# PROFESSIONAL WORK EXPERIENCE

## Currently:

2009 to Present: Director of Ph.D. Professional Counseling Program Center for Counseling and Family Development Liberty University

### Associate Professor of Professional Counseling

Responsibilities include teaching primarily doctoral level courses in professional counseling. These courses have included:

Coun 797: Counseling Seminar: Attachment Theory: Research and Practice Coun 797: Counseling Seminar: Psychodynamic Theory in Professional Counseling Coun 805: Advanced Psychopathology and Its Treatment Coun 806: Cognitive Therapy and Professional Counseling Coun 871: Advanced Quantitative Research and Statistics

Other Courses have included: Couns 711: Addictions in Counseling Coun 800 Psychological Assessment Coun 612: Counseling the Child Coun 705 Philosophy of Psychology and Christian Counseling Coun 712 Psychopharmacology and Neuropsychology in the Helping Professions Coun 745 Advanced Statistics/

Other responsibilities include administration of the doctoral program in professional counseling as well as chairing 3 to 5 doctoral dissertation per calendar year. Also, participation on CCFS Leadership Team

## Clinical Psychologist, Piedmont Psychiatric Center

Responsibilities include individual caseload of 30 to 35 clients weekly; modalities include individual psychotherapy with children, adolescents, and adults; group psychotherapy, including a grant funded group on Dialectical Behavior Therapy for Borderline Personality Disorder, family therapy, couples therapy, psychological testing, and hospital consultations. Also, conduct psychological evaluations for both the adult and child and adolescent inpatient units.

Specialty treatments:

- focus on attachment informed treatments for mood disorders, especially chronic depression
- Special training in the treatment of Refractory Chronic Depression, using Cognitive Behavioral Analysis of Systems Psychotherapy, CBASP
- attachment based family therapy for complex oppositional defiant disorder in children and adolescents
- Treatment of chronic PTSD in both adults and children
- Attachment based therapies for children with attachment disorders and attachment disturbances
- Also, supervision of both Masters and Doctoral level interns in both inpatient and outpatient settings

### Internship Supervison: Centra Health

Supervision of both Masters and Doctoral level students in a variety of contexts and with a variety of populations within Centra Health's Psychiatric Treatment Programs

### Clinical Director, Light Counseling Inc. (1995-1999)

Responsibilities include: Individual caseload of 25-30 clients per week. Job description includes /conducting group therapy /Clinical program development for focal groups and disorder specific treatment protocols/Psychological testing/Clinical supervision of master level interns/Writing a monthly column on relevant clinical topics in Light's newsletter "Light Source"/Presenting bi-monthly in-service workshops on relevant clinical topics/Clinical coordination of an intensive outpatient program, including program development for a specific trauma recovery track to be implemented in the fall of 1995. (1992-1999)

# Pre-doctoral and postdoctoral clinical training

# Practicum In Clinical Psychology

A 1000 hour (10 semester credit hours) clinical training experience that emphasized three areas of training: assessment, intervention, and supervision/consultation. Each area of training paralleled specialty course work in psychological testing, psychotherapy interventions, and supervision/consultation methods. The Learner was exposed to a high degree of patient contact. Patient population consisted of individuals experiencing moderate to severe mental disorders, including psychotic disorders, depressive disorders, anxiety disorders, childhood developmental disorders and disruptive behavioral disorders, severe personality disorders, and various cognitive disorders. Located at Virginia Baptist Hospital, under the supervision and training of 5 clinical psychologists (primary supervisor: Dan Owens, Ph.D., VA Lic # 1078). Learner was on site for minimum of 20hours/week; two hours of face-to-face (1:1) supervision/week, minimum of 3 hours didactic and case-conferencing/week. (1997-1999)

# APA Consistent Internship in Clinical Psychology

A 2000 hour (full-time, onsite, 30 to 40 hrs/week, from August 1<sup>st</sup>, 1999 to October 12, 2000) training experience at Centra Health of Lynchburg, Virginia, which offers virtually a fullrange of mental health services to the greater Lynchburg community. This internship provided the learner with a plethora of clinical exposure and experience with a wide variety of moderate to severe mental disorders. The learner had substantial responsibility for carrying out major professional functions within the context of a supervisory relationship. The learner participated in three major rotations (acute child psychiatry, acute adult psychiatry, and behavioral medicine) and two sub-rotations (emergency mental health and forensic psychology). In addition, the learner was assigned a minimum of six cases/wk ongoing psychotherapy cases throughout the internship, administered at least two psychological assessments/wk beyond those conducted within each rotation/wk, and was available for psychological consultations throughout the hospital. Patient contact was equal to or exceeded 1000 hours. This internship was consistent with the requirements of an APA approved internship, and included the following components: 5 full-time, onsite, clinical psychologists and at least two doctoral level interns; minimum of 2 hours face-to-face supervision/wk; 11/2 hours group supervision/wk; 2-3 hours didactic training/case conferencing/wk; internship evaluations at six months and the conclusion of the training experience.

# Post-master Internship in Professional Couunseling

Light Counseling Inc. Under the supervision of Dr. Tim Clinton and Dr. Ron Hawkins.

Provided individual, family and group psychotherapy to adults, children and adolescents presenting with a variety of clinical problems (1992-1994)

### Home-based Family Therapist

Provided individual and family therapy for juvenile delinquents and their families in a home-based setting. The position also required extensive collaboration efforts with community organizations such as court service units and social services and Family Assessment and Planning Teams (FAPT) (Spring 1992 to fall of 1992)

### **Residential Youth and Family Counselor**

Provided individual and family counseling for juvenile delinquent males and their families within a residential setting. (1990-1992)

### Delta Outreach Detention Caseworker.

Responsibilities and tasks include: case management, intensive collaboration with Court Service Unit, Social Services and Mental Health, counseling and supervision of homebased adolescents who have been referred by the Amherst Juvenile and Domestic Court (1990-1992)

### **PROFESSIONAL MEMBERSHIPS**

American Psychological Association American Association of Christian Counselors

#### Current Research Projects:

<u>The God Attachment Project:</u> A grant funded research project initiated in the fall of 2006. The focus was multileveled. The first was to examine the spiritual and relational experiences of a sample of first semester college freshmen. We measured multiple domains, including the quality of parent-child attachment, religious emphasis, perceived parental spirituality, loss, and potential trauma, God attachment, romantic attachment, mood regulation, and spiritual well-being. We also endeavored to develop a theory-based religious doubt scale. This scale is currently under construction and the manuscript is in preparation.

#### Other Research Activities

<u>Dialectical Behavior Group Therapy Outcome Project</u>: Co-principle investigator of a grant funded projected designed to administer dialectical behavior therapy to patients at Piedmont Psychiatric Center. These patients have been diagnosed with severe Borderline Personality Disorder and are being treated within a multi-component treatment program which include psychiatric medication management, individual psychotherapy, and DBGT (administered by both a licensed clinical psychologist and a board certified psychiatrist). Careful pre- and post- test assessments have been administered. Because of the severity of the patients, no control group was used. The primary aim of the study was to assess whether adding the skills training group to this treatment refractory group of patients would result in improved functioning, not only in terms of standard outcome measure but also more ecologically valid measures such as fewer hospitalizations, fewer ED visits, and fewer non-psychiatric medical visits to general practitioners. This project began in January 2004 and extends to January 2006. The project is funded by the Centra Foundation.

Attachment-Based Family Therapy for Oppositional Defiant Disorder and Other Disruptive Behavior Disorder. This project is currently in the preparation phase, which involves the completion of a clinician treatment manual for administering Attachment-Based Family Therapy (50% complete). After the manual is complete, the next phase will be to secure funds for the study and to recruit and train therapists. At this point, the Centra Foundation has expressed an interest in funding such a project. Therapist will include both Master level interns in counseling, LPC's and perhaps some LCP's. The third phase would include the recruitment of patients and pre-test assessment. The fourth phase will be the actual treatment phase. The study's design will include random assignment into a waiting list control group (depending on whether the IRB will approve of it with such a population), an active control group (individual supportive-counseling) and the experimental group. Phase five will be post-assessment.

## Sample of Recent, Relevant Trainings and Certificates:

Certified Practitioner of Cognitive Behavior Analysis System of Psychotherapy (January, 2013).

Treatment of Chronic Depression. Specialty training in Cognitive Behavioral Analysis of Systems Psychotherapy, Jim McCollough, Ph.D. VCU, Richmond Va. 2011, March 14-18. This training includes ongoing clinical supervision with a certified CBASP therapist. I should complete the certification process in Dec. 2012.

Neurofeedback Training in Smartmind, October 2010, Richmond Va..

Two-Years (2009-2010). Object Relations and Attachment Theory, Training and Supervision, Michel Kaufman, Washington School of Psychiatry. This involved once a month, 5 hour training held in Charlottesville Va. Total was 90 hours of continuing education.

March 2010. Two Day Training with David Burns: Cognitive Therapy for Anxiety Disorders. Held in Charlotte N.C.

April 2009. Two Day Training by John Briere. Treating Complex PTSD. Held in Durham, N.C.

April 2008, 14 day training in The Adult Attachment Interview, held at the Washington DC Institute of Psychiatry

June 2007, Two day Training with David Burns. Using CBT in with Difficult Cases. Held in Durham, NC.

March, 2005, Two Day Training by Donald Meichenbaum. Treating PTSD with Cognitive Behavior Therapy
