Elsevier Acquires bepress

By ROGER C. SCHONFELD | AUG 2, 2017
30 COMMENTS

Today, Elsevier announces its acquisition of bepress. In a move entirely consistent with its strategy to pivot beyond content licensing to preprints, analytics, workflow, and decision-support, Elsevier is now a major if not the foremost single player in the institutional repository landscape. If successful, and there are some risks, this acquisition will position Elsevier as an increasingly dominant player in preprints, continuing its march to adopt and coopt open access.
