## 1 Curriculum Vitae

# 1.1 Primary Research Interests

- Information extraction from text, Web mining.
- Data mining. Information integration. Knowledge Management.
- Bibliometrics. Digital libraries of research literature.
- Social network analysis.
- Natural language processing.
- Machine learning, graphical models, probabilistic reasoning.
- Probabilistic programming languages.
- Artificial intelligence.

#### 1.2 Education

- Post-doctoral Research Fellow, School of Computer Science, Carnegie Mellon University, 1996. Advisers: Sebastian Thrun and Tom Mitchell. Machine Learning for Text, Language Modeling. Reinforcement Learning, Intelligent Control for Office Space.
- Ph.D. in Computer Science, University of Rochester, Rochester New York, 1995. Thesis title: "Reinforcement Learning with Selective Perception and Hidden State". Adviser: Dana Ballard; committee: Leslie Kaelbling (MIT), Chris Brown (Rochester), Randal Nelson (Rochester). Best Doctoral Dissertation of 1995-96, University of Rochester. Nominated for ACM Best Dissertation Award. (300 citations in Google Scholar)
- M.S. in Computer Science, University of Rochester, Rochester, New York, 1992.
- B.A. in Computer Science (*summa cum laude*, Phi Beta Kappa), Dartmouth College, Hanover, New Hampshire, 1989.
- High School: The North Carolina School of Science and Mathematics. 1985.

#### 1.3 Professional Positions

• Associate Professor, Department of Computer Science, University of Massachusetts, Amherst, MA. Fall 2003–present. Director of Information Extraction and Synthesis Laboratory. Fall 2004–present.

Currently advising ten Ph.D. students, two postdocs, and several undergraduates. Teaching graduate and undergraduate classes.

Research projects include (a) Unified inference to manage uncertainty across NLP, information extraction, information integration and data mining. (b) Extraction and mining of bibliometric data; building Rexa.info, an enhanced alternative to Google Scholar. (c) Efficient inference and training in conditional random fields, including relational models combining logic and probability, and new probabilistic programming languages going beyond logic. (d) Structured topic models: Bayesian latent variable models of text and other modalities, including authors, citations, timestamps, geo-spatial locations. (e) Learning by reading. (f) Managing uncertainty in NLP dialog systems.

- Research Associate Professor, Department of Computer Science, University of Massachusetts, Amherst, MA. September 2002–September 2003.
- Vice President of Research & Development, Director of Pittsburgh office of WhizBang Labs, Inc. January 2000–May 2002.

Set research direction for this 170-person company, identified key research problems and technical approaches, led two research-related software projects, managed group of research scientists, directed 30-person Pittsburgh office, joined sales team on visits with key customers.

• Adjunct Faculty, Carnegie Mellon University, Center for Automated Learning and Discovery, and Language Technology Institute. 1998–2002.

Co-taught a graduate-level class, gave guest lectures at graduate and undergraduate levels, advised three PhD graduate students, advised graduate and undergraduate research projects, gave invited academic research presentations.

Research Scientist and Research Coordinator, Just Research (Justsystem Pittsburgh Research Center).
 January 1997–December 1999.

Spearheaded research in technology for statistical text processing.

Leader of the project that created "Cora," a domain-specific search engine for computer science research papers—an early contemporary of CiteSeer. (With Kamal Nigam, Kristie Seymore and Jason Rennie.) This project resulted in eight refereed publications.

Created *libbow*, an extensive software library for document classification, document clustering, information retrieval and information extraction written in C, released as open source. This is one of the most widely used software packages for document classification, with many hundreds of users from all over the world.

Recruited and advised undergraduate and graduate summer interns, including Dayne Freitag (CMU), Kamal Nigam (CMU), Kristie Seymore (CMU), Thomas Minka (MIT), and many undergraduates, including Jason Rennie (now at MIT).

 Research Fellow, Computer Science Department, University of Rochester. January–June 1996. With Dana Ballard and Mary Hahoe.

Psychophysics experiments with human eye-movements during the performance of highway driving tasks in virtual reality: testing models of short-term memory.

• Consultant, Net Community Inc., Portland, Oregon, 1996.

• Research Assistant, Computer Science Department, University of Rochester. Spring 1991, Spring 1992, Spring, Summer & Fall 1993, Summer & Fall 1994, Spring & Summer 1995.

Accelerating reinforcement learning with techniques from Kohonen Maps. Learning Hidden Markov Models for tasks with incomplete perception. Memory-based techniques for fast learning of context-dependent tasks. Visual routines and deictic strategies on images generated from realistic images of a 3-D world. Human eye-tracking while chasing cars in virtual reality.

• Research Staff, Biomedical Information Communications Center, Oregon Health Sciences University. Summer 1992, Fall 1989–Summer 1990.

Using Genetic Algorithms to categorize diseases from their symptoms. Designing graphical user interfaces and novel graphical representations for complex medical data.

• Programmer, IBM, Research Triangle Park, North Carolina. Summer & Winter 1988.

### 1.4 Grant and Contract Proposals and Activities

- PI, with Co-PIs Fernando Pereira and Ben Taskar. "Dynamically-Structured Conditional Random Fields for Complex, Natural Domains." NSF CISE Robust Intelligence, Medium. 2008-2011. (Acceptance rate for this program was about 5%.)
- PI, DARPA DIESEL program seedling (David Gunning, PM). Summer 2007–Summer 2008.
- IBM Faculty Partnership Award. 2007.
- PI with Padhraic Smyth (UC Irvine) (Co-PI) on NSF CRI, "Improving Experimental Computer Science with a Searchable Web Portal for Datasets." Summer 2006–Summer 2009.
- PI, IC Postdoctoral Fellowship. (Funding for a postdoc of my choice in my lab). "Resource-Bounded Information Gathering for Efficient Entity Resolution and Link Analysis using Probabilistic Reasoning and Decision Analysis." Fall 2006–Fall 2008, with option for one additional year.
- PI, "Aiding Collaboration through Probabilistic Methods on Text and Semi-Structured Data." IARPA. January 2006–August 2010.
- PI, Monster.com Inc, Research gift. 2006-2007.
- Co-PI with James Allan (PI) and Bruce Croft (Co-PI), DARPA GALE Program, "Information Distillation in Nightingale." September 2005–September 2010.
- PI with David Jensen (Co-PI) on NSF Medium ITR, "Unified Graphical Models of Information Extraction and Data Mining with Application to Social Network Analysis." (Acceptance rate for this program was below 10%) September 2003–September 2009, with option for extention.
- PI with Fernando Pereira (collaborative PI) and John Lafferty (collaborative PI), NSF Medium ITR, "Machine Learning for Sequences and Structured Data: Tools for Non-Experts." (Given highest rating by all reviewers. Acceptance rate for this program was below 10%.) September 2004–August 2007.

- PI, DARPA/IBM UIMA. "UIMA Integration with a Machine Learning for Language Toolkit." May 2005–May 2006.
- PI, Intelligence Technology Innovation Center (ITIC) grant. "Confidence Measures for Information Extraction of Entities, Relations and Object Correspondence." January 2005–January 2006.
- PI, DARPA IPTO, "Enduring Personal Cognitive Assistant" (CALO). May 2003–January 2009.
- IBM Faculty Partnership Award. 2004.
- PI, with Lance Ramshaw (prime contractor PI), BBN. U.S. Department of the Interior, ARDA, "Statistical Models for Information Extraction for REFLEX." September 2004—August 2007.
- Co-PI with Jared Freeman of Aptima, Inc. "Automated Diagnosis of Usability Problems Using Statistical Computational Methods" STTR. September 2003–May 2006.
- PI, Microsoft Research faculty gift. 2003-2004.
- Co-PI with Tom Dietterich (PI). NSF IIS "Student Travel Scholarships for ICML 2003"

#### 1.5 Honors

- AAAI Fellow, 2009.
- UMass NSM "Distinguished Research Award" (given to 2/250 faculty per year), 2007.
- Kavli Fellow, National Academy of Sciences, 2007.
- UMass Lilly Teaching Fellow, 2005–2006.
- "Best Paper Honorable Mention," Proceedings of AAAI, 2004.
- National Science Foundation, Information Technology Research (ITR) Awards, 2003, 2004.
- IBM Faculty Partnership Award, 2004–2005, 2007–2008.
- Best Doctoral Dissertation of 1995–1996, University of Rochester.
- Nominated for ACM Best Ph.D. Dissertation Award, 1995.
- Phi Beta Kappa, 1989.
- Rufus Choates Scholar, and graduation summa cum laude. Dartmouth College. 1989.
- IBM T. J. Watson Scholarship. 1985.

## 2 Publications and Presentations

In November 2008 *Google Scholar* reported over 13,000 citations to 103 of the 155 research articles listed below. (Recent and other low-citation articles do not have their citation counts listed below.)

3 of the articles below had more than 1000 citations. 30 of the articles below had more than 100 citations. The *h-index* for this collection of articles was 47. (See http://en.wikipedia.org/wiki/Hirsch\_number for a description of this measure, and http://www.brics.dk/~mis/hnumber.html for a script that calculates it.)

### 2.1 Submitted and Pending Journal Papers

- [1] Wei Li and Andrew McCallum. "Pachinko Allocation: Scalable Mixture Models of Topic Correlations" Submitted to the Journal of Machine Learning Research, (JMLR).
- [2] Ron Bekkerman, Ran El-Yaniv, Andrew McCallum "Multi-Way Distributional Clustering via Pairwise Interactions" Submitted to Journal of Machine Learning Research (JMLR).

#### 2.2 Journal Publications

- [1] Charles Sutton and Andrew McCallum. "Piecewise Training for Structured Prediction" Machine Learning Journal, (MLJ) 2009.
- [2] Andrew McCallum, Xuerui Wang and Andres Corrada-Emmanuel. "Topic and Role Discovery in Social Networks with Experiments on Enron and Academic Email." Journal of Artificial Intelligence Research (JAIR), Volume 30, October 2007.
- [3] Charles Sutton, Andrew McCallum and Khashayar Rohanimanesh. "Dynamic Conditional Random Fields." *Journal of Machine Learning Research (JMLR)*, Vol. 7, 2006. (100 citations in Google Scholar)
- [4] Aron Culotta, Trausti Kristjannson, Andrew McCallum and Paul Viola. "Interactive Information Extraction and Active Learning with Constrained Conditional Random Fields." Artificial Intelligence Journal, Vol. 170 (No. 12), 2006.
- [5] Xing Wei, Bruce Croft and Andrew McCallum. "Table Extraction for Answer Retrieval" Information Retrieval Journal, Vol. 9, (No. 5), November, 2006.
- [6] Fuchun Peng and Andrew McCallum. "Information Extraction from Scientific Papers with Conditional Models," Information Processing and Management, Volume 42 (Number 4), pages 963-979, 2006.
- [7] Andrew McCallum. "Information Extraction: Distilling Structured Data from Unstructured Text." ACM Queue, Vol. 3, (No 9), November 2005. (Invited article)
- [8] Wei Li and Andrew McCallum. "Rapid Development of Hindi Named Entity Recognition Using Conditional Random Fields and Feature Induction." ACM Transactions on Asian Language Information Processing. Volume 2, Issue 3, September 2003. (18 citations in Google Scholar)
- [9] Andrew McCallum, Kamal Nigam, Jason Rennie, Kristie Seymore. "Automating the Construction of Internet Portals with Machine Learning." Information Retrieval Journal, Volume 3, pages 127-163. Kluwer. 2000. (214 citations in Google Scholar)
- [10] Kamal Nigam, Andrew McCallum, Sebastian Thrun and Tom Mitchell. "Text Classification from Labeled and Unlabeled Documents using EM." Machine Learning Journal, 2000. (1027 citations in Google Scholar)
- [11] Mark Craven, Dan DiPasquo, Dayne Freitag, Andrew McCallum, Tom Mitchell, Kamal Nigam, Sean Slattery. "Learning to Construct Knowledge Bases from the World Wide Web". Artificial Intelligence, 118(1-2). pp 69-114. 2000. (317 citations in Google Scholar)

- [12] William Cohen, Andrew McCallum, Dallan Quass. "Learning to Understand the Web." IEEE Data Engineering Bulletin. September 2000, Vol. 23, No. 3. Pages 17-24. (Invited article) (21 citations in Google Scholar)
- [13] Andrew McCallum. "Hidden State and Reinforcement Learning with Instance-Based State Identification". In *IEEE Transactions on Systems, Man and Cybernetics*, (Special Issue on Robot Learning), 26 (3), June 1996 (54 citations in Google Scholar)

# 2.3 Book Chapters and Sections

- [1] Andrew McCallum and Charles Sutton. Contributed a 1.5 page case study to Daphne Koller's book "Structured Probabilistic Models", 2008.
- [2] David Cohn, Rich Caruana and Andrew McCalllum. "Semi-supervised Clustering with User Feedback." In *Constrained Clustering: Advances in Algorithms, Theory, and Applications*. Editors: Sugato Basu, Ian Davidson, and Kiri Wagstaff. Chapman & Hall/CRC Press, Data Mining and Knowledge Discovery Series. 2008.
- [3] Andrew McCallum, Xuerui Wang and Natasha Mohanty. "Joint Group and Topic Discovery from Relations and Text" In *Statistical Network Analysis*, Lecture Notes in Computer Science (LNCS), Springer-Verlag. 2007.
- [4] Charles Sutton and Andrew McCallum. "An Introduction to Conditional Random Fields for Relational Learning." In Introduction to Statistical Relational Learning. Edited by Lise Getoor and Ben Taskar. MIT Press, 2006.
- [5] Kamal Nigam, Andrew McCallum and Tom Mitchell. "Semi-Supervised Text Classification Using EM." *Semi-supervised Learning*. Olivier Chapelle, Alexander Zien, and Bernhard Schlkopf, eds. 2006.

#### 2.4 Refereed Conference Publications

- [1] Michael Wick, Khashayar Rohanimanesh, Karl Schlutz and Andrew McCallum. "A Unified Approach for Schema matching, Coreference and Canonicalization." Proceedings of the Conference on Knowledge Discovery and Data Mining, (KDD), 2008. (10% acceptance rate for long oral presentation)
- [2] Robert Hall, Charles Sutton, Andrew McCallum. "Unsupervised Deduplication using Cross-field Dependencies." In Conference on Knowledge Discovery and Data Mining (KDD), 2008. (10% acceptance rate for long oral presentation)
- [3] Gregory Druck, Gideon Mann and Andrew McCallum. "Learning from Labeled Features using Generalized Expectation Criteria." Proceedings of ACM Special Interest Group on Information Retreival, (SIGIR), 2008. (17% acceptance rate)
- [4] David Mimno and Andrew McCallum. "Topic Models Conditioned on Arbitrary Features with Dirichlet-multinomial Regression," Conference on Uncertainty in Artificial Intelligence, (UAI), 2008. (Plenary presentation.) (13% acceptance rate for oral presentation)

- [5] Gideon Mann and Andrew McCallum. "Generalized Expectation Criteria for Semi-Supervised Learning of Conditional Random Fields," Proceedings of Association of Computational Linguistics, (ACL), 2008. (20% acceptance rate)
- [6] Vidit Jain, Erik Learned-Miller, and Andrew McCallum. "People-LDA: Anchoring Topics to People Using Face Recognition," International Conference on Computer Vision (ICCV), 2007. (23% acceptance rate)
- [7] Xuerui Wang, Andrew McCallum and Xing Wei. "Topical N-grams: Phrase and Topic Discovery, with an Application to Information Retrieval," Proceedings of the 7th IEEE International Conference on Data Mining (ICDM), 2007. (19% acceptance rate)
- [8] Aron Culotta, Michael Wick, Robert Hall, Matthew Marzilli and Andrew McCallum. "Canonicalization of Database Records using Adaptive Similarity Measures." Conference on Knowledge Discovery and Data Mining (KDD), 2007. (18% acceptance rate)
- [9] Xuerui Wang, Chris Pal and Andrew McCallum. "Generalized Component Analysis for Text with Heterogeneous Attributes." Conference on Knowledge Discovery and Data Mining (KDD), 2007. (18% acceptance rate)
- [10] Greg Druck, Chris Pal, Xiaojin Zhu and Andrew McCallum. "Semi-Supervised Classification with Hybrid Generative/Discriminative Methods." Conference on Knowledge Discovery and Data Mining (KDD), 2007. (18% acceptance rate)
- [11] David Mimno and Andrew McCallum. "Expertise Modeling for Matching Papers with Reviewers." Conference on Knowledge Discovery and Data Mining (KDD), 2007. (18% acceptance rate)
- [12] Wei Li, David Blei and Andrew McCallum. "Nonparametric Bayes Pachinko Allocation." Conference on Uncertainty in Artificial Intelligence (UAI), 2007. (~30% acceptance rate) (7 citations in Google Scholar)
- [13] Charles Sutton and Andrew McCallum. "Improved Dynamic Schedules for Belief Propagation." Conference on Uncertainty in Artificial Intelligence (UAI), 2007. (~30% acceptance rate)
- [14] Gideon Mann and Andrew McCallum. "Simple, Robust, Scalable Semi-supervised Learning via Expectation Regularization." International Conference on Machine Learning (ICML), 2007. (29% acceptance rate) (15 citations in Google Scholar)
- [15] Charles Sutton and Andrew McCallum. "Piecewise Pseudolikelihood for Efficient Training of Conditional Random Fields." International Conference on Machine Learning (ICML), 2007. (29% acceptance rate) (12 citations in Google Scholar)
- [16] David Mimno, Wei Li and Andrew McCallum. "Mixtures of Hierarchical Topics with Pachinko Allocation." International Conference on Machine Learning (ICML), 2007. (29% acceptance rate)
- [17] Aron Culotta, Michael Wick and Andrew McCallum. "First-Order Probabilistic Models for Coreference Resolution." North American Association of Computational Linguistics / Human Language Technology (NAACL/HLT), 2007. (24% acceptance rate) (13 citations in Google Scholar)

- [18] Gideon Mann and Andrew McCallum. "Efficient Computation of Entropy Gradient for Semi-Supervised Conditional Random Fields." North American Association of Computational Linguistics / Human Language Technology (NAACL/HLT), 2007. (short paper) (36% acceptance rate) (5 citations in Google Scholar)
- [19] David Mimno and Andrew McCallum. "Mining a digital library for influential authors." Joint Conference on Digital Libraries (JCDL), 2007. (~30% acceptance rate)
- [20] David Mimno and Andrew McCallum "Organizing the OCA: Learning Faceted Subjects from a Library of Digital Books." Joint Conference on Digital Libraries (JCDL), 2007. (~30% acceptance rate)
- [21] Pallika Kanani, Andrew McCallum and Chris Pal. "Improving Author Coreference by Resource-bounded Information Gathering from the Web." Twentieth International Joint Conference on Artificial Intelligence (IJCAI), 2007. (15% acceptance rate) (10 citations in Google Scholar)

#### 2.10 Invited Talks and Presentations

- [1] Duke University, (and UNC, NSCU), **Triangle Computer Science Distinguished Lecturer Series**. November 2008.
- [2] Columbia University. Seminar Series. October 1, 2008.
- [3] Google Research, New York. October 2, 2008.
- [4] Universite Pierre et Marie Curie (Paris, France), Department of Computer Science. July 11, 2008.
- [5] INRIA (Sophia Antipolis, France). July 16, 2008.
- [6] EURECOM (Sophia Antipolis, France). July 17, 2008.
- [7] Xerox Research Center Europe (Grenoble, France). July 21, 2008.
- [8] Google Research, Mountainview, CA. April 17, 2008.
- [9] Carnegie Mellon University, CMU Machine Learning Department-Google Seminar. (Contact Kamal Nigam). March 2008.
- [10] University of California Irvine, **Distinguished Speaker Series**, Center for Machine Learning and Intelligent Systems. February 2008.
- [11] Kavli Frontiers of Science Symposium, National Academy of Sciences, Fall 2007.
- [12] Oak Ridge National Lab, Fall 2007.
- [13] Isenberg School of Management, University of Massachusetts. Operations Research / Management Science, Fall Speaker Series. November 3, 2007.
- [14] Tsinghua University (China), Department of Computer Science. July 16, 2007.
- [15] Peking University (China), Department of Computer Science. July 13, 2007.

- [16] Microsoft Research Asia (Beijing, China). July 12, 2007. Two-day invited tutorial. As part of a series with Trevor Hastie, Stanford University.
- [17] Kennedy School of Government, Harvard University. March 5, 2007.
- [18] Second Annual Information Theory and Applications Workshop, UC San Dieago. Invited talk. (Over 500 researchers in attendence.) February 4, 2007.
- [19] BBN. January 9, 2007.
- [20] UMass National Center for Digital Government. December 2006.
- [21] National Science Foundation. Invited talk. CISE IIS. October 5, 2006.
- [22] The Twelfth ACM SIGKDD International Conference on Knowledge Discovery and Data Mining (KDD), Invited talk. August 2006.
- [23] Carnegie Mellon University, AI Seminar Series. (Contact Tom Mitchell). March 2006.
- [24] DARPA ISAT workshop study on "Adaptive and Interactive Representations." MIT. (Contact: Kendra Moore, DARPA PM.) July 2006.
- [25] 23rd International Conference on Machine Learning (ICML), Workshop on Statistical Network Analysis: Models, Issues and New Directions. Invited talk. (Contact: Stephen Feinberg.) July 2006.
- [26] 23rd International Conference on Machine Learning (ICML), Workshop on Open Problems in Statistical Relational Learning. Invited talk. (Contact: Lise Getoor.) July 2006.
- [27] Neural Information Processing Systems (NIPS), Workshop on Open Problems and Challenges for Nonparametric Bayesian Methods in Machine Learning. (Contact Ye Whye Teh.) December 2005.
- [28] Neural Information Processing Systems (NIPS), Workshop on Bayesian Methods for Natural Language Processing. (Contact Hal Daume.) December 2005.
- [29] SRI International, Menlo Park, CA. CALO year End Status. (Contact Bill Marks.) October 2005.
- [30] Stanford University, Computer Science Department, Broad Area Colloquium. (Contact: Andrew Ng.) October 2006.
- [31] Yahoo, Inc. (Contact: Byron Dom) October 2006.
- [32] University of Edinburgh. (Contact Miles Osborne and Chris Williams.) August 2005.
- [33] ACL Workshop on Feature Engineering. Invited keynote presentation. "Recent Advances in Machine Learning Methods for Feature Engineering." (Contact Eric Ringger.) June 2005.
- [34] Microsoft Research. (Contact Sue Dumais.) June 2005.
- [35] University of Washington. (Contact Pedro Domingos.) June 2005.
- [36] National Library of Medicine. (Contact John Wilbur.) May 2005.

- [37] Department of Homeland Security, Workshop on Text Analysis, Invited Presentation. (Contact Tom Potok.) May 2005.
- [38] Google NYC. (Contact Craig Nevill-Manning.) April 2005.
- [39] UPenn, Department of Computer Science. (Contact: Fernando Pereira) April 2005.
- [40] MIT, CSAIL. (Contact Leslie Kaelbling.) March 2005.
- [41] Dagstuhl Workshop, Germany. Keynote address. (Contact Nicholas Kushmerick). February 2005.
- [42] Alphatech Research. (Contact: Tom Stephenson.) January 2005.
- [43] UC Berkeley. (Contact: Michael I. Jordan). November 2004.
- [44] Google Research. (Contact Peter Norvig). November 2004.
- [45] Lawrence Livermore National Laboratory. (Contact: Tina Eliassi-Rad). November 2004.
- [46] Invited tutorial, Johns Hopkins, Center for Language and Speech Processing, NSF Summer School on Human Language Technology, 2004.
- [47] Cornell University, Department Seminar Series. (Contact: Claire Cardie). April 2004.
- [48] University of Washington, AI Seminar Series. (Contact: Oren Etzioni). December 2003.
- [49] Microsoft Research. (Contact: Sue Dumais). December 2003.
- [50] Carnegie Mellon University, AI Seminar Series. (Contact: Tuomas Sandholm). Fall 2003.
- [51] BBN, Information Extraction Seminar Series. (Contact: Scott Miller). Fall 2003.
- [52] Xerox Research Center Europe. (Contact: Nicola Cancedda). September 2003.
- [53] University of Pennsylvania, Seminar Series. (Summer 2003).
- [54] University of Wisconsin. (Contact: Jude Shavlik). May 2003.
- [55] Invited by Ted Senator to a DARPA workshop assessing the feasibility of a new DARPA program on "Misinformation Detection." Selected to be one of three workshop report co-authors. February 2003.
- [56] MIT AI Lab. (Contact: Leslie Kaelbling). "Information Extraction from the World Wide Web: Discriminative Finite State Models, Feature Induction and Scoped Learning". AI Lab Seminar Series. February 2003.

- [77] AAAI Spring Symposium, ('Toward Physical Interaction and Manipulation'), Stanford University. "Short-Term Memory in Visual Routines". March 1994.
- [78] Xerox PARC. Invited talk. "A Nearest-Neighbor Approach to Short-Term Context While Performing Tasks with Visual Routines". March 1994.
- [79] Brown University. Invited talk. "Learning Hidden Markov Models for Short-Term Memory in Reinforcement Learning". June 1993.
- [80] University of Buffalo Graduate Conference on Computer Science. "Speeding Reinforcement Learning with On-line Value Iteration". Fall 1992.

# 3 Service Activities

#### 3.1 Professional Service

2 program co-chairmanships (ICML, CEAS), 3 program area chairmanships (ACL, IJCAI, NIPS), 2 journal editorial board memberships (MLJ, then JMLR, FnT-ML), 4 board memberships (IMLS, CRA-CCC, CoRR, DMIFG), 5 years officer-level service to international conferences (NIPS and ICML), 50+ international conference program committee memberships, 5 grant proposal review panels, co-organizer of 7 workshops at international conferences, 2 tutorials at international conferences (NIPS, KDD).

- Program Co-chair, International Conference on Machine Learning (ICML), with Sam Roweis, 2008.
- Board, CRA Computating Community Consortium. http://www.cra.org/ccc. 2007–2009.
- Program Committee Area Chair, Association of Computational Linguistics (ACL), 2008.
- Program Committee Area Chair, International Joint Conference on Artificial Intelligence (IJCAI), 2005.
- Program Co-chair, Conference on Email and Spam, 2005.
- Program Committee Area Chair, North American Association of Computational Linguistics / Human Language Technologies (NAACL/HLT), 2004.
- Program Committee Area Chair, Neural Information Processing Systems (NIPS), 2003.
- Action Editor, Journal of Machine Learning Research, 2003

  –. Founding Member of Editorial Board, 2001

  –
- Editoral Board Member, Foundations and Trends in Machine Learning, (Michael Jordan, editor), 2007–.
- Board member, International Machine Learning Society (IMLS), 2006–.
- Board member, ACM Computing Research Repository (CoRR), 2004–.

- Board member, Data Mining and Information Fusion Group, Computer Science and Telecommunications Board, The National Academies. 2005–.
- Co-organizer IPAM 2007 Workshop on "Social Network Analysis".
- Online Proceedings Chair, Neural Information Processing Systems (NIPS), 2003-2008.
- Fundraising Chair for International Conference on Machine Learning (ICML), 2003. Raised over \$40k for student travel scholarships.
- Program Committee, Empirical Methods in Natural Language Processing (EMNLP), 2004–2007.
- Program Committee, World Wide Web Conference, 2004–2005.
- Program Committee, Neural Information Processing (NIPS), 1998–2007.
- Program Committee, International Conference on Machine Learning (ICML), 1998–2007, 2009.
- Program Committee, Conference on Email and Spam (CEAS), 2004.
- Program Committee, International Joint Conference on Artificial Intelligence (IJCAI), 2007, 2005, 2003, 2001, 1999, 1997, 1995.
- Program Committee, ACM Special Interest Group on Information Retrieval (SIGIR), 2003.
- Program Committee, Conference of the American Association for Artificial Intelligence (AAAI), 1997, 1998, 2000, 2004, 2005, 2006.
- Program Committee, Uncertainty in Artificial Intelligence (UAI), 2004–2006.
- Program Committee, Association for Computational Linguistics (ACL), 2004–2007, 2009.
- Program Committee, Empirical Methods in Natural Language Processing, 2004–2006.
- Reviewer, ACM-SIAM Symposium on Discrete Algorithms (SODA), 2005.
- Panel Session member, Conference on Human Language Technology, 2004.
- Invited tutorial, Johns Hopkins, Center for Language and Speech Processing, NSF Summer School on Human Language Technology, 2003.
- Grant proposal review panel. NSF Robust Intelligence. May 2008.
- Grant proposal review panel. NSF ITR. June 2002.
- Grant proposal review panel. NSF SBIR. 2004.
- Grant proposal review panel. U. S. Department of Energy. 2005.
- Invited tutorial at Knowledge Discovery and Data Mining Conference (KDD), "Information Extraction from the World Wide Web," with William Cohen. Summer 2003.

- Program area chair, "Algorithms and Architectures" section co-chair, Neural Information Processing Systems Conference (NIPS), with Geoffrey Hinton, Chris Burges, Yoram Singer, Martin Wainwright and Alex Smola. 2003.
- Gave invited tutorial at Neural Information Processing Systems Conference (NIPS), "Information Extraction from the World Wide Web," with William Cohen. Fall 2002.
- Co-organizer NAACL/HLT 2006 Workshop on "Computationally hard problems and joint inference in speech and language processing", with Charles Sutton and Jeff Bilmes.
- Co-organizer KDD 2003 Workshop on "Record Linkage", with Sheila Tejada.
- Co-Organizer of IJCAI workshop "Text Learning: Beyond Supervision,", with Lillian Lee, Tony Jebara and Kamal Nigam). 2001.
- Co-Organizer of IJCAI Workshop "Machine Learning for Information Filtering," with Thorsten Joachims, Mehran Sahami and Lyle Ungar. 1999.
- Co-Organizer of NIPS\*98 Workshop "Integrating Supervised and Unsupervised Learning," with Rich Caruana, Virginia de Sa and Michael Kearns. 1998.
- Co-Organizer of ICML/AAAI Workshop "Learning for Text Categorization," with Mehran Sahami, Mark Craven, and Thorsten Joachims. 1998.
- Reviewer for many journals, including: Machine Learning Journal (MLJ), Journal of Machine Learning Research (JMLR), Journal of Artificial Intelligence Research (JAIR), BMC Bioinformatics, IEEE Transactions on Pattern Analysis and Machine Intelligence (PAMI), IEEE Systems, Man and Cybernetics (SMC), IEEE Computer Vision and Pattern Recognition (CVPR), Journal for the American Society of Information Science and Technology (JASIST), IEEE Transactions on Speech and Language Processing (TSLP).
- Chief Maintainer of GNUstep Project, appointed by Richard Stallman, January 1996-August 1998. GNUstep is the Free Software Foundation's effort to implement NeXT Computer Inc.'s OpenStep object-oriented GUI standard. Also made small contributions to gcc compiler and emacs editor.

# 3.2 Departmental Service Activities

- Graduate Program Committee, Computer Science Department, University of Massachusetts Amherst. 2008–2009.
- Strategic Planning Committee, Computer Science Department, University of Massachusetts Amherst. 2008–2009.
- Outreach Committee (Chair), Computer Science Department, University of Massachusetts Amherst. 2006–2008.
- Executive Committee, Computer Science Department, University of Massachusetts Amherst. 2006–2007.

- Curriculum Committee, Computer Science Department, University of Massachusetts Amherst. 2005–2006, 2007-2008.
- Diversity Committee, Computer Science Department, University of Massachusetts Amherst. 2005–2006.
- Special Events/Colloquia Committee (chair), Computer Science Department, University of Massachusetts Amherst. 2004–2005.
- Personnel Committee, Computer Science Department, University of Massachusetts Amherst. 2004–2005.
- Search Committee for Department Chair, Computer Science Department, University of Massachusetts Amherst. 2003–2004.
- Outreach Committee, Computer Science Department, University of Massachusetts Amherst. 2003–2004.
- Space Committee, Computer Science Department, University of Massachusetts Amherst. 2003–2004.
- Faculty Recruiting Committee, Computer Science Department, University of Massachusetts Amherst. 2002–2003.
- Creator and organizer of new UMass Computer Science weekly discussion series, "Research Discussion Breakfast" in which a faculty members present and discuss their research with other faculty. 2008–2009.
- Creator and organizer of new UMass Computer Science monthly discussion series, "Big Picture Advice Breakfast" in which a senior faculty member gives advice and participates in discussion with junior faculty. 2004–2005.
- Creator and organizer of new UMass Computer Science weekly seminar series, "Machine Learning and Friends Lunch". Average attendance: 50 students, faculty and staff. 2002–.
- Graduate Student Representative, Computer Science Department, University of Rochester. Attended faculty meetings, representing the graduate students. 1993–1994.
- Curriculum Committee, Computer Science Department, University of Rochester. 1992–1993.
- Admissions Committee, Computer Science Department, University of Rochester. 1991–1992.

## 3.3 Software Packages and Services

- FACTORIE. A toolkit for probabilistic programming. Implements factor graphs, MCMC inference, discriminative training. Innovative approach based on combining declarative and procedural knowledge. Extremely scalable and efficient.
- Rexa. A Web portal for computer science research, supporting search and analysis for research papers, people, conferences, journals, universities, conferences, grants, and the links between them. Launched as http://www.rexa.info in April 2006.

- MALLET. Machine Learning for Language Toolkit created at University of Massachusetts Amherst. Released as Open Source. Personally wrote more than 30k lines of Java; now includes about 50k lines. In active use at MIT, UPenn, Berkeley, Stanford, CMU, and other places, including China, France, England. Fall 2002–present. (168 citations in Google Scholar)
- C4. Co-architected and helped develop first stages of the foundation classes for WhizBang's machine learning software libraries. System eventually grew to over 1 million lines of Java code. 2000-2002.
- Cora. Research paper search engine, an early contemporary of CiteSeer.org, 1998–2002.
- Libbow. Software package for statistical text classification, clustering and retrieval. Has thousands of users from all over the world. Subject of an article by John Udell in InfoWorld magazine. Nearly 100k lines of C. Released under GPL. 1996-2000. (462 citations in Google Scholar)
- RLkit. Software library that makes it easy to test various reinforcement learning algorithms in different environments with different sensory-motor systems. Objective-C and Guile. 1992-1995.
- Persia. Toolkit for building virtual reality environments on SGI Onyx RealityEngine. The kit is based on SGI's Performer library and an embeddable Scheme interpreter. 1994-1995.

# 4 Advising and Teaching

#### 4.1 Doctoral Committees

- [1] Aron Culotta, University of Massachusetts Amherst. Chair. Graduated 2008.
- [2] Charles Sutton, University of Massachusetts Amherst. Chair. Graduated 2008.
- [3] Wei Li, University of Massachusetts Amherst. Chair. Graduated 2007.
- [4] Hoifung Poon, University of Washington. Adviser, Pedro Domingos.
- [5] Nick Matsakis, MIT. Adviser, David Karger.
- [6] Daniel Lowd, University of Washington. Adviser, Pedro Domingos.
- [7] Razvan Bunescu, University of Texas at Austin. Adviser, Ray Mooney.
- [8] Hal Daume, University of Southern California. Adviser, Daniel Marcu. Graduated 2006.
- [9] Kathryn Flack, **Linguistics Department, University of Massachusetts Amherst**. Adviser, John McCarthy. Graduated 2008.
- [10] Jerod Weinman, University of Massachusetts Amherst. Advisers, Erik Learned-Miller and Allen Hansen. Graduated 2007.
- [11] Brendan Burns, University of Massachusetts Amherst. Adviser, Oliver Brock. Graduated 2007.
- [12] Donald Metzler, University of Massachusetts Amherst. Adviser, Bruce Croft. Graduated 2007.
- [13] Xing Wei, University of Massachusetts Amherst. Adviser, Bruce Croft. Graduated 2007.

- [14] Jennifer Neville, University of Massachusetts Amherst. Adviser, David Jensen. Graduated 2006.
- [15] Xiaoyan Li, University of Massachusetts Amherst. Adviser, Bruce Croft. Graduated 2006.
- [16] David Stracuzzi, University of Massachusetts Amherst. Adviser, Paul Utgoff. Graduated 2006.
- [17] Andy Arnt, University of Massachusetts Amherst. Adviser, Shlomo Zilberstein. Graduated 2005.
- [18] Andrew Schein, University of Pennsylvania. Adviser, Lyle Ungar. Graduated 2005.
- [19] Kamal Nigam, Carnegie Mellon University. Adviser, Tom Mitchell. Graduated 2001.
- [20] Kristie Seymore, Carnegie Mellon University. Adviser, Roni Rosenfeld.

# 4.2 Current Graduate and Undergraduate Advisees

- [1] Xuerui Wang (UMass Ph.D. student). Group, role and topic discovery in social network analysis. 2004–.
- [2] Kedar Bellare (UMass Ph.D. student). Discriminatively-trained alignment models. 2004-.
- [3] Pallika Kanani (UMass Ph.D. student). Resource-bounded information gathering for coreference and information extraction. 2005—.
- [4] Greg Druck (UMass Ph.D. student). Semi-supervised learning for information extraction. 2005-.
- [5] David Mimno (UMass Ph.D. student). Social network analysis and corpus discovery using structured topic models. 2005–.
- [6] Michael Wick (UMass Masters/Ph.D. student). Efficient inference in learning in relational factor graphs, especially for entity resolution and information integration 2005—.
- [7] Karl Schultz (UMass Masters/Ph.D student). Joint inference for information extraction, natural language processing, dialog.
- [8] Jason Naradowsky (UMass Ph.D. student). Latent variable models of natural language.
- [9] Limin Yao (UMass Ph.D. student). Information extraction and probabilistic databases.
- [10] Sameer Singh (UMass Masters/Ph.D. student). Accurate and scalable entity resolution.
- [11] Megan Day (UMass undergraduate). Bibliometrics and topic analysis of bio-medical research literature.

#### 4.3 Past Graduate and Undergraduate Advisees and Research Supervised

- [1] Robert Hall (UMass Masters student). Markov-chain Monte Carlo methods for coreference and parsing. 2006-2008. (Now PhD student at Carnegie Mellon University.)
- [2] Matthew Marzilli (UMass undergraduate student). Statistical models of canonicalization from multiple extracted mentions. (Now PhD student at UMass in Software Engineering.)

- [3] Gary Huang (UMass Ph.D. student). Interactive information extraction and active learning. 2003–. (Now jointly advised with Erik Learned-Miller. Fall 2006 on internship at Google.)
- [4] Michael Sindelar (UMass undergraduate student). Feature bagging for regularization in training conditional random fields. (Michael was then first-author on an accepted paper to EMNLP Conference, 2006.)
- [5] Ron Bekkerman (UMass Ph.D. student). Co-reference of entities across email and the Web. 2003–2005. (Now working with James Allan.)
- [6] Benjamin Wellner (UMass Ph.D. student). Markov random fields for co-reference resolution. 2002–2004. (On long-term parental leave.)
- [7] Michael Mammarella (UMass Masters student, now Ph.D. student at UCLA). Active and targeted spidering of the Web. 2003-2004.
- [8] Ben Lambert (UMass undergraduate, now in Ph.D. program at CMU). Extracting a database of people relations from the World Wide Web. (Senior honors thesis.) 2002–2003.
- [9] Nadia Ghamrawi (UMass Ph.D. student). Conditional probability models for multi-labeled data. 2003–2004.
- [10] Hema Raghavan (UMass Ph.D. student). Synthesis project. 2003. (Joint with James Allan)
- [11] David Blei (UC Berkeley Ph.D. student, now Assistant Professor at Princeton) and Drew Bagnell (CMU Ph.D. student, now Research Assistant Professor at CMU). Scoped learning for integrated local/global learning with language and layout. 2002.
- [12] Kamal Nigam (CMU Ph.D. student, now Assistant Director, Google Labs, Pittsburgh). Document classification and clustering with unlabeled data and EM, (with Tom Mitchell). 1998–2001.
- [13] Kary Meyers (CMU Ph.D. student). Language modeling with the Dirichlet-Multinomial (with Larry Wasserman). 2000.
- [14] Nicholas Roy (CMU Ph.D. student, now Assistant Professor, MIT). Active learning with statistical sampling. 2000.
- [15] Alexandrin "Sasha" Popescul (U Penn Ph.D. student, now at AskJeeves.com). Distributional clustering for integrating site-level information into document classification. 2000.
- [16] Andrew Ng (UC Berkeley Ph.D. student, now Assistant Professor, Stanford). More accurate posterior probabilities for Bayesian classifiers. 2000.
- [17] Thomas Minka (MIT Ph.D. student, now Research Scientist, Microsoft). Learning distance metrics classifiers trained with labeled and unlabeled data. 1999.
- [18] Kristie Seymore (CMU Ph.D. student, now COO software start-up company). Information Extraction with hidden Markov models. 1998-2000.
- [19] Jason Rennie (CMU undergraduate, now Ph.D. student at MIT) Efficient spidering with Reinforcement Learning. 1998-1999. Document classification with large negative classes. 1997.

- [20] Doug Baker (CMU Ph.D. student, now running a lab at Nokia). Word merging for document classification. 1998.
- [21] Jessica Bayliss (Rochester Ph.D. student). Reinforcement learning with short-term memory. 1996.
- [22] Josh Richardson (Rochester undergraduate). Building graphical simulations of highway environments. 1995.
- [23] Matt Hohlfeld (Rochester undergraduate). A Scheme interface to SGI's 'Performer' Graphics 3D Library. 1995.
- [24] Jennifer Alexander (Rochester undergrad). Reinforcement learning for a cheetah learning to stalk and pounce. 1994–1996.
- [25] Chandler Chao (Rochester undergraduate). Learning to perform tasks with deictic primitives on bitmap-vision perception. 1994.
- [26] Mia Stern (Rochester undergraduate, went on to get a Ph.D. from UMass). Reinforcement learning exploration strategies. 1992.
- [27] Jason Anderson (Rochester undergraduate). A machine learning simulator implemented in Objective C. 1992.

### 4.4 Teaching Experience

- Instructor, "Our Networked World," UMass CMPSCI 191c, Newly-created UMass undergraduate-level three-credit course in economic/political/social networks, graph properties, generation, clustering, navigation, privacy and behavior. Co-instructor with David Jensen. Fall 2008.
- Instructor, "Introduction to Natural Language Processing," UMass CMPSCI 585, UMass graduate and undergraduate-level three-credit course with lectures, quizzes, readings, class project, programming and writing assignments. Fall 2007, Spring 2004, Fall 2004.
- Instructor, "Introduction to Problem Solving with Computers," UMass CMPSCI 121, UMass undergraduate-level three-credit introduction to computer programming. 150 students. Fall 2006.
- Instuctor, "H15 Honors Section," Honors section to CMPSCI 121, teaching the "big ideas" of computer science, including computational complexity, finite-state automata, parsing, search, cryptography, robotics, uncertainty.
- Instructor, "Computational Linguistics," UMass CMPSCI 591N. Newly-designed interdisciplinary
  course for linguistics and computer science undergraduates and graduate students, covering computational approaches to parsing, anaphora resolution, verb sub-categorization, lexicon discovery, semantics and pragmatics. Course designed during Lilly Fellowship. 22 students, from both departments.
  Spring 2006.
- Instructor, "Introduction to Problem Solving with Computers," UMass CMPSCI 121, UMass undergraduate-level three-credit introduction to computer programming. ~120 students. Spring 2005.

- Instructor, "Computational Social Network Analysis," UMass CMPSCI CS791S, graduate-level threecredit course with readings, discussion, written assignments and class project. Co-taught with David Jensen. Fall 2003.
- Instructor, "Statistical Information Extraction," UMass CMPSCI 791E graduate-level three-credit course with lectures, quizzes, readings and class project. Spring 2003.
- Guest Lecturer, "Information Retrieval," UMass CMPSCI graduate-level course. Fall 2002.
- Guest Lecturer, "Artificial Intelligence," UMass CMPSCI graduate-level course. Fall 2002.
- Guest Lecturer, "Advanced Topics in Information Retrieval," UMass CMPSCI graduate-level seminar. Lectures on maximum entropy and finite state models. Fall 2002.
- Project-customer guest, "Software Engineering", UMass CMPSCI undergraduate-level course. Fall 2002.
- Instructor, "Machine Learning for Text Mining", CMU CS graduate-level course. Semester-long course with lectures and class project. Co-taught with Tom Mitchell, Fernando Pereira and William Cohen. 2000.
- Guest Lecturer, "Machine Learning", CMU CS graduate-level course. (Main instructor was Roni Rosenfeld). 2001.
- Guest Lecturer, "Machine Learning", CMU CS undergraduate-level course. (Main instructor was Sebastian Thrun). 1999, 2000.
- Guest Lecturer, "Information Retrieval", CMU CS graduate-level course. 1998, 1999. (Main instructor was Yiming Yang.)
- Instructor, "Introduction to Computer Systems", University of Rochester, (CSC104). Fall 1995, Fall 1991. Introductory programming class for non-majors. Taught two lectures per week for entire semester. Redesigned course lecture format for greater interactivity and student involvement; new design was then used by other instructors.
- Teaching Assistant and Lecturer, "Artificial Intelligence", University of Rochester. Spring 1992. Lectured one fourth of the classes. Assistant for Professor Chris Brown.
- Teaching and Project Assistant, Rochester First-Year Graduate Student Boot-Camp Course (CSC400), 1992. Organized machine learning component.
- Undergraduate teaching assistant, "Artificial Intelligence", "Operating Systems", Dartmouth College. 1988–1989. For Professors Peter Sandon and Matt Bishop.

## 4.5 Public Tutorials, Oral and Written

Collated information, duplicated from above.

• Invited tutorial at Neural Information Processing Systems Conference (NIPS), "Information Extraction from the World Wide Web," with William Cohen. Fall 2002.

- Invited tutorial at Knowledge Discovery and Data Mining Conference (KDD), "Information Extraction from the World Wide Web," with William Cohen. Summer 2003.
- Invited tutorial, Johns Hopkins, Center for Language and Speech Processing, NSF Summer School on Human Language Technology, 2003.
- Invited tutorial, Johns Hopkins, Center for Language and Speech Processing, NSF Summer School on Human Language Technology, 2004.
- Charles Sutton and Andrew McCallum. "An Introduction to Conditional Random Fields for Relational Learning." In Introduction to Statistical Relational Learning. Edited by Lise Getoor and Ben Taskar. MIT Press. 2006. (87 citations in Google Scholar)
- Andrew McCallum. "Information Extraction: Distilling Structured Data from Unstructured Text." ACM Queue, volume 3, number 9, November 2005. (An overview of information extraction by machine learning methods, written for people not familiar with machine learning, especially CTOs and other people in business.) (30 citations in Google Scholar)

## 5 Personal Information

• Born: 1967

• Nationality: United States of America

• Marital Status: Married, two children

• Languages: English (Native language), French (9 years of experience; attended one semester in University of Toulouse, France), Greek (Limited knowledge).
