ESSAY

EVADING LEGISLATIVE JURISDICTION

Austen L. Parrish

In the last few years, and mostly unnoticed, courts have adopted a radically different approach to issues of legislative jurisdiction. Instead of grappling with the difficult question of whether Congress intended a law to reach beyond U.S. borders, courts have side-stepped it entirely. Courts have done so by redefining the definition of extraterritoriality. Significant and contentious decisions in the Ninth and D.C. Circuits paved the way by holding that not all regulation of overseas foreign conduct is extraterritorial. And then suddenly, last term, the U.S. Supreme Court breathed life into the practice. In its landmark Morrison v. National Australia Bank decision, the Court suggested that legislation focused on domestic conditions may not be extraterritorial, even if the legislation regulates overseas foreign activity.

This Essay laments the birth of this troubling new approach, where established law is jettisoned and legislative jurisdiction analysis is evaded. The Essay’s aim is largely descriptive: it summarizes an important development and reveals how courts have lapsed into error. But it goes beyond the descriptive to also critique the new practice. Redefining extraterritoriality not only subverts established doctrine; it removes an important safeguard to the difficulties that extraterritorial regulation creates. More problematically, the practice undercuts principles that have been foundational in both domestic and international law.

* Professor of Law and Vice Dean, Southwestern Law School. The author is grateful to Maria Daatio for her research assistance. The Essay benefited from discussions with or feedback from Lea Brilmayer, Hannah Buxbaum, Anthony Colangelo, Bill Dodge, Paul Dubinsky, Max Huffman, John Knox, Daniel Margolies, Jeffrey Meyer, Trevor Morrison, Kal Raustiala, and Christopher Whytock. Portions of this Essay were presented at the 2011 AALS Annual Meeting, Southwestern Law School, and the Annual Meeting of the Society for Historians of American Foreign Relations. It also will be presented at the 2011 Annual Meeting of the American Society of International Law.

INTRODUCTION

At one time, the fundamentals of the law of legislative jurisdiction were mostly settled. As a general matter, law shielded each state from the intrusion of others, ensuring that each could pursue its own economic and social objectives. Extraterritorial regulation – the regulation of foreign conduct outside the United States – although tolerated under certain circumstances, was disfavored and in tension with basic international law principles. To be sure, significant and vigorous debate existed at the margins: over the extent to which Constitutional provisions constrained Congressional action and over how courts should interpret a statute’s geographic reach in the face of Congressional silence. But those debates played out at the periphery; the core doctrine remained untouched. Even when globalization rendered territorial limits to law less important as a descriptive matter, the heart of the doctrinal analysis remained intact. Absent contrary evidence, Congress was presumed to have exercised only its territorial jurisdiction.

What once was set, however, has softened. In the last few years, and largely unnoticed, courts have taken a different tack. Instead of wrestling with the difficult questions of whether Congress intended a law to apply to foreign conduct and, if so, whether doing so is Constitutional or consistent with international law, courts have sidestepped the issue of legislative jurisdiction entirely. They have done so by redefining extraterritoriality itself. Significant decisions in the Ninth and the D.C. Circuit paved the way by holding that not all regulation of overseas foreign conduct is extraterritorial. And then suddenly last term, perhaps unintentionally, the U.S. Supreme Court seemed to breathe life into the practice. The Court suggested that legislation “focused” on domestic conditions is not extraterritorial, even if the legislation regulates foreign activity.

This Essay laments the birth of this troubling new approach. Unlike a number of recent articles that have sought to develop comprehensive frameworks for addressing extraterritorial regulation or to refashion this

1 This description of legislative jurisdiction calls to mind Ernest Gellner’s assessment of a Kokoschka painting: how discerning a clear pattern in the details is difficult, even though the picture as a whole can be easily recognized. Cf. ERNEST GELLNER, NATIONS AND NATIONALISM 139 (1983) (famously comparing the pre-modern, pre-nationalism map to a Kokoschka painting: a “riot of colours,” with no clear pattern in the detail, though with a clear overall pattern of diversity, plurality and complexity).
2 Pakootas v. Teck Cominco Metals, Ltd., 452 F.3d 1066 (9th Cir. 2006); United States v. Philip Morris USA Inc., 566 F.3d 1095 (D.C. Cir. 2009).
4 For a few recent examples, see Anthony J. Colangelo, A Unified Approach to Extraterritoriality: Legislative Sources, Statutory Construction, and Due Process (forthcoming 2011); Jeffrey A. Meyer, Dual Illegality and Geoambiguous Law: A New Rule for Extraterritorial
EVADING LEGISLATIVE JURISDICTION

area of law, the Essay’s goal is more modest. It seeks to limn an important development and reveal how courts have lapsed into error. In so doing, it aims to clear away some of the confusion that has festered in the lower courts. Part I summarizes the law of legislative jurisdiction and the doctrinal principles that courts use to determine whether Congress intended to regulate conduct occurring outside U.S. borders. Part II then describes how courts recently have circumvented doctrine through redefining extraterritoriality. Part II ends with a critique of this new practice and explains why redefining extraterritoriality obscures an already difficult analysis. Finally, in Part III, the essay suggests that a return to well-established law would correct some of the excesses of transnational litigation. It explains why redefining extraterritoriality to evade legislative jurisdiction analysis not only subverts the territorial principle, but removes an important safeguard to the problems that extraterritorial regulation engenders. More problematically, the redefinition marks a sharp departure from foundational principles that have defined the international legal system. It is a departure that, if embraced, threatens to increase global conflict, frustrate multilateralism, and undermine American interests.

A point to stress before proceeding: The courts’ doctrinal sleight of hand to avoid the thorny issues surrounding legislative jurisdiction is not merely of academic concern. The extension of federal law to activity outside the United States has dramatically increased in the last decade and promises to continue. The way courts approach legislative jurisdiction determines, in part, how quickly these sort of transnational cases will multiply. Indicative of the trend, legislative jurisdiction cases have become a

common fixture on the Supreme Court’s docket. None of this is surprising. As the world flattens, and people and markets become more interconnected, courts are pressed to provide a forum for malfeasance wherever it occurs. Legislative jurisdiction analysis, however, has a broader significance. It is the doctrinal plain upon which ongoing and significant debates are waged: the importance of national courts in global governance, the role that territoriality should play in law, as well as the extent to which domestic law, as contrasted with international law, should address transnational challenges.

For these reasons, it serves as a cornerstone for a distinct field of law.

Burke-White, The Future of International Law is Domestic, 47 Harv. Int’l L.J. 327, 350 (2006) (arguing that international law must harness the power of national institutions to achieve global objectives); Tonya Putnam,
I. WELL-ESTABLISHED DOCTRINE?

Legislative jurisdiction refers to Congress’s authority to prescribe or regulate conduct. Congress’s power to apply its law to occurrences in the United States, within Constitutional limits, is uncontested. Legislative jurisdiction comes into play when a state attempts to apply its law to the foreign acts of non-nationals. When the United States attempts to formally project its laws outside U.S. borders, issues of extraterritoriality come to the fore. While some of these issues are the subject of spirited debate, many of the precepts are settled.

A. Extraterritoriality Defined

One of the long-settled precepts is the definition of “extraterritoriality.” Both courts and commentators refer to extraterritorial legislation the same
way: domestic law that regulates conduct abroad.\textsuperscript{16} For the U.S. Supreme Court, territorial jurisdiction involves “places over which the United States has sovereignty or has some measure of legislative control.”\textsuperscript{17} In a similar vein, Black’s Law Dictionary defines “jurisdiction” as “[a] government’s general power to exercise authority over all persons and things within its territory,” while it defines “extraterritorial jurisdiction” as “a court’s ability to exercise power beyond its territorial limits.”\textsuperscript{18} This is not to say that extraterritorial regulation is forbidden or necessarily even of dubious legality. On the contrary, international law permits states to regulate overseas conduct in a number of contexts, such as when regulating the conduct of its own citizens.\textsuperscript{19} But when Congress uses a basis of jurisdiction other than territorial jurisdiction, Congress has regulated extraterritorially.

This understanding – that extraterritoriality is implicated whenever a state exercises jurisdiction on a basis other than territorial jurisdiction – is consistent with the doctrine’s historical underpinnings. Limiting a state’s regulatory authority to activities within its borders was at one time beyond dispute. In the personal jurisdiction, choice of law, and international law contexts, rules had territorial limits.\textsuperscript{20} As Justice Story famously declared,\textsuperscript{21}
“every nation possesses an exclusive sovereignty and jurisdiction within its own territory,” and “it would be wholly incompatible with equality and exclusiveness of the sovereignty of all nations, that any one nation should be at liberty to regulate either persons or things not within its own territory.”

Beale summarized the universally agreed upon rule the same way: “Since the power of a state is supreme within its own territory, no other state can exercise power there . . . . It follows generally that no statute has force to affect any person, thing, or act, outside the territory of the state that passed it.” These understandings were widely held. And even when strict territorial approaches eventually gave way in other areas of the law, states were still cautious about extending law beyond the water’s edge. Congress would be presumed to usually regulate only activity in U.S. territory or under American control.

A limited exception to the notion that foreign conduct was beyond a state’s territorial jurisdiction was known as the “objective” application of the territorial principle. In situations where a crime’s effects were so much part of the act that produced them “that their separation [would] render[ ] the offense nonexistent,” courts found territorial jurisdiction implicated even

23 S.S. “Lotus” (Fr. V. Turk.), 1927 P.C.I.J. (sr. A) No. 10, at 18 (Judgment of Sept. 7) (“The first and foremost restriction imposed by international law upon a State is that – failing the existence of a permissive rule to the contrary – it may not exercise its power in any form in the territory of another State. In this sense jurisdiction is certainly territorial….”), at 56 (Lord Finlay) (“A country is no more entitled to assume jurisdiction over foreigners than it would be to annex a bit of territory which happened to be very convenient to it.”); see also 2 John Bassett Moore, A Digest of International Law 236 (1906) (“There is no principle better settled than that the penal laws of a country have no extraterritorial force.”); Research in International Law, Harvard Law School, Jurisdiction with Respect to Crime, 29 Am. J. Int’l L. Supp. 435, 480-84 (1935) (hereinafter Harvard Research) (describing territorial jurisdiction and settled tenets).

though the conduct that commenced the crime occurred abroad.\textsuperscript{25} Simply that a crime’s effects were felt within a state, however, was insufficient. Rather, jurisdiction existed only when the crime’s nature meant that the crime was consummated in the place where the direct effect of the criminal act took place (i.e., when those effects were a constituent element of the crime).\textsuperscript{26} Hence, when a person fired a gun across a border and killed another in a neighboring state, the crime was said to have occurred within the neighboring state.\textsuperscript{27} As a leading American authority once put it: “The principle that a man who outside of a country willfully puts in motion a force to take effect in it is answerable at the place where the evil was done, is recognized in the criminal jurisprudence of all countries.”\textsuperscript{28}

But this exception – or, perhaps, qualification – to the common concept of territorial jurisdiction was narrow. It was generally limited to the criminal context; the effects had to be substantial and direct, if not immediate; and the effects also had to form a part of the \textit{actus reus}, so that the crime would be considered completed in the territory claiming jurisdiction.\textsuperscript{29} Only a few crimes met these requirements.\textsuperscript{30} And even if the requirements were met, the

\textsuperscript{26} S.S. “\textit{Lotus},” 1927 P.C.I.J. at 30 (noting that the effect must constitute a constituent element of the crime); Harvard Research, supra note 23, at 480, 494-95 (explaining for the objective application of the territoriality principle, the effect must be indistinguishable from the act, as an “essential constituent element” or “part” of the crime); Restatement (Second) Of The Foreign Relations Law Of The United States § 18(b) (1965) (explaining the effect must constitute a constituent element of the crime); see also R.Y. Jennings, Extraterritorial Jurisdiction and the United States Antitrust Laws. 33 Brit. Y.B. Int’l L. 146, 159-60 (1957) (describing the objective territorial principle); cf. Strassheim v. Dailey, 221 U.S. 280 (1911) (articulating an effects test).

\textsuperscript{27} See Restatement (Second) Of The Foreign Relations Law Of The United States § 18, Illustration 2 (1965); See, e.g., Simpson v. State, 17 S.E. 984, 985 (Ga. 1893) (“if a man in the State of South Carolina criminally fires a ball into the State of Georgia, the law regards him as accompanying the ball, and as being represented by it, up to the point where it strikes”).

\textsuperscript{28} See Jennings, supra note 26, at 157 (quoting 2 John Bassett Moore. A Digest of International Law 244 (1906)).

\textsuperscript{29} Restatement (Second) Of Foreign Relations Law Of the United States § 18(b) (1965); see also Jennings, supra note x, at 160; Harvard Research, supra note 23, at 487-94.

\textsuperscript{30} The United States had “rarely sought to prosecute for crimes committed outside its territorial jurisdiction.” Note, Extraterritorial Jurisdiction – Criminal Law, 13 Harv. Int’l L.J. 347 (1972); see also Note, Extraterritorial Application of the Antitrust Law: A Conflict of Law Approach, 70 Yale L.J. 259, 266-68 (1960) (describing the prohibition against extraterritorial enforcement of penal laws). In 1970, the National Commission on Reform of Federal Criminal Laws reported that “the issue of the extraterritorial application of the federal criminal law is one which does not arise frequently.” National Commission on Reform of Federal Criminal Laws. Final Report 21 (1971). And when legislation was proposed to obviate the need for courts to ascertain the extraterritorial implications of federal criminal law legislation, jurisdiction over activity having substantial effects in the United States was notably absent. Criminal Justice Reform Act of 1975, S.1, 94th Cong., 1st Sess. § 204 (1975).
crime had to be an offense “which the community of civilized nations ha[d] come to regard as justifying a modification of the strict territorial principle.”

The objective territorial principle was in many ways then simply a restatement of the understanding that “a crime is committed wherever an essential element of the crime is accomplished.” Of course, it had to be this way. If all acts – criminal or otherwise – invoked territorial jurisdiction wherever effects were felt, “it would permit a practically unlimited extension of [the objective territorial] principle to cover almost any conceivable situation.”

This once obvious observation was near definitional, for “it would be absurd indeed if an almost unlimited extraterritorial jurisdiction could be ostensibly based upon a territorial principle of jurisdiction.”

Admittedly, Congress does not always legislate using its territorial jurisdiction. From time to time, Congress regulates foreign conduct exercising a different basis of jurisdiction. But when Congress has done so, it has always considered the regulation extraterritorial. Even when some courts controversially began applying an expansive effects approach, to allow jurisdiction over conduct having substantial effects within the United States, courts and policymakers nevertheless described the regulation as extraterritorial. The well-studied antitrust context underscores the point. While the U.S. antitrust laws have prescribed certain foreign activity since the 1940s, those laws have always been treated as extraterritorial regulation. Many

34 Id.; see also George W. Haight, Antitrust Laws and the Territorial Principle, 11 VAND. L. REV. 27, 35 (1957) (noting that S.S. Lotus did not intend an “obliteration of territoriality” and quoting Justice Story that “[t]he absurd results of such a state of things need not be dwelt upon”). For a detailed recent description of the objective territoriality principle and its subsequent development into a more expansive effects doctrine in the United States and Germany, see Buxbaum, supra note 16, at 638-42.

35 Steele v. Bulova Watch Co., 344 U.S. 280, 288 (1952) (applying trademark law to foreign activity with U.S. effects); U.S. v. Aluminum Co. of America, 148 F.2d 416, 443 (2d Cir. 1945) (describing jurisdiction based on effects); see also Gerber, supra note 32, at 195-96 (distinguishing objective territoriality from an effects approach); Buxbaum, supra note 17, at 639 (describing how the objective territoriality principle was dramatically expanded with an effects approach). For a description of the effects test, its development, and its problems, see Parrish, The Effects Test, supra note 8.

have criticized the antitrust laws for aggressively reaching out beyond U.S. borders, while others find the regulation essential. But neither courts, scholars, nor practitioners take the position that the antitrust laws are just business as usual: a plain, vanilla exercise of territorial jurisdiction.\footnote{That extraterritoriality is implicated when a domestic law seeks to regulate the conduct of foreigner abroad is consistent with the reach of the U.S. Constitution. The U.S. Constitution has been held to constrain government action within the United States territory or control. While the Constitution may or may not follow the flag, constitutional rights and protections are generally not afforded foreigners on foreign soil.}

B. Determining the Reach of Domestic Laws

While the definition of extraterritoriality is generally well-understood, in broad-brush so too is the doctrinal analysis. Traditionally courts approach assertions of extraterritorial regulation with a two-pronged inquiry. First, does Congress have the power to enact the law? Second, did Congress exercise that power? On occasion, courts have infused a third, judicial-restraint assessment into the analysis.

The first prong, although well-accepted, is often overlooked or simply assumed to be met. The U.S. Constitution and international law impose limits on Congress’s ability to regulate foreign conduct. The Fifth Amendment’s Due Process Clause\footnote{Lea Brilmayer & Charles Norchi, \textit{Federal Extraterritoriality and Fifth Amendment Due Process}, 105 Harv. L. Rev. 1217 (1992); but see A. Mark Weisburd, \textit{Due Process Limits on Federal Extraterritorial Legislation?}, 35 COLUM. J. TRANSNAT’L L. 379 (1997) (arguing against due process limits to extraterritorial regulation).} and other Constitutional provisions\footnote{Anthony Colangelo, \textit{The Foreign Commerce Clause}, 96 Va. L. Rev. 949, 951-58 (2010) (describing limits imposed by foreign commerce clause). For a discussion of limits in the criminal law context, see Eugene Kontorovich, \textit{Beyond the Article I Horizon, Congress’s Enumerated Powers and Universal Jurisdiction over Drug Crimes}, 93 Minn. L. Rev. 1191, 1219-23 (2009); Eugene Kontorovich, \textit{The “Define and Punish” Clause and the Limits of Universal Jurisdiction}, 103 Nw. U. L. Rev. 149 (2009).} provide some limitation on Congress’s ability to regulate conduct with little connection to the United States.\footnote{Professor Lea Brilmayer is probably the best known for championing the position, in the adjudicatory and legislative jurisdiction contexts, that some relationship between the defendant and the United States must exist for a state’s exercise of authority to be politically legitimate. See, e.g., Brilmayer, & Norchi, supra note 38; Lea Brilmayer, \textit{How Contacts Count: Due Process Limitations on State Court Jurisdiction}, 1980 Sup. Ct. Rev. 77, 86-87; Lea Brilmayer, \textit{Jurisdictional Due Process and Political Theory}, 39 U. Fla. L. Rev. 293, 294 (1987); Lea Brilmayer, \textit{Shaping and Sharing in Democratic Theory: Towards a Political Philosophy of Interstate Equality}, 15 Fla. St. U. L. Rev. 389, 391 (1987).} Under international law, a state only has the power to regulate within one of the traditional categories of jurisdiction.\footnote{Ian Brownlie, \textit{Principles of Public International Law} 298-305 (6th ed. 2003) (setting out the bases of jurisdiction under international law).} Because of these constitutional and international law limitations, courts...
avoid reading statutes in a way that would raise significant constitutional concerns or in a way that would violate international law.

When Congress has authority to regulate foreign conduct, courts must still assess whether Congress intended to exercise that authority. This is the second prong of the analysis. In the face of legislative silence or ambiguity, courts generally presume that Congress does not intend to regulate extraterritorial conduct. The nature and amount of evidence sufficient to overcome the presumption admittedly is hazy, but the need to ascertain Congres-

sional intent is always the starting point for the analysis. This two-step approach is consistent with how courts assess Congress’s use of jurisdiction in other contexts. Courts commonly conclude that Congress has not exercised its full power and interpret statutes to fall well within constitutional or international law limits.

Even if Congress authorized extraterritorial regulation, at times courts exercise discretion and for prudential reasons decline to hear a case. Although the basis for such abstention is not entirely clear, generally this sort of abstention falls under the umbrella of “international comity.” Employing comity, courts consider a host of factors to determine whether the exercise of jurisdiction would be reasonable. Comity in the legislative jurisdiction area is thus used in a way akin to its use in judicial abstention.

---

47 See, e.g., Louisville & Nashville R.R. Co. v. Mottley, 211 U.S. 149, 152-53 (1908) (interpreting the statutory grant of federal question jurisdiction to be narrower than what is constitutionally permitted); Strawbridge v. Curtiss, 7 U.S. (3 Cranch) 267 (1806) (Marshall, J.) (interpreting the statutory grant of diversity jurisdiction to be narrower than constitutional limits).

48 See, e.g., Lauritzen v. Larsen, 345 U.S. 571, 583–92 (1953) (looking towards principles of international law and adopting a multi-factor balancing approach); see also Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287, 1297–98 (3d Cir. 1979) (applying a balancing of interests approach); Timberlane Lumber Co. v. Bank of Am., 549 F.2d 597, 613–14 (9th Cir. 1976) (limiting the effects test through a rule of reason/international comity approach that accounts for international comity concerns).

49 Hilton v. Guyot, 159 U.S. 113, 163–64 (1895) (defining international comity); see also Donald Earl Childress III, Comity as Conflict: Resituating International Comity as Conflict of Laws, 44 U.C. Davis L. Rev. 11 (2010).

50 F. Hoffmann-La Roche, Ltd. v. Empagran, SA, 542 U.S. 155, 164–65 (2004) (explaining that a court should “ordinarily construe[ ] ambiguous statutes to avoid unreasonable interference with the sovereign authority of other nations”); see also Max Huffman, A Retrospective of Twenty-Five Years of the Foreign Trade Antitrust Improvements Act, 44 Hus. L. Rev. 285, 298-300 (2007) (describing the factors courts consider in comity analysis); Andreas F. Lowenfeld, International Litigation and the Quest for Reasonableness: Essays in Private International Law 228 (1996) (describing the rule of reason/international comity approach).

non conveniens, parallel proceedings, and in other related contexts. In
general, courts balance the interests of the United States in having the claim
heard in a U.S. court against the international comity ramifications of doing
so. Invoking comity to decline jurisdiction, however, is controversial, in
disfavor, and now rarely done.

To say that the core-principles surrounding the law of legislative jurisdic-
tion are settled does not mean that this area of law is free from dispute.
The law of legislative jurisdiction is notorious for being badly fragmented
and in disarray on the margins. Scholarly tussles are common and court
decisions often reflect a degree of confusion. Significant disagreement
exists, for example, over the application of different canons of construction.
The Supreme Court has not resolved what exactly is required to overcome
the presumption against extraterritoriality, nor do the justices agree on the
role of clear statement rules in statutory interpretation.

52 Piper Aircraft Co. v. Reyno, 545 U.S. 235, 238 (1981); Gulf Oil Corp. v. Gilbert, 330
U.S. 501, 507-09 (1947). For an early overview of the doctrine, see Robert Braucher, The

scribing the rise and fall of interest balancing); see also Philip E. Trimble, The Supreme
Court and International Law: The Demise of Restatement Section 403, 89 Am. J. Int’l L. 53,
57 (1995) (arguing that the international comity approach has lost any influence); Spencer
plaining how the Hartford Fire case “dealt comity a near death blow” and that “comity as a
legal doctrine in the courts has seen better days and will rarely be successful”).
57 See Knox, supra note 4, at 351-53 (describing inconsistency in the Court’s jurispru-
dence leading to confusion); Meyer, supra note 4, at 114-19 (describing scholarly debates
and different approaches – unilateral, territorial, and interest balancing).
58 Knox, supra note 4, at 351-53. From time to time, scholars have invited courts to ignore
the presumption against extraterritoriality and to dramatically expand extraterritorial jurisdic-
tion. See, e.g., William S. Dodge, Understanding the Presumption Against Extraterritor-
ality, 16 Berkeley J. Int’l L. 85, 89 (1998) (arguing that the effects test should negate the
C. The History of American Extraterritoriality

Before continuing, a brief, albeit overly simplified, description of the reasons behind the growth in extraterritorial regulation may be helpful to appreciate the current pressure on courts to redefine extraterritoriality. At the turn of the 19th Century, the United States was in its nascent stages as a World Power. While some important exceptions existed, particularly when dealing with the southern border, the U.S. was nervous about broadly extending its laws reach. This was understandably so. Extraterritorial laws were viewed as empire-building and the province of great powers. Reciprocity was also a concern. The U.S. did not want European powers meddling in its internal affairs, and extraterritorial laws conjured reminders of the “taxation without representation” that the early colonists railed against.

After the Second World War, however, the calculus changed. Extraterritorial regulation in the commercial arena became an important weapon in the Cold War. It was a way for a dominant power in a bi-polar world to promote liberal capitalist democracy and free markets, while checking Soviet aspirations. First with antitrust and then with securities regulation, the U.S. sought to expand international influence through the unilateral application of domestic law. Changes in other areas of the law also made the use

presumption against extraterritoriality); Larry Kramer, Extraterritorial Application of American Law after the Insurance Antitrust Case: A Reply to Professors Lowenfeld and Trimble, 89 Am. J. Int’l L. 750, 751 (1995) (arguing for application of U.S. law over foreign conduct that produces substantial effects within the United States). While some lower courts have toyed with this idea, the Supreme Court has consistently declined the invitation. See supra note 44.

L. Rev. (forthcoming 2011).

of extraterritorial regulation more acceptable. Territorial limits in choice-of-law, personal jurisdiction, and other areas had given way in the domestic context (albeit for very different reasons), which provided a superficial justification for making territoriality less important when addressing transboundary disputes. Legal realism’s influence on the courts in the post-War period similarly made the bright-line rules and classic legal thought that girded legislative jurisdiction analysis more suspect, tempting courts to employ more flexible standards and balancing tests. And lastly, the development of the modern administrative state post-New Deal meant that extraterritorial regulation was just one component of other dramatic changes that promoted comprehensive regulation.

A second wave of extraterritorial regulation was seen almost fifty years later. At the Cold War’s conclusion in the early 1990s, extraterritorial regulation became important in a way different than it had been before. Domestic regulation, applied to foreign conduct, became a more palatable way to exert global influence than traditional empire-building. While commercial laws – following in the steps of antitrust and securities – had often been applied to regulate foreign conduct, non-commercial laws had tended to be more constrained. For many scholars, it was time to change that. From human rights, to environmental regulation, to labor and employment law, the projection of American law was a way for U.S. interest groups to solidify domestic power, while at the same time promoting American liberal

values. Globalization, changes in communication and technology, and the well-publicized unsavory practices of some multi-national corporations gave greater urgency to regulate malfeasance, wherever it occurred. After 2001, the extraterritorial application of U.S. criminal law also became an expeditious way to counter terrorism.

Increased extraterritorial regulation was also consistent with intellectual trends as legal scholars from both the right and left of the political spectrum withdrew from traditional, state-based, international law. For neorealists or sovereigntists scholars, extraterritorial regulation was a way to exert foreign influence, while avoiding international obligations. For constructivists, pluralists and liberal internationalists, extraterritorial regulation fit nicely with emerging theories of transnational legal process, transnational networks, and the idea that national courts are part of pluralistic cross-border dialogues. For many, the growth of extraterritorial regulation appeared consistent with, and a logical response to, globalization, the declining power of the sovereign nation-state, and the rise of non-state and sub-state actors.

As certain groups embraced extraterritoriality for instrumental reasons in the late 1990s, cases involving legislative jurisdiction also became the backdrop against which the U.S. Supreme Court would debate other issues –

Colangelo, Constitutional Limits on Extraterritorial Jurisdiction: Terrorism and the Intersection of National and International Law, 48 Harv. Int'l L.J. 121 (2007); Charles Doyle, Congressional Research Service Report, No. 7-5700, Extraterritorial Application of American Criminal Law 1 (March 26, 2010) (describing how a “surprising number of federal criminal statutes have extraterritorial effect”).

the role of federal courts in resolving global challenges, the appropriateness of clear statement rules, the use of canons of construction, and whether rules should be preferred over standards.\footnote{For a recent discussion, see Seanna V. Siffrin, Inducing Moral Deliberation: On the Occasional Virtues of Fog, 123 HARV. L. REV. 1214 (2010).} Often Supreme Court cases addressing legislative jurisdiction served as convenient vehicles for the justices to explore these other issues, with the significant problems of extraterritoriality not taking center stage.\footnote{Morrison is illustrative, with the Justices focusing mostly on debates of legislative primacy. \textit{Morrison}, 130 S. Ct. at 2869.} And as the recent Court redefined itself, legislative jurisdiction cases became a convenient canvas on which the Court could advance its vision of legislative primacy and its constrained approach to statutory construction.\footnote{Lea Brilmayer, The New Extraterritoriality: Morrison v. National Australia Bank and the Presumption Against Extraterritorial Application of American Law, S.W. L. Rev. x (forthcoming 2011).} While law schools continued to focus on doctrines of personal jurisdiction, subject matter jurisdiction, and forum non conveniens as the bread-and-butter of procedure, it was cases implicating legislative jurisdiction that regularly appeared on the U.S. Supreme Court’s docket, grabbed national headlines, and wrought significant changes in law and policy.\footnote{See supra note 7.}

II. A DANGEROUS TREND

A new wrinkle has developed that threatens to accelerate the growth of extraterritorial regulation. Courts have begun to seek ways to evade legislative jurisdiction analysis entirely. Decisions in the Ninth and D.C. Circuit exemplify the trend, while the U.S. Supreme Court’s recent opinion in \textit{Morrison v. National Australia Bank} seems to have endorsed the practice, although perhaps unintentionally.

A. Evading Extraterritoriality

Over the last few years, a number of high-profile cases have side-stepped the issue of extraterritoriality. One in the Ninth Circuit and another in the D.C. Circuit are notable in how far they creatively veered from prior doctrine.

\footnote{For a recent discussion, see Seanna V. Siffrin, Inducing Moral Deliberation: On the Occasional Virtues of Fog, 123 HARV. L. REV. 1214 (2010).}
1. Environmental Harm and the Ninth Circuit

First was the Ninth Circuit’s landmark decision in Pakootas v. Teck Cominco. Pakootas involved a privately owned Canadian corporation that operates a smelting plant in Trail, British Columbia, Canada, just a few miles north of the American border. For decades, the smelter dumped slag – a fine, sand-like byproduct of the smelting process – into the Columbia River in accordance with Canadian environmental laws and permits. In 2003, after preliminary testing of the upper-Columbia river basin within Washington State, the U.S. Environmental Protection Agency issued a Unilateral Administrative Order demanding that the Canadian corporation conduct a study consistent with the U.S. Superfund (CERCLA) laws. After the Canadian corporation refused to comply, in July 2004 a Native-American tribe brought a CERCLA citizen’s suit against the Canadian corporation in federal court. The suit sought to enforce the EPA’s order and require that the Canadian corporation pay the clean-up costs as a responsible party under CERCLA.

The lawsuit was unprecedented. It represented the first time that a tribal government had filed a petition for preliminary assessment under CERCLA. The lawsuit was also the first time the EPA had taken the extraordinary step of issuing a unilateral order to a Canadian company doing business solely in Canada. Perhaps most significantly, it was the first lawsuit brought under CERCLA that attempted to apply the Superfund laws to a Canadian company for conduct occurring entirely outside the United States. The defendant immediately moved to dismiss the case. The key preliminary issue was whether CERCLA covered the foreign conduct: could

the EPA force a Canadian company, governed by Canadian environmental law and operating solely in Canada, to comply with the terms of U.S. domestic environmental regulations.\textsuperscript{86}

The reaction was not entirely surprising. The Canadian government bristled at what it perceived to be an impermissible interference with its own domestic environmental policies.\textsuperscript{87} Canada pointed to a bilateral treaty – the 1909 Boundary Waters Treaty\textsuperscript{88} and its institutions\textsuperscript{89} – as the appropriate mechanism for addressing these sort of transboundary disputes.\textsuperscript{90} The defendant in turn argued that as a result of the pre-existing international agreement covering transboundary water disputes, Congress did not intend CERCLA to apply to foreign conduct.\textsuperscript{91} The district court, however, was not persuaded. It found that CERCLA applied extraterritorially because the effects of the pollution (i.e., the slag discharges) were felt in the United States.\textsuperscript{92} It also concluded that the presumption against extraterritoriality does not apply when effects are felt within the United States.\textsuperscript{93}

The District Court’s decision is difficult to square with the objective territoriality principle, but is consistent with a line of cases applying a more expansive effects-based approach to jurisdiction.\textsuperscript{94} If simply affirmed, the

\textsuperscript{92}CV-04-256, 2004 WL 2578982 (E.D. Wash. Nov. 8, 2004). The district court explained:

There is no dispute that CERCLA, its provisions and its ‘sparse’ legislative history, do not clearly mention the liability of individuals and corporations located in foreign sovereign nations for contamination they cause within the U.S. At the same time, however, there is no doubt that CERCLA affirmatively expresses a clear intent by Congress to remedy ‘domestic conditions’ within the territorial jurisdiction of the U.S. That clear intent, combined with the well-established principle that the presumption [against extraterritoriality] is not applied where failure to extend the scope of the statute to a foreign setting will result in adverse effects within the United States, leads this court to conclude that extraterritorial application of CERCLA is appropriate in this case.

\textsuperscript{93}Id. at \textsuperscript{89}.
\textsuperscript{94}Parrish, Trail Smelter Déjà vu, supra note 76. For an example of the line of cases adopting an expansive effects-approach, see Envtl. Def. Fund v. Massey, 986 F.2d 528, 531
decision would have been unremarkable. The Ninth Circuit, however, neatly avoided the key questions altogether and by doing so broke with even the most far-reaching precedent. Instead of assessing whether Congress intended CERCLA to apply to Canadian conduct, or whether the “effects test” reverses the presumption against extraterritoriality, the Ninth Circuit defined away the problem. Because the clean-up site was in the United States, the court found the application of CERCLA to be purely domestic. The Ninth Circuit found the place where the remedy was sought to be the key question. It explained that “the location where a party arranged for disposal or disposed hazardous substances is not controlling for purposes of assessing whether CERCLA is being applied extraterritorially.” The conclusion was puzzling because liability was based on the conduct of a Canadian company, operating solely in Canada in accordance with Canadian law. The decision’s reasoning baffled commentators and was widely criticized.

The Ninth Circuit, however, has not stood alone in its willingness to sidestep the difficult questions legislative jurisdiction raises. A second

Pakootas, 452 F.3d at 1078 (stating that “because the actual or threatened release of hazardous substances triggers CERCLA liability, and because the actual or threatened release here, the leaching of hazardous substances from slag that settled at the [site], took place in the United States, this case involves a domestic application of CERCLA).”

Id. at 1078; see also id. at 1079 (holding that CERCLA is not applied extraterritorially “even though the original source of the hazardous substances is located in a foreign country”).

prominent example of a court evading issues of legislative jurisdiction is the D.C. Circuit’s 2009 decision in U.S. v. Philip Morris.99

2. Tobacco, Criminal Conspiracies, and the D.C. Circuit

The Philip Morris case involved massive litigation between the United States and the tobacco industry.100 The United States sued nine cigarette manufacturers and two tobacco-related trade organizations under the civil RICO laws, alleging that the defendants had joined together in a decades-long scheme to deceive the American public about the health effects and addictiveness of smoking cigarettes.101 One of the defendants, however, was a British company that was sued for activity and statements made outside the United States.102 The case therefore asked, among other things, whether Congress intended RICO to apply to the foreign conduct of non-nationals.103

The D.C. Circuit failed to tackle the difficult question of RICO’s extraterritorial reach – an issue on which the lower courts were divided.104 As with the Ninth Circuit’s Pakootas decision, the D.C. Circuit treated regulation of foreign conduct as domestic, not extraterritorial, regulation. Without looking at RICO’s text, the overall statutory scheme, the legislative purpose or history, or any other benchmark for ascertaining Congressional intent, the court concluded that Congress wanted the statute to regulate the foreign conduct of foreign corporations.105 It did so by designating a new category of statutes with “true extraterritorial reach” and found that the presumption against extraterritoriality solely applies in those “true” cases.106 The court opined that only statutes that “reach foreign conduct with no impact on the United States” are extraterritorial. Departing from and dramatically expanding the objective territoriality principle without saying so, the D.C. Circuit found that a law is territorial even when the effects are not “elements of mail and wire fraud offenses or associated RICO violations.”107 According to the D.C. Circuit, Congress’s regulation of foreign conduct is never

106 Id. at 1130.
107 Id.
extraterritorial, so long as substantial effects are felt within the United States.\textsuperscript{108}

The D.C. Circuit’s decision was a significant expansion of even that circuit’s prior jurisprudence. At one time, effects could never be a basis for jurisdiction, except in the very narrow objective territoriality cases. Then, law and practice appeared to soften to permit countries to regulate foreign conduct when substantial effects were felt within a state’s borders. Under this approach, the effects test was used to determine the outer limits of Congressional authority.\textsuperscript{109} Unless a substantial, foreseeable effect was felt within the United States, Congress would not have authority to regulate foreign conduct and the Courts would avoid reading a statute to do so absent an express statement. Other courts used effects as one factor in many in determining legislative intent, while a few outlying decisions expanded the effects test even more to find that when a substantial effect is felt within the United States, the presumption against extraterritoriality no longer applies. The D.C. Circuit’s decision in Philip Morris, however, went significantly beyond that. It outstripped prior precedent to find that once an effect is felt in the United States no inquiry into Congressional intent is necessary at all. It not only reversed the presumption against extraterritoriality, changing it into a presumption in favor of extraterritorial regulation, but used the effects test as a substitute for, and affirmative evidence of, Congressional intent.\textsuperscript{110}

The Ninth and D.C. Circuit cases might be viewed as aberrations and outliers – unfortunate perhaps, but limited to their facts. Yet the U.S. Supreme Court last term – in a decision that at least one scholar has described as “the most important decision construing the geographic scope of a statute in almost twenty years”\textsuperscript{111} – seemed to encourage the practice.

B. A New “Focus.”

Morrison v. National Australia Bank involved three Australian investors who had bought stock in Australia’s largest bank.\textsuperscript{112} The investors contended that one of the bank’s subsidiaries in Florida had fraudulently miscalculated interest rates on mortgages it was servicing, causing the value of

Davis, Transnational Fraud Claims and the Extraterritorial Reach of U.S. Securities Laws: The Beginning of a New Era?, 1843 PLI/Corp. 323 (2010) (describing the Morrison decision as “landmark” and having “ushered in the dawn of a new era”).

\textsuperscript{112} 130 S. Ct. 2869, 2875 (2010).
the parent bank’s stock to plummet. The investors sued in the United States, pursuing a class-action remedy and claiming that the Florida-based subsidiary had made false and misleading statements to the U.S. Securities and Exchange Commission as well as falsified financial data in Florida. The key issue was whether the anti-fraud provisions of the American securities laws apply to investment deals that occur abroad when the securities deal involves a company whose stock is not traded in the United States. More specifically, the case asked whether section 10(b) of the 1934 Securities and Exchange Act “provide[s] a cause of action to foreign plaintiffs suing foreign and American defendants for misconduct in connection with securities traded on foreign exchanges.”

The court unanimously concluded that section 10(b) did not provide a cause of action under these circumstances. The Court did so by reaffirming the presumption against extraterritoriality and finding that insufficient evidence existed that Congress intended the Act to apply to foreign securities. The court also explained that merely because some of alleged illegal activity occurred in the United States did not mean the Act was only being applied domestically. Morrison’s doctrinal breakthrough is how it put an end to so-called “foreign cubed” cases – that is cases brought by foreign claimants against a foreign company in relation to shares bought on a foreign exchange.

In its reasoning, the Court spent considerable ink condemning the circuit court’s creation of the “effects” and “conduct” tests. With what some have described as sarcasm, Justice Scalia, writing for the majority, chastised the Second Circuit for having created “judicial-speculation-made law,” without putting “forward a textual or even extratextual basis” for the effects or conduct tests. The opinion rejected the argument that domestic effects alone could overcome the presumption against extraterritoriality, colorfully explaining that “the presumption against extraterritorial application would be a craven watchdog indeed if it retreated to its kennel whenever some domestic activity is involved.”

121 Id. at 2879-81.
122 Id. at 2884.
The Court could have stopped there. Instead, however, it went farther to inject a suggestion that the presumption against extraterritoriality only applies to foreign, not domestic, cases. The petitioners asserted that they sought only a domestic application of the Act because the conduct they sought to punish occurred in Florida. The Court responded by saying that a court had to assess the “focus” of the Exchange Act. It concluded that the Act’s focus was not “upon the place where the deception originated, but upon the purchases and sales of securities in the United States.” A focus analysis is new addition to the landscape of legislative jurisdiction analysis. If a court determines that the statute’s focus is on activity within the United States, the presumption becomes irrelevant. In so doing, the Court created an unintended loophole that may permit courts to easily skirt the presumption against extraterritoriality.

C. Critiquing the Evasion

The upshot of Morrison, combined with the Ninth and D.C. Circuit decisions, is not just that they encourage courts to do an end-run around legislative jurisdiction analysis — it is worse. Treating the regulation of foreign activity as “domestic regulation,” simply because an adverse impact is felt in the United States, creates a presumption in favor of extraterritorial jurisdiction.

The impact of eviscerating doctrine this way is at least three-fold. First, it potentially promises to increase the amount of extraterritorial regulation through judicial decisions. In a modern, globalized economy, finding some impact on the United States is always possible. Second, it upsets the background default rules upon which Congress legislates. At the very least, it makes those rules less meaningful. When a court will apply the presumption against extraterritoriality and when it will choose to ignore it be-

123 Id.
124 Id. at 2883.
125 Id. at 2885. This differed from traditional analysis which assumed that Congress’s focus was usually territorial unless Congress said so. United States v. Bowman, 260 U.S. 94, 97-102 (1922) (describing the locus of criminal laws).
126 Id.
127 Admittedly, believing that the Court intended to create such a glaring loophole is difficult. But the Court declined to accept review in either of D.C. Circuit and Ninth Circuit decisions. Its willingness to let those decisions stand, combined with its discussion of “focus,” provides leeway for mischief in the future and has led some commentators to assert the Supreme Court supports the D.C. and Ninth Circuit’s novel approaches.
128 BORN & RUTLEDGE, supra note 6, at 573 (questioning whether in today’s global economy basing jurisdiction on effects permits almost limitless legislative jurisdiction); Paul Schiff Berman, Global Legal Pluralism, 80 S. CAL. L. REV. 1155, 1182 (2007) (“[I]n an electronically connected world the effects of any given action may immediately be felt elsewhere with no relationship to physical geography at all.”).
comes less clear. Third, it encourages more ad hoc decisions and reduces predictability as courts have little guidance as to which rules to follow. In cases where a court is opposed to finding the law applies, the court can invoke a rigorous presumption against extraterritoriality. In cases where a court wishes to provide a remedy, the court can simply define away the problem. Legislative jurisdiction thus becomes a malleable façade: to provide judges cover in tendentiously making what otherwise would be arbitrary or merits-driven decisions (or, at least, decisions based on other, unwritten considerations). In turn, the presumption against extraterritoriality is rendered too feeble to protect against exorbitant jurisdictional assertions.

Even if a more charitable assessment is made, encouraging courts to sidestep the jurisdictional analysis or engage in a “focus” analysis contributes little but obfuscation to the legislative jurisdiction analysis. It takes a relatively straightforward inquiry into Congressional intent and replaces it with a free-wheeling assessment of the legislation’s gravitational center. Another problem exists. What courts should consider in determining the “focus” of legislation is uncertain. Presently, the test is so unformed and poorly delineated that lower courts have almost no guidance on how to proceed in a principled way. A focus analysis thus may give new life to a broadly-conceived effects test—an approach that the Supreme Court appeared to wish to inter with Morrison.

III. A RETURN TO FIRST PRINCIPLES

As stated in the Introduction, the Essay’s purpose is not to provide an extensive framework or rubric for deciding legislative jurisdiction cases. Its primary aim is descriptive: to reveal a recent development that, if not checked, may augur a sea change in how courts address legislative jurisdictional issues. The Essay ends, however, by suggesting that courts would do well to return to the well-established tenets of legislative jurisdiction and international law. Courts should be skeptical of a litigant’s claims that Congress intends a law to apply to the foreign conduct of non-citizens.

129 See Robert A. Leflar, Honest Judicial Opinions, 74 Nw. U. L. Rev. 721, 735-41 (1979) (arguing for intellectual honesty and the need for judges to accurately articulate the reasons for their decision); David L. Shapiro, In Defense of Judicial Candor, 100 Harv. L. Rev. 731, 737-50 (1987) (arguing that honesty and candor are essential attributes to the judicial process); see also Knox, supra note x, at 388 (“Courts should strive to employ interpretative canons that are transparent and coherent enough for Congress, the executive and everyone else concerned to be able to predict whether and how they will be used to construe legislation”).

130 Dodge, Morrison’s Effects Test, supra note x (arguing that Morrison embraced an effects test despite language in the opinion to the contrary).
A. A Revived Presumption, the End to Effects

In the wake of *Morrison*, lower courts will be tempted to follow one of two paths – either to take to heart the Court’s condemnation of the effects test, or instead circumvent it through a focus analysis that finds extraterritoriality not in play if domestic effects are shown. With luck, courts won’t be lulled to the wrong path and will more closely hew to the presumption against extraterritorial regulation when dealing with foreign defendants acting abroad. The presumption that Congress only employs its territorial jurisdiction absent a Congressional directive is not an arbitrary or hollow canon – it encapsulates important considerations.

Enshrined in the presumption is the recognition that extraterritorial laws regulating foreigners are problematic and should be used with great care. As an initial matter, extraterritorial laws that impose obligations on non-citizens are inherently undemocratic because they impose obligations on individuals and groups who have no formal voice in the political process and who have not consented to those laws. Because of this political-legitimacy deficit, laws that regulate foreign conduct are antithetical to basic notions of fairness and self-governance. Not surprisingly, extraterritorial...
regulation is barred domestically: the extraterritoriality principle formally prohibits American states from regulating conduct of non-citizens occurring in sister states.134 Indeed, it’s particularly odd that under current jurisprudence American states when joining a federal system purportedly retained greater sovereignty to be free from extraterritorial regulation than foreign countries.135 While debate exists as to how much sovereignty states retain under the Constitution, no one argues that states secured greater sovereignty by joining the union.

Second, the presumption serves a separation-of-powers function and helps allocate authority. Underlying the presumption is the understanding that Congress, rather than the courts, is better equipped to make the policy and judgment calls as to whether law should apply to foreign conduct.136 The presumption thus requires that Congress must have actually given the

---

134 The extraterritoriality principle holds that a state may “may not ‘project its legislation into [other States].’” Brown-Forman Distillers Corp. v. N.Y. State Liquor Auth., 476 U.S. 573, 582-83 (1986) (alteration in original) (quoting Baldwin v. G.A.F. Seelig, Inc., 294 U.S. 511, 521 (1935)); see also Healy v. Beer Inst., 491 U.S. 324, 336-37 (1989) (explaining that states may not regulate “commerce that takes place wholly outside of the State's borders, whether or not the commerce has effects within the State, if its 'practical effect . . . is to control conduct beyond the boundaries of the State or if it risks creating a problem with inconsistent legislation arising from the projection of one State regulatory regime into the jurisdiction of another State.’”) (quoting Edgar v. MITE Corp., 457 U.S. 624, 642-43 (1982)); Bonaparte v. Tax Court, 104 U.S. 592, 594 (1881) (stating that a state may not legislate “except with reference to its own jurisdiction”). For scholarship describing the extraterritoriality principle in the domestic context, see Donald H. Regan, Siamese Essays: (I) CTS Corp. v. Dynamics Corp. of America and Dormant Commerce Clause Doctrine; (II) Extradterritorial State Legislation, 85 MICH. L. REV. 1865, 1884-1913 (1987) (describing the extraterritoriality principle); Gillian E Metzger, Congress, Article IV, and Interstate Relations, 120 HARV. L. REV. 1468, 1520-21 (2007) (describing the general prohibition against extraterritorial regulation, but noting that it is formal in nature and not absolute); cf. Mark D. Rosen, State Extraterritorial Powers Reconsidered, 85 NOTRE DAME L. REV. 1133, 1135 (2010) (noting a strand of dormant Commerce Clause jurisprudence that prohibits domestic extraterritorial regulation, but concluding that political processes, not the Constitution, imposes limits on when a state within the United States may regulate conduct occurring in another state).

135 See Katherine Florey, State Courts, State Territory, State Power: Reflections on the Extraterritoriality Principle in Choice of Law and Legislation, 84 NOTRE DAME L. REV. 1057, 1128-29 (2009) (advocating for “within-jurisdiction effects as a basis for regulation” drawn from international cases, while noting that this is not the current law in domestic legislative jurisdiction).

136 Bradley, supra note x, at 524-29 (arguing that a central purpose of Charming Betsy can is to avoid having judges, who are politically unaccountable and inexpert in foreign affairs, erroneously place the United States in violation of international law through their construction of a statute); Knox, supra note x, at 386 (“Courts have no expertise in foreign relations, and whenever possible they should take care not to create political headaches for those with responsibility in this area.”). A similar argument is made in the domestic context, see Rosen, supra note x.
issue of a statute’s geographic reach thought: Congressional silence is insufficient. It also conveys an allocation-of-authority concept in a different way. The presumption reflects the pragmatic reality that international law, rather than domestic law, is often best suited to address international challenges.137 Simply put, global challenges usually require comprehensive, harmonized responses, with cooperation and agreement among many states. Unilaterally imposed extraterritorial measures undermine and hamper those multilateral efforts.

Third, a robust territorial presumption reduces friction with foreign nations, who bristle at what they perceive to be illegitimate assertions of power, if not legal imperialism.138 Indeed, other countries view jurisdiction based solely on effects with inherent suspicion, if not as outright violative of international law.139 The result is that foreign countries often attempt to weaken the impact of extraterritorial regulation through diplomatic protests, nonrecognition of judgments, and blocking or clawback statutes.140 In addition, on the margins, the presumption avoids difficult Constitutional and international law issues that can arise with extraterritorial laws.141

To avoid misunderstanding, emphasizing the limits of this Essay’s critique is also necessary. Adhering to principles of territoriality on the international arena is not to solve the current debate among the Justices as to what is required to show a “clear indication of intent,” and to what extent legislative history or other indicia of intent can be accounted for. Believing that countries should avoid using domestic law to regulate the foreign activity of non-citizens is not to necessarily require a strict clear statement rule.142 But it does mean that domestic effects alone are never a basis for assuming that Congress intended to regulate foreign activity. And it requires that whenever a litigant seeks damages based on foreign activity that a court must ascertain whether Congress intended to regulate that foreign conduct. In this way, the effects test should be constrained, or at least not further

137 The concept of a natural forum is familiar in the federal-state context.
139 BORN & RUTLEDGE, supra note 6, at 569, 573, 648–50 (explaining how “post-War assertions of U.S. legislative jurisdiction often aroused diplomatic protests and legal objections from foreign states”); John B. Sandage, Forum Non Conveniens and the Extraterritorial Application of United States Antitrust Law, 94 YALE L.J. 1693, 1698 (1985) (explaining that the effects test was perceived as “Yankee ‘jurisdictional jingoism’ [that] created wide-spread resentment”).
140 Parrish, The Effects Test, supra note x, at 1491-92, nn.190-93.

expanded. At the very least, it suggests that reasoning of the Ninth Circuit and D.C. Circuit decisions was wrong.

Another misunderstanding is also common. It is tempting to engage in the conceit that extraterritorial laws are necessary, or at least that courts should rescue Congress from its oversight if it failed to contemplate the issue of geographic scope when it enacted a law. The worry over regulatory-free zones where foreign companies appear liberated from U.S. laws motivates the concern. But while seductive, the concern has always been misleading. First, under the nationality principle, a state has jurisdiction to regulate the conduct of citizens abroad.\textsuperscript{143} So while it is true that citizens and U.S. corporations should not be able to escape national regulatory objectives by simply moving certain activities offshore, that truism does not support basing jurisdiction on the effects of foreign conduct. The problems with extraterritoriality do not apply in situations where the United States holds its own citizens, and its own government, to domestic standards abroad. Second, suggesting that courts should gingerly assume that Congress exercised extraterritorial power is not to argue for no regulation. The opposite is true. In a modern, global economy, transnational activities usually require some level of regulation, if not comprehensive regulation. But there is no reason to assume that the regulation must be, or is appropriately, unilateral and domestic in nature. Instead it is to recognize that international law, and the consent-based multilateralism upon which it is based, is better suited to address international disputes.

B. The World in Our Courts, Americans in Foreign Courts

Although the foregoing suggests there are theoretical, doctrinal, and other drawbacks to courts evading legislative jurisdiction analysis, a long-term pragmatic concern is also at stake. The readiness of courts to apply U.S. law to the foreign conduct of non-citizens says much about what form of global governance the U.S. wishes to promote. Will international challenges in the coming decades be resolved comprehensively or in a hodgepodge, piece-meal fashion? Will the world be one governed by multilateral agreement or instead by a free-for-all, where each state is free to impose its own vision and where exceptionalism rather than the rule of law controls?

While the “unilateral-free-for-all” vision has its adherents, how much that vision departs from common understandings of international law is worth underscoring. The international system was structured in a way to encourage cooperation, reduce conflict, and promote democratic self-

\textsuperscript{143} \textit{See, e.g., The Apollon,} 22 U.S. (9 Wheat) at 370 (“The law of no nation can justly extend beyond its own territory, except far as in regards to its own citizens.”) (emphasis added); \textit{see also Harvard Research,} supra note x, at 445 (describing the nationality principle).
government.\textsuperscript{144} Those ideals are undermined if our national courts sidestep international law to unilaterally regulate.\textsuperscript{145} As one circuit court explained the problems with this form of legal imperialism:

\begin{quote}
The United States should not impose its own view of [legal standard on a foreign country]. . . . a country with a vastly different standard of living, wealth, resources, level of health care and services, values, morals and beliefs than our own. . . . Faced with different need, problems and resources [the foreign country] may, in balancing the pros and cons of a [product’s] use, give different weight to various factors that would our society . . . . Should we impose our standard upon them in spite of such differences? We think not.\textsuperscript{146}
\end{quote}

Although we may “cherish the image of our courts as the refuge of all seeking succor,”\textsuperscript{147} as one commentator provocatively describes it, “it is past time for us to get it through our heads that it is not everyone but us who is out of step.”\textsuperscript{148}

Yet whether we want foreigners to litigate their claims in our courts is perhaps the wrong question to ask. What’s in play is less about entertaining foreign cases in U.S. courts, and more about whether we are prepared to have foreign courts adjudicate the propriety of American conduct occurring in the United States. This reciprocity point bears particular emphasis, although it is absent from almost all discussions of extraterritoriality. After years of the U.S. being one of the few to apply its laws extraterritorially, other countries have begun to follow suit.\textsuperscript{149} The impact has grown as

\end{footnotesize}
American-style litigation has migrated to other countries. While the idea of a U.S. global policeman may be troubling, equally or perhaps more troubling is the idea that every nation’s regulatory system has global reach. U.S. courts should be wary of fostering a system that inherently undermines sovereignty and encourages surrendering control to foreign courts. Those courts are unlikely to reach decisions that promote American interests. Hewing to a presumption against extraterritorial jurisdictional assertions thus prevents the further development of a norm that provides other states with authority to attempt to regulate and prescribe American activity within the United States whenever some foreign effect can be alleged.

A final point to end with. This Essay does not suggest that extraterritorial regulation is always a bad idea. That would be a particularly strong position, and not the position advocated here. In under-regulated areas, extraterritorial regulation can fill a gap. And it may be that extraterritorial regulation can serve as a placeholder before more comprehensive, international agreement can be reached. Sometimes the U.S. is not able to wait until multilateral negotiation concludes before taking action. At minimum, increased extraterritorial regulation provides more fora where injured plaintiffs can seek a remedy. Indeed, these policy considerations all make extraterritoriality expedient and alluring. For these reasons, it may be that in narrow circumstances Congress will decide the short-term benefits of extraterritorial regulation of non-nationals outweigh its significant long-term costs. But it’s a decision not to be taken lightly, and one the courts should not simply assume. At least courts should address these considerations head on and not evade the important issues that legislative jurisdiction implicates.

**CONCLUSION**

In a number of recent, high-profile decisions, circuit courts have evaded legislative jurisdiction analysis by employing the fiction that not all laws that regulate the overseas conduct of foreigner should be considered extraterritorial. The U.S. Supreme Court last term may have unintentionally encouraged this doctrinally odd approach by finding that legislation focused domestically is not extraterritorial, even if foreign conduct is regulated. This Essay has explained why the circuit court decisions and that particular reading of *Morrison* are not defensible doctrinally. It also underscores why these approaches significantly break from previously accepted practice.

---

But the Essay has attempted to go beyond those descriptive points: more is in play than simply a doctrinal battle. The increased willingness of courts to find that a law regulates the foreign conduct of non-nationals – even absent any indication that Congress considered the issue – reflects a very different vision of the world than we are traditionally accustomed. Evading legislative jurisdiction analysis and promoting extraterritoriality is to take an approach that privileges and fosters unilateralism while undermining traditional international law-making and the multilateralism upon which it is based. The new approach is troubling. With luck, it will be short lived.
