

# Teaching Author Rights Through 3D Printing Submissions

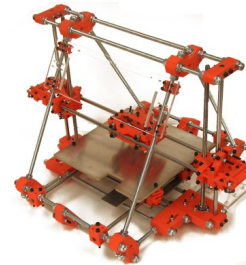

## CREATE

Student adapts existing model or designs a new model for 3D printing

Student submits the file to the 3D printer queue in ScholarWorks, Boise State's institutional repository

Librarians help print object and asks to include work in an open access institutional repository

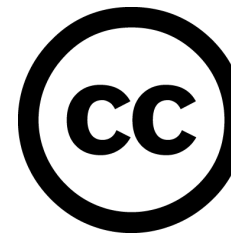

## EDUCATE

Discuss rights as an author/creator of work

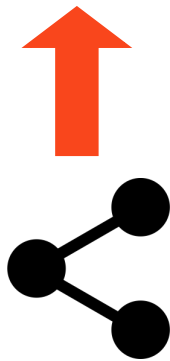

Empower student to take advantage of their copyrights

Help choose a Creative Commons License

Post the work on the open access institutional repository

Share with the world; other students can adapt and print
