Libraries for Sustainability Webinar Series #2
Exploring Sustainability Practices in Libraries
April 24, 2012, 2:00-3:00 PM (EST)

There are different types of sustainability practices in libraries (e.g. buildings, collection development, instruction, events, collaboration) and many of us are working, educating, and practicing in these areas. Join us for the second webinar in the Libraries for Sustainability series to learn about and share sustainable practices in academic, public and school libraries. This webinar will be similar to a lightning round-up as librarians engaged in different types of sustainability efforts share with you their experiences and provide time for questions. The session will be recorded so you can view it later.

SIGN UP BELOW to receive the link to the virtual room.
