Chemical Technology of Ore Processing
by Vladco Panayotov, Fathi Habashi, and Marinela Panayotova in 218 pages, 20.5 x 28.5 cm, hard cover, is a combined effort of authors from different countries with different background. The book is in 8 chapters:
1. Introduction
2. Energy Basis of Flotation
3. Pyrometallurgy
4. Basics of Minerals Dissolution and Leaching
5. Hydrometallurgy
6. Electrometallurgy
7. Application of Methods of Extractive Metallurgy to Different Ores
8. Environment Pollution Problems in the Mineral Processing Industry
