### **The Role of Law and Public Participation in the Evolution of Watershed Institutions in Kentucky and Tennessee for Social-Ecological Resilience**

- 2014 Multi-Disciplinary Research Grant (MRG) from the University of Louisville Office of the Executive Vice President of Research in the amount of \$9,902
- Principal Investigator (Dr. Daniel DeCaro is Co-Principal Investigator)
- Use of case study research, in-depth interviews, and surveys to assess the relationship between law and public participation in how 8 watershed governance institutions in Kentucky and Tennessee have adapted to changing conditions and disturbances
- Designed to develop data and models that will lead to further funding proposals (e.g., National Science Foundation Program in Law and Social Sciences)
- Competitive grant

### **Diverse Participation in Watershed Planning and Governance: Building Social –Ecological Resilience in Kentucky Watersheds**

- 2014-2015 104b Student Research Enhancement Project Grant in the amount of \$5,000, funded by the U.S. Geological Survey and the National Institutes for Water Resources through the Kentucky Water Resources Research Institute at the University of Kentucky
- Co-Principal Investigators (other Co-Principal Investigators were student research assistants Jennifer-Grace Ewa and Alexandra Chase)
- Student research on participant preferences regarding participatory methods in watershed planning and governance
- Assessment of diversity and scope of public participation in watershed planning and governance in two Kentucky watersheds, one urban and one rural, with particular focus on certain groups with historically low participation rates: low-income and moderate-income residents, racial and ethnic minorities, farmers, ranchers, and other agricultural producers, and others
- Competitive grant

#### Social-Ecological Resilience: Climate Change and Adaptive Water Governance, 2013-2015

- Multi-university and multi-disciplinary research team
  - Member of Core Team
  - Participant in all planning and workshops
- Develop adaptive governance and administrative law models for water management in the face of climate change through a series of workshops
- Funding (approximately \$100,000 of travel and research expenses) from the National Socio-Environmental Synthesis Center (SESYNC), a national research center funded through an NSF grant to the University of Maryland to solve society's most complex, challenging environmental problems
- Researchers in law, social sciences, water resources, and ecology at the University of Idaho, Emory University, the University of Nebraska, the University of Louisville, the University of New Mexico, the University of Utah, Oregon State University, Vanderbilt University, Washington State University, and the US Environmental Protection Agency
- Competitive grant

#### Ecosystem Services, Law, and Urban Planning, 2013-2014

- Multi-university and multi-disciplinary research team
  - Invited to assist with development of workshop program, in particular recommendations of participants to invite
  - Participant in workshop; leader of one session
  - Presenter on literature review; co-author of article; leader of several aspects of project
- An investigation of how governance, institutional structures, and legal frameworks affect the adoption of an ecosystem services approach to urban planning
- Workshop in December 2013 attended by experts from a wide range of disciplines and settings including academia, government, and nonprofit organizations
- Funded by the National Academies Keck Futures Initiative with a \$10,000 grant to the Duke University Nicholas Institute for Environmental Policy Solutions

#### Kentucky Growth Readiness Workshops and Kentucky Wet Growth Handbook, approx. \$25,000 sub-grant from the U.S. Environmental Protection Agency (Clean Water Act Section 319 grant) to the Kentucky Division of Water and the University of Louisville Department of Geography for the Commonwealth Water Education Project

- Facilitated workshops on the impact of land use and development on water quality and mechanisms for adapting land development regulations and planning to protect water quality
- Wrote and disseminated handbook on land use tools to protect water quality, entitled KENTUCKY WET GROWTH TOOLS FOR SUSTAINABLE DEVELOPMENT (co-authors: Craig Anthony (Tony) Arnold, Carol Norton, and Dustin Wallen)
- Integrated material on relationships between land use and watersheds, land use impacts on water quality, low-impact development, watershed planning, land conservation, water supply planning, property rights and takings, and codes and ordinances analysis
- Developed relationships with local officials, community leaders, land development and environmental professionals, civic groups, the Commonwealth Division of Water, the Kentucky Waterways Alliance, and the Kentucky League of Cities

- Sub-grant recipient: Center for Land Use and Environmental Responsibility, as part of the Center's Healthy Watersheds Land Use Initiative, in coordination with the Kentucky Division of Water and the University of Louisville Department of Geography (the primary grant recipient), and in partnership with the University of Louisville Center for Environmental Policy and Management, the City Solutions Center, and the Urban Design Studio
- Competitive grant

HUD Sustainable Communities Capacity Building Grant: \$400,000 grant to the Center for Environmental Policy and Management from the U.S. Department of Housing and Urban Development and the U.S. Environmental Protection Agency to lead the Water Infrastructure Capacity Building Team

- The Center for Land Use and Environmental Responsibility (i.e., Professor Tony Arnold) is a member of the Water Infrastructure Capacity Building Team
- The Team is one of eight capacity building providers for Sustainable Community Grantees across the nation
- The Team provides assistance on incorporating water infrastructure planning and investments into local and regional planning efforts. The Team's technical assistance offerings will help communities create and implement complete land use development/re-development and transportation plans that take into account water infrastructure, including:
  - water conservation and protection
  - wetland preservation
  - stormwater and wastewater management
  - environmental justice and water
  - sustainable water utility financing
  - coordination with water utilities
  - utility asset management

Community Land Use Assessment for Fair and Healthy Neighborhoods: An Educational-Community Partnership in West Louisville, \$10,000 grant from the Center for Health Equity, Louisville Metro Department of Public Health and Wellness

- Developed community conditions assessment tools
- Taught Central High School students (juniors) about land use, environmental justice, community health conditions and health equity, and geographic information systems
- Worked with Central High School students to engage in analysis of land use and environmental conditions in a West Louisville neighborhood
- Taught Central High School students about land use planning and regulation, including zoning, permits, processes for changing land use policies and regulations, and public participation
- Assisted Central High School students in preparing and making a presentation about community conditions and the potential of planning and regulatory reform
- Grant recipient: Center for Land Use and Environmental Responsibility, as part of the Center's Fair and Healthy Land Use Initiative, the Law School's Partnership with Central High School, and the University's Signature Partnership Initiative with West Louisville
- Competitive grant
