# Migration, Human Rights, and Development:

## A Global Anthology

Edited by Anne T. Gallagher

This anthology presents a unique collection of the best, most accessible, and most important writing in the area of migration—with a particular focus on the human rights and development aspects of modern migration trends and responses.

Four thematic sections address:

- ✓ The relationship and connections between human rights, migration, and development;
- ✓ Key issues in migration and development, including impacts on source and destination countries, social costs, and the role of remittances;
- ✓ Key issues in migration and human rights: the legal and policy framework and rights of specific migrant groups including refugees, children, and women.
- ✓ The future of migration. Is migration always a good? Can restrictions be justified? How do we address the very real challenges of global migration while preserving rights and promoting development?
