Academic Experience

- Sabbatical Visiting Professor, Colorado College, Block 8, 2014 & 2015
- Professor, Department of Biology (joint appointment), Utah State University, 2008-present.
- Associate, Utah State University Ecology Center, 2008-present.
- Professor, Department of Mathematics and Statistics, Utah State University, 2003-present.
- Research Sabbatical, University of Glasgow and University of Alberta, 2007.
- Associate Professor, Department of Mathematics and Statistics, Utah State University, 1997-2003.
- Research Sabbatical, Laboratory of Theoretical Production Ecology, Wageningen Agricultural University, Wageningen, the Netherlands, 1999.
- Assistant Professor, Department of Mathematics and Statistics, Utah State University, 1991-1997.
- Postdoctoral Fellow, Arizona Center for Mathematical Sciences, University of Arizona, 1990-1991. Supervisor: Jerome V. Moloney.
- Ph.D. in Applied Mathematics, 1990, University of Arizona. Advisor: Alan C. Newell.
- Graduate Research Assistant/Teaching Assistant, University of Arizona, 1985-1990.
- B.S. in Mathematics, 1985, with Honors and Highest Distinction, Colorado State University. Honors Advisor: Murray Nabors.
- Student Researcher, Department of Atmospheric Sciences, Colorado State University, 1983-1985. Supervisor: William R. Cotton.

Honors and Awards

- Lee Segel Prize for Best Paper of 2010, Society for Mathematical Biology (with B.R. Kohler, R.J. Swank and J.W. Haefner), 2010.
- USU College of Science 'Researcher of the Year,' 2008.
- USU Math Department 'Researcher of the Year,' 2004.
- Best Visionary Science Publication, 2002 (with Jesse Logan). Rocky Mountain Research Station, USDA Forest Service.
- USU Alumni Association 'Professor of the Year,' 2001.
- USU College of Science 'Teacher of the Year,' 2001.
- Selected for USU Mortar Board's 'Top Prof' Award, 1994.

Research Interests/Specializations

- Mathematical Fields: Applied Mathematics, Nonlinear Evolution PDE, Asymptotic Analysis, Dynamical Systems.
- Areas of Application:
 - Ecology – dispersal and demographics of organisms, formation of spatial patterns
 - Entomology – developmental phenology and dynamic aspects of adaptations to the environment
 - Modeling – population dynamics, energetics of organisms, industrial chemical reactions, market pricing of derivatives, evolution of quantitative traits....
 - Continuum Physics (fluid mechanics, nonlinear optics)

Work in Progress:

1. Dispersal and outbreak behavior of Mountain Pine Beetle in North America (with B.J. Bentz, USDA Forest Service RMRS, Logan Forestry Sciences Lab, J. Duncan, PhD student and L. Gordillo).
2. Modeling vegetative and sexual reproduction and spread of *Phragmites* in Utah (with R. Rozum, undergrad, Physics and Karin Kettenring, Watershed Sciences, USU).
3. Parameterizing random-walk movement models in variable habitats using homogenization (with Marti Garlick, SD School of Mines and Technology, L. MacFarlane, UT DWR and Mevin Hooten, USGS Assistant Unit Leader, Colorado State University).
4. Large-scale dispersion of pinyon and juniper depending on small-scale vertebrate dispersal (with Ram Neupane, PhD student and TC Edwards, USGS Assistant Unit Leader, Utah State University).
5. Lab-based pedagogy in Mathematical Biology - using the Biology/Applied Math Instructional Model (with James Haefner, Biology (retired), Brynja Kohler, Mathematics, Andrea Bruder, Mathematics, Colorado College, and Matt Lewis, PhD student, Math & Stats).
6. Zombie Apocalypse! Mathematical modelling of disease behaviors observed in HvZ at USU (with Lizzie Spencer, undergraduate researcher, Mathematics)

artisan

Publications

Below ♡ indicates publications resulting from undergraduate research and ♠ indicates publications with graduate co-authors. International collaborations are indicated with ◇.

Refereed Journals:

Invited Talks and Presentations:

1. *Research/Teaching Statements for Job Applications*. Invited talk, SIAM Student Chapter, USU. November 15, 2013.
2. *Modeling Pest Dynamics in the Limit as Trees become Broccoli: Lessons from the Mountain Pine Beetle*. Invited talk, National Institute for Mathematical and Biological Synthesis (NIMBioS) Investigative Workshop on "The evolution of pest resistance to crop protection strategies: What we know, the models we have, and the models we need." University of Tennessee, Knoxville, November 2013.
3. *How mechanistic models with landscape resistance, direct temperature effects on life-cycle timing, and the Allee effect explain bark beetle outbreaks*. Invited talk, Ecological Society of America Meeting, Minneapolis, MN August 2013.
4. *Slow Down, Bring your Friends, and Eat a Tree: How Phenology and Differential Dispersal Predict Landscape Patterns of Mountain Pine Beetle Impact*. Invited talk, Western Forest Insect Work Conference, Couer d'Alene, ID, March 4-7, 2013.
5. *Informative and Inspiring Mathematical Writing (with Students)*. A workshop given at MAA Sectional Meeting, BYUI Rexburg, March 29, 2013
6. *Instantaneous NSF*. University of Alabama, Birmingham Nutrition and Obesity Research Center, September 2012.
7. *Math and the Life-Impaired: How Disease Theory Predicts the Zombie Apocalypse*. USU College of Science 'Science Unwrapped' February, 2012. Plenary talk, MAA Sectional Meeting, BYUI Rexburg, March 29, 2013
8. *Emerging at the Right Time, Stopping at the Right Place, and Scaling Up the Right Way: Phenology and Differential Motility Describe Patterns of Bark Beetle Outbreak*. UBC Okanagan, September, 2011; University of Colorado, November, 2011; Colorado State University, October 2012; University of Montana, October 2012.
9. *The Timing of Insect Development and Trajectory of Bark Beetle Outbreaks*. SIAM Conference on Dynamical Systems, Snowbird, UT May 2011; UBC Okanagan, September, 2011; Colorado College, November, 2011.
10. *Being on Time: Tree-Level Phenology, Landscape Outbreaks and Evolutionary Dynamics for Mountain Pine Beetle*. Keynote Speaker, Tria Project Scientific Workshop, Edmonton, Alberta November, 2009.
11. *Connecting Tree-level Phenology and Landscape-level Mountain Pine Beetle Outbreak Dynamics*. Invited speaker, Society of Math Biology Minisymposium on Modelling Forest Insects, Vancouver, July 2009, University of Groningen Department of Evolution and Ecology, May 2009, Mathematical Biology Seminar, University of Utah, October, 2009, Departments of Wildlife Science and Applied Economics, USU, Spring 2010, Department of PPhysics, USU, Spring 2011.
12. *Mountain Pine Beetle, Ecology, Modelling and Risk Analysis*. With J. Régnierè and B.J.B Bentz. Laurentian Forestry Centre, Canadian Forest Service, Quebec, Quebec. October 2008.
13. *Ghost Forests, Global Warming and the Mountain Pine Beetle*. Loyola Marymount University, February 2008.
14. *Mathematical Modelling and Mountain Pine Beetles 1994-2007: A Case Study*. 2007. Invited Plenary talk at the Fredericton 'Spread' workshop, Fredericton, New Brunswick.
15. ♠ Yurk, B.P. and J. Powell. 2007. *Evolution of Phenology*. Presented by Brian Yurk at Joint SMB/AMS Meeting.
16. *Connecting Tree-level Phenology and Landscape-level Mountain Pine Beetle Outbreak Dynamics: Where did All the Green Trees Go?*. North American Forest Insect Work Conference, 2006; University of Alberta, 2006; University of Dundee, 2007, Heriot-Watt University, 2007, University of Glasgow, 2007; 65th Birthday Conference for Jim Cushing, University of AZ, 2007.

17. *Invasion of Mountain Pine Beetle due to Climate Change*, Invasion Models in Ecology and Biology, Banff International Research Station/MSRI, November, 2004.
18. *Modelling Development with Variability in Phenotype and Environment*, Workshop on Transport Models in Industry, Traffic, and Biology, ASU, February, 2003; Society for Math Biology Annual meeting, Dundee, Scotland, August, 2003; Wageningen University, September, 2004; Arizona State University, February, 2005; Western Forest Insect Workshop, Victoria, BC, March 2005; Dartmouth College, May, 2005.
19. *The Mathematical Basis for Modelling Insect Seasonality*, Joint Meetings of the Entomological Societies of America and Canada, Montreal, December, 2000; Natural Resource Ecology Lab (CSU), January, 2001; University of Alberta, February, 2002.
20. ♡ Leek, J.T. and J. Powell. 2003. *Numerical approaches to solving PDE modelling Mountain Pine Beetle Phenology*. Presented by Jeff Leek at the regional AMS meeting in Salt Lake City.
21. *Quantitative Environmental Biology Workshop*, NSF-sponsored, invitation-only workshop to help determine future directions for quantitative environmental biology. San Diego Supercomputer Institute, September, 2000.
22. *Teaching Mathematics in the Biology Classroom: BioMathLab at Utah State University*. Annual meeting of the Society of Mathematical Biology, Salt Lake City, Utah, August, 2000.
23. *Spatio-Temporal Models in Ecology: An Introduction to Integro-Difference Equations*. Two-week post-graduate workshop taught at Wageningen University, the Netherlands, February, 1999; to be repeated Spring, 2001.
24. *Mathematical Elements of Spatial Risk Analysis in the MPB/Forest System*, International Workshop on Spatially Heterogenous Problems in Ecology and Epidemiology, Fifth International Conference in Mathematical Population Dynamics, Zakopane, Poland, June 1998. (Also presented in: Theoretical Production Ecology Workgroup and Sub-department of Entomology, Wageningen Agricultural University, 1999; Gödöllő Agricultural University, Gödöllő, Hungary, May 1999).
25. *Dynamics of Mass Attack: Local Projections of Global Models*, presented at the Interdisciplinary Nonlinear Dynamics Seminar, USU, Nov. 1995. Also invited to National Forest Insect Work Conference, April, 1996, and Gordon Research Conference, June 1996.
26. *Mathematical Issues in Ultra-Short Propagation*, presented at Physics Colloquium, USU, Nov. 1995.
27. *Mathematical Models of Mass Attack in Mountain Pine Beetles at: the Nonlinear Analysis Conference*, University of Utah, Salt Lake City, Utah, April 1994; the Department of Chemistry, USU, May 1994; Mathematical Biology Seminar, University of Utah, Salt Lake City, Utah, May 1994; Department of Mathematics, Colorado State University, September, 1994; Department of Biology, USU, November, 1994; Weber State University, February 1995; Mathematical Models in Population Dynamics Conference, USU, August 1995.
28. *Reflection of Localized Beams from a Nonlinear Absorbing Interface*, at the Applied Math Colloquium, University of Utah, Salt Lake City, Utah. March, 1993. Presented also at the Applied Math Colloquium, University of Arizona, Tucson, Arizona, April, 1993, and at Idaho State University, November, 1993.
29. *Localized States in Fluid Convection and Multi-Photon Lasers*, at the SIAM meeting on Dynamical Systems, Snowbird, UT, October, 1992; Physics Colloquium, Utah State University, May 1992.
30. *Pulse Dynamics at Interfaces between Nonlinear Materials*, presented at the Applied Math Colloquium, University of Colorado, Boulder CO. September 1992.
31. *Accuracy-Optimized Approaches to Self-Steepening in Self-Focussing, Ultra-Short Laser Pulses*, at the meeting "Computational Optics and its links to Computational Fluid Dynamics," Arizona Center for Mathematical Sciences, Tucson, AZ. March, 1992.

32. *Pulse Dynamics at Interfaces between Nonlinear Materials*, presented at the Physics Colloquium, Utah State University, May 1992.
33. *First Year Project Report on Beam Collapse as an Ocular Damage Mechanism*, presented to contract monitors and staff at the Directed Energy Division, Radiation Analysis Branch, School of Aerospace Medicine, Brooks AFB, San Antonio, Texas. June 1991.
34. *Nongenericity and Stability in Front Solutions*, presented at the Applied Math Colloquium, University of Colorado, Boulder CO. October 1990.

Funding Activity

Proposals Funded

1. *Predicting mountain pine beetle phenology and forest susceptibility in the southwester United States.* USDA Forest Service, 2015-2016. \$100,000, JP is PI.
2. *Bridging Math and Science - Authentic Laboratory Experiences in Mathematical Biology.* NSF-TUES Type I, 2013-15. \$100,000, JP is USU PI; collaborative grant with Colorado College, Andrea Bruder PI.
3. *Landscape-Scale Enhanced Mountain Pine Beetle Model.* USDA Forest Service, 2009-015. \$60,000, JP is subcontractor as part of \$80,000 WWETAC grant to Barbara Bentz, USDA Forest Service RMRS.
4. *Phenological coupling and decoupling in mutualism: Temperature effects on a bark beetle host and two fungal symbionts.* NSF DEB 2009-13. \$113,000 subcontract, Diana Six, University of Montana is PI.
5. *Constructing an Intermediate-Complexity Biological Modeling Framework for Nutrient Cycling in Lakes Based on Physical Structure.* USU Water Initiative, May 2008. \$11,000, JP is PI.
6. *Evolutionary Models for Phenology.* Linked travel proposals to the Royal Society of London, Edinburgh and London Math Societies, 2007. \$12,000, Christina Cobbold, University of Glasgow, was PI.
7. *Validating a Southern Pine Beetle Phenology Model and Testing Hypotheses of Spot Initiation and Success.* USDA Forest Service Southern Research Station, 2006-07 (\$20,000, JP is PI).
8. *MATLAB Implementation of an Improved Southern Pine Beetle Phenology Model and Hypotheses of Spot Initiation and Success.* USDA Forest Service Rocky Mountain Research Station, 2006-07 (\$11,000, JP is PI).
9. *PCR Thermal Protocol Optimization.* Idaho Tech, Inc, 2005-06,(\$12,000, J.P. was PI, proposal supports a graduate student).
10. *Bark Beetle Phenology Modelling with Full Variability in Temperatures and Among Individuals.* USDA Forest Service Southern Research Station, 2005-06, (\$20,000, J.P. was PI).
11. *Mathematical Determination of Climate Change Impacts on Range of Mountain Pine Beetle.* Canadian Forest Service, 2003-2006, (\$52,000, J.P. was PI).
12. *Advance-US: Applying a Business Model to a University.* NSF-SBE, 2003-2008, (~ \$3,000,000, JP was co-PI in a team of four: Ronda Callister (PI, Management and Human Resources), Kim Sullivan (co-PI, Biology), Christine Hult (co-PI, English)).
13. *The Role of Mathematics and Computation in Systems and Integrative Biology.* NSF-BIO, 2003-2004. (~ \$35,000 workshop proposal, JP was PI).
14. *Homogenization and Simulation Applied to Optimize Heating Designs.* Contract with Idaho Technologies, Inc. 2003-2005. (~ \$17, 000, J.P. was PI).
15. *Integration of Mountain Pine Beetle Models across Spatial and Temporal Landscapes.* USDA-FS RMRS Research Station 2001-2003. (~ \$16, 000, J.P. was PI).
16. *Homogenization Applied to Integrate Across Spatial and Temporal Scales in Forest/Insect Ecology* (NSF, 2000-03, ~ \$340,000, J.P. was PI; co-PIs: B. Bentz (USDA-FS), D.R. Cutler (Stats), J. Logan (USDA-FS)). REU and RET supplements support two undergraduates and a local teacher.
17. *Predicting Emergent Dyanamics of ANT Systems,* DARPA, 2000-03 (~ \$460, 000, J.P. was PI; co-PIs: T. Moon (Engineering), D. Watson (Computer Science)).

18. *Flight Dynamics of Trumpeter Swans*, US Fish and Wildlife Service, 2000-2005 (~ \$10,000, J.P. was PI).
19. *Optimal Flight Dynamics as a Limiting Factor to Trumpeter Swan Migration*, Utah Mineral Lease Replacement Fund, 2000-01 (~ \$40,000, J.P. was PI; co-PI: V. Roy (USFWS)).
20. *International Collaboration on Modelling Biocontrol of Fungal Pathogens*, NSF, 1998-2000 (~ \$11,000, J.P. was PI).
21. *BioMathLab: Modelling Biological Processes in the Laboratory*, FIPSE, 1997-2000 (~ \$318,000, J. Haefner (Biology) was PI; J.P. was co-PI with J. Koebbe (Math), J. Cangelosi (Math), A. Lindahl (Biology)).
22. *Acquisition of a High-Performance Computer for Mathematical Sciences Applications*, NSF/MRI 1997-99 (~ \$150,000, J.P. was co-PI, then acting PI; H. Walker was initial PI; co-PIs: A. Cutler (Stats), K. Hestir (Math), E. Stone (Math)).
23. *Developing an Integro-Difference Approach to MPB Dispersal*, USDA/FS, 1996-97 (~ \$17,000). Proposal funded postdoctoral associate and development of integro-difference emulation strategy for the MPB dispersal model.
24. NSF REU Supplement to *Nonlinear self-focussing...* grant, 1996-97, (~ \$10,000). Proposal funded research for two undergraduates.
25. *Predicting Bark Beetle Dispersal in Western Forests*, Utah Mineral Lease Proposal, 1996-97 (~ \$45,000). Funded data collection, parametrization and validation of MPB dispersal model. (J.P. was PI; co-PIs: B. Bentz (USDA-FS), J. Logan (USDA-FS), D. Roberts (Forestry))
26. *Spatial Invasion of Pine Beetles into Lodgepole Forests, Year 2*, USDA/FS Proposal, 1995-96 (~ \$32,000). Proposal continued postdoctoral funding and development of 'local' projections for global models. (J.P. was PI; co-PIs: B. Bentz (USDA-FS), J. Logan (USDA-FS))
27. *Nonlinear Self-Focussing as a Mechanism for Generating Spatial Complexity in Ecosystems*, NSF, 1995-97 (~ \$50,000). (J.P. was PI; co-PIs: B. Bentz (USDA-FS), J. Logan (USDA-FS), D. Roberts (Forestry))
28. *Southwest Regional Institute for Mathematical Sciences (SWRIMS)* NSF, (W.Y. Velez was P.I, USU a collaborative institution with the University of Arizona), 1995-97 (~ \$70,000). Proposal funded integration of research and education at levels from high school to university.
29. *Spatial Invasion of Pine Beetles into Lodgepole Forests*, USDA/FS, 1994-95 (~ \$35,000). Proposal funded a postdoctoral associate and development of spatial dispersal model for MPB.
30. *Study of Optical Shock Formation in Self-Focussing, Ultra-Short Pulses*, University Faculty Research Grant 1991-92 (~ \$10,000).
31. Proposal to the SCREMS program, NSF, for an improved graphical computing environment in the math department. (J.Powell was co-PI, proposal written with J. Koebbe, K. Hestir, H. Walker.)
32. *Safety Standard Development for Ultra-Short Laser Pulses*, AFOSR, 1990-91. (J.V. Moloney was PI; co-PIs: A.C. Newell and J.Powell)

Other Information

Journal Review

European Journal of Applied Math, SIAM Journal of Applied Math, Physica D, Mathematical Reviews, Physical Review A, Diversity and Distributions, Ecology, Ecological Monographs, Ecological Applications, Environmental Entomology, Forest Ecology, Journal of Mathematical Biology, Journal of Theoretical Biology, Bulletin of Mathematical Biology, Philosophical Transactions of the Royal Society of London

Current Students

Jacob Duncan (PhD – Math), Matt Lewis (PhD – Math), Ram Neupane (PhD – Math), Lizzie Spencer (UG – Math)

Past Students (Major Advisor)

Graduate: Audrey Addison (PhD – Math), Daniel Balls (MS – Math), Zy Biesinger (MS–Biology), Bradley Bush (MS–Industrial Math), Alicia Caldwell (MS – Math), Alia Criddle/Maw (MS–Industrial Math), Marti Garlick (PhD – Math), Estella Gilbert (MS–Industrial Math), AnnMarie Harris (MS–Math), Justin Heavilin (Ph.D.–Math), Kun Huang (MS–Industrial Math), Jan Jenkins (MS–Math), Matt Lewis (MS – Math), Tyler McMillen (MS–Math), Sarah Reehl (MS – Industrial Math), Chris Retford (MS–Industrial Math), Michael Rigley (MS – Math), Audrey Smith (MS – Math), Heidi Tangermann (MS–Fisheries and Wildlife), Brian Yurk (Ph.D.–Math)

Undergraduate: Zy Biesinger (Biology), Dawance Chea (Biological Engineering), Joe Eason (Math/Physics), Estella Gilbert (Math), Sujit John (Math/CS), Shannon Kay (Undergrad, Wildlife), Bruce Kennedy (Math), Michael Larkin (Math/Education), Jeff Leek (Math), Rachel Nydegger (Physics), Andrew Pound (Math/Physics), Chris Retford (Math), Jason Rose (Math/Physics), Lizzie Spencer (Math), David Stowell (Computational Math), Jessica Tams (Math/Physics), Ethan Williams (Math)

Conferences/Workshops Organized:

1. **Laboratory Experiences for Mathematical Biology Students.** A mini-symposium offered at the Society for Mathematical Biology Annual Meeting, 2015, in Atlanta. Co-organized with Brynja Kohler, USU and Andrea Bruder, Colorado College.
2. **Model Fitting Across the Mathematics Curriculum.** Co-organized with David Brown, Colorado College, and offered on April 17, 2015 at the MAA sectional meeting at Colorado College, Colorado Springs, Colorado.
3. **The Role of Mathematics and Computation in Systems and Integrative Biology.** NSF-funded workshop to suggest the future course of integrative biological research involving mathematics, statistics and computer science. Held on the USU campus, March 2003.
4. **Spatio-Temporal Models in Ecology: An Introduction to Integro-Difference Equations.** Post-graduate course sponsored by the Graduate School, Wageningen Agricultural University, Wageningen, the Netherlands, February, 1999. Repeated in Spring, 2001, Spring, 2009.
5. **Spatial Dynamics in Ecology: Redefining the Paradigm.** Mini-symposium proposed for the SIAM General Meeting, June 1997.
6. **SWRIMS Biology/Applied Math Instruction Model Workshop** for high school and college instructors, sponsored by NSF through SWRIMS, November, 1995.
7. **Mathematical Models of Population Dynamics,** sponsored by NSF through SWRIMS, August, 1995.
8. **Singularities in Physical Systems,** USU mini-conference, June, 1992.

Pedagogical Accomplishments

- Developed Quantitative Ecology Block for the USU Ecology Center with T. Edwards, Wildland Resources.
- Developed Industrial/Interdisciplinary Projects in Applied Mathematics capstone course for the Industrial Mathematics Program at USU. Course involves applied problem solving and presentation in group/studio format. 2006-2008.
- Developed and Taught Math 4910-LD, Introduction to Linear Algebra and Differential Equations, for USU's UMEP Distance Education program, taught to in-service Utah Math Teachers over USU's satellite network, 2005-2007.
- Developed Applied Math in Biology with J. Haefner (Biology, USU), a team-taught capstone course for the BioMath Minor.
- Developed the Honors Calculus sequence at USU.
- Developed and taught an international course in "Spatial Modelling in Ecology: an Introduction to Integro-difference Equations" for the Graduate School of Wageningen University, the Netherlands.
- Assisted in developing innovative programs at USU, including:
 - The BioMath Minor, an interdisciplinary minor program for students in Mathematics, Statistics, Biology, and Biological and Irrigation Engineering.
 - **BioMathLab**, a sequence of quantitatively-intensive class/lab experiences for students in life sciences, funded by FIPSE. (J. Haefner is PI).
 - The Interdisciplinary Ph.D in Math, a doctoral program integrating graduate course work outside of mathematics, aimed at encouraging and supporting cross-disciplinary research in math.
 - The Industrial Master's Program, a professional masters program geared to generating students trained to apply mathematics in private-sector environments.

Departmental, College and University Service

- Search Committee Chair, Mathematics Education, 2012-13.
- Search Committee Chair, Mathematical Biology, 2011-12 and 2013-14.
- College of Science Research Advisory Committee, 2006-2012.
- Graduate Committee Chairman, 2006-2009.
- Departmental Honors Coordinator, 1999-2009.
- Graduate Committee, 1999-2000, 2002-2005, 2011-2013.
- Honors Advisory Council, 1999-2002.
- Co-Chairperson (with Emily Stone), Program in Interdisciplinary Nonlinear Studies (PINS), 2000-2002.
- Co-organizer, Interdisciplinary Nonlinear Dynamics Seminar (INDy), 2000-2001.
- Departmental Honors Coordinator, 1996-1998.
- Industrial Master's Committee, 1996-present.
- Assisted with development of BioMath minor, 1994-6.
- Assisted with development of Honors Calculus (Department), 1994-95.
- Assisted with development of Nonlinear Analysis Graduate Program (Department), 1994-95.

- Assisted with development of Math/Biology integration for NSF Project Synergy (Department), 1994-95.
- Undergraduate Advising (Department) 1993-97.
- Computer Committee (Department), 1993-96, 97-98 (Chairman, 1993-94).
- Colloquium Committee (Department) 1992-95 (Chairman, 1992-93) .
- Math Dept. Search Committee (Department), 1992-93.
- Summer Lecture Series Committee (College), 1991-92.
- Graduation Ceremonies Committee (University), 1992-95 (Chairman in 1994-95).
