implications for the creative industries, branding and marketing, manufacturing and robotics, clean technologies, health-care and the digital economy. The project examined how 3D printing disrupts copyright law, designs law, trade mark law, patent law and confidential information. The project sought to provide practical advice about intellectual property management and commercialisation, and boost Australia’s capacity in advanced manufacturing and materials science. Along with Dinusha Mendis and Mark Lemley, Rimmer is the editor of the collection, *3D Printing and Beyond: Intellectual Property and Regulation* (Edward Elgar, 2019). He has also engaged in fieldwork on makerspaces, fab labs, tech shops, Maker Faires, and hackerspaces; and has been conducting interviews with members of the Maker Movement.

Rimmer has also a research interest in Indigenous intellectual property and traditional knowledge. He has written about the misappropriation of Indigenous art, the right of resale, Indigenous performers’ rights, authenticity marks, biopiracy, and population genetics. Rimmer is the editor of the collection, *Indigenous Intellectual Property: A Handbook of Contemporary Research* (Edward Elgar, 2015). He has focused upon the adoption and the implementation of the *United Nations Declaration on the Rights of Indigenous Peoples* 2007. Rimmer has participated in inquiries into the right of resale, inauthentic art, and the design of the Aboriginal Flag.

Rimmer was an Australian Research Council Future Fellow, working on Intellectual Property and Climate Change from 2011 to 2015. He is the author of a monograph, *Intellectual Property and Climate Change: Inventing Clean Technologies* (Edward Elgar, September 2011). This book charts the patent landscapes and legal conflicts emerging in a range of fields of innovation – including renewable forms of energy, such as solar power, wind power, and geothermal energy; as well as biofuels, green chemistry, green vehicles, energy efficiency, and smart grids. As well as reviewing key international treaties, this book provides a detailed analysis of current trends in patent policy and administration in key nation states, and offers clear recommendations for law reform. It considers such options as technology transfer, compulsory licensing, public sector licensing, and patent pools; and analyses the development of Climate Innovation Centres, the Eco-Patent Commons, and environmental prizes, such as the L-Prize, the H-Prize, and the X-Prizes. Rimmer is the editor of the collection, *Intellectual Property and Clean Energy: The Paris Agreement and Climate Justice* (Springer, 2018). He is currently working on a manuscript, looking at green branding, trade mark law, and environmental activism. Rimmer is interested in the implementation of the *Paris Agreement 2015* and the *United Nations Sustainable Development Goals 2015*.

Rimmer is the author of *Intellectual Property and Biotechnology: Biological Inventions* (Edward Elgar, 2008). This book documents and evaluates the dramatic expansion of intellectual property law to accommodate various forms of biotechnology from micro-organisms, plants, and animals to human genes and stem cells. It makes a unique theoretical contribution to the controversial public debate over the commercialisation of biological inventions. Rimmer also edited the thematic issue of *Law in Context*, entitled *Patent Law and Biological Inventions* (Federation Press, 2006). Rimmer was also a chief investigator in an Australian Research Council Discovery Project, ‘Gene Patents In Australia: Options For Reform’ (2003-2005), an Australian Research Council Linkage Grant, ‘The Protection of Botanical Inventions (2003), and an Australian Research Council Discovery Project, ‘Promoting Plant

Innovation in Australia' (2009-2011). Rimmer has participated in inquiries into plant breeders' rights, gene patents, and access to genetic resources.

Rimmer is the author of *Digital Copyright and the Consumer Revolution: Hands off my iPod* (Edward Elgar, 2007). With a focus on recent US copyright law, the book charts the consumer rebellion against the *Sonny Bono Copyright Term Extension Act 1998* (US) and the *Digital Millennium Copyright Act 1998* (US). Rimmer explores the significance of key judicial rulings and considers legal controversies over new technologies, such as the iPod, TiVo, Sony Playstation II, Google Book Search, and peer-to-peer networks. The book also highlights cultural developments, such as the emergence of digital sampling and mash-ups, the construction of the BBC Creative Archive, and the evolution of the Creative Commons. Rimmer has also participated in a number of policy debates over Film Directors' copyright, the *Australia-United States Free Trade Agreement 2004*, the *Copyright Amendment Act 2006* (Cth), the *Anti-Counterfeiting Trade Agreement 2011*, and the *Trans-Pacific Partnership*. He has been an advocate for Fair IT Pricing in Australia.

Rimmer is a chief investigator in the QUT Australian Centre for Health Law Research (QUT ACHLR), and the QUT Centre for Behavioural Economics, Society, and Technology (QUT BEST). He is an associate investigator in the QUT Energy Transition Centre. He is a chief investigator in the NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) (2020-2025) – a transnational research network. Rimmer was previously the leader of the QUT Intellectual Property and Innovation Law Research Program from 2015-2020 (QUT IPIL). He was previously a member of the QUT Digital Media Research Centre (QUT DMRC), the QUT Centre for the Digital Economy, the QUT Centre for Justice, the QUT Centre for Clean Energy Technologies and Processes, and the QUT International Law and Global Governance Research Program.

Dr Matthew Rimmer holds a BA (Hons) and a University Medal in literature (1995), and a LLB (Hons) (1997) from the Australian National University. He received a PhD in law from the University of New South Wales for his dissertation on *The Pirate*

Bazaar: The Social Life of Copyright Law (1998-2001). Dr Matthew Rimmer was a lecturer, senior lecturer, and an associate professor at the ANU College of Law, and a research fellow and an associate director of the Australian Centre for Intellectual Property in Agriculture (ACIPA) (2001 to 2015). He was an Australian Research Council Future Fellow, working on Intellectual Property and Climate Change from 2011 to 2015. He was a member of the ANU Climate Change Institute.

Dr Matthew Rimmer was a visiting lecturer at Western University in London, Ontario in 2006, and a distinguished visitor at the University of Toronto in 2015. He has also presented his research in universities and educational institutions across Australia, New Zealand, Canada, the United States, the United Kingdom, the European Union, Switzerland, and the Nordic countries.

Rimmer has supervised nine students who have completed Higher Degree Research projects on the topics, *Secret Business and Business Secrets: The Hindmarsh Island Affair, Information Law, and the Public Sphere* (2007); *Intellectual Property and Applied Philosophy* (2010); *The Pharmacy of the Developing World: Indian Patent Law and Access to Essential Medicines* (2012); *Marine Bioprospecting: International Law, Indonesia and Sustainable Development* (2014); *Social Media Policies and Work: Reconciling Personal Autonomy Interests and Employer Risk* (2017), copyright law and musical sampling (2017), *True Tracks: Indigenous Cultural and Intellectual Property Principles for putting Self-Determination into Practice* (2019), *Community-Based Patent Opposition Model in India* (2020), and *The Theft of Culture and Inauthentic Art and Craft Products: Australian Consumer Law, and Indigenous Intellectual Property* (2020). Rimmer has also supervised sixty-nine Honours students, Summer Research Scholars, and Interns, and two graduate research unit Masters students. He is currently supervising a post-doctoral researcher working on intellectual property and 3D printing in the context of the coronavirus public health crisis.

He has also been an external assessor of thirteen candidates for higher degree research degrees – both in Australia (the Australian Catholic University, QUT, Murdoch

University x 2, University of Canberra, the University of Tasmania x 2, UTS x 2, Charles Darwin University x 1) and overseas (University of Helsinki, Hanken School of Economics, the University of Cape Town).

With a strong commitment to law reform and social justice, Rimmer has been an influential contributor to public policy debate in respect of intellectual property, innovation law, and international trade. He has made 89 submissions to a wide variety of public policy inquiries – both in Australia and overseas. Rimmer has given evidence in appearances before 31 public policy inquiries. His work has been cited in a wide range of government inquiries, public policy reports, and parliamentary debates. Rimmer’s submissions have been cited by a broad cross section of political representatives – including by the Hon. Malcolm Turnbull from the Liberal Party, the Hon. Nicola Roxon from the Australian Labor, Senator Scott Ludlam from the Australian Greens, and Senator Nick Xenophon from the Nick Xenophon Team. Rimmer received the ANU Vice-Chancellor's Award for Public Policy and Outreach at the annual Awards Ceremony on the 26 November 2013. He was one of Managing IP's 50 most influential intellectual property people in 2014.

Rimmer has been a high-profile contributor to media discussion relating to intellectual property, innovation law, and international trade. He has made 799 media contributions, featuring in television, radio, newspapers, and online media. Rimmer has discussed trade agreements on *Lateline*. Rimmer received a Social Media Award from the ANU in 2014, and was named one of the Top 100 Eco-Influencers by Corporate Knights in 2015.

Rimmer has been an external assessor in a number of grant processes – including for the Australian Research Council, the Bank of Sweden Tercentenary Foundation, the Canada Research Chairs, Canada’s Social Sciences and Humanities Research Council, the Gerda Henkel Foundation for the Marie Curie Fellowship, the Hong Kong Research Grants Council, the Netherlands Organisation for Scientific Research (NWO), the Royal Society of Canada, and the United States National Science Foundation. He has been an external assessor for a number of monograph and

publishing proposals. As well as serving an appointment boards for internal candidates and appointments, he has been an external assessor for a number of promotion applications in Australia, Canada, and South Africa.

Alternative Biography (Chronological)

Dr Matthew Rimmer is a Professor in Intellectual Property and Innovation Law at the Faculty of Business and Law, at the Queensland University of Technology (QUT). He has published widely on copyright law and information technology, patent law and biotechnology, access to medicines, plain packaging of tobacco products, intellectual property and climate change, Indigenous Intellectual Property, intellectual property and trade, and 3D printing regulation. He is undertaking research on intellectual property and sustainable development (including the debate over the right to repair); greenwashing; intellectual property, access to essential medicines, and public health (particularly looking at the COVID-19 crisis), and tobacco endgame policies. His work is archived at [QUT ePrints](#), [SSRN Abstracts](#), [Bepress Selected Works](#), and [Open Science Framework](#).

Rimmer is a chief investigator in the QUT Australian Centre for Health Law Research (QUT ACHLR), and the QUT Centre for Behavioural Economics, Society, and Technology (QUT BEST). He is an associate investigator in the QUT Energy Transition Centre. He is a chief investigator in the NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) (2020-2025) – a transnational research network. Rimmer was previously the leader of the QUT Intellectual Property and Innovation Law Research Program from 2015-2020 (QUT IPIL). He was previously a member of the QUT Digital Media Research Centre (QUT DMRC), the QUT Centre for the Digital Economy, the QUT Centre for Justice, the QUT Centre for Clean Energy Technologies and Processes, and the QUT International Law and Global Governance Research Program.

Dr Matthew Rimmer holds a BA (Hons) and a University Medal in literature (1995), and a LLB (Hons) (1997) from the Australian National University. He received a PhD in law from the University of New South Wales for his dissertation on *The Pirate Bazaar: The Social Life of Copyright Law* (1998-2001). Dr Matthew Rimmer was a lecturer, senior lecturer, and an associate professor at the ANU College of Law, and a research fellow and an associate director of the Australian Centre for Intellectual

Property in Agriculture (ACIPA) (2001 to 2015). He was an Australian Research Council Future Fellow, working on Intellectual Property and Climate Change from 2011 to 2015. He was a member of the ANU Climate Change Institute.

Dr Matthew Rimmer was a visiting lecturer at Western University in London, Ontario in 2006, and a distinguished visitor at the University of Toronto in 2015. He has also presented his research in universities and educational institutions across Australia, New Zealand, Canada, the United States, the United Kingdom, the European Union, Switzerland, and the Nordic countries.

Rimmer is the author of *Digital Copyright and the Consumer Revolution: Hands off my iPod* (Edward Elgar, 2007). With a focus on recent US copyright law, the book charts the consumer rebellion against the *Sonny Bono Copyright Term Extension Act 1998* (US) and the *Digital Millennium Copyright Act 1998* (US). Rimmer explores the significance of key judicial rulings and considers legal controversies over new technologies, such as the iPod, TiVo, Sony Playstation II, Google Book Search, and peer-to-peer networks. The book also highlights cultural developments, such as the emergence of digital sampling and mash-ups, the construction of the BBC Creative Archive, and the evolution of the Creative Commons. Rimmer has also participated in a number of policy debates over Film Directors' copyright, the *Australia-United States Free Trade Agreement 2004*, the *Copyright Amendment Act 2006* (Cth), the *Anti-Counterfeiting Trade Agreement 2011*, and the *Trans-Pacific Partnership*. He has been an advocate for Fair IT Pricing in Australia.

Rimmer is the author of *Intellectual Property and Biotechnology: Biological Inventions* (Edward Elgar, 2008). This book documents and evaluates the dramatic expansion of intellectual property law to accommodate various forms of biotechnology from micro-organisms, plants, and animals to human genes and stem cells. It makes a unique theoretical contribution to the controversial public debate over the commercialisation of biological inventions. Rimmer also edited the thematic issue of *Law in Context*, entitled *Patent Law and Biological Inventions* (Federation Press, 2006). Rimmer was also a chief investigator in an Australian Research Council

Discovery Project, 'Gene Patents In Australia: Options For Reform' (2003-2005), an Australian Research Council Linkage Grant, 'The Protection of Botanical Inventions (2003), and an Australian Research Council Discovery Project, 'Promoting Plant Innovation in Australia' (2009-2011). Rimmer has participated in inquiries into plant breeders' rights, gene patents, and access to genetic resources.

Over the past two decades, Rimmer has investigated intellectual property and access to medicines in a range of contexts. He has considered conflicts in relation to HIV/AIDS, malaria, tuberculosis, tropical diseases, non-communicable diseases such as cancer, the SARS virus, avian influenza, ebola, and the coronavirus COVID-19. Rimmer is a co-editor of a collection on access to medicines entitled *Incentives for Global Public Health: Patent Law and Access to Essential Medicines* (Cambridge University Press, 2010). The work considers the intersection between international law, public law, and intellectual property law, and highlights a number of new policy alternatives – such as medical innovation prizes, the Health Impact Fund, patent pools, open source drug discovery, and the philanthropic work of the (RED) Campaign, the Gates Foundation, and the Clinton Foundation. Rimmer is also a co-editor of *Intellectual Property and Emerging Technologies: The New Biology* (Edward Elgar, 2012). Rimmer has undertaken extensive research on intellectual property and access to essential medicines. He has written about the Race to Patent the SARS Virus (*Melbourne Journal of International Law*, 2004). Rimmer has analysed Canada's pioneering regime for the export of pharmaceutical drugs (*Public Health Ethics*, 2008). He has also evaluated the system for priority review vouchers (*WIPO Journal*, 2012). Rimmer has also considered the impact of the *Trans-Pacific Partnership* on access to essential medicines (*IP Journal*, 2017). Rimmer has been providing expert commentary on intellectual property, access to essential medicines, and the coronavirus COVID-19.

Rimmer is a chief investigator of the NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) (2020-2025). He is a co-director of the legal project of the research network. Rimmer is a researcher and commentator on the topic of intellectual property, public health, and tobacco control. He is the co-author of the influential article 'The Case for the Plain Packaging of Tobacco Products' (2008),

which has been a high impact piece of research and public policy in Australia and the world. Rimmer has undertaken research on intellectual property and the plain packaging of tobacco products, and given evidence to an Australian parliamentary inquiry on the topic. He has edited a special issue of the *QUT Law Review* on the topic, *The Plain Packaging of Tobacco Products* (2017). Rimmer has considered the development and implementation of the *WHO Framework Convention on Tobacco Control* 2003. He has been an advocate of tobacco control measures - such as tobacco advertising bans, graphic health warnings, plain packaging of tobacco products, tobacco divestment, and tobacco endgame strategies.

Rimmer has undertaken a range of research work and public policy engagement on the relationship between intellectual property, international trade, and globalisation. He has investigated the *TRIPS Agreement* 1994, and considered its implications for various global issues – such as technology transfer, food security, public health, and climate change. Rimmer has undertaken extensive analysis of the *Australia-United States Free Trade Agreement* 2004 – particularly focusing upon its impact upon the duration of the copyright term, and the evergreening of pharmaceutical drugs. He has also considered other bilateral trade agreements – such as the *Chile-Australia Free Trade Agreement*, the *Korea-Australia Free Trade Agreement*, the *Japan-Australia Economic Partnership Agreement*, and the *China-Australia Free Trade Agreement*. Rimmer was a critic of the *Anti-Counterfeiting Trade Agreement* 2011. Rimmer has written extensively about the various iterations of the *Trans-Pacific Partnership*. He has been particularly interested in the relationship between intellectual property and investor-state dispute settlement. He is publishing a research monograph on *The Trans-Pacific Partnership: Intellectual Property and Trade in the Pacific Rim* (Edward Elgar, 2020-1). Rimmer has also been exploring other mega-regional trade agreements – such as the *Regional Comprehensive Economic Partnership*, the *United States-Mexico-Canada Agreement* 2020, and the *Trade in Services Agreement*.

Rimmer was an Australian Research Council Future Fellow, working on Intellectual Property and Climate Change from 2011 to 2015. He is the author of a monograph, *Intellectual Property and Climate Change: Inventing Clean*

Technologies (Edward Elgar, September 2011). This book charts the patent landscapes and legal conflicts emerging in a range of fields of innovation – including renewable forms of energy, such as solar power, wind power, and geothermal energy; as well as biofuels, green chemistry, green vehicles, energy efficiency, and smart grids. As well as reviewing key international treaties, this book provides a detailed analysis of current trends in patent policy and administration in key nation states, and offers clear recommendations for law reform. It considers such options as technology transfer, compulsory licensing, public sector licensing, and patent pools; and analyses the development of Climate Innovation Centres, the Eco-Patent Commons, and environmental prizes, such as the L-Prize, the H-Prize, and the X-Prizes. Rimmer is the editor of the collection, *Intellectual Property and Clean Energy: The Paris Agreement and Climate Justice* (Springer, 2018). He is currently working on a manuscript, looking at green branding, trade mark law, and environmental activism. Rimmer is interested in the implementation of the *Paris Agreement 2015* and the *United Nations Sustainable Development Goals 2015*.

Rimmer has also a research interest in Indigenous intellectual property and traditional knowledge. He has written about the misappropriation of Indigenous art, the right of resale, Indigenous performers' rights, authenticity marks, biopiracy, and population genetics. Rimmer is the editor of the collection, *Indigenous Intellectual Property: A Handbook of Contemporary Research* (Edward Elgar, 2015). He has focused upon the adoption and the implementation of the *United Nations Declaration on the Rights of Indigenous Peoples 2007*. Rimmer has participated in inquiries into the right of resale, inauthentic art, and the design of the Aboriginal Flag.

Rimmer was a Chief Investigator on an ARC Discovery Project on 'Inventing The Future: Intellectual Property and 3D Printing' (2017-2021). This project sought to provide guidance for industry and policy-makers about intellectual property, 3D printing, and innovation policy. It considered the evolution of 3D printing, and examine its implications for the creative industries, branding and marketing, manufacturing and robotics, clean technologies, health-care and the digital economy. The project examined how 3D printing disrupts copyright law, designs law, trade mark law, patent law and

confidential information. The project sought to provide practical advice about intellectual property management and commercialisation, and boost Australia's capacity in advanced manufacturing and materials science. Along with Dinusha Mendis and Mark Lemley, Rimmer is the editor of the collection, *3D Printing and Beyond: Intellectual Property and Regulation* (Edward Elgar, 2019). He has also engaged in fieldwork on makerspaces, fab labs, tech shops, Maker Faires, and hackerspaces; and has been conducting interviews with members of the Maker Movement.

In collaboration with Bitu Amani and Caroline B. Ncube, Rimmer is the editor of *The Elgar Companion to Intellectual Property and the Sustainable Development Goals* (Edward Elgar, 2023).

Rimmer has supervised nine students who have completed Higher Degree Research projects on the topics, *Secret Business and Business Secrets: The Hindmarsh Island Affair, Information Law, and the Public Sphere* (2007); *Intellectual Property and Applied Philosophy* (2010); *The Pharmacy of the Developing World: Indian Patent Law and Access to Essential Medicines* (2012); *Marine Bioprospecting: International Law, Indonesia and Sustainable Development* (2014); *Social Media Policies and Work: Reconciling Personal Autonomy Interests and Employer Risk* (2017), copyright law and musical sampling (2017), *True Tracks: Indigenous Cultural and Intellectual Property Principles for putting Self-Determination into Practice* (2019), the *Community-Based Patent Opposition Model in India* (2020), and *The Theft of Culture and Inauthentic Art and Craft Products: Australian Consumer Law, and Indigenous Intellectual Property* (2020). Rimmer has also supervised sixty-nine Honours students, Summer Research Scholars, and Interns, and two graduate research unit Masters students. He is currently supervising a post-doctoral researcher working on intellectual property and 3D printing in the context of the coronavirus public health crisis.

He has also been an external assessor of thirteen candidates for higher degree research degrees – both in Australia (ACU, QUT, Murdoch University x 2, University of Canberra, the University of Tasmania x 2, UTS x 2, Charles Darwin University x 1)

and overseas (University of Helsinki, Hanken School of Economics, the University of Cape Town).

With a strong commitment to law reform and social justice, Rimmer has been an influential contributor to public policy debate in respect of intellectual property, innovation law, and international trade. He has made 89 submissions to a wide variety of public policy inquiries – both in Australia and overseas. Rimmer has given evidence in appearances before 31 public policy inquiries. His work has been cited in a wide range of government inquiries, public policy reports, and parliamentary debates. Rimmer’s submissions have been cited by a broad cross section of political representatives – including by the Hon. Malcolm Turnbull from the Liberal Party, the Hon. Nicola Roxon from the Australian Labor, Senator Scott Ludlam from the Australian Greens, and Senator Nick Xenophon from the Nick Xenophon Team. Rimmer received the ANU Vice-Chancellor's Award for Public Policy and Outreach at the annual Awards Ceremony on the 26 November 2013. He was one of Managing IP's 50 most influential intellectual property people in 2014.

Rimmer has been a high-profile contributor to media discussion relating to intellectual property, innovation law, and international trade. He has made 799 media contributions, featuring in television, radio, newspapers, and online media. Rimmer has discussed trade agreements on *Lateline*. Rimmer received a Social Media Award from the ANU in 2014, and was named one of the Top 100 Eco-Influencers by Corporate Knights in 2015.

Rimmer has been an external assessor in a number of grant processes – including for the Australian Research Council, the Bank of Sweden Tercentenary Foundation, the Canada Research Chairs, Canada’s Social Sciences and Humanities Research Council, the Gerda Henkel Foundation for the Marie Curie Fellowship, the Hong Kong Research Grants Council, the Netherlands Organisation for Scientific Research (NWO), the Royal Society of Canada, and the United States National Science Foundation. He has been an external assessor for a number of monograph and publishing proposals. As well as serving an appointment boards for internal

candidates and appointments, he has been an external assessor for a number of promotion applications for Australian and Canadian universities.

1. EDUCATION AND EMPLOYMENT HISTORY

2015-

Professor of Intellectual Property and Innovation Law, Faculty of Law, the Queensland University of Technology

2011-2015

Australian Research Council Future Fellow working on Intellectual Property and Climate Change

2011-2015

Associate Professor, The Australian National University College of Law

2005-2010

Senior Lecturer, The Australian National University College of Law

2001-2004

Lecturer, the Australian National University College of Law

2001-2015

Research Fellow, the Australian Centre for Intellectual Property in Agriculture (ACIPA)

1999-2001

Casual Lecturer in Aspects Of Intellectual Property, School of Law, The University Of Western Sydney, Nepean

1998-2001

Doctor Of Philosophy In Law, The University Of New South Wales.

1997

Bachelor Of Law with First Class Honours, The Australian National University

Awards included the Butterworths Prize for Industrial Relations Law, the Attorney-General's Department Mooting Shield, and the Witness Examination Prize.

1995

Bachelor Of Arts with First Class Honours and the University Medal for English Literature, The Australian National University

2. POSITIONS

2015-

Chief Investigator and Member, Australian Centre for Health Law Research, Faculty of Business and Law, the Queensland University of Technology

2020-

Chief Investigator and Member, QUT Centre for Behavioural Economics, Society, and Technology (QUT BEST)

2020-

Chief Investigator, NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame 2020-2025 (CREATE)

2024-

Associate investigator, QUT Energy Transition Centre

2020-2022

Member, QUT Centre for Clean Energy Technologies and Processes

2015-2022

Member, QUT Digital Media Research Centre, the Creative Industries Faculty, the Queensland University of Technology

2020-2022

Member, QUT Centre for Justice

2020-2022

Member, QUT Centre for the Digital Economy – the QUT Centre for Future Enterprise

2015-2020

Director, Intellectual Property and Innovation Law Research Program, Faculty of Law,
the Queensland University of Technology

2015-2020

Member, International Law and Global Governance Research Program, Faculty of
Law, the Queensland University of Technology

5. RESEARCH GRANTS AND CONSULTANCIES

ARC Discovery Projects

Applications on Robotics Regulation, and Intellectual Property and the Coronavirus

Successful Research Grants

5.9 QUT Edge Scheme Grant

Title: Intellectual Property and 3D Printing: Public Health and the Coronavirus COVID-19

Recipient: Dr Muhammad Zaheer Abbas (post-doctoral researcher) and Professor Matthew Rimmer (supervisor)

Duration: 12 months (01/01/2021 – 31/12/2021)

Funding: \$116,962.00 (Level A, Step 8, Salary and Oncosts)

Abstract:

As part of the QUT Edge Grant, Dr Muhammad Zaheer Abbas will focus on the potential of 3D printing in addressing the current global health crisis and possible challenges posed by the current intellectual property regime during the pandemic.

COVID-19 has already caused far-reaching negative impacts not only on health but also on the social and economic well-being of the global population. Lockdowns, travel restrictions, quarantines, social distancing, and other strict public-health measures have played their part in minimizing the spread of infection, but governments are desperate for a safe and potent vaccine, effective therapeutics, point-of-care diagnostics, and other health products to combat this pandemic. Given the global nature of this health crisis, any delay in the advancement of vaccines and needed medical

technologies may have serious economic, social, psychological, political, and legal implications.

3D printing offers promise in relation to the provision of health technologies designed to address COVID-19. Additive manufacturing is uniquely well positioned to support the shortage of critical medical devices. A wide range of medical devices can be customized and printed in a timely and cost-effective manner by using additive manufacturing techniques. This breakthrough technology allows the rapid conversion of information from digital 3D models into physical objects. This rapid prototyping technology can be used to scale up the manufacturing of hospital respiratory support apparatus like ventilators. Likewise, 3D printing can be used to mitigate shortages of personal protective equipment like face shields, respirator hoods, and surgical masks. Governments around the world need to make sure that intellectual property rights do not become a hurdle in using the full potential of 3D printing in response to disruptions to the medical product supply chain in the pandemic context. The aim of regulating 3D printing of COVID-19 related health technologies should be to ensure consistent quality and reproducibility in large-scale manufacturing and supply of critical medical devices.

This study is crucial because access to necessary health technologies in a pandemic context is a matter of life and death for millions of patients around the globe, especially for underprivileged patients in resource-constrained countries. 3D printing can be used as a force for good in public health in these trying times. This study will help policy makers at national and international levels by contributing to the debate over intellectual property and scope of 3D printing in response to the global health crisis. In particular, this research will address some of the intellectual property flexibilities in respect of the COVID-19 technologies – including the ACT-Accelerator, CTAP, patent pools, patent pledges, public sector licensing, compulsory licensing, and models of open innovation.

This use of the QUT Edge Grant will help with the production of further research and public policy work in the pipeline coming out of the ARC Discovery Grant on intellectual property and 3D printing, and enable further funding applications in 2021-2022 in respect of intellectual property and advance manufacturing – particularly in light of public health challenges such as COVID-19.

5.8 NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame 2020-2025 (CREATE)

Title: NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame 2020-2025

Administering Organization: University of Queensland

Lead Investigator: Associate Professor Coral Gartner

Investigators: Associate Professor Coral Gartner, Professor Billie Bonevski, Professor Tony Blakely, Professor Richard Edwards, Associate Professor Raymond Lovett, Professor Matthew Rimmer, Professor Ron Borland, Professor Geoffrey Fong, Professor Michael Farrell, and Professor Natalie Walker.

Associate Investigators: Professor David Thomas, Dr Gary Chung Kai Chan, Dr Natalie Carvalho, Dr Michelle Scollo, Dr Catherine Segan, Professor Janet Hoek, Professor David Hammond, Professor Amanda Baker, Mr Andrew Waa, and Professor Adrian Dunlop.

Abstract: The Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) unites global leaders in tobacco control and connects them to Australian policy makers at a time when a tobacco endgame has never been more achievable. CREATE's vision is to achieve a smoke-free Australia. The CRE leverages existing funding with new research initiatives to deliver research outcomes in Year 1. By year 5, CREATE aims to deliver an evidence-informed, highly strategic, comprehensive tobacco endgame framework to inform policy making in Australia and globally. Discrete research projects alone could not achieve this. The value of CREATE arises from its ability to bring together world-leading researchers to: (1) develop what will be the most rigorous and comprehensive endgame strategy to date; and (2) focus on

translating this strategy into policy to maximise health gains in Australia, with strong potential for informing policy in other countries. CREATE will be a unique and focused community of practice, which will build public health research capacity and leadership in Australia, strengthen links with experts internationally, and provide the foundation for successful implementation of its endgame framework.

5.7 ARC Discovery Project 2017-2020

DP170100758

Title: Inventing the Future: Intellectual Property and 3D Printing

Administering Organisation: Queensland University of Technology

Investigators: Matthew Rimmer

Abstract: This project will provide guidance for industry and policy-makers in respect of intellectual property, 3D Printing, and innovation policy. It will consider the evolution of 3D printing, and examine its implications for the creative industries, branding and marketing, manufacturing and robotics, clean technologies, health-care, and the digital economy. The study will examine how 3D printing will disrupt key regimes of intellectual property – such as copyright law, designs law, trade mark law, patent law, and confidential information. As well as providing practical advice in respect of intellectual property management and commercialisation, this study will offer policy recommendations in respect of domestic and international law reform.

5.6 ARC Future Fellowship 2011-2015

FT100100418

Title: Intellectual Property and Climate Change: Inventing Clean Technologies

Administering Organisation: The Australian National University (ANU)

Investigators: Matthew Rimmer

Abstract: In the wake of the Copenhagen Summit, there is an urgent need for the Federal Government to promote the development of clean technologies to mitigate and

adapt to the effects of climate change. Intellectual property laws have the potential to both promote and hinder research, development, and transfer of clean technologies. Through reviewing international treaties, national laws, and commercial practice, this project will provide a detailed analysis of current trends and offer clear recommendations for law reform. It will consider such options as patent pooling, co-operative licensing, technology transfer, green labelling, penalties for greenwashing, access to environmental databases protected by copyright, and Climate Innovation Centres.

5.5 ARC Discovery Grant 2009-2011

DP0987639 Prof B Sherman; Dr CG Lawson; Dr M Rimmer; Ms LG Wiseman

Title: Promoting Plant Innovation in Australia: maximising the benefits of intellectual property for Australian agriculture

Primary RFCD 3901 LAW

Administering Organisation The University of Queensland

Project Summary:

The development of new plant varieties is crucial to the ongoing competitiveness and sustainability of Australian agriculture. It also has wider social, cultural and economic consequences. Intellectual property laws have the potential to promote and hinder the developments of new plant varieties. In recent years there has been a shift towards the use of patents to protect plant innovations: a trend which has the potential to transform existing research and development arrangements and industry practices in Australia. By providing policy-makers and stakeholders with recommendations on how to respond to and manage these changes, the project will promote plant breeding in Australia and also enhance the sustainability and competitiveness of Australian agriculture.

5.4 ARC Linkage Grant 2005-2008

LP0562485 Prof GW Greenleaf; Prof MD Pendleton; Dr K Bowrey; Dr M Rimmer; Mr BC Mercurio; Prof BF Fitzgerald; Prof JP McKeough; Prof P Griffith; Mr P Chung; Prof J Dalziel; Mr I Oi; Mr PM Crisp

Title: Unlocking IP - Expanding public rights and the public domain in Australian copyright

Category: 3901 - LAW

APA(I) Award(s): 2

Partner Organisation(s)

AEShareNet Limited; Baker & McKenzie; Linux Australia Inc.; Open Source Industry Australia Limited; IBM Australia Ltd; and LAMS International Pty Ltd

Administering Institution: The University of New South Wales

Summary:

This research investigates how Australia's digital commons, comprising both the public domain and public rights created by open content and open software licensing, can be expanded and protected. It focuses on 'self help' actions within the existing statutory context, in Australia's distinct legal and cultural context, and on comprehensiveness. Its significance is that healthy commons-based production of information is essential to Australia as an innovative country and a democracy. The principal outcomes will be better understood and more efficient public rights licences, incentives to copyright owners to create them, and technical aids to allow users to find commons content.

5.3 ARC Discovery Grant 2003-2005

DP0345648 Prof B Sherman Mr R Burrell Dr M Rimmer Mr AS Taubman

Title: Gene Patents in Australia: Options for Reform

Category: 3901 - LAW

Summary:

Controversies over the upsurge in gene patenting, access to pharmaceuticals, biopiracy, and ownership of genetic resources, lead many to question whether patent law is appropriate for biotechnology. Do patents thwart access to beneficial technologies such as drugs, research tools and new crops, while hampering policy options for health care and agriculture? This project addresses the urgent need for a comprehensive study of the impact of biotechnology patenting, critically reviewing overseas developments, setting biotechnology in the broader policy context of intellectual property law, and empirically analysing patterns rather than relying on the anecdotal and piecemeal studies that dominate this area.

5.2 ARC Linkage Grant 2003

LP0348051 Prof B Sherman Dr M Rimmer

Title: Protection of Botanical Innovation: A legal analysis of the scope and operation of national and international plant breeder's rights.

Category: 3901 - LAW

Industry Partner(s):

Plant Breeder's Rights Office

Summary:

Plants play a crucial role in Australian society: they are a major source of nutrition, shelter, clothing, fuel, medicines and aesthetic pleasure. They also make an important contribution to the Australian economy. The legislative regime established under the 1994 Plant Breeder's Rights Act was designed to promote research, investment and innovation in Australian plant breeding. A lack of familiarity and widespread misunderstanding mean that the system is under-utilised with adverse consequences for plant innovation and Australia's economy. This groundbreaking research will provide a comprehensive analysis of plant breeder's rights in Australia to maximise understanding and awareness amongst key stakeholders.

5.1 New Starter's Grant 2002

Title: Myriad Genetics: Patent Law And Genetic Testing

Summary: There has been a long-standing debate over whether medical diagnostics should be patentable subject matter. This has been crystallized with the recent controversy over Myriad Genetics relying upon patents in respect of genetic testing of breast cancer. The company applied for patents on the discovery, including a 'composition-of matter' patent on the gene itself and a 'method-of-use' patent for the application of BRCA 1 and BRCA 2 in the diagnostic and therapeutic arena. In response, there has been a world-wide protest against the breadth of the patents held by Myriad Genetics in respect of genetic tests for breast cancer. There have been doubts expressed about the validity of the patents. There have also been concerns raised about the implications of the patents for the administration of health care.

Bioprinting Regulation, QUT, 11 December 2017,
<https://www.eventbrite.com.au/e/20171211-ipil-workshop-bioprinting-regulation-tickets-39539306129>

Date: Monday 11 December 2017

When: 9.00am - 4.30pm

Venue: Seminar Room, KG-Z9-607
QUT Kelvin Grove Campus,
Victoria Park Road, Kelvin Grove

Register: by Thursday 7 December 2017

About the Event

3D printing, Bioprinting, and additive manufacturing promise to revolutionise healthcare, medicine, and surgery. There have been high hopes that the field will

result in the next industrial revolution. Governments have invested in makerspaces, fab labs, incubators, and accelerators in order to encourage innovation in the area. Nonetheless, this disruptive technology poses a range of legal, ethical, and regulatory challenges. There has been a debate about the regulation of 3D printing by food and health regulators. There has been emerging conflicts in the field of intellectual property over 3D printing, bioprinting, and additive manufacturing. Moreover, there have been larger issues in respect of product liability and 3D printing.

3D printing raises larger questions about the relationship between creativity, art, design, and science. There has been much interest in the role of 3D printing in education. 3D printing and bioprinting have also featured in popular culture – from Westworld to Ghost in the Shell.

This research workshop brings together an interdisciplinary range of researchers from science, law, geography, history and art to consider the various dimensions of bioprinting. The event hopes to raise public policy questions about the regulation of 3D printing, bioprinting, and additive manufacturing. The event will provide practical recommendations about intellectual property management and regulation to bioprinting researchers, scientists, and engineers.

Climate Change, Capitalism and Corporations

Please join members of the Intellectual Property and Innovation Law Research Program for a half-day workshop.

This event is a research workshop focused upon the role of corporations in respect of climate change. The various speakers will consider how managers and corporations interpret and respond to the climate crisis. Professor Christopher Wright from the University of Sydney will give a keynote speech on the ‘Climate Crisis, Corporate Imaginaries and Creative Self-Destruction’. The four panellists will consider the role of business in climate action from a variety of disciplinary perspectives – including law, business, regulation, and the environment.

Chair: Dr Angela Daly

Angela is a Vice Chancellor’s Research Fellow in QUT’s Faculty of Law and a research associate in the Tilburg Institute for Law, Technology and Society (Netherlands). She is a comparative socio-legal scholar of technology and is the author of Socio-Legal

Aspects of the 3D Printing Revolution (Palgrave 2016) and Private Power, Online Information Flows and EU Law: Mind the Gap (Hart 2016). She holds a PhD in Law from the European University Institute, which was joint winner of the 2013-2015 Fondazione Calamandrei Frosini prize for best thesis in legal informatics and information law. Prior to QUT, she was previously Postdoctoral Research Fellow in Media and Communications Law at the Swinburne Institute for Social Research.

Speakers:

Professor Christopher Wright

Climate crisis, corporate imaginaries and creative self-destruction

Abstract: In the space of two centuries of industrialization, humanity's embrace of fossil fuel energy has changed the very chemistry of the atmosphere and oceans with profound consequences. We now face a grim future; large tracts of the Earth rendered uninhabitable, the collapse of global food production, the acidification of the oceans, substantial sea-level rise and storms and droughts of growing intensity. So how has it come to this? How to paraphrase Elizabeth Kolbert, has a technologically advanced society chosen in essence to destroy itself? In this presentation I argue that the particular neoliberal variant of late capitalism that now dominates global political-economy not only obfuscates the need for a fundamental questioning of the capitalist imaginary of endless growth and resource exploitation, but exacerbates the problem by framing business and markets as the only means of responding to the crisis. In essence, the prevailing political view is that capitalism is not a cause of climate change but as an answer to it. In particular, the presentation will focus on three core imaginaries that underpin our creative self-destruction: 'business as usual', 'green business' and 'natural capitalism'. The presentation will explore the key dimensions of these founding belief systems, as well as alternative imaginaries that are likely to emerge as the climate crisis worsens.

Dr Nicole Rogers

Climate change does not play by the rules. As Robyn Kundis Craig has observed, 'climate change is the trickster of the 21st century.'¹ Timothy Morton emphasises its 'uncanny' nature.

Abstract: What paths, therefore, should researchers pursue in order to undertake research into climate change? While scientific investigation into climate change impacts and research into technological and regulatory partial fixes are clearly important, other sorts of research are also critical if we are to come to terms with climate change as trickster: big picture interdisciplinary research which does not necessarily have any political or commercial value in the knowledge economy.

In this paper, drawing upon Margaret Thornton's work on the corporatised university, the renegade scientists and utopian visionaries in Margaret Atwood's Maddaddam trilogy and the walkaway researchers in Cory Doctorow's latest novel, I shall reflect upon the possibilities for creative rule-bending research into climate change as trickster within the constraints of contemporary Australian corporatised academia.

Dr Michelle Maloney

**Alternative economic imaginaries - too little too late? The New Economy Network
Australia**

Abstract: *"You never change things by fighting the existing reality. To change something, build a new model that makes the existing model obsolete" – R. Buckminster Fuller*

If we turn our attention away from the towering steel and concrete, the pollution and the plastic, the sheer violence and noise of contemporary consumer capitalism, and steady our gaze on the quieter spaces – the spaces between the towers and beyond the noise - we can find a prolific blossoming of alternatives to the current capitalist crises. Solar farms, community gardens, democratic social enterprises, urban agriculture, community currencies, platform cooperativism, peer-to-peer support, First Nations community driven sovereignty and economic initiatives, land restoration cooperatives, wildlife protection projects, aquaculture farms nurturing heat resilient coral for a climate changed world ... the list goes on.

It is arguable that one of the most important challenges of our time, in this second decade of the 21st Century, is to connect, amplify and strengthen the already diverse elements of the 'alternative economy', so that it no longer grows in the shadows and the quiet places, but can replace the destruction of the material and intellectual legacy of industrialization and hyper-consumer-capitalism. The New Economy Network

Australia (NENA) was created in late 2016 by around 100 individuals and organisations who see the amplification and strengthening of ‘alternative’ economic approaches as an important way to challenge the current system and create a sustainable, livable future. NENA is ‘under construction’ and in this paper I’ll give an overview of what it is, why it was created and what its plans to do.

Professor Matthew Rimmer

Greenwashing: Trademark Law, Consumer Rights and Internet Domain Names

Abstract: Greenwashing is a pernicious problem, which involves misleading and deceptive representations by corporations in respect of the environment. There are a number of legal responses – spanning trade mark law, consumer rights, and internet domain names.

First, this paper considers the role of trade mark law in respect of green branding, environmental messaging, and greenwashing. It considers the action of the United States Patent Trade Mark Office in respect of ‘green’ trade mark applications, which have been descriptive, generic, and misleading. It also examines the response of IP Australia and the High Court of Australia to trade mark applications in respect of the colour ‘Green’. It also highlights the use of certification trade marks to promote credible and authentic eco-labels – such as the Nordic Swan EcoLabel, the Wind-Made Label developed by Vestas and Bloomberg, and the Carbon Trust’s Carbon Footprint.

Second, this paper examines the role of consumer regulators in regulating greenwashing, carbon scams, and astroturfing. The Federal Trade Commission in the United States has issued revised ‘Green Guides’ to tackle the problem of greenwashing. There has been a striking complaint by Forest Ethics against the Sustainable Forestry Initiative. The ACCC has also developed guidelines in respect of green marketing, and has taken action on occasion. The Advertising Standards Authority in the United Kingdom has also been active in addressing false and misleading advertising.

Third, this paper examines the role of Internet Domain Names in respect of

environmental communication. It provides a case study of the successful bid by Big Room in respect of the Dot Eco application.

Dr Hope Johnson

Intellectual Property, Climate Change, and Food Security

Abstract: It is estimated that almost 1 billion people in the world are food insecure. These people are primarily rural smallholders in the developing world. The causes of structural food insecurity are complex and inter-related. Amongst them are (i) the expansion of intellectual property rights, which has disrupted traditional farming practices, the development of (ii) export orientation in food production, (iii) rural poverty, (iv) land grabs and now (v) climate change. The impact of climate change on food insecurity is two-fold. Firstly, the availability of arable land will reduce as the climate declines. Secondly, some states have begun positioning themselves for this scenario by buying up agricultural land in the developing world. Both of these factors will only heighten food insecurity in the developing world. A coordinated global response is required to safeguard the livelihoods and welfare of the food insecure. This must involve a reassessment of the legal framework within which food security has been allowed to become imperilled.

3D Printing and Designs

IPIL Research Symposium

The Third Industrial Revolution: Designs Law and 3D Printing

Please join members of the Intellectual Property and Innovation Law Research Program for a Research Symposium.

Register: by Monday 28 August 2017

Speakers:

Mitchell Adams

Title: The ‘Third Industrial Revolution’ 3D Printing Technology and Australian Designs Law

Abstract: Three-dimensional (3D) printing and scanning, touted as the next disruptive technology, is already upon us. Merging the physical and digital, 3D printing and scanning is having profound effects on how we design, share, copy and manufacture objects. Consequently, this article considers the previously unexplored intellectual

property implications for registered design owners. In doing so, it examines the technological background to 3D printing and scanning against a backdrop of consumer access to these technologies. With the advent of 3D scanners and 3D printers any user can (re)produce unauthorised versions of an object that embodies a registered design in digital or physical form. This article considers the effectiveness of Australian registered design rights to combat infringement of this kind. It is concluded that the Designs Act 2003 (Cth) is unable to deal with this nascent technology.

Professor Margaret Maile Petty.

Title: A Moment of Truth: 3D technologies and the future [or obsolescence] of design

Abstract: Contemporary design has its origins in the first third of the twentieth century, with the blossoming of mass manufacture and the rise of consumer culture and economics, when the re-styling of a refrigerator could triple sales within one financial year. Today such exhilarating sales curves are harder won. However many UX designers a company employs, the notion of creating a singular ‘killer product’ that can be produced in the millions is increasingly challenged by cross-sector disruptions such as 3D printing and scanning in combination with the escalating sophistication and use of AI and big data. The allied design disciplines have a small window of opportunity to consider what design means in the 4th industrial revolution, where does it add value, and how can it adapt to radically different forms of manufacture, supply chains, IP protections and customer demands for greater levels of customization. ‘A Moment of Truth’ will briefly explore these drivers in the relation to the larger evolution of design since the 1930s and pose critical questions central to defining the future or future obsolescence of design.

Daniel Flood

Title: Misconceptions of Legality: 3D printing and community

Abstract: ‘Just because someone can’ does not mean they should but Australians have proven to be culturally ambivalent to this reality where it intersects with the legality. This is clearly evidenced by the published numbers of Australian illegal downloads of Game of Thrones. Mashup and remix culture reflect a frontier attitude to copyright that

is pervasive and can be evidenced through a simple Google search.

At large the community does not truly understand the legal realities, citing fair use or a general ambivalence towards their actions. This is compounded by the implements of making - including 3D design and printing - being so readily available at an affordable price point, easily accessible in public places like libraries and makerspaces. Further, the current cultural movements of repair cafes and DIY encourages communities to repair their own equipment, designing replacement parts using 3D printers that are, at their core, protected intellectual property. In essence breaking the law.

Conversely, with this consumer equipment and increasingly powerful tools for design is establishing a new class of designers that lack a learned, embodied understanding regards intellectual property law, moral rights and licensing, the misuse of copyright and alternate licensing platforms (Creative Commons, GPL etcetera) in their work in common, negating the protections they offer and exposing individuals to be either taken advantage of or finding themselves in breach of those same licenses. Misconceptions of Legality will explore the understanding and misconceptions in the general community around intellectual property and 3D printing, and the role spaces such as libraries, public makerspaces (etc) can and do play in informing this conversation in community.

Dr Brett Dale

Title: Opportunity knocks - 3D printing will revolutionise the automotive industry!

Abstract: Business has been aware of 3D printing and the expectation it will revolutionise the automotive industry. However, the technology is still considered to be on the periphery and only recognised by *innovators* as a disruptor to both the manufacturing sector and the retail, service and repair sector of the automotive industry. Latest developments suggest that 3D printing is preparing to turn manufacturing on its head, with 3D metal printing systems that are much faster, safer and cheaper than existing systems and now capable of competing with traditional mass manufacturing processes. The hype is real with new technology enabling 3D printing up to 100 times

faster, with 10 times cheaper initial costs and 20 times cheaper materials costs than existing laser technologies may be tipping point for large scale 3D manufacturing of car components. Latest technology provides rapid, cheap metal prototyping for engineering groups, and a production system for mass manufacturing. Indeed, 3D printing is likely to disrupt both manufacturing and retail service and repair sectors of industry.

The entire automotive value chain will be transformed by emerging technologies, such as 3D printing in 2-5 years. Specifically, 3D printing will disrupt our parts suppliers, our vehicle body sector, tools and servicing and eventually the car manufacturing sector itself. Industry must maintain the leadership and momentum on digital disruption and emerging technologies, which according to experts will impact business by 2020 with the major rollout and effect here by 2022. In the context of a timeframe, it is closer than many realise! Real opportunities will be gained by preparing business for the digital and technological transformations. The key to success will be open collaboration with stakeholders and regulators about emerging technologies to ensure that associated regulations are responsive, flexible and support business prosperity and consumer expectations.

Dr Angela Daly

Title: 3D printing and designs in China

Abstract: This presentation provides an introduction to the 3D printing ecosystem in China, with a focus on file-sharing sites, makerspaces and some of the emerging IP law considerations there. China has been investing large sums in innovative technologies including 3D printing, and is transitioning from a ‘user’ of others’ IP to a creator and producer country in its own right. As with the Internet, a different linguistic, political and cultural context has given rise to a different 3DP ecosystem compared to the Western world. However, our initial research suggests similar concerns are arising as regards the relationship between 3D printing, design files and IP. The work-in-progress in this presentation comprises exploratory research conducted as part of the UK Intellectual Property Office-funded project, 3D Printing and IP Law Futures, in advance of our horizon scanning workshop to be held in Shenzhen in September 2017.

Professor Matthew Rimmer

Title: Bring It On: The Supreme Court of the United States, Copyright Law, Designs, Fashion, and 3D Printing

Abstract:The Supreme Court of the United States granted leave to consider the vexed question of copyright protection in respect of fashion. In the case of *Star Athletica v. Varsity Brands*, a number of 3D printing companies have filed a brief to establish a test for determining conceptual separability under copyright law. The companies involved include Formlabs Inc., Matter and Form Inc., and Shapeways Inc. In many ways, this dispute focuses upon legal issues thrown up by the controversy over *Left Shark*. The submission noted: ‘This case presents a clear conflict among the circuits on an important substantive matter of copyright law that justifies this Court’s review’.

The submission warned: ‘These advancements are threatened by the current fractured state of copyright law on objects combining functional and artistic elements.’ The 3D companies were concerned: ‘Uncertainty over the line between copyrightable and noncopyrightable works can lead to over-claiming and over-categorization of material as copyrightable, upsetting the balance struck by Congress between the interests of rights holders and the societal benefits from a vibrant public domain.’ The industry pleaded with the Supreme Court of the United States: ‘This Court should grant certiorari to resolve the present circuit split and ensure that the development of innovative technologies and industries such as 3D printing is not hampered by the ongoing conflicts and confusion in conceptual separability doctrine’. There was a powerful joint submission led by Public Knowledge on the topic of intellectual property and 3D printing. Charles Duan from Public Knowledge highlighted the larger ramifications of the dispute for fashion, designs, and 3D printing hobbyists.

On the 22nd March 2017, the Supreme Court of the United States delivered a majority 6-2 opinion in favour of the respondents *Varsity Brands, Inc.* against *Star Athletica LLC*. Thomas J delivered the opinion of the court, in which Roberts CJ, Alito J, Sotomayor J, and Kagan J joined. Ginsburg J filed a concurrence. Breyer J filed a dissenting opinion, which Kennedy J joined. Writing for the majority, Thomas J observed: ‘Congress has provided copyright protection for original works of art, but not for industrial designs’. His Honour noted: ‘The line between art and industrial design, however, is often difficult to draw. ‘We hold that an artistic feature of the design

of a useful article is eligible for copyright protection if the feature (1) can be perceived as a two- or three-dimensional work of art separate from the useful article and (2) would qualify as a protectable pictorial, graphic, or sculptural work either on its own or in some other medium if imagined separately from the useful article.’ Thomas J found that the test was satisfied in this case involving the surface of cheerleading uniforms. In her concurrence, Ginsburg J held that ‘the designs are themselves copyrightable pictorial or graphic works reproduced on useful articles.’

In dissent, Breyer J disagreed that the designs that Varsity Brands Inc. submitted to the Copyright Office would be eligible for copyright protection. His Honour emphasized that there was a need to respect the decisions of Congress in respect of the scope of copyright protection: ‘The Constitution grants Congress primary responsibility for assessing comparative costs and benefits and drawing copyright’s statutory lines. Courts must respect those lines and not grant copyright protection where Congress has decided not to do so. And it is clear that Congress has not extended broad copyright protection to the fashion design industry.’ The judge observed: ‘I fear that, in looking past the three-dimensional design inherent in Varsity’s claim by treating it as if it were no more than a design for a bolt of cloth, the majority has lost sight of its own important limiting principle.’

The decision attracted a wide array of public commentary. There has been disquiet about the impact of the Supreme Court of the United States decision on 3D printing. The presentation will consider the ramifications of the ruling for copyright law, designs, fashion and 3D printing.

RoboCops in the frontline: Robotronica sorts fact from fiction

18 August 2017

Brad Wright has been a police officer for more than three decades and has led the introduction and use of drones and other human-operated robotic technology in the Queensland Police Service (QPS) over the past eight years.

While he's witnessed firsthand technology's rapid evolution and application, Acting Superintendent Wright (pictured) doesn't expect to see himself or his colleagues replaced by a 'RoboCop' any time soon – even with reports of the first experimental robotic police officer now patrolling the streets of Dubai and a plan to have unarmed robots make up 25 percent of that city's patrolling force by 2030.

"I think we are still quite a few steps away from police being replaced by machines that are autonomously making decisions and applying force," he said.

Acting Superintendent Wright will join a panel discussion at QUT's Robotronica on Sunday (August 20), *RoboCop: Robots, Ethics, and Law Enforcement*, to examine the ethical debate and implications of using remote-controlled, semi-autonomous and fully autonomous robots as law enforcers.

Chaired by QUT Professor in Intellectual Property and Innovation Law Matthew Rimmer, the session will also hear from Dr Monique Mann from QUT's School of Justice (pictured below) and applied robotics engineer Associate Professor James Mullins from Deakin University.

Acting Superintendent Wright said the QPS was the first police service in Australasia to introduce drones (remotely piloted aircraft) in late 2013, with one used at a home invasion and subsequent siege in the Brisbane suburb of Banyo in which a woman and her teenage daughter were held hostage.

Since then, the technology had advanced considerably and drones were now being used by QPS Special Emergency Response Team (SERT), Forensic Services, and were being looked at as a tool during serious road traffic crashes, he said.

"The first drone we had which was purpose built for our use had only six minutes of operational flight time," he said.

"Now drones that are commercially available off the shelf have 40 minutes' flight time, thermal imaging, high-definition and encrypted video streaming as standard.

"We have always been conscious and careful with the introduction of these technologies that there are community concerns around issues of privacy and safety. Our focus has been on air safety and their use in open and overt ways."

Dr Mann said lawmakers need to keep pace with rapid technology developments being implemented in policing around the world – including autonomous 'RoboCops', facial recognition and other automated systems of surveillance, and softbots such as a computer-generated children used to lure online predators.

"The social, legal and ethical issues around these are complex, but the regulatory tipping point for automated robotic policing has certainly passed," she said.

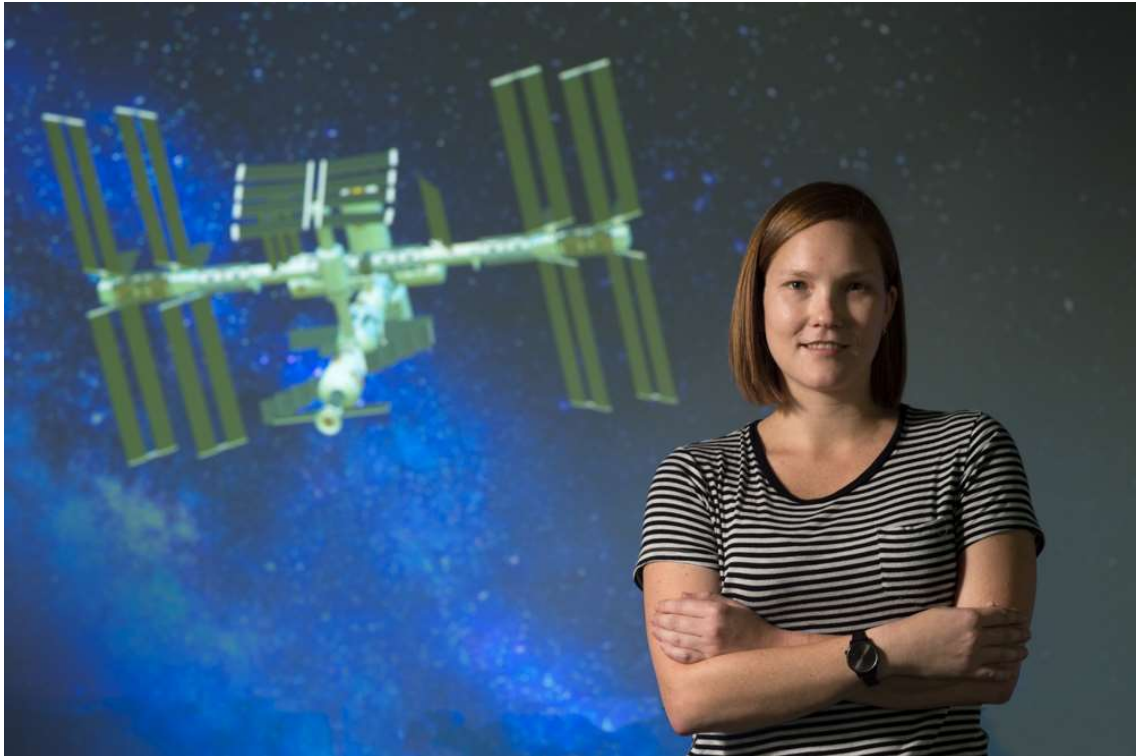

"Priority areas requiring attention and regulatory measures include legal frameworks around robot use of force, processes to ensure the transparency of automated decision-making, consideration of how criminal law is converted into algorithms and the admissibility of softbot-procured evidence in criminal trials.

"These are issues that need to be tackled now."

Robotronica, held biennially, is Australia's largest robotics festival. *RoboCop: Robots, Ethics, and Law Enforcement* at Robotronica runs from 1.15pm-2.15 pm at QUT's

Gardens Point campus, Science and Engineering Centre (P block), Level 5, Room 514.
Admission is free. Register to attend [here](#).

Dr Monique Mann

Dr Kate Devitt

Robots, Ethics, and Intimacy: the need for scientific research

ROBOTRONICA

What are the legal, ethical and societal issues if humans form intimate relationships with robots as the recent films such as *Ex Machina* and TV shows such as *Westworld* have represented?

Market forces and customer demand are driving the creation of robots where humans are forming strong emotional attachments. In this keynote, Georgia Tech's Professor Ron Arkin will discuss the emerging field of intimate robotics and argues that prior to the technology becoming fully actualised we need research and debate on what effects the technology may have on users and society. Dr Kate Devitt (QUT Faculty of Law)

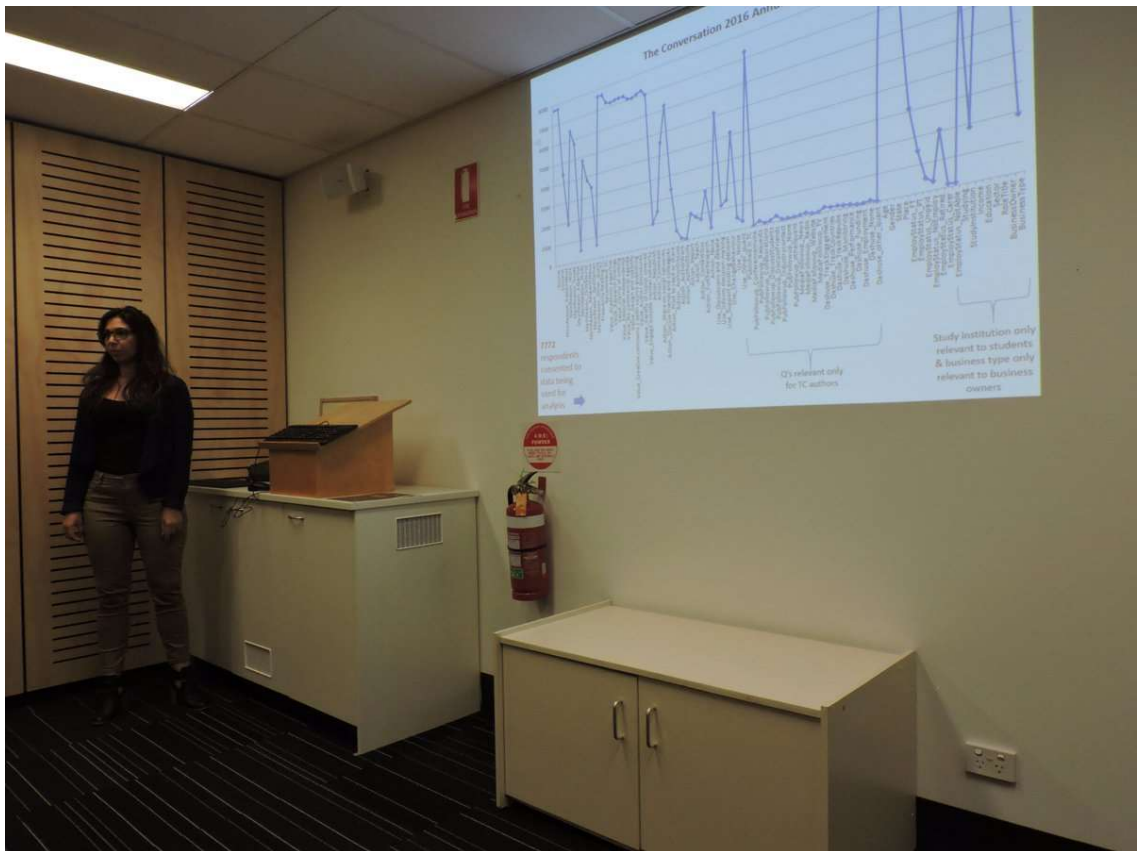

responds to these developments with consideration of the ethical concerns at play in this new technological frontier.

Intellectual Property and Climate Change

Professor Abbe Brown

17 August 2017

<https://www.eventbrite.com.au/e/20170817-ipil-research-seminar-professor-abbe-brown-1230pm-tickets-36502892133#>

<https://storify.com/DrRimmer/professor-abbe-brown-on-ip-and-climate-change-17-a>

Topic: Parallel tracks? The national relationship between intellectual property and climate change

Professor Abbe Brown:

University of Aberdeen, Scotland. Dr Abbe E. L. Brown is a legal researcher and teacher at the University of Aberdeen in Scotland. From 1 August 2017 she will be a Personal Chair. Abbe's main research interest is the laws relating to intellectual property and innovation, their intersection with other legal fields, and the impact of this on key societal challenges. Key publications are Intellectual Property, Human Rights and Competition: Access to Essential Innovation and Technology (Edward

Elgar 2012), the edited collection *Environmental Technologies, Intellectual Property and Climate Change* (Edward Elgar 2013) and several editions of the respected OUP textbook *Contemporary Intellectual Property: Law and Policy*.

Funding sources for her research include the *Modern Law Review*, the UK Arts and Humanities Research Council, the Carnegie Trust for the Universities of Scotland and the Wellcome Trust. Before returning to academia, Abbe practised as a solicitor specialising in intellectual property, competition (including *ACCC v Boral*) and commercial litigation in London, Melbourne and Edinburgh.

Abbe's current projects involve intellectual property, climate change and technology; intellectual property, disability and personhood; and with Professor Charlotte Waelde a forthcoming edited collection *Intellectual Property and the Creative Industries*. In July and August 2017 she is spending time in Australia working on her forthcoming monograph *Intellectual Property, Climate Change and Technology: managing national legal intersections, relationships and conflicts*.

Abstract:

Climate change has been recognised through international agreements, most recently the Paris Agreement, as a key problem of contemporary society. Technology and its role in dissemination and sharing is one means of addressing this, as can be seen for example from the increasing importance accorded to the United Nations Framework on Climate Change's Technology Mechanism. The fact that technologies may be the subject of intellectual property rights, held in private hands, receives limited attention in climate change negotiations and certainly in final form documents. The problems arising from this have been explored by scholars (Rimmer, Barton) as have arguments that issues could be addressed through taking new approaches to the fragmentation of international law and to treaty interpretation (Frankel, Young, Grosse-Ruse Khan).

Yet the relationship between climate change, technology and intellectual property is actually taking place at a national level, and this issue is underexplored. The paper being discussed in this presentation forms part of a book project addressing this, taking the UK jurisdictions as an example. Reference will be made to UK intellectual property legislation and its limited engagement with climate change; and to climate

change legislation from Westminster and from Holyrood which imposes obligations on states and on public authorities to meet targets, to report on actions taken and to have regard to technology when setting targets and budgets and when making energy efficiency and low carbon plans. A strong policy theme in Scotland and at UK level is to encourage developing a variety of technologies rather than to be dependent upon one. Yet policy and legislation are silent about the potential for the impact of IP.

Drawing on this framework, this presentation will present a hypothetical case study drawing from actual events. It will discuss the potential for conflict, for court adjudication and for new judicial approaches; and will make some preliminary suggestions for new court based relationships between intellectual property, technology and climate change which would be of transnational relevance.

22 June 2017 – Intellectual Property and Trade in the Pacific Century

Matthew Rimmer (Convenor), 'Intellectual Property and Trade in the Pacific Century', QUT IP and Innovation Law Research Symposium, 22 June 2017, <https://medium.com/@DrRimmer/intellectual-property-and-trade-in-the-pacific-century-64f790e4bbf9> (video archives)

<https://www.eventbrite.com.au/e/20170622-intellectual-property-and-trade-in-the-pacific-century-tickets-34710792916#>

With the election of US President Donald Trump and the fall of the Trans-Pacific Partnership, the Regional Comprehensive Economic Partnership (RCEP) has taken on a new importance in the Asia-Pacific. RCEP is one of the leading potential economic frameworks for the Asia-Pacific region. The proposed membership of RCEP is based upon the ASEAN framework. The negotiations involve ASEAN trading partners – such as the Republic of Korea, China, India, Australia, Japan, and New Zealand. RCEP is both an opportunity and a challenge for Australia in a time of uncertainty in the global trading system. This one day symposium will explore the geopolitics of the RCEP negotiations. The event will consider key chapters of the proposed agreement – dealing with intellectual property, investment, innovation, electronic commerce, agriculture, public health, the environment, and trade in services. This event will consider the future evolution of RCEP in the Pacific Century.

The speakers included Dr Shiro Armstrong, Professor Lisa Toohey, Professor Jane Kelsey, Professor Matthew Rimmer, Professor William van Caenegem, Associate Professor Jay Sanderson, Associate Professor Judith McNamara, Dr Burcu Kilic, Dr Felicity Deane, and Professor Luke Nottage.

The evolution of Digital Markets

QUT DMRC

Associate Professor Nicolas Suzor, Dr Kylie Pappalardo & company

**2017.03.27 - Seminar & Book Launch - Private Power, Online Information
Flows, and Global Laws**
by QUT Faculty of Law

Abstract: The emergence of very large transnational private companies which provide critical Internet infrastructure and services has brought with it corresponding concerns

about the power of these companies to control, surveil and otherwise influence our communications. Many of these companies also gather vast amounts of data by, and about their users – a bank of data which has proved attractive to the public power of nation-states’ security and law enforcement agencies, which have accessed it in less than transparent and legitimate ways, as Edward Snowden’s revelations from 2013 attest.

Against this backdrop, this event considers how different jurisdictions’ legal, regulatory and policy frameworks, including antitrust/competition, sector-specific regulation and human/constitutional rights have been addressing digital dominance issues. Some key topics, including net neutrality in the US & EU, the competition investigations into Google and the emergence of cloud computing, will be covered in order to determine how well existing legal systems are able to protect individual Internet users’ interests vis-à-vis private power online.

Speakers

Dr Angela Daly, QUT Faculty of Law

Dr Mark Burdon, University of Queensland Faculty of Law

Professor Pat Aufderheide, American University, Visiting Fulbright Fellow at QUT
Digital Media Research Centre

Professor Matthew Rimmer, QUT Faculty of Law

The event will conclude with the launch of Dr Angela Daly's new book, *Private Power, Online Information Flows and EU Law: Mind Gap* (Hart, 2016).

2017.04.05 Workshop – Making Copyright Work For Creators
QUT DMRC

DESCRIPTION

Creators and Copyright: How Do Australian Creators Navigate Today's Copyright Challenges?

Patricia Aufderheide, Kylie Pappalardo, Nic Suzor and Stuart Cunningham

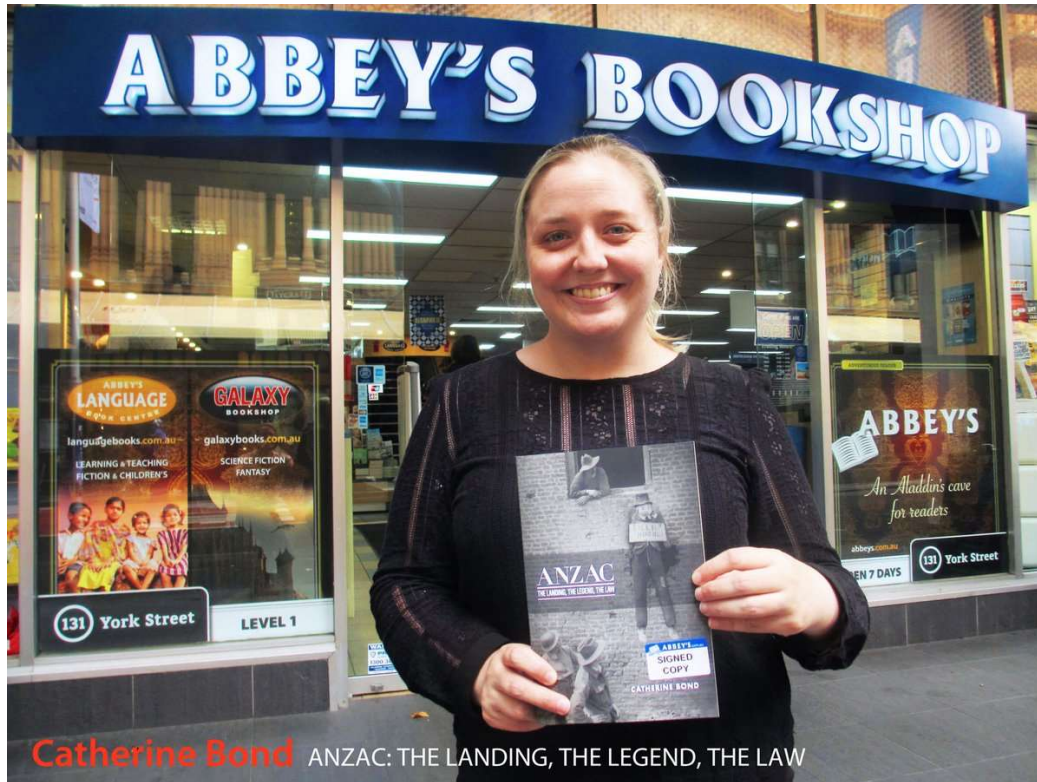

In this workshop, we will discuss what creators have and need from copyright law to assure that Australian culture flourishes in a digital age. Professor Patricia Aufderheide, University Professor and Founder, Center for Media & Social Impact, American University Washington DC, and resident Fulbright Senior Fellow in QUT's Media Research Centre (DMRC), has worked for decades with U.S. creative communities (documentary film, visual arts, the galleries-libraries-

archives-museums (GLAM) sector, and creative practice scholars and teachers), advocating and empowering best practice use of fair use copyright exceptions. Her book, *Reclaiming Fair Use: How to Put Balance Back in Copyright*, University of Chicago Press, 2011, is a great introduction to her work. **Sample Reclaiming Fair Use!**

Researchers from the DMRC are working with Pat to build a research project examining the scope within existing Australian copyright law for maximising opportunity and creativity in the Australian creative industries sector. We need creative practitioners and creative practice academics to input your perspective, and your experience of managing your creative process within Australian law. We will deliberate together on creator strategies in relation to copyright, and the conversation will inform research that will directly contribute to the policy debate.

12 April 2017 – Anzac: The Landing, the legend, the law

<https://www.eventbrite.com.au/e/20170412-seminar-and-book-launch-anzac-the-landing-the-legend-the-law-tickets-32427327008?aff=ereexpmlt#>

The year 2016 marks an ‘Anzac’ anniversary of a different kind: the centenary of legal regulation over use of the term ‘Anzac’ in Australia and internationally. In *Anzac: The Landing, The Legend, The Law*, Catherine Bond interrogates the legal history of one of Australia and New Zealand’s most revered words and the restrictions on the acronym that still exist today.

This book examines how, in 1916, control of ‘Anzac’ was introduced initially for businesses then extended, without precedent, to more private spheres, including prohibiting the use of the word as the name of a home. It documents the effect that these laws had on the Australian home front and the devastating impact on soldiers and families. Yet, such use and regulation was not limited to Australia, with New Zealand, the United Kingdom and the United States authorities also grappling with how to respond to the increased adoption of ‘Anzac’ within their borders. Bond explores these issues and how this legal history can be used to inform the restrictions on ‘Anzac’ that remain in force in Australia to this day.

Anzac: The Landing, The Legend, The Law will appeal to all readers with an interest in law or history, and those keen to understand more about a forgotten aspect of the 'Anzac' legend.

Dr Catherine Bond

Catherine is a Senior Lecturer in the Faculty of Law, UNSW Sydney. She completed her PhD in Law at UNSW and became an academic member of the Faculty in July 2009. Catherine teaches and researches in intellectual property law, with a focus on historical IP issues. She has published widely in leading Australian and international law journals, on issues ranging from Crown copyright to the introduction of a patent system in the Game of Thrones world of Westeros. Her first book, *Anzac: The Landing, The Legend, The Law*, is part of her recent work on the relationship between IP and war, from World War I through to today.

1 March 2017 - Open Education & the Future of Publishing Business Models

Members of the Intellectual Property and Innovation Law Research Program, QUT, Swinburne University of Technology, and Creative Commons Australia came together for an interactive event examining 'Open Education and the Future of Publishing Business Models.' The day will featured two parts; interactive workshops on Open Education and Licensing, and a panel event focusing on the future of publishing business models, featuring experts in this area.

<https://www.eventbrite.com.au/e/20170301-open-education-the-future-of-publishing-business-models-tickets-32108659866>

15 February 2017 - Forum on Access to Essential Medicines

Access to Medicines This forum was hosted by the QUT Intellectual Property and Innovation Law Research Program and the Australian Centre for Health Law Research in the QUT Faculty of Law to coincide with the visit of the Hon. Michael

Kirby to the QUT Faculty of Law. It assessed and evaluated the recommendations of the United Nations Secretary-General's High Level Panel on Access to Medicines. Access to medicines is a critical issue in respect of infectious diseases, such as HIV/AIDS, malaria, tuberculosis, the SARS virus, Ebola, and the Zika virus. There have been a number of obstacles and barriers in respect of access to medicines – including the high prices caused by monopolies, and the absence of appropriate treatments for neglected diseases.

The speakers reviewed the proposed solutions for remedying the policy incoherence between intellectual property, public health, and international law. This forum considered such issues as health research and development; patent law and compulsory licensing; public sector licensing; open access and open innovation; international trade; bioethics, privacy, and human rights. The future possible implementation of the United Nations Secretary-General's High Level Panel on Access to Medicines – both at an international level and by national governments were discussed.

The speakers included the Hon. Michael Kirby, Professor Matthew Rimmer, Professor Charles Lawson, Tessa Marshall of UAEM, Dr Pauline Zardo, Assistant Professor Bruce Arnold, and Professor Belinda Bennett.

Indigenous Knowledge, Intellectual Property Rights and Human Rights – the University of Lapland – 5 December 2016

<https://www.ulapland.fi/news/Indigenous-Knowledge,-IPRs-and-Human-Rights-seminar-5-December/38394/eb53a88f-3da8-4a7b-b77a-efac976a67b7>

The Faculty of Law and the Northern Institute for Environmental and Minority Law at the Arctic Centre organize an open seminar about indigenous peoples' knowledge, intellectual property rights and human rights. The seminar takes place on Monday 5 December at 12–16 in the Arctic Centre in the Arktikum house.

The seminar aims at delving into core issues related to the governance of indigenous peoples' rights. A range of senior and junior researchers will present and tackle key research questions related to the intersection between indigenous peoples' knowledge, intellectual property rights and human rights.

All students, researchers, staff, as well as interested parties are warmly welcome! Students attending the whole seminar will be able to gain 2ECTS.

PROGRAMME

5 December 2016, 12.00-16.00

Place: Borealis meeting room, 3rd Floor, Arctic Centre, (Arktikum, Pohjoisranta 4, 96100 Rovaniemi)

12:00 – 12:15 Welcome: Professor Juha Karhu, Dean of ULap/Faculty of Law

12:15 – 13:00 Keynote speaker: Professor Matthew Rimmer, Queensland University of Technology (Brisbane, Australia).
Topic: “Indigenous knowledge, intellectual property and sustainable development”

Dr Matthew Rimmer is a Professor in Intellectual Property and Innovation Law at the Faculty of Law, at the Queensland University of Technology (QUT). He is a leader of the QUT Intellectual Property and Innovation Law research program, and a member of the QUT Digital Media Research Centre (QUT DMRC) the QUT Australian Centre for Health Law Research (QUT ACHLR), and the QUT International Law and Global Governance Research Program. Rimmer has published widely on copyright law and information technology, patent law and biotechnology, access to medicines, plain packaging of tobacco products, intellectual property and climate change, and Indigenous Intellectual Property.

13:00 – 13:15 Commentator: Rosa Maria Ballardini, University Lecturer in IP Law, ULap/Faculty of Law

13:15 – 13:35 Speaker: Pii Nuorgam, PhD student at ULap/ Faculty of Law

13:35 – 13:50

Commentator I: Dhanay Cadillo-Chandler, Post-doctoral researcher at University of Turku/ Faculty of Law

Commentator II: Heidi Härkkönen, Doctoral researcher at ULap/Faculty of Law

14:10 – 14:30 Speaker: Associate Professor Hossain Kamrul, Director of Northern Institute for Environmental and Minority Law, ULap/Artic Center
Topic: “Human security: Sámi as Actors in Security Frameworks”

14:30 – 14:45 Commentator: Dr. Stefan Kirshner, Senior researcher, PYVI

14:45 – 15:05 Speaker: Olga Pushina, PhD student, ULap/Artic Center
Topic: “Protection of Property rights by the European Court of Human Rights:
Comparative research in Finnish and Russian Property Law”

15:05 – 15:20 Commentator: Prof. Soili Nysten-Haarala, ULap/ Faculty of Law

15:20 – 15:40 Speaker: Anna Petrétei, PhD student, ULap/Artic Center
Topic: “Integration of Human Rights Impact Assessments in the license granting
process for extractive development project in the Sámi region (Sámi region)”

15:40 – 15:55 Commentator: Anette Alen, Post-doctoral researcher, ULap/Faculty of
Law

Just Work in the Digital Economy, QUT Digital Media Research Centre, QUT Work,
and QUT Intellectual Property and Innovation Law Program, 28 November 2016,
<https://www.qut.edu.au/law/about/news-events/news?news-id=110423>

Matthew Rimmer (convenor), Divestment and Social Change, QUT Research Symposium, 22 November 2016, <https://drrimmer.medium.com/divestment-and-social-change-22-november-2016-5eacc5ad74d8> (video archives)

QUT Divestment Forum – Co-hosted by IPIL and the QUT Business School on 22 November 2016. Speakers included, James Thier, the Director of Future Super; Shen Narayanasamy from No Business in Abuse & GetUp partnership; Brynn O’Brien, Business & Human Rights Advisor at The Australia Institute; Professor Matthew Rimmer, QUT; Dr Carol Richard, QUT Business School; Dr Robyn Mayes, Vice-Chancellor’s Senior Research Fellow in the QUT Business School; Carly Baque, QUT; and Moira Williams, ecologist, policy maker and strategist.

On 15 December 2016, Dr Kylie Pappalardo convened a research seminar by Professor Jason Schultz from New York University. The seminar was co-hosted by the IP and Innovation Law Group and the Institute for Future Environments.

**Research Workshop: Intellectual Property, Policing, Crime Online and Privacy,
7 October 2016**

Regulating Robots Symposium: Law, Ethics and Public Policy, Friday 7 October. Speakers included: Professor the Hon. 2015

Australian Media Law – the Year in Review (Convenor)

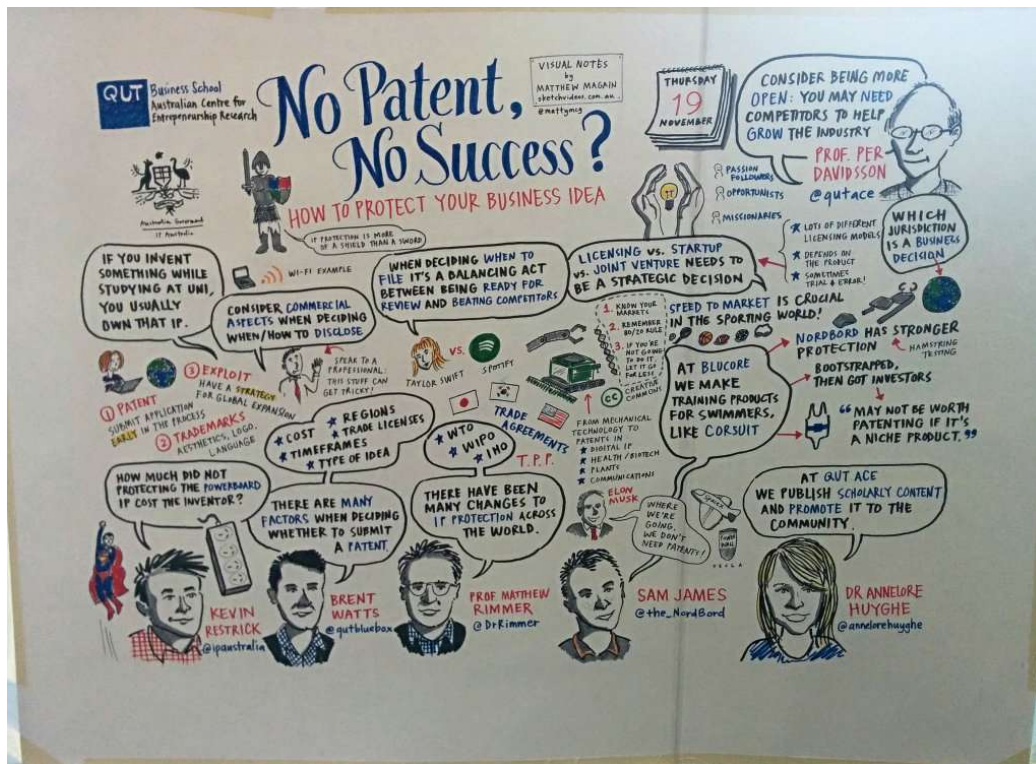

On the 16th December 2015, the QUT Intellectual Property and Innovation Law Research Program hosted a review of Australian media law in 2015. The Dean John Humphrey opened the proceedings. His Honour Justice Peter Applegarth of the Supreme Court of Queensland considered the state of defamation law in an age of digital publishing. Professor David Rolph of Sydney Law School launched his new book on defamation law, and reviewed the year in defamation litigation. Dr Nicolas Suzor of the QUT Faculty of Law considered recent developments in intermediary liability. PhD Candidate Katherina Drinkuth examined the right to be forgotten in the European Union. PhD Candidate Jacinta Buchbach surveyed freedom of speech, and employment law over the last year.

‘Australian Defamation Law: A Book Launch and the Year in Review’, QUT Faculty of Law, 16 December 2015, <https://www.eventbrite.com.au/e/20151216-australian-defamation-law-a-book-launch-and-the-year-in-review-tickets-19721129429?aff=ebrowse>

Intellectual Property: Start-Ups, Innovation, and Entrepreneurs

Professor Matthew Rimmer participated at an event hosted by QUT’s Australian Centre for Entrepreneurship Research on intellectual property, start-ups, innovation, and entrepreneurs.

‘Intellectual Property: Start-Ups, Innovation, and Entrepreneurship’, Queensland University of Technology Australian Centre for Entrepreneurship, 19 November 2015, <http://www.eventbrite.com.au/e/no-patent-no-success-how-to-protect-your-business-idea-tickets-19110984469>

Climate Litigation Symposium (Convenor)

Climate Litigation Symposium, Queensland University of Technology, 17 November 2015, <https://www.eventbrite.com.au/e/20151117-climate-litigation-a-symposium-tickets-19393967880>

The QUT International Law and Global Governance Research Program held a symposium on climate litigation on the 17th November 2015. Senator Larissa Waters, Deputy Leader of the Australian Greens, provided a keynote speech on the Paris climate talks, federal environmental law, and climate litigation. Anna Huggins – co-director of the Program – discussed the successful Dutch climate litigation by Urgenda. Professor Matthew Rimmer from the QUT Intellectual Property and Innovation Law Research Program explored the use of atmospheric trust litigation in the United States – at both a state level (looking at Alaska) and at a Federal level.

Sean Ryan, Principal Solicitor for EDO Qld, and Mark-Baker Jones, a Partner at DibbsBarker, debated whether climate litigation was an effective means of encouraging government action in respect of climate policy.

QUT Intellectual Property and Innovation Law Symposium (Convenor)

Queensland University of Technology Intellectual Property and Innovation Law Symposium, 6 November 2015, <https://www.eventbrite.com.au/e/qut-ip-and-innovation-law-hdr-symposium-tickets-19161714203>

The QUT Intellectual Property and Innovation Law Research Program held a symposium at Brisbane City Hall on the 6th November 2015. There were keynote speeches from Professor Maree Sainsbury from the University of Canberra, Professor Andrew Kenyon from Melbourne Law School, Professor Belinda Carpenter from QUT Law and Justice, and Professor Matthew Rimmer from the QUT Intellectual Property and Innovation Law Research Program. The symposium considered a range of fields of intellectual property – including copyright law, trade mark, patent law, and trade secrets. The event also charted new developments in media law, social media, and information technology law. The symposium also explored recent developments in international law – such as the *Trans-Pacific Partnership*.

The Plain Packaging of Tobacco Products (convenor)

The Plain Packaging of Tobacco Products: Intellectual Property, Trade, and Public Health, Queensland University of Technology, 30 October 2015, <https://www.eventbrite.com.au/e/20151030-plain-packaging-of-tobacco-products-law-ethics-and-trade-roundtable-tickets-19198784080>

The QUT Intellectual Property and Innovation Law Research Program and the Australian Centre for Health Law Research held a joint workshop on the plain packaging of tobacco products on the 30th October 2015. Rebecca Lowe, the Executive Manager, Public Health at the Cancer Council Queensland, discussed tobacco control, public health. Professor Christine Parker of Monash Law School considered questions of law and ethics in respect of tobacco litigation. Professor Matthew Rimmer from the

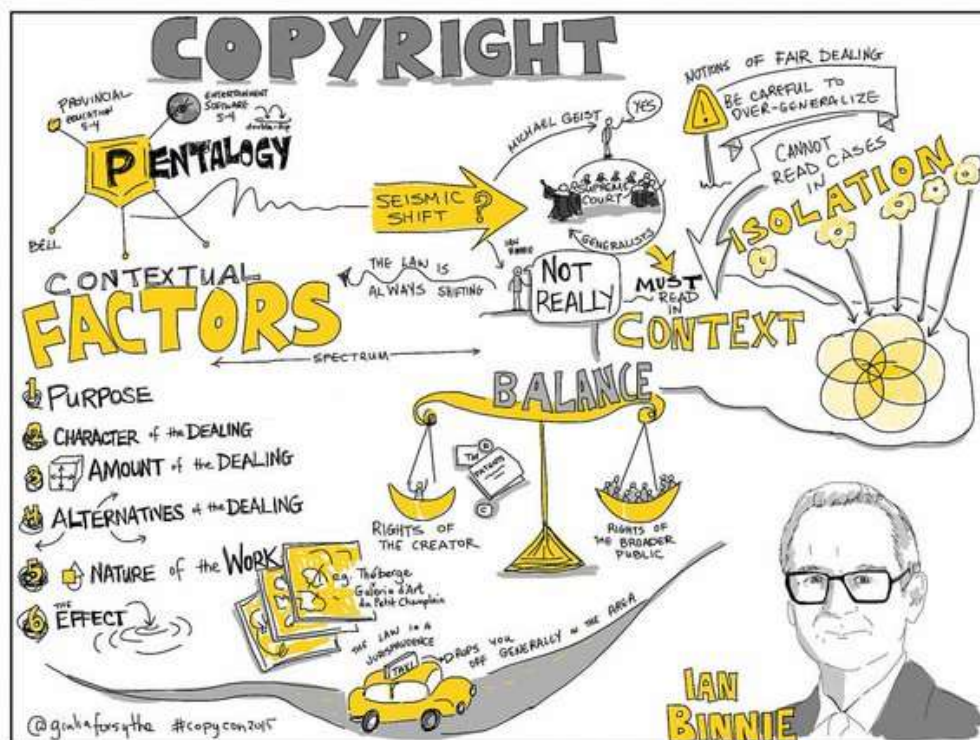

QUT Intellectual Property and Innovation Law research programme considered battles over intellectual property and trade – looking at proceedings in the World Trade Organization, battles over investor-state dispute settlement, and negotiations in the *Trans-Pacific Partnership*.

Intellectual Property and Climate Change: The Paris Accord, ARC, ACIPA, ANU
College of Law Conference, 11-12 May 2015
(Convenor) <https://law.anu.edu.au/conferences/intellectual-property-and-climate-change>

In 2015, the United Nations Climate Change Conference will be held in Paris to discuss the achievement of a fair, binding and ambitious agreement on climate change. One of the outstanding topics under discussion is intellectual property and climate change. Patent Law plays a critical role in providing incentives for renewable energy, and access to critical inventions for the greater public good. Plant breeders' rights impact on intellectual property and food security. Access to genetic resources raises questions about biodiversity and climate change. Trade mark law is significant in terms of green trade marks, eco labels, and greenwashing. Copyright law plays a key part in respect of access to environmental information. The topic of intellectual property and climate change has significant implications for innovation, technology transfer, agriculture, biodiversity, and public health.

This conference will consider whether an accord on technology transfer and climate change will be able to be reached at the international climate talks in Paris 2015.

The conference will feature keynote addresses by Blair Palese (Co-Founder and CEO, 350.Org Australia), Professor Barbara Norman (University of Canberra and

ACT Climate Council), Professor Will Steffen (the Climate Council) and Professor Sharon Friel (Regnet, ANU College of Asia and the Pacific).

Speakers include:

- Professor Michael Adams (Dean, UWS School of Law)
- Bruce Baer Arnold (University of Canberra)
- Professor Howard Bamsey (The Australian National University)
- Dr Wendy Bonython (University of Canberra)
- Dr Pete Burdon (University of Adelaide)
- Dr Robert Cunningham (University of Western Australia)
- Dr Felicity Deane (Queensland University of Technology)
- Dr Miranda Forsyth (ANU College of Asia and the Pacific)
- Tim Hollo (Green Music Australia)
- Dr Susan Harris Rimmer (ANU College of Asia and the Pacific)
- Gillian King (Independent researcher)
- Dr Peter Lawrence (University of Tasmania)
- Professor Charles Lawson (ACIPA, Griffith Law School)
- Dr Marina Nehme (UNSW)
- Alexandra Phelan (Georgetown Law)
- Dr Matthew Rimmer (ARC, ACIPA, ANU College of Law)
- Professor Maree Sainsbury (Head of School, Faculty of Law, University of Canberra)
- Tom Swann (The Australia Institute)

How do we prevent vaccine nationalism?

As the COVID-19 count continues to soar across the globe, scientists are rushing to develop a vaccine. But there's growing concern that the US will take an "America First" approach to COVID-19 diagnostics, therapeutics and vaccines, potentially shutting out other nations.

ABC News, Sydney, ABC News Hour at 17:44

10 Mar 2020 5:44 PM

Interview with Matthew Rimmer, Qld University of Technology. Robinson says Led Zeppelin has won a copyright dispute after a US appeals court ruled they didn't steal the opening riff in Stairway to Heaven. Rimmer states the court said that there wasn't substantial copying of the earlier work. He adds the Blurred Lines decision has led to a lot of concern that there will be an avalanche of copyright infringement over musical works, particularly commercially-valuable works. He notes in Australia, Clive Palmer is being sued over one of his political ads for copying a Twisted Sister song.

Location: Brisbane

Region: QLD

Duration: 8mins 19secs

Type: AM Radio

Interview with QUT Faculty of Law Dr Matthew Rimmer. Feeney says around 1% of Australians say they used electronic cigarettes three years ago but it is much more common now. She says the contents inside the cartridges used to vape vary and can include cannabis products that have been linked to deaths in the US. Rimmer says there is a raging debate in Australia about the regulation of e-cigarettes. He says Health Minister Greg Hunt has emphasised that he is steadfast in his opposition to e-cigarettes but Trent Zimmerman and Tim Wilson have been pushing for e-cigarette deregulation. He adds the World Health Organization has been very concerned e-cigarettes have been promoted by big tobacco as an alternative to cigarettes. Rimmer says the ACCC has taken action against many cigarette companies for making misleading health claims. He says many things are happening in other countries that might signal a shift towards the treatment of tobacco and cigarettes in Southeast Asia. Feeney notes Rimmer will be presenting a talk about tobacco through the Asia Pacific.

Pre-recorded interview with Dr Matthew Rimmer, Professor of Intellectual Property and Innovation Law, QUT, regarding the regulation into 3D printing.

By Matt Webber

ABC Gold Coast, Gold Coast, Drive at 16:33

25 Jul 2019 4:33 PM

Pre-recorded interview with Dr Matthew Rimmer, Professor of Intellectual Property and Innovation Law, QUT, regarding the regulation into 3D printing. Webber reports 3D printed weapons are prompting authorities to discuss legislation regarding the printer's use. Rimmer says there are concerns 3D printed guns could have a disastrous effect on the community, citing such weapons can pass through metal detectors;

however, there are some who say such concerns are overblown. He mentions Defense Distributed, a US company that distributes blueprints for 3D printing guns, has been challenged in court regarding its work with the government winning the lawsuit and appeals. Rimmer then says Australia had a Parliamentary inquiry into minimising gun violence in the country with one of its recommendations being the regulation of 3D printed weapons. He enumerates court cases in Australia involving 3D printed guns.

732. Tamara Oudyn, 'Australia Wins Plain Packaging Dispute in the WTO', ABC News TV, 29 June 2018, <https://www.youtube.com/watch?v=DYNknFO1ldk>

Interview with Qld University of Technology Professor Matthew Rimmer. Oudyn states Australia has won a clear victory in a major trade dispute over its pioneering tobacco packaging law, with the World Trade Organisation rejecting arguments brought by Cuba, Indonesia, Honduras, and the Dominican Republic. Rimmer discusses the importance of the legal decision, saying Australia's plain packaging of tobacco products had been previously defended in the High Court of Australia and in an investment tribunal. He says a number of other countries have followed Australia's lead, such as Ireland, the UK, France, New Zealand and Canada. Rimmer believes Big Tobacco will be thunderstruck by the ruling, saying it has been unsuccessful in its attempts to derail Nicola Roxon's pioneering plain packaging of tobacco products [law].

This series of quotations was removed from the Dayton article without my permission:

Myriad Genetics is expected to fight back against the decision in a number of ways, Rimmer says. The biotechnology company could lobby Parliament to overturn the law. However, he notes the new Australian Prime Minister Malcolm Turnbull "has expressed his concern about gene patents, previously." Myriad could invoke an investor-state dispute settlement claim over the ruling, as did tobacco firms regarding Australia's 2011 law requiring the plain packaging of tobacco products. Although Rimmer doubts such moves would prove successful, he says "the biotechnology industry will no doubt push for a change of the rules in respect of patentable subject matter under secretive regional agreements such as the Trans-Pacific Partnership."
