Abstract. Relative abundances of tree species are presented for the 348 forest plots described in E. Lucy Braun's (1950) book, *Deciduous Forests of Eastern North America* (Hafner, New York, facsimile reprint 1972). Information about the plots includes forest type, location with latitude and longitude, WorldClim climate variables, and sources of original studies where applicable. No copyright restrictions are associated with the use of this data set. Please cite this article when the data are used in other publications.

Key words: *Bioclim variables; climate variables; eastern North America; forest plot; relative abundance; species diversity; species richness; tree species.*

The complete data sets corresponding to abstracts published in the Data Papers section in the journal are published electronically as Supporting Information in the online version of this article at <http://onlinelibrary.wiley.com/doi/10.1002/ecy.2121/supinfo>
