LTMG Medical College. Mumbai India & .Department of Psychiatry, Schulich School of Medicine & Dentistry, Western University, London, ON, Canada

Stigma is a multidimensional construct

**THE SCALE**

- Personal; (2) Family; (3) Social; and (4) Environmental
- **Dimensions:** (a) self experience; (b) illness related consequences; and (c) coping strategies
- The scale measures 4 experience and 8 opinion
- This is a Multidisciplinary study of stigma in schizophrenia. We present result of a pilot phase of the field trial conducted in Mumbai, India

**SQS**

1. **Concept**
   - A clinical risk
   - SQS is a valid scale for measurement of Burden of stigma in schizophrenia
   - SQS Score may indicate clinical complications

2. **Stigma:**
   - We present result of a pilot phase of the field trial conducted in Mumbai, India
   - The scale measures 4 experience and 8 opinion
   - This is a Multidisciplinary study of stigma in schizophrenia

3. **Conclusion**
   - Stigma is a multidimensional construct
   - The scale measures 4 experience and 8 opinion
   - This is a Multidisciplinary study of stigma in schizophrenia

4. **Background**
   - A clinical risk
   - SQS is a valid scale for measurement of Burden of stigma in schizophrenia
   - SQS Score may indicate clinical complications

5. **Coping strategies**
   - a. To what extent are you afraid of your illness?
   - b. To what extent are you afraid of your illness?
   - c. To what extent are you afraid of your illness?
   - d. To what extent are you afraid of your illness?
   - e. To what extent are you afraid of your illness?

6. **Coping strategies**
   - a. To what extent are you afraid of your illness?
   - b. To what extent are you afraid of your illness?
   - c. To what extent are you afraid of your illness?
   - d. To what extent are you afraid of your illness?
   - e. To what extent are you afraid of your illness?

7. **Coping strategies**
   - a. To what extent are you afraid of your illness?
   - b. To what extent are you afraid of your illness?
   - c. To what extent are you afraid of your illness?
   - d. To what extent are you afraid of your illness?
   - e. To what extent are you afraid of your illness?

8. **Coping strategies**
   - a. To what extent are you afraid of your illness?
   - b. To what extent are you afraid of your illness?
   - c. To what extent are you afraid of your illness?
   - d. To what extent are you afraid of your illness?
   - e. To what extent are you afraid of your illness?

9. **Coping strategies**
   - a. To what extent are you afraid of your illness?
   - b. To what extent are you afraid of your illness?
   - c. To what extent are you afraid of your illness?
   - d. To what extent are you afraid of your illness?
   - e. To what extent are you afraid of your illness?

10. **Coping strategies**
    - a. To what extent are you afraid of your illness?
    - b. To what extent are you afraid of your illness?
    - c. To what extent are you afraid of your illness?
    - d. To what extent are you afraid of your illness?
    - e. To what extent are you afraid of your illness?

11. **Coping strategies**
    - a. To what extent are you afraid of your illness?
    - b. To what extent are you afraid of your illness?
    - c. To what extent are you afraid of your illness?
    - d. To what extent are you afraid of your illness?
    - e. To what extent are you afraid of your illness?

12. **Coping strategies**
    - a. To what extent are you afraid of your illness?
    - b. To what extent are you afraid of your illness?
    - c. To what extent are you afraid of your illness?
    - d. To what extent are you afraid of your illness?
    - e. To what extent are you afraid of your illness?

13. **Coping strategies**
    - a. To what extent are you afraid of your illness?
    - b. To what extent are you afraid of your illness?
    - c. To what extent are you afraid of your illness?
    - d. To what extent are you afraid of your illness?
    - e. To what extent are you afraid of your illness?

14. **Coping strategies**
    - a. To what extent are you afraid of your illness?
    - b. To what extent are you afraid of your illness?
    - c. To what extent are you afraid of your illness?
    - d. To what extent are you afraid of your illness?
    - e. To what extent are you afraid of your illness?

15. **Coping strategies**
    - a. To what extent are you afraid of your illness?
    - b. To what extent are you afraid of your illness?
    - c. To what extent are you afraid of your illness?
    - d. To what extent are you afraid of your illness?
    - e. To what extent are you afraid of your illness?
