Fastest Cars and their technology.docx

Dello Eno, University of Montana, Missoula
Which technology is supporting the fastest cars in the world?

Koenigsegg, the Swedish car manufacture, has been producing the finest cars in the world since it hit the market with its first production car in 2002. Here are some facts related to the manufacture.

Pinchcliffe Grand Prix, the movie triggered the idea behind the company

Founder of Koenigsegg, Christian von Koenigsegg had the idea of producing the finest super car in world after watching the movie Pinchcliffe Grand Prix. The animated feature film is among the most watched Norwegian movies of all time. Released in 1975, this movie triggered the dream of producing the best supercars in the world. In his early days, Christian von even created the sketches for his car. He was searching for his dream car for years. He created many designs before realizing the design for the first concept car. Now, Koenigsegg cars are one of the finest cars in the world.

Koenigsegg cars are premiers in both design and performance

Koenigsegg cars did not take much time to raise as the top super cars. In fact, they brought the concept of hyper cars with their impressive and unbeatable specifications. In 2002, their first production car, the CC8S version was certified by Guinness World Records as the most powerful engine in the world. The car had 655 hp engine. They repeated the same in 2004, rolling out the Koenigsegg CCR models. The total output of its engine is 806 hp. This time, Koenigsegg CCR was awarded the World’s Most Powerful Production Car by Guinness World Records. In the following year, the CCR was recognized as the World’s Fastest car. In 2007, the CCXR version was listed by Forbes among the most beautiful cars in the world.

Koenigsegg badge is based on the heraldic coat of arms of the Koenigsegg family

Koenigsegg’s logo has its origin in the family’s old coat of arms. The lineage of Koenigsegg family traces back to 12th century Roman Empire, the ancestors being knights in middle ages. The present logo is with slight modifications. It has been a tradition for car manufacturers to use shield designs as car logos. Several car companies including Ferrari and Porsche uses shields as logos.

Koenigsegg also produced the world’s most expensive car, the ‘Trevita’

Apart from producing the fastest, Koenigsegg also produced the most expensive car. The CCXR ‘Trevita’ is the most expensive car so far. Although the company planned to built three such cars, it produced only two units. Floyd Mayweather, the famous boxer bought one of it at a whopping price of USD 4.8 million. Trevita is the only car in world which is coated with diamonds and rubies.
