Benefits to researchers:

1. **Name Disambiguation**
   Have a common name? Published under multiple names? Changed your name? With ORCID, you can list all names that you’ve gone by, published under, or used in your academic career.

2. **Unique ID for researchers**
   In a digital ecosystem of research, unique identifiers are incredibly important. Chances are your articles have DOIs and books have ISBNs. ORCID identifiers will provide a unique identifier for researchers. This will make it easier for larger systems to figure out which works belong to YOU.

3. **Profile for links to all your works**
   Once you have an ORCID identifier, you can set up a profile. Your profile can link out to your works (using DOIs, URLs, ISBNs, patent numbers, etc.) Unlike Academia.edu or the Digital Repository @ Iowa State, ORCID profiles do not host copies of your work, so you do not need permission from publishers.

4. **Enable automatic updates from large research systems**
   Your research record, or parts of it, likely exists in other systems. If you enable it, you can connect your ORCID profile to Scopus, ResearcherID (Web of Science), and CrossRef Metadata search. These systems will add entries to your ORCID when they are available.

5. **Belongs to you, not the University**
   You control what data you add to your ORCID profile and the privacy level of each entry. Your profile is yours, and does not belong to any university or research institute.

**Check out an ORCID profile:** [http://orcid.org/0000-0002-2597-718X](http://orcid.org/0000-0002-2597-718X)

**Publishing with ORCID:**

Many journal publishers ([Taylor & Francis, PLOS, Springer](https://www.taylorfrancis.com) and more!) now give authors the opportunity to list their ORCID as part of the article submission process.

---

Example of ORCID displayed on a journal article. The ORCID logo links to author’s ORCID profile page where authors can link to all of their work and include their current affiliation.

ORCID is growing in usage and popularity. Chances are you will interact with it while submitting a manuscript or when applying for a grant.
