Using the Anti-racism Digital
Library and Thesaurus to
Understand Information Access,
Authority, Value and Privilege

Anita S. Coleman, *San Jose State University*

The Anti-racism Digital Library seeks to serve as a clearinghouse for information resources about people, groups, and projects who are building inclusive and caring communities. Anti-racism can be defined as some form of focused and sustained action, which includes inter-cultural, inter-faith, multi-lingual and inter-abled (i.e. differently abled) communities with the intent to change a system or an institutional policy, practice, or procedure which has racist effects. Using the Anti-racism Digital Library and Thesaurus to Understand Information Access, Authority, Value and Privilege

Anita Coleman, Ph.D.

Curator, Anti-Racism Digital Library <http://endracism.info/>

This is the text of a talk given at the 2017 Annual Conference of the American Theological Librarians Association in Atlanta, Georgia, June 17, 2017 and preprint of the paper submitted to the *Proceedings*.

I am excited by the new ACRL Framework for Information Literacy. The six threshold concepts about information mirror my experiences as a researcher studying the representation of anti-racism in bibliographic information systems. Anti-racism, in general, is a great concept to use when teaching information literacy. Today, I will share how antiracism information literacy can be taught and learned as part of theological and religious studies education. Since our conference is in Atlanta, I want to begin with two stories about the scholar DuBois who lived here.

The first story

“Under the leadership of W. E. B. Du Bois, Atlanta became a hub of early American sociology with rigorous empirical studies of black communities. One hundred years later, that history has been pushed to the sidelines.” (Wright II, 2016a) As Wright recounts it, it was 1995 and he was a young graduate student in the University of Chicago feeling uncomfortable, sitting alone in the library, recalling his childhood reading of DuBois’ *The Philadelphia Negro* in his grandparents’ home: “if the Chicago School of Sociology studies were conducted in the 1920’s and the Pittsburgh survey was conducted in 1907, why are they considered the earliest and most important urban sociological investigations? Why is W. E. B. Du Bois’s *The Philadelphia Negro*, published in 1899, not considered the first urban sociological investigation or even acknowledged by sociology instructors or in sociology textbooks? ... began to review the existing literature, singularly focused on proving why Du Bois’s *Philadelphia Negro*, not the Pittsburgh survey, was the first urban sociological study conducted in the United States.” (*ibid*). Using the tools of his discipline, Wright showed how DuBois’ work was co-opted and marginalized. His findings are detailed in the book *The First American School of Sociology: W.E.B. DuBois and the Atlanta Sociological Laboratory* (Wright II, 2016b).

The second story

A year earlier, in 2015, *The Author Denied: W.E.B. DuBois and the Birth of Modern Sociology* was published by the University of California Press. The book excerpt reads thus: “In this groundbreaking book, Aldon D. Morris’s ambition is truly monumental: to help rewrite the history of sociology and to acknowledge the primacy of W. E. B. Du Bois’ work in the founding of the discipline. Calling into question the prevailing narrative of how sociology developed, Morris, a major scholar of social movements, probes the way in which the history of the discipline has traditionally given credit to Robert E. Park at the University of Chicago, who worked with the conservative black leader Booker T. Washington to render Du Bois invisible. Morris uncovers the seminal theoretical work of Du Bois in developing a “scientific” sociology through a variety of methodologies and examines how the leading scholars of the day disparaged and ignored Du Bois’s work Morris delivers a wholly new narrative of American intellectual and social history that places one of America’s key intellectuals, W. E. B. Du Bois, at its center. ... *The Scholar Denied* is a must-read for anyone interested in American history, racial inequality, and the academy.” (University of California Press, 2015)

Our Intellectual Traditions and Epistemic Racism

What we see from these two stories is that there is a ‘black’ sociological tradition that grew up alongside ‘white’ sociology and the mainstream did not recognize the existence of two parallel sociologies. Library systems too failed. I searched *WorldCat* for *The Philadelphia Negro*. As an example, the 1996 edition of the book, bound with another, is described thus: *The Philadelphia*

Negro is the first, and perhaps still the finest, example of engaged sociological scholarship-the kind of work that, in contemplating social reality, helps to change it. (see Appendix 1).

In the USA, ‘Black’ studies have been legitimated as departments in our institutions of higher learning and also as subject headings in information infrastructures such as the *Library of Congress Subject Headings* e.g. Black Theology. The anti-racism scholar Alana Lentin notes that “due to ‘epistemic racism’ in Australia, disciplines such as sociology or cultural studies do not have [a similar] institutionally legitimated black tradition.” [Lentin, 2017] However, this does not mean that epistemic racism is absent in the USA. It is worthwhile to revisit the meaning of epistemology in the light of anti-racism. Epistemology is a philosophic theory of the method or basis of human knowledge, exploring questions such as how knowledge is acquired and what assumptions are made in the historical development of knowledge. “This area of inquiry is critical to understanding racism because the dominance of western knowledge systems produces and promotes beliefs about racialized culture as inferior to western culture.” (Reading, 2013) Three traditions: Classical Greek-Roman culture, Christianity, and the scientific method are privileged while other ways of knowing and seeing deemed inferior and marginalized. This is epistemic racism. So there is an important point to note here. All of us, and it doesn’t matter what color our skin is – as products and willing participants of western education – are complicit in the practice of epistemic and other forms of racism as well as the processes of racialization.

‘Anti-racism’ in *The LCSH*

Coleman (2016) discussed how the *Library of Congress Subject Headings* (LCSH) contributes to institutional and systemic racism. There is only one LCSH for ‘Anti-racism’ and no relationship list. Theology is complicit in the creation of the construct of race and various expressions of racism such as the Doctrine of Discovery, Slavery, Apartheid, Nazism, as well as in the efforts to defeat it with anti-racism such as the *La Resistance*, anti-slavery/abolition, Civil Rights and Racial Reconciliation movements. ‘Race relations’ was authorized and now has literally hundreds of other related headings, including ‘Racism’ which was suggested as a replacement for ‘Race Discrimination’ but remains together (Berman, 1973, 1993). Even though the old *LCSH* of the ‘Race Problem’ also known as the ‘Negro Problem’ are no longer used, ‘race’ problems are much more visible than the solutions of ‘Anti-racism.’ For example, a book on ‘Anti-racism education’ has been assigned “Race Relations – Study and Teaching” and the behaviors and beliefs that are an integral part of ‘Anti-racism’ are not always assigned this subject heading. Instead they are given ‘Racism’ or similar subject headings. The *Anti-racism Digital Library and International Anti-racism Thesaurus* (ADL) is an effort to build a clearinghouse of anti-racism resources as well as to develop and use the language of *anti-racism* in order to mitigate the unintended structural racism bias of library information infrastructures, such as the *LCSH*. Discovering and naming the ‘Anti-racism’ vocabulary will make solutions to the ‘race’ problem better understood. Assigning ‘anti-racism’ subject headings will improve intellectual access and alleviate many other bias problems such as faulty generalization, inappropriate terminology, the privileging of universalism, white as normative, and hegemony over diversity in order to achieve efficiency, ghettoization, treating as exceptions, omission, being procrustean, and more.

‘Anti-racism’ and Information Literacy

In this paper, I highlight some of the ADL developments. In the process, I will show the ADL can be used in theological libraries with the new ACRL Information Literacy framework. Not just for students but also for ourselves for informational professional growth, research, and the promotion of our own critical thinking about information access, authority, value, and privilege.

As I mentioned earlier, I am excited by the new ACRL Information Literacy (IL) framework (2016). In curating the ADL, I find the 6 threshold concepts described in the new framework playing out over and over again: 1) Authority is constructed and contextual; 2) Information creation as a process; 3) Information has value; 4) Research as inquiry; 5) Scholarship as conversation; and 6) Searching as strategic exploration.

Anti-racism is an excellent topic for use with the development of these new literacy skills.

Example: Biblical word study of race: Examine one of the key texts that is often used in conversations about race, **Revelation 7:9** (ESV): *After this I looked, and behold, a great multitude that no one could number, from every nation, from all tribes and peoples and languages, standing before the throne and before the Lamb, clothed in white robes, with palm branches in their hands . . .* The underlined words, when translated correctly from the original language, reveal no race! Nation = *ethnos* Tribe = *phylē* People = *laos* Language = *glossa*.

That's a quick example. Students can be assigned Bible word studies of the term "race" at levels suitable for both beginners and experts. Experts can be asked to trace the origins of the concept of 'race' in primary and secondary sources beyond the Bible while beginners are guided through a limited and pre-selected list of texts. This is an excellent way to teach and learn new information literacy skills as well as the religious subject. Appendix 1 is an anti-racist writing exercise, a small example of how we can begin to dismantle racism by changing the language.

Racialization is another concept/topic that can be used to teach information literacy as well as in the professional development of librarians of all kinds engaged in tasks as varied as cataloging and instruction.

As I continue on the ADL structure, I hope that other concepts and ideas will come to your mind.

The Anti-racism Digital Library Thesaurus and Descriptors for People Groups

The ADL is dedicated to the victims of the 2015 Charleston AME church shooting. I mostly work with local community and church groups and so the structure is simple. There are ***Collections*** with items (resources), ***About***, ***Glossary***, ***Thesaurus*** (pages), and a form to ***Contribute an item***, which can be an information resource such as confession, prayer, story, etc.

Critical race theory and findings from anti-racism education drives the research and development of the library and thesaurus. For idealists, in critical race theory, language matters. A rich and actively growing vocabulary for racism – e.g. micro-aggressions – without corresponding anti-racism solutions, only continues to perpetuate racism. Hence developing the language of anti-racism and understanding it becomes pre-eminent, including the descriptors for people groups. Color labels such as blacks, whites, and people of color are a product of thinking purely in terms of a social myth and have become a technique for increasing political power. They build group identity and cross-cultural solidarity, but findings show that grouping people as whites, blacks, and people of color also perpetuates discriminatory codes which give pre-eminence to skin color

over other meaningful markers. Additionally, they cause despair, disunity, continuing bias. They don't dismantle racism and whether they will help increase economic and educational equality, bring racial equity, and achieve racial justice remains in the balance. In libraries, anti-racism work which can be done by facilitating critical information literacy has the potential for easing inequities. In addition to teaching anti-racism information literacy using anti-racism, catalogers and metadata creators can contribute, by changing the existing vocabularies for people groups.

The *Library of Congress Subject Headings* (LCSH), as we all know, is often used to describe people as 1) intended audiences (e.g. Children), 2) creators and contributors (e.g. Book editors), and subjects (e.g. Asian Americans). In 2013, the Library of Congress began to separate the three purposes and create a new, controlled vocabulary for the first two only. The first edition of the *Library of Congress Demographic Groups Terms* (LCDGT), published last year contains 827 authorized terms. In the LCDGT, "Whites" is not an authorized term for intended audiences or creators and contributors. "White supremacists" is. You will also find the term "Blacks," but you won't find "People of color." Since authorized terms are selected using the principle of literary warrant this means that only the most common terms used in content (books, journal articles) become preferred headings. That "Whites" did not make it is something to which those interested in anti-racism should pay attention. It reinforces related research findings from over a decade and it offers catalogers, indexers, metadata managers and similar librarians a rare opportunity as well.

"Antiracism calls white people to a negative task: critiquing racism and white privilege and acting against them. It is difficult to persuade white people to join a cause in which their identity is deconstructed without a positive rebuilding." (Paris and Schoon, 2007, p. 286). From their qualitative study of students in an evangelical, mid-western college Paris and Schoon concluded that "rather than offering a new white identity derived from antiracist philosophy (such as "antiracist," "white ally" or "post-white"), antiracist teachers may tap other aspects of identity as motivators for action against racism. Motivating people to work against racism based upon a particular group's deepest identity (be it religious, political, geographical, and so forth), may provide more positive and lasting identity attachments." (p. 300) Studies investigating how race, religion and politics intertwine have reiterated this. However, minority status/identity politics is the driving force for Blacks. Blacks, with or without faith, are more committed to racial group membership while whites are more tied to denominational affiliation (Shelton and Emerson, 2012).

Privilege continues to be a hallmark characteristic of whiteness. From a global or psychological point of view, though, there are many different kinds of privilege besides white skin privilege such as male, Christian, heterosexual, ability, and social class. Discrimination based on social class is more common since a large number of people in the world are poor. Similarly, most of the world is Christian; males are favored in a number of cultures; heterosexuality tends to be the norm as also ability versus disability. Skin color privilege though is a bit unique because it has been used to perpetuate the construction of one human race into two if not many others. Both "whiteness" and "blackness," are constructed through education and culture and maintained through politics. Such whiteness often transcends and assimilates skin color privilege: Rwanda's 1994 genocide, India's caste system, Brazil's *embranquecimento* (palmitagem). It is no wonder, then, 'White Supremacists' gets conflated to Whites and why some people don't and/or cannot identify as White!

It is difficult enough to call anybody – of any color - to anti-racism given the universal preference for lighter skin (colorism) and the heterogeneity and complexity of racism. When we put people into color boxes to describe them, we lose. The time has come to put aside the color labels ‘Whites’ and ‘People of Color.’ I have mixed feelings about the term Blacks – it has been legitimated; blackness and black identity like whiteness is constructed but appears to be needed. However, we can encourage the media and in our own in-house reports start to use ethnicity, ancestry, culture, education, class, faith/religion, occupation/field of activity, national/regional origin and location, language, and similar others. *Poor Whites* subject heading has an equivalent *Poor Blacks* subject heading (*LCSH*). *Working class whites* didn’t have an equivalent *Working class blacks* but had two headings (*working class* and *blacks*); yet, we know that intersectionality is one of the biggest challenges in achieving justice be it racial or economic.

Whites, however, continues to be used in WorldCat as a subject heading. The figure below shows the total first and then the yearly number of books that have received a *Library of Congress Subject Heading* of *Whites* and *Blacks* from 2010 to 2017. As you can see, there are more books with *Blacks*; the norm is *White* and hence, often not explicitly assigned.

The *ADL Thesaurus* seeks to describe anti-racism in all its fullness in order to fuel the scorching of race and ignite cooperation for justice and peace by discovering and crafting a new vocabulary for describing complex humanity. The goal for this thesaurus is that it can also be used in everyday language as well as for assigning subject headings in library catalogs, and indexing databases. The *Glossary* is one of the first steps towards developing the *Dictionary-Thesaurus*. Terms and phrases, when completed, will describe anti-racism concepts, policies, strategies, and movements, not just in the U.S.A. but in the *global arena* as well. Terms for people groups and genre/form will come from two other sources: *Library of Congress Group Demographic Terms (LCGDT)* and *ATLA Genre Forms for Religious Works/Library of Congress Genre Form Terms*.

The rare opportunity for catalogers, indexers, and similar professionals is to help develop the concept of anti-racism by contributing new subject headings when they note anti-racist behaviors and practices that are not already there, and identifying relationships between them. If you're not exactly sure how this can be done, it will become clearer once I share a few anti-racism concepts and behaviors Bystander Anti-racism and Tolerance, Inclusion and I will do this towards the end.

Anti-racism Digital Library Glossary

The Anti-racism Digital Library Glossary brings together words from diverse disciplines. Works by anti-racism scholars, inclusive style guides from anti-racist organizations, and *Critical Race Theory* (CRT) by Ricardo and Stefancic (2001) are major sources of the *Glossary*. The inclusion terms for people are still under investigation and the *Glossary* is continuously updated. CRT terms are given in **boldface black, including some of its basic tenets**. Additionally, the *Scriptures* of diverse faith traditions, selective texts from Christian liberation theologies, scholarship about anti-racism, comparative religion, human rights, multicultural education, and positive peace are included. The ideas about categorization (frames, idealized cognitive models, metaphors, bias, prototypes) are influenced by George Lakoff's *Women, Fire and Dangerous Things: What Categories Reveal About the Mind* (1987).

I share two examples, one from an emerging discipline and another from an established one, sociology, below. These can be tailored to teach/learn any of the IL threshold concepts such as authority is constructed, and scholarship as conversation, or even research as inquiry.

Linguicism /Languagism (language discrimination) refers to Linguistic Human Rights, a growing area of study which combines the study of language as a central dimension of ethnicity, along with national and international law. There are many types of language discrimination:

- Linguistic Imperialism
- Accent Prejudice and Dialect Prejudice
- Drawl
- English-Only Movement
- Language Myth
- Language Planning
- Multilingualism
- Native Speakerism
- Prestige

Nuance Theory is the view that one may determine the essential qualities of a group such as women, and that difference from that essential core may be treated as slight variations or shades of difference. Recently there has been some backlash. A paper about nuance theory that was presented at the American Sociological Conference was quickly downloaded over 12,000 times! Comments on the site are instructive about how academic knowledge is contested and constructed: "Social science is an oxymoron - and, a deception. At best, it should be called social studies. But, the truth is it's just another bogus 'discipline' designed to indoctrinate people with humanist ideology as substitute for critical thinking." Similar conversations exist in the religious

studies and theology arenas. For example, the Anti-racism Digital Library has brought together many resources from the mainline denominations about anti-racism in specific kinds of collections which can be used to teach/learn the new IL.

Anti-racism Digital Library: Collections

Collections bring together information resources created by diverse people, groups and projects that are adapting anti-racism to help and build inclusive and caring communities. Findings from recent anti-racism research are used to name the collections. There are two kinds of collections. One that showcases what specific groups or individuals are doing and the second offers resources that can help us construct new language for antiracism.

Example: **Presbyterian Women Collection** and a recent resource: *Bias Free Guidelines. A Presbyterian Women/Horizons style sheet addendum of guidelines for writing with inclusive and socially just language.* <http://endracism.info/items/show/195>

The Intercultural Community (PC (USA) Collection and recent resources: *Well Chosen Words! Inclusive Language With Reference to the People of God and Expansive Language With Reference to God.* A PC (USA) tri-fold brochure. <http://endracism.info/items/show/198>

Facing Racism. Policy, Guides, and more of the PC (USA)'s 2016 anti-racism initiative.

Collections such as the *Anti-racist Identity, Racial Imagination, American Identity, Christian Imagination, Intersectional Invisibility, Reclaiming Ourselves,* and *American Myths* offer new language for fueling the human imagination with concepts and categories that describe the essential humanity beyond 'color labels' based on skin color and phenotypic variations.

What is in an ADL Collection? How can it be used to teach IL?

Each collection contains information resources in 7 genres. Take the *Christian Imagination* collection as an example which currently, has a total of 13 resources in these 7 genres such as:

- 1) Genre: Research article/study – Resource: Jenell William Paris and Kristin Schoon, “Antiracism, Pedagogy, and the Development of Affirmative White Identities Among Evangelical College Students,” *Anti-Racism Digital Library*, accessed September 22, 2017, <http://endracism.info/items/show/75>
- 2) Genre: Bible Studies – Resource: On Scripture - The Bible, “Jesus is woke and we should be too,” *Anti-Racism Digital Library*, accessed September 22, 2017, <http://sacred.omeka.net/items/show/222>.
- 3) Genre: Books or Book Reviews – Resource: Jonathan Tran, “The New Black Theology: Retrieving Ancient Sources to Challenge Racism,” *Anti-Racism Digital Library*, accessed September 22, 2017, <http://endracism.info/items/show/108>
- 4) Genre: Exercises/Open Educational Resources – Resource: Anita Coleman, “Building an Inclusive, Caring Community: Unveiling Perception and the Christian Identity,” *Anti-Racism Digital Library*, accessed September 22, 2017, <http://endracism.info/items/show/65>.
- 5) Genre: Church Confessions/Policy - Resource: “Love Thy Neighbor as Thyself,” *Anti-Racism Digital Library*, accessed September 22, 2017, <http://endracism.info/items/show/148>.

6) Genre: Key Bible Verses - Anita Coleman, "Discipleship and Diversity in the Bible," *Anti-Racism Digital Library*, accessed September 22, 2017, <http://endracism.info/items/show/211>

7) Genre: Stories, narratives, art - Resource: "Women's March 2017 (Signs)," *Anti-Racism Digital Library*, accessed September 22, 2017, <http://endracism.info/items/show/205>.

Bystander Anti-racism

Bystander anti-racism is an anti-racism behavior and it is also another topic that can be used to develop information literacy as it has gained popularity in recent years. The aim of bystander anti-racism is to shift social norms toward intolerance of everyday racism. It appears to displace race and challenge racism. The problem with bystander anti-racism is that it constructs racist acts as 'deviant' i.e. casual racism. It is not engaging with the deeper injustices or halting white dominance or supremacy. Also, bystander anti-racism is seen as overreaction if a member of the same ethnic group who is the racism target engages in it. So it tends to reinforce or center whiteness in anti-racism and continues the property interest in whiteness i.e. white skin, white identity are economically and otherwise valuable. (Lentin, 2017).

Tolerance and Unlearning it for Inclusion and/as Anti-racism

Tolerance, like Inclusion, is an anti-racism belief/value. However, many resist it and ask: "Who wants to be tolerated? I want to be accepted, respected, fully included." King and Springwood, (2001) in their book present findings and discuss the intersections of signification, power, and race, specifically the use of Native American mascots in college sports. Researchers found that it is not enough to teach tolerance, "what might best be described as pluralistic and superficial understandings of difference that celebrate diversity and too often dovetail with dominant interests and ideologies"; this is what CRT calls interest convergence when racial justice is pursued only when it benefits the dominant group.

Increasing Anti-racism Information Literacy (AIL)

I found the new ACRL IL framework to be an indicator of the way in which I progressed from being a novice or beginner in 'anti-racism' to more of an 'expert.' Information Authority, Access, Value, and Privilege took on a greater depth of meaning in light of anti-racism. My area of library specialization is intellectual access, specifically how can metadata, subject headings, thesauri and similar tools improve access to content. I was aware of the racial divide statistics about digital information and information technology access and use just as I knew about the biased and prejudiced subject headings. But I hadn't realized how much of this is structural, built into our systems because of epistemic racism. Similarly, I was aware of privilege but learning about white privilege in the church, for example, led me to consider how information privilege exists. Appendix 4 outlines some examples for what I now call "anti-racism information literacy.

Conclusion

- 1) Anti-racism is a great topic for developing critical information literacy skills, be it that of the student or the teacher-librarian. Categorization is a fundamental human activity and

we all use categories and tend to discriminate whether we are aware of it or not. Part of teaching intellectual access means we become aware of our own implicit bias as well as learning to recognize bias in our information infrastructures such as the library catalog, reference databases, thesauri, and subject headings.

- 2) Anti-racism Information Literacy means teaching about the process of racialization as well as epistemic racism – students are equipped with the tools to identify the social construction of race or races, recognize, engage, challenge, the reconstructions of racial identities, ideologies and hierarchies. Like people, issues too are racialized (welfare, domestic violence, housing, immigration). Racialization is a fluid process.
- 3) Anti-racist teaching is about more than recognizing difference or even stereotypes. Anti-racism using the new ACRL framework in theology and religious studies will develop pedagogy and incite professional development that directs attention toward the disruption of white supremacy as a structured social system so that inequities can be corrected.
- 4) Racism and racialization shape and are shaped by schools and thus librarians are in a unique position to challenge white normativity as well as address systemic bias.
- 5) Anti-racism Information Literacy articulates, makes visible, and teaches how different communities have been racialized differently – Euro-Americans, Native American, African Americans, Asian Americans, Hispanics, and now MENA (US Census 2020)
- 6) Anti-racist information literacy concerns itself with the sites of pedagogy that matter to those it seeks to hail in the classroom.
- 7) Anti-racist teaching must join the key conflicts of the day, by having a strong presence with peace and justice work.

Appendices 1 through 4 provide a simple exercise, the learning outcomes from this paper, the anti-racism vocabulary that has been developed, and some examples for increasing anti-racism information literacy.

Appendix 1: Building an Anti-racist Vocabulary Exercise

The following sentences employ racist language and values. Please identify and underline the racist terminology then rewrite the sentence using antiracist language. Example:

82 of the students in SF public schools are minority students

Antiracist Rewrite:

82 of the students in SF public schools are students of color

What else can we use instead of students of color?

Some Possible Answers:

students from historically marginalized groups; students from the subordinate groups

Challenge: Librarians, Catalogers, Indexers, can you suggest some alternate terms from the current literature or diverse library contexts?

Appendix 2: Learning Outcomes

Become informed about ways to collaborate with the *Anti-racism Digital Library/Thesaurus*

- About, Glossary, Thesaurus Pages, Collections, Contribute

Increase understanding of **anti-racism information literacy** for racial equity and justice

- Concepts: Anti-racism, Bystander anti-racism; Epistemic racism;

Be inspired to think about ways to use *ADL/T* resources in research and assignment design

- Examples: “Anti-racism” and “Racialization” as threshold concepts rather than ‘Race’ or ‘Racism’; Biblical word studies of ‘race’

Appendix 3: Anti-racism Vocabulary: A preliminary framework:

Core concept: Anti-racism

Preliminary Facets (are given in boldface type below)

Beliefs/Values (e.g. Community, Diversity, Equality, Equity, Faith, Hospitality, Human Rights, Humanism, Inclusion, Justice, Non-violence, Peace, Spirituality, Tolerance, Unity);

Actions – Practices - Strategies (e.g. Advocacy, Anti-racism training, Anti-violence training, Awareness training, Community building, Conflict resolution, Cultural action, Cultural democracy, Cultural transformation, Educational events, Dialogue/discussions, Organizational change, Youth activities, Skill-building training); Political participation; Identity politics;

Movements (e.g. Civil Rights movement; Interfaith movement)

Policies (affirmative action; includes laws too, e.g. Universal Declaration of Human Rights, Genetic Information Non-discrimination Act of 2008 (GINA) USA);

Organizations (e.g. UN; Catalyst Project; Anti-racism for collective liberation; Stand Up for Racial Justice),

People (e.g. groups such as African Americans,);

Periods (e.g. modern, 1492 onwards, etc.); **Space** (e.g. United States);

Concepts of anti-racism: Anti-racist education; Bystander anti-racism; Integrative anti-racism; Tolerance; Inclusivity, Reparation

Closely related concepts: Diversity, Racial categories/taxonomies/typologies, Racial equity, Racial healing, Cultural racism, Bio-racism; Restorative justice; Competitive advantage; Innovation

Related concepts: Race; Racism; Racialization, Multiculturalism (narrow term); Social justice (broad term)

Domains/Disciplines: Cultural/Ethnic studies, Education, International Indigenous studies, Positive peace, Theology;

Peripheral areas: Biology, Cultural anthropology, Genomics, Psychology, Sociology;

Anti-racist policies (examples):

- inclusivity
- neutrality or “colorblindness”;
- cooperative (not competitive) workplace environment;
- affirmative action initiatives and scholarships directed towards increasing diversity;
- multi-culturalism / pluralism /solidarity

Anti-racist actions (some examples of how people are actively practicing anti-racism):

- Practicing Cultural Humility and the LCSH for this is: Cultural humility
- Acknowledging White Privilege and the LCSH for this is: White Privilege
- Interfaith Dialog and the LCSH for this is: Interfaith dialog
- Christian Witnessing and the LCSH for this is: Witness bearing (Christianity)
- Faithful Rhetoric and the LCSH for this is: Faith; Rhetoric; Civic Engagement
- Standing in Solidarity and the LCSH for this is: Solidarity
- Original Purpose/Divine Calling (for everybody not just clergy) – LCSH: Vocation

Anti-racist movements (examples):

- Anti-apartheid movements; Civil Rights Movement; Indigenous or Self-development of People movement; Interfaith movement; Spirituality movements; Sustainability movements (e.g. campus sustainability); crowdsourced syllabi (campus activism movements); Black Lives Matter movement; Academic Reparation (current);

Appendix 4: - ACRL Framework for Information Literacy – Six Threshold Concepts and Some Examples for Increasing/Learning/Teaching Anti-racism and Information Literacy

- Authority Is Constructed and Contextual – e.g. Find two or more anti-racist theologians, scholars, or activists whose views are markedly different; identify some of the conflicts that exist in current anti-racism activism or research
- Information Creation as a Process – e.g. Trace the development of the concept of ‘anti-racism’ in the context of the church; explore related concepts such as restorative justice
- Information Has Value – Ownership of liturgies and sermons – who owns a pastor’s intellectual work? Use a key anti-racist church figure such as Martin Luther King, Jr.
- Research as Inquiry – What is integrative anti-racism and what are its implications for us (as religious studies scholars)? What is the academic reparation movement in theology/religious studies and what is its impact?
- Scholarship as Conversation – Trace the origins of the Belhar Confession (or other anti-racist confession/doctrine) and discuss how it came to pass, accepted by professional clergy and laity.
- Searching as Strategic Exploration - e.g. Intellectual access (LCSH, LCDGT, etc.);
