# BOOK REVIEWS AND CONFERENCE REPORTS

is published in 2017 by Métallurgie Extractive Quebec, 800 rue  
Alain # 504, Quebec City, Canada G1X 4E7. It is in 485 pages can  
be downloaded free of charge from the web site

[http://works.bepress.com/fathi\\_habashi/](http://works.bepress.com/fathi_habashi/)

The reviews and conference reports were published mainly in the *Bulletin of the Canadian Institute of Mining and Metallurgy* and in *Mineral Engineering*. They are reproduced here in facsimile edition. Some of them were not published. It was not possible to make the separation of different reviews because more than one book was reviewed in the same page of the journal. It should be also noted the same review sometimes appeared in *Minerals Engineering* as well as *MEi Online*. It is reproduced here in one journal only. Book reviews and conference reports are closely related because in most conferences *Proceedings* are published. Proceedings are here reviewed under Book Reviews not with the Conference Reports. The book is in 414 pages and covers historical and technical books as well as conference reports.
