• Disseminate publications
Dear Nader Ale Ebrahim:

Your paper, "Virtual R&D Teams in Small and Medium Enterprises: A Literature Review", was recently listed on SSRN's Top Ten download list for ORG: Contemporary Organizational Structures (Topic) and Structural Dimensions & Organizational Behavior eJournal. As of 06/16/2010, your paper has been downloaded 107 times. You may view the abstract and download statistics at http://papers.ssrn.com/abstract=1530904.

Top Ten Lists are updated on a daily basis. Click on the following link to view the Top Ten list for the journal ORG: Contemporary Organizational Structures (Topic) Top Ten and Structural Dimensions & Organizational Behavior eJournal Top Ten.

Click on the following link to view all the papers in the journal ORG: Contemporary Organizational Structures (Topic) All Papers and Structural Dimensions & Organizational Behavior eJournal All Papers.

To view any of the Top Ten lists, click the TOP button on any network, sub network, journal or topic in the Browse list reachable through the following link: http://www.ssrn.com/Browse

Your paper may be listed in the Top Ten for other networks or journals and, if so, you will receive additional notices at that time.

If you have any questions regarding this notification or any other matter, please email AuthorSupport@SSRN.com or call 877-SSRNHelp (877.777.6435 toll free). Outside of the United States, call 00+1+585+4428170.

Sincerely,

Michael C. Jensen

“Virtual Teams will become as important as Web to companies” (Nader Ale Ebrahim)

Small and medium sized enterprises (SMEs) have a significant contribution in industrial economies. Their sustained growth is a prominent issue for the economy and employment of any country. Towards that end, research and development (R&D) policy dimension deserves particular attention to promote and facilitate the operations of SMEs: Virtual R&D team could be a viable option. However, literature shows that virtual R&D teaming in SMEs is still at its infancy. This article provides a comprehensive literature review on different aspects of virtual R&D teams collected from the research publications. The purpose of the state-of-the-art literature review is to provide an overview on the structure and dynamics of R&D collaboration in SMEs. Specifying the rationale and relevance of virtual teams, the relationship between virtual R&D team for SMEs and new product development (NPD) has been examined. It concludes with the identification of the gaps and felicities in the existing literatures and calls for future research in this area. It is argued that the formation of virtual R&D team deserve consideration at top level management for running into the new product development in SMEs.
