**Training Institute for the Adult Attachment Interview**

The Adult Attachment Interview Training Institutes are intensive 10-day training courses in the analysis of the Adult Attachment Interview - perhaps the most important clinical and research tool to emerge from the field of attachment. The institute is designed for researchers and professionals intending to use the AAI in their research and professional activities. The focus of the institute is on the application of the AAI coding system, developed by Mary Main, Ruth Goldwyn and Erik Hesse, to AAI interview transcripts and transcript fragments.

This is a demanding workshop, meeting from 9:00 a.m. to 4:00 p.m., Monday to Friday, over 10 days. There will be a transcript to code most evenings and on the middle weekend. The 2-week full-time course culminates in participants being eligible to take the AAI Reliability Test, administered by Drs. Mary Main and Erik Hesse at the University of California at Berkeley, and leading to qualification as a “Trained AAI Rater”.

David and Deanne Pederson are accredited AAI trainers.
