GOALS AND GOVERNANCE IN MUNICIPAL BANKRUPTCY

JULIET M. MORINGIELLO*

ABSTRACT

The years from 2011 to 2013 were remarkable in municipal bankruptcy terms. During those years, several cities and counties took the rare step of filing for bankruptcy under Chapter 9 of the Bankruptcy Code. When Detroit filed for bankruptcy in July, 2013, it became the largest city measured by both population and outstanding debt to file for Chapter 9.

The recent filings challenge the conventional wisdom that Chapter 9 is poorly tailored to the rehabilitation needs of larger cities and counties. Those who have written about Chapter 9 in the past twenty years have treated Chapter 9 and state intervention in municipal financial affairs as freestanding alternatives rather than as complementary components of a comprehensive municipal financial recovery plan. These authors compare municipal bankruptcy to corporate bankruptcy and conclude that because Chapter 9 does not incorporate all of the Chapter 11 checks on debtor behavior, it cannot adequately promote the financial rehabilitation of a sizable general-purpose municipality. This approach ignores the original goal of Congress in enacting a municipal bankruptcy law in the aftermath of the Great Depression, which was to bring together two sovereigns, the state and the federal government, to accomplish something that neither could accomplish alone – the imposition of a plan to adjust municipal debts that would be binding on all creditors, wherever located.

This article refocuses the discussion about the limitations of the municipal bankruptcy process by examining the goals of Chapter 9 and relating its governance provisions to those goals. A refocused discussion is particularly timely, because the deteriorating financial condition of many cities has led states to reexamine their programs for resolving municipal financial distress and the conditions under which they permit their municipalities to file for bankruptcy. Chapter 9 may only be as effective as the state governance that accompanies it. Therefore, policy makers on the state and federal levels need an understanding of the role of Chapter 9 in an integrated scheme for municipal financial recovery in order to decide whether and how to assist municipalities on the state level and to decide whether reforms to Chapter 9 are necessary.

* Professor, Widener University School of Law. Many thanks to Scott Pryor and David Skeel for their thoughtful comments on earlier drafts. I would also like to thank my research assistants, Corey Dietz and Julia Skinner, for their diligent and enthusiastic help with this article.

Municipal Bankruptcy

INTRODUCTION

Municipal bankruptcy occupies a rarely studied corner of bankruptcy law. Coverage of its governing Bankruptcy Code (“Code”) chapter, Chapter 9,¹ in law school casebooks and treatises is almost non-existent,² and scholars turn their attention to the subject only when a high-profile case is filed.³ There is a simple reason for this lack of attention: very few municipalities have filed for bankruptcy. Fewer than 700 cases have been filed⁴ since 1938, when the United States Supreme Court upheld the constitutionality of a municipal bankruptcy chapter.⁵ Even this number is misleadingly high; the overwhelming majority of the municipalities that have filed for bankruptcy were special purpose districts such as water and sewer districts,⁶ rather than general-purpose municipalities such as cities, counties and towns.

¹ 11 U.S.C. § 901 *et seq.*

² *See, e.g.* MARGARET HOWARD, *BANKRUPTCY: CASES AND MATERIALS* 21 (5th Ed. 2012)(explaining that Chapter 9 “governs the bankruptcy of municipalities [and] is used only occasionally,” and adding that “[w]e will not cover it in this casebook”); CHARLES JORDAN TABB, *THE LAW OF BANKRUPTCY* 116-117 (2nd Ed. 2009) (giving an overview of Chapter 9; the remaining coverage in the over 1400 page treatise appears on four other pages); ELIZABETH WARREN & JAY LAWRENCE WESTBROOK, *THE LAW OF DEBTORS AND CREDITORS* 109 (6th Ed. 2009) (devoting about six pages in a 931 page casebook to a description of Chapter 9, and acknowledging that Orange County filed for bankruptcy).

³ *See, e.g.* Dorothy A. Brown, *Fiscal Distress and Politics: The Bankruptcy Filing of Bridgeport as a Case Study in Reclaiming Local Sovereignty*, 11 *BANKR. DEV. J.* 625 (1994); David L. Dubrow, *Chapter 9 of the Bankruptcy Code: A Viable Option for Municipalities in Fiscal Crisis?*, 24 *URB. LAW.* 539 (1992)(written after Bridgeport, Connecticut filed for bankruptcy); Kevin A. Kordana, *Tax Increases in Municipal Bankruptcies*, 83 *VA. L. REV.* 1035 (1997)(written after Orange County, California filed for bankruptcy); Michael W. McConnell & Randal C. REV.* 425 (1993) (written after Bridgeport’s filing); Frederick Tung, *After Orange County: Reforming California Municipal Bankruptcy Law*, 53 *HASTINGS L.J.* 885 (2002).

⁴ *See* JAMES SPIOTTO, CHAPMAN & CUTLER, LLC, *PRIMER ON MUNICIPAL DEBT ADJUSTMENT*, Appendix C (2012), http://www.afgi.org/resources/Bankruptcy_Primer.pdf (reporting that, as of January 31, 2012, 635 municipal bankruptcy petitions had been filed). This is a miniscule number; in 2012 alone, 1,221,091 bankruptcy petitions were filed under all chapters. United States Courts, http://www.uscourts.gov/uscourts/Statistics/BankruptcyStatistics/BankruptcyFilings/2012/1212_f2.pdf (last visited Mar. 3, 2013)

⁵ *United States v. Bekins*, 304 U.S. 27 (1938).

⁶ Under the Bankruptcy Code, a municipality may file only for Chapter 9, 11 U.S.C. § 109, and the Code defines municipality as “political subdivision or public agency or instrumentality of a State.” 11 U.S.C. § 101 (40). Between 1980 and January 31, 2012, 264 municipalities filed petitions under Chapter 9, only 49 of which were cities, counties, or towns. *See* SPIOTTO, *supra* note 4, Appendix C.

The years from 2011 to 2013 were therefore remarkable in municipal bankruptcy terms. During those years, several general-purpose municipalities took the rare step of filing for bankruptcy under Chapter 9. Among those filing were: a small Rhode Island city, Central Falls;⁷ Pennsylvania's capital city, Harrisburg (whose filing was dismissed six weeks later);⁸ Jefferson County, Alabama,⁹ and Stockton, California.¹⁰ Just over a month after Stockton filed, another California city, San Bernardino, filed for Chapter 9 protection.¹¹ The media described the Jefferson County and Stockton bankruptcies in superlative terms: Jefferson County as the largest municipal bankruptcy ever filed measured by outstanding debt;¹² and Stockton as the largest city measured by population ever to file for bankruptcy.¹³ Both of these municipalities lost their bragging rights in July 2013, when Detroit became the largest city measured by both population and outstanding debt to file for Chapter 9.¹⁴

These recent filings challenge the conventional wisdom that Chapter 9 is poorly tailored to the rehabilitation needs of larger cities and counties. As news of impending financial doom in Harrisburg, Jefferson County, and several California cities emerged, so did scholarly articles questioning the utility of Chapter 9.¹⁵ Authors who have written about municipal

REV. 281 (2012) (Gillette, *Fiscal Federalism*); Omer Kimhi, *Chapter 9 of the Bankruptcy Code: A Solution in Search of a Problem*, 27 YALE J. ON REG. 351 (2010) (Kimhi, *Solution*); Richard C. Schragger, *Democracy and Debt*, 121 YALE L. J. 860 (2012). The financial problems faced by cities have also generated discussion about whether states should be permitted to file for bankruptcy, something that is currently prohibited. See Adam Feibelman, *Involuntary Bankruptcy for American States*, 7 DUKE J. OF CONST. L. & PUB. POL. 81 (2012); Adam J. Levitin,

Municipal Bankruptcy

bankruptcy in the past twenty years approach Chapter 9 and state intervention in municipal financial affairs as freestanding alternatives rather than complementary components of a comprehensive municipal financial recovery plan.¹⁶ From that vantage point, they compare Chapter 9 to other bankruptcy chapters, notably Chapter 11, and then conclude that because Chapter 9 does not incorporate all of the Chapter 11 checks on debtor behavior, it cannot adequately promote the financial rehabilitation of a sizable general-purpose municipality and is thus an undesirable alternative to *ex ante* state intervention. This approach ignores the original goal of Congress in enacting a municipal bankruptcy law in the aftermath of the Great Depression. When Congress passed the predecessor to Chapter 9, it did so in order to bring together two sovereigns, the state and the federal government, to accomplish something that neither could accomplish alone – the imposition of a plan to adjust municipal financial liabilities that would be binding on all the municipality’s creditors, wherever located.¹⁷

At the same time, the deteriorating financial condition of many cities has led states to reexamine both their own programs for resolving municipal financial distress and the conditions under which they permit their municipalities to file for bankruptcy. States have unfettered discretion in allowing their municipalities to file for bankruptcy; the Code allows a municipality to be a debtor under Chapter 9 only if it is “specifically authorized” by its state to file for bankruptcy.¹⁸ In the past few years, several states have revised their laws governing the ability of their municipalities to file for bankruptcy.¹⁹

J. 261 (2012) (discussing California’s Assembly Bill 506, which became effective on January 1, 2012, and which requires a California municipality to participate in a neutral evaluation process before filing a Chapter 9 petition); Juliet M. Moringiello, *Specific Authorization to File Under Chapter 9: Lessons from Harrisburg*, 32 CAL. BANKR. J. 237, 248 - 250 (2012) (explaining that Pennsylvania revised its authorization statute in response to Harrisburg’s financial distress); Katherine Newby Kishfy, Note, *Preserving Local Autonomy in the Face of Municipal Financial Crisis: Reconciling Rhode Island’s Response to the Central Falls Financial Crisis with the State’s Home Rule Tradition*, 16 ROGER WILLIAMS U. L. REV. 348, 377 - 382 (2011) (explaining that the Rhode Island General Assembly enacted a

In this article, I refocus the discussion about the limitations of the municipal bankruptcy process by examining the goals of municipal bankruptcy and relating the governance provisions in Chapter 9 to those goals in order to illustrate that Chapter 9 is only as effective as the state oversight that accompanies it. The recent municipal bankruptcy filings, especially that of Detroit, illustrate that larger municipalities will resort to Chapter 9 to alleviate their financial problems. These filings reopen the discussion about the usefulness of Chapter 9. Policy makers on the state level need a better understanding of how Chapter 9 bankruptcy was designed to complement, rather than replace, state financial intervention plans. This understanding will help them develop comprehensive schemes to deal with their distressed cities, towns and counties. Policy makers on the federal level must be able to identify the deficiencies in Chapter 9 in light of this shared governance goal. Chapter 9 was never designed to be an independent solution to municipal financial problems. An understanding of the goals of Chapter 9 and its role in an integrated scheme for municipal financial recovery can assist both groups of policy makers in deciding whether and how to assist the municipalities on the state level and in deciding whether reforms to Chapter 9 are necessary.

To refocus the discussion about managing municipal financial distress, in Part I, I discuss the constitutional underpinnings of Chapter 9's structure as well as the view that the structure eviscerates bankruptcy's effectiveness as a municipal rehabilitation tool. In Part II, I discuss the relationship between bankruptcy goals and bankruptcy governance in order to explain the governance structure in Chapter 9. I then discuss the history of Chapter 9 in Part III to illustrate that the original proponents of a municipal bankruptcy chapter designed it to invite the states to manage their municipalities' use of bankruptcy. In Part IV, I discuss the extent to which states have accepted this invitation to govern their municipalities in bankruptcy. In Part V, I use a specific example, that of Pennsylvania's response to Harrisburg's distress, to illustrate the confusion that reigns when state policy makers lose sight of Congress' original vision of Chapter 9 as one component of an integrated approach to municipal financial distress that incorporates both state law and federal bankruptcy law. In Part VI, I discuss some of the open issues that remain in Chapter 9 after the governance question is answered, and I conclude by encouraging policy makers to consider the proper role of Chapter 9 as they develop more robust mechanisms to rehabilitate their cities.

fiscal oversight statute in response to the financial problems in Central Falls); Paul Egan, *New emergency manager law signed, but opponents already talking about legal challenge*, DETROIT FREE PRESS, Dec. 28, 2012, available at <http://www.freep.com/apps/pbcs.dll/article?AID=2012312280118>.

Municipal Bankruptcy

I. THE DELICATE BALANCE OF STATE AND FEDERAL POWER PRESERVED IN CHAPTER 9: DOES IT RENDER MUNICIPAL BANKRUPTCY USELESS?

Constitutional concerns, coupled with municipal bankruptcy's original limited goal of solving the holdout problem, explain the somewhat skeletal nature of Chapter 9. The Tenth Amendment limits the control that a federal court can exercise over a municipality and the Contracts Clause limits the ability of a state to force a creditor of a city to accept less than what it is owed.²⁰ As a result, although today's Chapter 9 is modeled more closely on Chapter 11 than were its predecessor statutes,²¹ it lacks many of the elements of Chapter 11 that give creditors some control over the debtor. The structure of Chapter 9 appears to grant the governing body of a municipality in Chapter 9 exclusive management of the municipality's future destiny. Chapter 9 does not require this state of affairs, however. Congress did not design municipal bankruptcy law to give a municipality unfettered control over its reorganization process, rather, it carefully designed the law to respect each state's ability to control the financial rehabilitation of its cities. In this section, I will explain the major differences between Chapter 9 and Chapter 11 and then discuss the prevailing criticisms of Chapter 9.

A. Chapter 9 and Control Over the Debtor and Its Property

Chapter 9 incorporates many elements of other types of bankruptcy, Chapter 11 in particular. An automatic stay of all actions against the debtor and the debtor's property arises immediately upon filing.²² The debtor must propose a plan of adjustment, which is Chapter 9's version of the Chapter 11 plan of reorganization.²³ The debtor may assume or reject executory contracts, including collective bargaining agreements.²⁴ The municipality's creditors vote on the plan, and the voting requirements are similar to those found in Chapter 11.²⁵ Like Chapter 11, Chapter 9

²⁰ See notes – *infra* and accompanying text

²¹ See generally Lawrence P. King, *Municipal Insolvency: The New Chapter IX of the Bankruptcy Act, 1976* DUKE L.J. 1157 (1976) (explaining the 1976 amendments to Chapter 9's predecessor statute).

²² 11 U.S.C. §§ 901 (a) (incorporating the automatic stay provided by 11 U.S.C. § 362); 922 (extending the stay to actions against an "officer or inhabitant of the debtor that seeks to recover a claim against the debtor").

²³ 11 U.S.C. § 941.

²⁴ 11 U.S.C. § 901 (a) (incorporating 11 U.S.C. § 365); see also King, *supra* note 21, at 1169 (explaining that labor contracts may be a partial cause of a municipality's financial problems); Barry Winograd, *San Jose Revisited: A Proposal for Negotiated Modification of Public Sector Bargaining Agreements Rejected Under Chapter 9 of the Bankruptcy Code*, 37 HASTINGS L. J. 231, 276 – 281 (1985) (discussing the legislative history behind the inclusion of the right to reject collective bargaining agreements in Chapter 9).

²⁵ 11 U.S.C. § 901 (a) (incorporating all of the voting requirements of 11 U.S.C. § 1126 except for those dealing with voting by holders of equity interests in the debtor).

contains a cramdown provision, which provides that the plan can be imposed on non-consenting creditors if at least one class of creditors accepts the plan and the plan is fair and equitable.²⁶ These elements give a municipality some of the important bankruptcy benefits available to business entities: a stay of all collection actions, the ability to reject burdensome contracts, and the ability to impose a plan on non-consenting creditors. In other ways, Chapter 9 is significantly different from Chapter 11.

Chapter 9 explicitly respects state sovereignty. It eschews any limitation on the state's power "to control, by legislation or otherwise, a municipality of or in such state in the exercise of the political or governmental powers of such municipality,"²⁷ but limits this sovereignty by prohibiting states from passing laws that would bind non-consenting creditors to a plan of debt adjustment.²⁸ When Congress added this limitation to the municipal bankruptcy chapter in 1946, it did so recognizing that investors throughout the country held the bonds of many municipalities. Therefore, even if, as the Court had held in *Faitoute Iron & Steel Co. v. City of Asbury Park*,²⁹ the Contracts Clause did not prohibit a state plan of debt adjustment, Congress believed that a uniform federal process for imposing a plan on non-consenting creditors was preferable to a mélange of state processes.³⁰ In further recognition that federal law cannot usurp a state's role in municipal oversight, Chapter 9 prevents the bankruptcy court from interfering with a municipality's political and governmental powers and from interfering with the municipality's use of its property.³¹

This respect for state sovereignty explains the remainder of Chapter 9. The partial incorporation of Chapter 11 concepts reflects the fact that the bankruptcy court, as an arm of the federal government, must refrain from interfering with the governance of a municipality. As a result, missing from Chapter 9 are many of Chapter 11's provisions designed to give creditors some control over the Chapter 11 outcome. The default rule in Chapter 11 is that the existing managers of the debtor entity remain in

²⁶ 11 U.S.C. § 901 (incorporating the cram down provisions of 11 U.S.C. § 1129 (b)(1) and (b)(2)(A), (B)).

²⁷ 11 U.S.C. § 903.

²⁸ Congress added this limitation to overrule the Supreme Court's holding in *Faitoute Iron & Steel Co. v. City of Asbury Park*, 316 U.S. 502 (1942), which upheld a state's ability to impose a plan of adjustment on a municipality's non-consenting creditors. See McConnell & Picker, *supra* note 3, at 462 (explaining that Congress enacted § 903 to overrule *Faitoute*); Tung, *supra* note 3, at 889 fn. 16 (discussing the legislative history of the predecessor to § 903).

²⁹ 316 U.S. 502 (1942).

³⁰ H.R. Rep. No. 2246, 79th Cong. 2d. Sess. 4 (1946).

³¹ The debtor may, however, consent to such interference. 11 U.S.C. § 904 (2010).

Municipal Bankruptcy

control of the debtor as “debtor in possession.”³² At the request of a creditor or any other party in interest, the court can replace the debtor in possession with a trustee if the court finds that the corporate managers have engaged in certain misconduct such as fraud, dishonesty, incompetence, or gross mismanagement.³³ Although the courts view the appointment of a Chapter 11 trustee as an extraordinary remedy,³⁴ the threat of such an appointment theoretically serves as a check on the debtor’s behavior.³⁵ Chapter 11 also allows a court to appoint an examiner to investigate allegations of fraud and other misconduct on the part of the debtor.³⁶ Because Chapter 9 specifically prohibits the bankruptcy court from interfering with any of the political or governmental powers of the debtor municipality,³⁷ it lacks these constraints on the debtor and prevents the court from appointing a trustee or an examiner in a Chapter 9 case.³⁸

The Chapter 9 mandate that the court not interfere with the municipality’s management of its property is illustrated by the absence of an estate in a Chapter 9 case. Absent from the list of sections included in Chapter 9 is § 541, which provides that the commencement of a bankruptcy case creates an estate that is comprised of all “legal or equitable interests of the debtor in property as of the commencement of the case.”³⁹ The absence of an estate, coupled with the Code’s prohibition against court interference with any of the property or revenues of the municipal debtor,⁴⁰ ensures that neither the court nor any creditor can determine how a municipal debtor uses its property. No party in interest can object to the debtor municipality’s use or disposition of such property;

³² 11 U.S.C. § 1101 (1) (2010) (defining “debtor in possession”); 11 U.S.C. § 1107 (2006) (granting to the debtor in possession all of the rights and powers of a trustee).

³³ 11 U.S.C. § 1104 (a)(1) (2010).

³⁴ *See, e.g. In re Euro-American Lodging Corp.*, 365 B.R. 421, 426 (Bankr. S.D. N.Y. 2007); *In re Ionosphere Clubs, Inc.*, 113 B.R. 164, 167 (Bankr. S.D.N.Y. 1990)

³⁵ In the early years of Chapter 11, commentators noted that despite these theoretical controls on management, corporate management was rarely ousted in Chapter 11 cases, and thus the debtor had excessive control over the proceedings. *See, e.g.* Lynn M. LoPucki, *The Debtor in Full Control - Systems Failure Under Chapter 11 of the Bankruptcy Code – First Installment*, 57 AM. BANKR. L.J. 99, 103 (1983) (observing that creditors in the first three years of Chapter 11 practice rarely used three tools often viewed as giving creditors control over the proceedings: involuntary petitions, creditors’ committees, and creditor-proposed plans).

³⁶ 11 U.S.C. § 1104 (c) (2010).

³⁷ 11 U.S.C. § 904 (1) (2010).

³⁸ 11 U.S.C. § 901 (2010) (incorporating numerous Code provisions into Chapter 9 but omitting § 1104)

³⁹ 11 U.S.C. § 541(a)(1) (2010); 11 U.S.C. § 901 (2010); 11 U.S.C. § 902 (1) (2010) (defining “property of the estate” for Chapter 9 purposes as “property of the debtor”).

⁴⁰ 11 U.S.C. § 904 (2) (2010).

the debtor may use, lease or sell it in Chapter 9 without asking the court for permission.⁴¹

Other omissions from Chapter 9 reflect the congressional decision to leave the management of an insolvent municipality to the municipality itself and its state. Most notably, only the debtor can propose a plan of adjustment.⁴² Creditors have no opportunity to do so, therefore the debtor's exclusivity period is unlimited.⁴³ Somewhat less importantly, given the small number of involuntary bankruptcies,⁴⁴ only the municipality itself may file for bankruptcy. There is no such thing as an involuntary Chapter 9.⁴⁵

Although the foregoing provisions are sometimes cited as giving the municipal debtor excessive control over the bankruptcy case,⁴⁶ they should be viewed less as an effort to give the management of the municipality exclusive control than to balance the constitutional powers of the state and federal governments. A common criticism of Chapter 9 is that, by excessive deference to local control, Chapter 9 presumes that a municipality will exit bankruptcy in the same form as it entered bankruptcy.⁴⁷ A more accurate approach to Chapter 9's structure is to view Chapter 9 as a sometimes-necessary component of a state or local plan for municipal financial recovery. Chapter 9 does not require a municipality to exit bankruptcy in the same form as it entered the process. Instead, Chapter 9 leaves governance decisions to entities other than the creditors and the bankruptcy judge, and invites the state to provide such governance. The real governance vacuum in Chapter 9 emerges when the state fails to provide any direction for the financial rehabilitation of its cities.

⁴¹ See 11 U.S.C. § 363 (2010) (placing conditions on the debtor's use, sale, and lease of estate property); 11 U.S.C. § 901 (2010) (omitting § 363 from the sections applicable in Chapter 9).

⁴² See 11 U.S.C. § 941 (giving the debtor the authority to file a plan of adjustment).

⁴³ See 11 U.S.C. § 901 (2010) (omitting § 1121 from list of sections included in Chapter 9); 11 U.S.C. § 1121 (c) (2010) (granting parties in interest the authority to file a plan of reorganization after the expiration of the debtor's exclusivity period).

⁴⁴ Susan Block-Lieb, *Why Creditors File So Few Involuntary Petitions and Why the Number is Not Too Small*, 57 BROOK. L. REV. 803, 805 (1991).

⁴⁵ See 11 U.S.C. § 303 (a) (authorizing involuntary petitions only in Chapters 7 and 11).

⁴⁶ See, e.g. Kimhi, *Solution*, *supra* note 15, at 380 (stating that because the court has no authority to intervene in a city's governance, the same officials that controlled the locality before the filing continue to manage it); Kordana, *supra* note 3, at 1046 (describing Chapter 9 as having a "pro-debtor" orientation).

⁴⁷ See Gillette, *Fiscal Federalism*, *supra* note 15, at 297 (stating that once a state has permitted a municipality to file for bankruptcy, the exercise of the bankruptcy option lies completely in the debtor's control); Kimhi, *id.* (stating the same officials who managed the city prior to bankruptcy do so during and after the bankruptcy); McConnell & Picker, *supra* note 3, at 427 (identifying, as a premise of Chapter 9, that the municipality will have the same "boundaries, resources, functions, and governing structure" after bankruptcy that it did before filing for bankruptcy).

Municipal Bankruptcy

Unlike Chapter 11,⁴⁸ Chapter 9 has strict entry requirements. These eligibility requirements, which make the state the Chapter 9 gatekeeper, illustrate that Chapter 9 is better viewed as a component of a state plan to resolve the financial distress of its municipalities than an independent alternative to state intervention.

A municipality may be a debtor under Chapter 9 only if it: 1) is a municipality, 2) is insolvent, 3) desires to adjust its debts, 4) has negotiated in good faith with its creditors or can show that such negotiation would be futile, and 5) is specifically authorized by its state to be a debtor under Chapter 9.⁴⁹ In addition, the court may dismiss the debtor's petition if it finds that the debtor did not file it in good faith.⁵⁰ Chapter 9's eligibility requirements provide the governance functions that further the goals of Chapter 9. The requirement that does so most explicitly is the specific authorization requirement, which shows the intent of Congress to give states the first opportunity to resolve the financial distress of their municipalities and invite the federal power to help if necessary. When states accept this invitation by making Chapter 9 a component of a comprehensive state oversight program, they provide governance that best furthers Chapter 9's primary goal of restoring municipalities to financial viability by bringing together the state and the federal government to do something that neither one could accomplish alone. When states do not accept that invitation, Chapter 9 may provide the debtor with only a fresh financial start. In those states, the eligibility requirements allow the court to assess whether the debtor should use Chapter 9 to obtain that fresh start.

B. *Does Chapter 9 "Work?": A Survey of Recent Scholarship*

Municipal bankruptcy scholarship comes in waves. In the 1930s, when widespread municipal defaults drove Congress to pass the first municipal bankruptcy law, scholarship about municipal bankruptcy focused on the desirability of a federal law to overcome the inability of states to comprehensively resolve the financial distress of their cities and the desired components of such a law.⁵¹ Scholarship about municipal bankruptcy waned until the 1970s when New York City's financial crisis led Congress to amend the municipal bankruptcy chapter. The scholarship from the 1970s until 1990 focused primarily on the various amendments to

⁴⁸ See 11 U.S.C. § 109 (d) (stating that any person who can file for Chapter 7 may file for Chapter 11).

⁴⁹ 11 U.S.C. § 109 (c) (2010).

⁵⁰ 11 U.S.C. § 921 (c).

⁵¹ See Part III. A., B., *infra*.

the municipal bankruptcy law and how they would enable larger cities to file.⁵²

Beginning in the 1990s, scholars began to question both the wisdom of a federal municipal bankruptcy chapter and the efficacy of the existing law. Authors in this post-1990 era of Chapter 9 scholarship concur that Chapter 9 is a poor tool for resolving the financial problems facing municipalities in large part because of its lack of governance controls over municipal debtors.⁵³

In this section, I summarize the post-1990 scholarly debate in order to refocus it. Although the recent Chapter 9 filings have exposed numerous questions about how Chapter 9 should work,⁵⁴ the open questions in Chapter 9 do not arise from the governance deficiencies identified by the post-1990 authors. I discuss the governance concerns of these authors below before I turn, in Part III, to a discussion of the history of Chapter 9 to illustrate that Congress designed Chapter 9 to assist, rather than replace, states in resolving municipal financial distress.

1. Is Chapter 9 Based on a Faulty Premise?

Michael McConnell and Randal Picker wrote the first post-1990 academic municipal bankruptcy article. In their expansive article, *When Cities Go Broke: A Conceptual Introduction to Municipal Bankruptcy*,⁵⁵ they criticized both the limited goals of Chapter 9 and its efficacy in achieving those goals. When McConnell and Picker wrote their article, most of the general-purpose municipalities that had filed for bankruptcy were small cities seeking to escape the collection of large judgments against them and all of those cases were dismissed.⁵⁶ The only city of any size that had filed was Bridgeport, Connecticut, and its filing had been dismissed for failure to meet the Code's entry requirements.⁵⁷ Both New York and Cleveland had experienced significant financial difficulties that were due in large part to municipal mismanagement, and neither one

Municipal Bankruptcy

resorted to Chapter 9 to solve its problems.⁵⁸ McConnell and Picker's prescriptions for a better municipal bankruptcy chapter were therefore based on two observations: that very few general-purpose municipalities file for bankruptcy and the ones that do are very small, and that the one that needed reorganization, Bridgeport, was not permitted to reorganize in bankruptcy.⁵⁹

According to McConnell and Picker, the underlying premise of Chapter 9 is flawed. They posit that Chapter 9 is based on the belief that "all cities need is relief from their present creditors."⁶⁰ From that foundation, they reason that because Chapter 9 assumes that "the city will emerge from bankruptcy in the same form . . . with which it entered bankruptcy," Chapter 9 does not support or encourage the efficient reorganization of cities.⁶¹ As a result, municipal bankruptcy provides only a fresh start for cities, and it does not even do that very well because by allowing a city to keep all of its assets and discharge its debts, it creates the moral hazard of permitting a city to devote its resources to itself while escaping its debts.⁶² McConnell and Picker compare the fresh start goal to the Chapter 11 goal of efficient reconfiguration of assets and find the fresh start, as applied to municipalities, to be unsatisfying.⁶³

Others have repeated the concern that because all Chapter 9 does is grant a fresh start to a city, it is not a useful rehabilitation tool. Those who express this concern contend that Chapter 9 assumes no operational restructuring. Michelle Wilde Anderson presented municipal dissolution as an option that states should consider in resolving the distress of cities. She based her contention that bankruptcy and dissolution are "independent measures" on the assumption that municipal bankruptcy must preserve a municipality's broken form.⁶⁴ Clayton Gillette presented his criticisms of Chapter 9 as a set of concerns that the parallel state and federal systems for resolving municipal financial distress may lead to undesirable strategic behavior on the part of municipalities,⁶⁵ a criticism based on the

⁵⁸ McConnell & Picker, *supra* note 3, at 472.

⁵⁹ *Id.* at 471 (1993). In the more than two decades since McConnell and Picker wrote, few municipalities of any size have filed, and other authors have cited this as evidence of Chapter 9's ineffectiveness in restoring cities to fiscal health. *See, e.g.* Schragger, *supra* note 15, at 881 (2012)

⁶⁰ McConnell & Picker, *supra* note 3, at 494. *See also* David A. Skeel, Jr., *Is Bankruptcy the Answer for Troubled Cities and States?*, 50 HOUS. L. REV. 1063, 1074 (2013) (making a similar point in supporting a bankruptcy mechanism for states).

⁶¹ McConnell & Picker, *id.*, at 427.

⁶² *Id.* at 476.

⁶³ *Id.* at 470.

⁶⁵ Gillette, *Fiscal Federalism*, *supra* note 15, at 319-20. Because a state can limit its municipalities' access to bankruptcy, the only likely result of a strategic threat to file

observation that “the underlying assumption [of Chapter 9] appears to be that localities should be preserved in their current form, free from judicial reorganization.”⁶⁶ As an example of strategic behavior, he presents the possibility of a municipality that, when faced with the choice of a state bailout that would require structural changes to its operations, might choose bankruptcy instead, which would shift the losses to creditors and allow the municipality to operate without effecting needed structural reform.⁶⁷

Omer Kimhi likewise begins with the Chapter 11 comparison to identify deficiencies in Chapter 9. Underlying his criticism is his view that Chapter 9 is based on the assumption that once a city’s financial hardship is resolved through the bankruptcy process, the city can be rehabilitated for the benefit of both its citizens and its creditors.⁶⁸ Several years later, he described Chapter 9 as “a solution in search of a problem,” in part because it does “little to address the root causes of the economic deterioration” of cities.⁶⁹

The post-1990 authors saw Chapter 9 as puzzle. Although an insolvent municipality is an entity that should be restructured both financially and operationally in order to succeed post-bankruptcy, the goal of Chapter 9 appears to be a fresh financial start, which is the goal that bankruptcy has for individuals. Bankruptcy cannot force an individual to change her habits, but it can enable stakeholders in an entity to force changes in the debtor entity’s corporate structure. Therefore, there appears to be a mismatch between the goal of Chapter 9 and the governance that it provides: the identified goal allows for no bankruptcy governance over a debtor who may desperately need appropriate restructuring governance.⁷⁰

The authors propose to solve their puzzle in two ways: add the missing piece by providing for more robust judicial supervision over Chapter 9

might be its impact as a catalyst to legislative action. *See* notes - *infra* and accompanying text.

⁶⁶ Gillette, *Fiscal Federalism*, *id.* at 292.

⁶⁷ *Id.* at 286. Given the power of each state to prevent its municipalities from filing for bankruptcy, it is unlikely that such a strategic use would be successful. *See* Part [] *infra* (discussing Pennsylvania’s rejection of Harrisburg’s attempt to use bankruptcy in a strategic manner).

⁷⁰ *See* McConnell & Picker, *supra* note 3, at 470 (noting that while bankruptcy law can dismember a private corporation, “what may be surprising is that we do not dismember municipal corporations either”); Schragger, *supra* note 15, at 881 (noting that municipal bankruptcy is of limited use because it “does not contemplate the kinds of reorganizations that are possible on the private side”).

Municipal Bankruptcy

debtors or scrap the puzzle altogether and leave the resolution of municipal financial distress entirely in state hands. Below, I discuss both these prescriptions and the problems inherent in both.

2. Does Chapter 9 Give Too Much Power to the Debtor?

One way to solve the governance problem identified above would be to grant the bankruptcy courts enhanced powers in Chapter 9. Authors who have found the fresh start goal to be unsatisfactory suggest that a municipal bankruptcy regime should force the efficient reconfiguration of a city. If a municipality is more like an entity than an individual, they reason, then perhaps Chapter 9 should be refashioned to force structural changes at the municipal level. Some scholars who have written about Chapter 9 since 1990 reject the fresh start goal and its corresponding absence of debtor governance and urge that Chapter 9 should encourage the efficient reconfiguration of a municipality's structure, just as Chapter 11 does for business entities.⁷¹

To support their position that Chapter 9 assumes that the structure of a city will remain the same after discharge as it was before filing, several authors point to the limited powers that Chapter 9 grants to the bankruptcy court.⁷² Because of these limited powers, these critics contend that Chapter 9 grants excessive powers to the debtor itself, reducing the chances of a successful reorganization because the same elected officials who ran the city poorly will continue in office during and after the bankruptcy.⁷³ Moreover, those elected officials are likely to refrain from making unpopular adjustments, such as tax increases, in order to remain in their positions.⁷⁴ Likewise, because only the debtor may file a plan of debt adjustment, some fear that the municipality retains excessive leverage over

⁷¹ See McConnell & Picker, *supra* note 3, at 482-83 (stating that when a municipality cannot pay its bills, something more than a fresh start may be necessary).

⁷² *Id.* at 472 (explaining that the Code explicitly prohibits courts from interfering with a municipal debtor's political or governmental powers); Schragger, *supra* note 15, at 881 (observing that Chapter 9 does not allow a judge to order the involuntary dissolution of a city); Tung, *supra* note 3, at 898 (stating that Chapter 9 gives a municipal debtor a "hefty club to wield over creditors, without giving creditors much in the way of protective mechanisms that are available in corporate and individual bankruptcy").

⁷³ See Kimhi, *Solution supra* note 15, at 380 (explaining that the bankruptcy court has no authority to affect the control exercised by municipal officials); Kordana, *supra* note 3, at 1046 (describing Chapter 9 as having a "pro-debtor" orientation); McConnell & Picker, *supra* note 3, at 472 (explaining that a city's paralyzing financial difficulties are often the result of a poorly functioning city government); David A. Skeel, Jr., *Is Bankruptcy the Answer for Troubled Cities and States?*, 50 HOUS. L. REV. 1063, 1083 (2013) (explaining that the existing decision makers retain control in a Chapter 9).

⁷⁴ Gillette, *Fiscal Federalism, supra* note 15, at 320.

its creditors in that the creditors are faced with a choice of either “languishing in bankruptcy or accepting the municipality’s plan.”⁷⁵

Because McConnell and Picker believed that Chapter 9 should more explicitly foster the reorganization of a city, they identified Chapter 9’s fundamental flaw as its limitations on the bankruptcy court’s powers. From this premise, they reasoned that an effective bankruptcy system should give courts the power to take actions to restructure a city. Among the powers that McConnell and Picker recommended were the power to order the levy and collection of taxes, the power to order reductions in wasteful municipal expenditures, the power to seize income streams for bond repayment purposes, and the power to sell some municipal property.⁷⁶ They cited this last power as particularly important because they identify the ability of a city to discharge debt while retaining its assets as “the principal source of the moral hazard problem in municipal bankruptcy.”⁷⁷

Gillette echoed these suggestions as a solution to the possibility of a municipality using the threat of municipal bankruptcy in a strategic fashion. A bankruptcy court could refuse to confirm a plan of adjustment that did not provide for tax increases,⁷⁸ but Gillette argued that Congress should give the courts more explicit powers over city governance. He suggested that the bankruptcy court be given the power to impose adjustments to both taxes and spending in order to deter municipalities from seeking Chapter 9 protection to avoid making politically unpalatable choices that would impose the costs of financial distress on city residents rather than creditors.⁷⁹ Gillette’s strategic bankruptcy argument is similar to McConnell and Picker’s moral hazard argument; in both articles, the authors express the fear that if too much discretion is left in a municipal debtor’s hands municipal debtors will seek an easy out that will allow them to escape debts without making necessary structural changes.⁸⁰

⁷⁵ Kordana, *supra* note 3, at 1041.

⁷⁶ McConnell & Picker, *supra* note 15, at 475-76.

⁷⁷ *Id.* Kevin Kordana doubts that municipal bankruptcy presents a significant moral hazard problem. See Kordana, *supra* note 3, at 1085-9 (explaining that defaults on government debt remain rare despite the fact that creditor collection remedies against government debtors are limited).

⁷⁸ 11 U.S.C. § 943 (b)(7) (2010) (authorizing the court to confirm a plan of adjustment if it is in the best interest of creditors); 11 U.S.C. § 1129 (b)(2) (2010) (incorporated into Chapter 9 by § 901, and requiring that a plan be fair and equitable towards an impaired class of creditors that opposes the plan); see also *Fano v. Newport Heights Irrigation District*, 114 F.2d 563, 566 (9th Cir. 1940) (refusing to confirm a plan of adjustment that did not raise taxes, holding that the plan was neither fair and equitable nor in the best interest of creditors).

⁷⁹ Gillette, *Fiscal Federalism*, *supra* note 15, at 324-25.

⁸⁰ *Id.* at 297; McConnell & Picker, *supra* note 3, at 477.

Municipal Bankruptcy

Inherent in these criticisms of Chapter 9 is the observation that if a city files for bankruptcy, the city is in complete control of its destiny, free of external supervision. Gillette contended that once a state has permitted bankruptcy, the decision to file is exclusively within the control of the municipality.⁸¹ Chapter 9 does not require this result, however. The Code limits the bankruptcy court's power over the municipal debtor and its property,⁸² but in doing so, it refrains from imposing limits on a state's powers over its municipalities.⁸³ Rather than leaving power in the hands of a debtor municipality, these sections, when read together with the requirement that a state specifically authorize its municipalities to file, allow the state to exercise as much control as it desires.⁸⁴

McConnell, Picker, and Gillette recognized the legal impediments to their suggestions. The Code specifically prohibits the bankruptcy court from interfering with any of the municipality's political powers,⁸⁵ but the authors suggested that this statutory restriction be relaxed.⁸⁶ Nevertheless, they conceded that such powers might violate the Tenth Amendment and concluded that perhaps a federal bankruptcy chapter is unnecessary. Their conclusion that states should be empowered to enact municipal bankruptcy regimes, however, raises Contracts Clause issues.⁸⁷

3. Must Chapter 9 and State Intervention Run On Parallel Tracks?

The authors discussed above described state intervention and municipal bankruptcy as parallel independent systems. McConnell and Picker stated this explicitly, by describing bankruptcy as “an *alternative* to state reform rather than supplemental to it.”⁸⁸ This view of Chapter 9 and state intervention as mutually exclusive alternatives is consistent with some authors' characterization of Chapter 9 as a way for a city to obtain easy debt relief without making the changes necessary to both provide essential services and avoid financial ruin in the future.⁸⁹ If that is the case,

⁸¹ Gillette, *Fiscal Federalism*, *id.*

⁸² 11 U.S.C. § 904.

⁸³ 11 U.S.C. § 903.

⁸⁴ McConnell and Picker recognize this, but discuss state intervention as an alternative, rather than a complement to, Chapter 9. *See* McConnell & Picker, *supra* note 3, at 463, 473-474.

⁸⁵ 11 U.S.C. § 904 (2010).

⁸⁶ Gillette, *Fiscal Federalism*, *supra* note 15, at 295; McConnell & Picker, *supra* note 3, at 474.

⁸⁷ McConnell & Picker, *id.*, at 479-80. This of course would likely violate the Contracts Clause.

⁸⁸ McConnell & Picker, *id.* at 479 (italics in original).

⁸⁹ *See* Gillette, *Fiscal Federalism*, *supra* note 15, at 291-92 (suggesting that the objective of Chapter 9 is “simply to allow a financially distressed city to restructure its monetary obligations, not to restructure the city government or liquidate its assets for the benefit of creditors”); Kimhi, *Reviving* *supra* note 68, at 653 (stating that bankruptcy allows

Chapter 9 is of course undesirable. No one wants a city to go through the expense and bad press of bankruptcy just to emerge from bankruptcy in the same distressed form in which it entered.

The superior ability of each state to remedy its cities' financial distress is beyond question. A state can make structural changes that can prevent or alleviate municipal financial distress, something a bankruptcy court cannot do. A state can intervene in a city's financial distress by establishing a financial review board or by extending loans⁹⁰ and can act to mitigate the causes of municipal distress, such as suburbanization, by reforming the state tax structure.⁹¹ A state can dissolve a municipality in order to merge it into another,⁹² and can appoint a receiver to impose fiscal discipline on a municipality.⁹³

Recognizing this superiority, each author's view of the relationship between state intervention and Chapter 9 influenced his prescriptions for a superior system for the resolution of financial distress. For example, Gillette's article explored the interaction between Chapter 9 and state intervention; in fact, he described his contribution to the literature as an explanation of how the two systems interact using principles of fiscal federalism.⁹⁴ The interaction he described, however, assumed that the two systems run on parallel, rather than intersecting, tracks. After discussing a city's motivations to choose one system over the other, Gillette ultimately suggested a grant of greater powers to the bankruptcy court that would mirror those that could be exercised by the state in order to prevent strategic uses of bankruptcy by municipalities.⁹⁵ Strategic use, therefore, is possible only because Chapter 9 lacks the debtor governance that a state can provide. According to Gillette, this problem can be remedied by giving the two systems similar debtor governance provisions.

In McConnell and Picker's view, the mutual exclusivity of state oversight and bankruptcy meant that there was a governance vacuum that

municipalities to avoid paying their creditors in full by "refusing to maximize their tax-raising capacity").

⁹⁰ Gillette, *id.*, at 308.

⁹¹ See Kimhi, *Solution*, *supra* note 15, at 386-88 (explaining that a state can require suburban residents to bear some of a city's tax burden).

⁹² See generally Anderson, *Dissolving*, *supra* note 64; McConnell & Picker, *supra* note 3, at 481-5.

⁹³ McConnell & Picker, *id.*, at 473. Laws providing for the appointment of receivers are highly controversial in part because they deprive the local electorate of their choice of elected officials, and they tend to affect cities with large minority populations. See Michelle Wilde Anderson, *Democratic Dissolution: Radical Experimentation in State Takeovers of Local Governments*, 39 *FORDHAM URB. L.J.* 577, 579-82 (2012) (Anderson, *Radical Experimentation*).

⁹⁵ *Id.* at 324-25.

Municipal Bankruptcy

excluded coordination between the state intervention process and the federal bankruptcy process.⁹⁶ They discussed several examples of state oversight that they characterized as successful.⁹⁷ Their prescription was to allow for parallel systems, but to allow a state that was inclined to implement an intervention scheme to opt entirely out of Chapter 9. Their opt-out went further than the opt-out that already exists in the Code, however. They explained that the constitutional objections to state-imposed bankruptcy regimes might easily be overcome by amending the Code to permit the states to impose involuntary debt adjustments, thus allowing states to not only opt-out of the Code entirely, as they can now, but to provide the same benefits that the Code provides to their cities in doing so.⁹⁸ McConnell and Picker believed that one benefit of a state-run bankruptcy regime would be that the state could commit its resources to the financial rehabilitation of a city as part of the process.⁹⁹

Writing after the Orange County bankruptcy, Frederick Tung provided a different perspective on Chapter 9 governance. Of the post-1990 municipal bankruptcy scholars, Tung sees the greatest role for the state in the Chapter 9 process. At the time Orange County filed for bankruptcy, California authorized its municipalities to file for bankruptcy free of any restrictions in addition to those imposed by the Bankruptcy Code.¹⁰⁰ Tung recognized both that early cooperation between a city in financial trouble and its state is necessary, but that sometimes such cooperation, if it comes at all, comes too late to avert a financial disaster.¹⁰¹ Tung's suggestions for California involved increased gubernatorial involvement in municipal bankruptcy by requiring the governor to approve all such bankruptcies.¹⁰² As I will explain below in Part IV, California has notably declined the invitation to exercise governance over its cities in financial distress.

In a perfect world, a state could prevent and ameliorate the financial distress of its cities without resort to federal law. The world is not perfect, however. States are prohibited from imposing binding plans of adjustment on non-consenting creditors by the Contracts Clause of the Constitution and by Supreme Court precedent.¹⁰³ As a result, state-supervised

⁹⁶ McConnell & Picker, *supra* note 3, at 479.

⁹⁷ *Id.* at 473-4. Twenty years later, however, some of these state intervention schemes have proven less successful than they had hoped. *See* notes 300 - 301 *infra* and accompanying text.

⁹⁸ *See* McConnell & Picker, *id.*, at 479-80 (explaining that such a scheme would not violate the Contracts Clause if it were to operate only prospectively, because its terms would be incorporated into future contracts).

⁹⁹ *Id.* at 479.

¹⁰⁰ *See* Tung, *supra* note 3, at 891-92.

¹⁰¹ *See id.* at 907.

¹⁰² *See id.* at 921-23 (providing a menu of conditions that could be attached to such a filing depending on the needs of each city).

¹⁰³ *See* notes 166 -170 *infra* and accompanying text.

municipal debt adjustment plans must win the consent of all creditors. Moreover, some states lack intervention programs;¹⁰⁴ others may implement those programs only when a general-purpose municipality in that state falls into financial distress.¹⁰⁵ As such, they may not provide the proactive monitoring assistance that prevents cities from falling into financial ruin.¹⁰⁶ Even states that have intervention programs may find that such programs are not as effective as originally hoped.¹⁰⁷

The post-1990 authors expressed important concerns about Chapter 9. Their core concern is that Chapter 9 does not provide debtor governance that is sufficient to effect structural changes in a distressed city. Their perception that Chapter 9 has more of a fresh start purpose than a rehabilitative purpose magnifies this concern. In the next section, I will discuss the relationship between bankruptcy governance and bankruptcy goals, and assert that Chapter 9 allows appropriate governance over municipal debtors by inviting states to provide the missing governance.

II. BANKRUPTCY'S GOAL-ORIENTED GOVERNANCE

Bankruptcy governance is inextricably linked to bankruptcy goals. As a result, one cannot develop effective governance mechanisms in any chapter of the Code if that chapter's goals are unclear.¹⁰⁸ If the goals of a municipal bankruptcy chapter are unclear, then Chapter 9, when viewed as a freestanding municipal rehabilitation mechanism, appears to have a governance problem. When Chapter 9 acts alone, it can give a municipality only a fresh start. Yet the only other debtors who receive a bankruptcy fresh start are individuals, and the Code does not govern them in the way that it governs entities. A municipality is not an individual, however. Because a municipality is an entity that provides necessary and

¹⁰⁴ See *The State Role in Local Government Financial Distress*, A Report from the Pew Charitable Trusts, 9-10 (July 2013) (Pew Report) (chart showing states that have intervention programs).

¹⁰⁵ See *infra* notes 279 - 290 and accompanying text.

¹⁰⁶ See John C. Philo, *Local Government Fiscal Emergencies and the Disenfranchisement of Victims of the Global Recession*, 13 J.L. SOC'Y 71, 82 (2011) (explaining that only a handful of states have general legislation enabling financial oversight of distressed cities); cf. Kimhi, *Solution*, *supra* note 15, at 385 (promoting a proactive supervision system that would not only help to rehabilitate distressed localities, but also "prevent local fiscal stress from becoming a crisis").

¹⁰⁷ See Part V. *infra*

¹⁰⁸ See Christopher W. Frost, *The Theory, Reality and Pragmatism of Corporate Governance in Bankruptcy Reorganizations*, 72 AM. BANKR. L.J. 103, 104 (1998) (explaining, in the business reorganization context, that "governance questions are inextricably bound up in the broader policy questions of what goals Chapter 11 should seek to promote").

Municipal Bankruptcy

desirable public services for its residents,¹⁰⁹ it may require the kinds of external governance that can be exercised over a corporate debtor in bankruptcy. Yet a municipality is not analogous to a corporate entity; in every American state, a municipality is a subdivision of its state,¹¹⁰ and it is therefore not owned and controlled like a private business entity.

Bankruptcy does not have one exclusive goal. Every bankruptcy case, regardless of the chapter under which it is filed, aims to resolve the claims of the debtor's multiple competing creditors and relieve the debtor from its financial past.¹¹¹ Beyond that, the bankruptcy goals for individuals and entities diverge. In this section, I discuss the different types of bankruptcy goals and governance in order to clarify the governance that Congress intended when it enacted a municipal bankruptcy chapter.

A. *Bankruptcy Governance over Individuals*

Consumer bankruptcy law aims to provide a fresh start to the honest but unfortunate debtor.¹¹² An individual manages herself and no mechanism, whether provided by bankruptcy law or by some other law, can replace the management of an individual. Bankruptcy's governance controls over individuals, therefore, consist of mechanisms designed to ensure that only "worthy" debtors will receive bankruptcy relief.¹¹³ When an individual files for bankruptcy, these governance controls operate both to limit the type of relief,¹¹⁴ if any, for which the debtor is eligible, and to deny relief to debtors who engage in some wrongdoing during the

¹¹¹ TABB, *supra* note 2, at § 1.1.

¹¹² *See* *Local Loan Co. v. Hunt*, 292 U.S. 234, 244 (1934)(stating that bankruptcy law "gives to the honest but unfortunate debtor who surrenders for distribution the property which he owns *at the time of bankruptcy*, a new opportunity in life and a clear field for future effort, unhampered by the pressure and discouragement of preexisting debt") (emphasis in original).

¹¹³ *See, e.g.* Richard E. Coulson, *Consumer Abuse of Bankruptcy: An Evolving Philosophy of Debtor Qualification for Bankruptcy Discharge*, 62 ALB. L. REV. 467, 477 (1998)(describing the "debtor's honesty in disclosing and turning over assets, and general cooperation with the bankruptcy process" as constant themes in the evolution of the discharge); Margaret Howard, *A Theory of Discharge in Consumer Bankruptcy*, 48 OHIO ST. L.J. 1047, 1052 (1987) (describing bankruptcy law as being "more accurately interpreted as a series of provisions reflecting ad hoc definitions of what is honest or worthy in particular situations").

¹¹⁴ 11 U.S.C. § 707 (b) (subjecting individual debtors to means testing and denying Chapter 7 relief to an individual deemed to have sufficient income to fund a Chapter 13 plan)

bankruptcy case.¹¹⁵ Opening bankruptcy only to worthy debtors does nothing, however, to ensure that the post-bankruptcy individual debtor is better managed than her pre-bankruptcy self.

One way in which the Code attempts to govern the post-bankruptcy behavior of individual debtors is by barring repeat petitions. An individual cannot file for bankruptcy if she has been in bankruptcy within six months before filing her petition if the earlier petition was dismissed because of the debtor's uncooperative behavior in the case.¹¹⁶ In addition, the Code denies discharge to individuals who file too frequently. An individual debtor will be denied a discharge if she has received one in another bankruptcy case filed within two to eight years before the second petition, depending on the chapter under which both the first and second bankruptcies were filed.¹¹⁷

Bankruptcy governance over individuals is therefore exercised through access and discharge restrictions. These restrictions are the only viable restrictions; there is no other way for the Code to dictate individual behavior. Bankruptcy will give an individual debtor relief from her pre-bankruptcy financial woes, but only if the debtor manages her affairs in a way that is deemed acceptable under the Code. The access restrictions encourage the debtor to exercise good financial governance over herself because they limit the frequency with which an individual can receive bankruptcy relief.

B. *Bankruptcy Governance over Entities*

The Code itself provides governance controls over the individual debtor. As I will discuss in this section, although the judge in a Chapter 11 case has more governance powers over the case itself than she does in a Chapter 9 case, non-bankruptcy forces govern the structural rehabilitation of the debtor entity. Unlike an individual debtor, who is governed only by herself, an entity is governed by a number of individuals whose behavior is influenced by the contracts the entity has entered into, the market in

¹¹⁵ 11 U.S.C. § 727 (denying individual debtors a Chapter 7 discharge for misbehavior before or during the bankruptcy case).

¹¹⁶ See 11 U.S.C. § 109 (g) (this section also prohibits an individual from filing if she voluntarily dismissed the earlier case after a request for relief from the automatic stay).

¹¹⁷ See 11 U.S.C. § 727 (8)(9) (2010)(denying a Chapter 7 discharge to an individual who was granted a Chapter 7 or 11 discharge in a case commenced within eight years before the petition was filed and denying a discharge to an individual who received a Chapter 12 or 13 discharge in a case commenced within six years before the petition); 11 U.S.C. § 1328 (f) (2010)(denying a Chapter 13 discharge to a debtor who has received a Chapter 13 discharge in a case filed within two years before the date of the petition or who has received a discharge under Chapters 7, 11, or 12 in a case filed within four years before the petition).

Municipal Bankruptcy

which the entity operates, and laws that impose fiduciary duties on entity actors.¹¹⁸ Bankruptcy law affects these elements of corporate governance when they conflict with bankruptcy goals. The debtor controls included in Chapter 11 therefore provide a bankruptcy substitute for these market and contractual controls that affect corporate governance outside of bankruptcy.¹¹⁹

The goal of business bankruptcy law is to maximize the value of an entity for its creditors and other parties affected by the entity's operations. A business entity that has no chance of survival will liquidate, either in Chapter 7 or Chapter 11, and an entity that can survive will reorganize under Chapter 11, on the theory that an entity is worth more to its creditors as a going concern than it is in a piecemeal liquidation.¹²⁰ Underlying corporate bankruptcy is the theory that a corporation can be reorganized to maximize its going-concern value for the benefit of its creditors and if such reorganization is impossible, the corporate assets can be liquidated and distributed to the entity's creditors.

The court and the debtor's creditors have several powers in Chapter 11 that they lack in Chapter 9. These powers further of the goal of maximizing the value of the business debtor's assets. Bankruptcy law does not mandate the results of a successful Chapter 11; it facilitates them.¹²¹ In the paradigmatic Chapter 11, creditors receive shares of the reorganized corporation in exchange for their claims,¹²² but the Code does not require this result. Likewise, a plan can provide for the merger or dissolution of the debtor corporation, but again, the Code does not require any structural change.¹²³ If internal corporate governance can result in a successful going concern, the end result of a Chapter 11 will not be a sale of the business. If

¹¹⁹ See *id.* at 113 (explaining that these Chapter 11 controls substitute for market and contractual governance).

¹²⁰ See MARK S. SCARBERRY, *ET AL.* BUSINESS REORGANIZATION IN BANKRUPTCY: CASES AND MATERIALS 2 (4th ed. 2012); (explaining that based on the premise that preserving the entity's going concern value is better for society than liquidating the entity); Elizabeth Warren, *Bankruptcy Policymaking in an Imperfect World*, 92 MICH. L. REV. 336, 350 (1993)(explaining the goals of business bankruptcy).

¹²¹ See Levitin, *supra* note 15, at 1445 (explaining that all bankruptcy can do to help a firm whose business is the sale of "whale oil, corset stays, bustles, flash bulbs, slide rules [or] floppy disks" is to provide it with an orderly way to liquidate its assets and a "dignified funeral").

¹²² See Richard E. Mendales, *Intensive Care for the Public Corporation: Securities Law, Corporate Governance, and the Reorganization Process*, 91 MARQ. L. REV. 979, 1013-14 (2008) (explaining how Chapter 11 facilitates changes in corporate structure).

¹²³ *Id.* The fact that these structural changes are largely left in the debtor's hands has led over the years to calls for enhanced judicial controls in Chapter 11 such as the mandatory appointment of a trustee or examiner, the reduction in time during which the debtor must propose a plan of reorganization, and an early determination of plan feasibility. See generally Charles J. Tabb, *The Future of Chapter 11*, 44 S. C. L. REV. 791 (1993).

it cannot, the judge will honor a request to sell the assets to the person who can best maximize their value. Therefore, creditors in Chapter 11 can object to a debtor's sale of its property¹²⁴ and they may propose their own plan of reorganization if the debtor does not do so within a prescribed time period.¹²⁵

A major concern of the post-1990 municipal bankruptcy authors was the inability of the court to replace a municipality's management in Chapter 9. In Chapter 11, a court may do so by appointing a trustee, but courts do so infrequently. Although a party in interest can ask the court to appoint a trustee in a Chapter 11 case and the court must do so if it finds that the debtor's management has acted in a way that is fraudulent, dishonest, or incompetent, or that it has grossly mismanaged the debtor's affairs,¹²⁶ such an appointment is considered an extreme, not a routine, remedy.¹²⁷ Chapter 11, both by statute and in practice, embodies a presumption that existing management will remain in control of the debtor. The debtor can, at least initially, remain in control of its operations, use and sell property in the ordinary course of its business, and retain the exclusive right to propose a plan of reorganization.¹²⁸ Even when a court appoints a trustee in a Chapter 11 case, the trustee usually appointed not to manage the business, but to sell the business.¹²⁹ Some courts have more specifically tailored the trustee remedy to the corporate governance problems of the debtor corporation by appointing a trustee to work with, rather than replace, corporate management when the skills of the corporate managers are necessary to the continued viability of the enterprise, despite the wrongdoing that led to the trustee appointment.¹³⁰

This balance that leaves governance powers in the management of the debtor entity in most cases furthers the goals that Congress had in mind when it enacted Chapter 11. A policy of encouraging financially stressed entities to submit to a bankruptcy proceeding while their operations could

¹²⁹ See Robert K. Rasmussen, *Debtor's Choice: A Menu Approach to Corporate Bankruptcy*, 71 TEX. L. REV. 51, 72 (1992) (explaining that corporate management remains in control in a Chapter 11 so that the corporation can continue to operate and that a trustee will not be appointed to operate a business with which she is not familiar);

¹³⁰ See Alces, *supra* note 127, at 106-07 (giving examples of cases in which the courts appointed a trustee to supervise the financial management of the debtors, but allowed existing managers to stay in their positions because of their business development or creative talents).

Municipal Bankruptcy

be salvaged drove the enactment of Chapter 11 in 1978.¹³¹ Chapter 11 changed prior corporate bankruptcy practice. Under the Bankruptcy Act, Chapter X, the reorganization chapter for large public companies, required that the court appoint a trustee.¹³² Congress favored control by corporate management, and made a choice, in enacting Chapter 11, to leave corporate control in management hands.¹³³ Congress made this decision to leave control in management hands to further the rehabilitative policy behind Chapter 11. If the management remained in control, stockholders, creditors, and the community would fare better than they would if the business were liquidated.¹³⁴

Even if bankruptcy serves to reorganize a large corporate debtor efficiently, many bemoan the lack of governance controls over small business entities. Small businesses make up the bulk, in number, of Chapter 11 filings, yet many believe that Chapter 11 is not effective with respect to small businesses.¹³⁵ This criticism illustrates that the Chapter 11 governance paradigm is one specifically tailored to one type of business: the large business. It does not mean, however, that a rehabilitation bankruptcy chapter cannot work for other entities. Other types of entities may be successfully rehabilitated using the bankruptcy process if the

¹³¹ See Warren, *supra* note 120, at 371-2 (explaining that both debtors and creditors believed that the reorganization provisions under the 1898 Act were ineffective; debtors because they did not trust that they could save their businesses in bankruptcy and creditors because they believed that “the system dissipated assets and delayed payouts unnecessarily”).

¹³² See Alces, *supra* note 127, at 91-92 (explaining bankruptcy governance under the Bankruptcy Act).

rehabilitation process includes governance provisions appropriate to the debtor.

C. *Bankruptcy Governance over Municipalities*

Viewed in the context of bankruptcy goals and governance, the absence of many debtor controls from Chapter 9 makes sense. A perceived problem with Chapter 9's control allocation is that it removes creditor control without providing a substitute restraint on the debtor. That restraint cannot be imposed by the bankruptcy court, both because of constitutional considerations and because of the clear statement in Chapter 9 that the bankruptcy court may not interfere with the debtor municipality's political or governmental powers, its property or revenues, or its use or enjoyment of its income-producing property.¹³⁶

Creditors of a municipality are likewise unable to impose debtor restraints in bankruptcy. One cannot talk about the value of a municipality to creditors in the same way as one discusses the value of an entity to creditors. Creditors can force an entity to liquidate, either piecemeal as a result of state law creditor remedies that allow creditors to seize private assets, or through the bankruptcy process. There is no comparable liquidation scheme for municipalities. Most municipal assets are immune from creditor process outside of bankruptcy,¹³⁷ therefore giving creditors the power to force such sales inside of bankruptcy would be counter to the general bankruptcy policy that respects state law property rights unless some federal interest requires a different result.¹³⁸ The value of a municipality to its creditors is its ability to repay those creditors.

Because municipalities are political instrumentalities, elected officials manage their functions, and therefore creditors have no ability to replace management, either inside or outside of bankruptcy. A municipality is not a profit-making enterprise that can be dismantled and distributed if it ceases to be successful, rather, it exists to provide essential governmental services.¹³⁹ It does not have shareholders who, as residual owners, bear the risk of its failure. Instead, a municipality has citizens who depend on its services. As a result, the Code provisions that provide debtor governance over a dysfunctional corporate entity would be inappropriate in a municipal context. Allowing a bankruptcy court to replace municipal management with a trustee would not only give creditors and other parties

¹³⁶ 11 U.S.C. § 904 (2010).

¹³⁷ See McConnell & Picker, *supra* note 3, at 429-34 (explaining that municipal assets are immune from creditor process).

Municipal Bankruptcy

in interest far more rights in bankruptcy than they would have outside of bankruptcy, but would fall afoul of the Tenth Amendment.

In some respects, municipal bankruptcy shares goals with business bankruptcy, and where the two types of bankruptcy share goals, they also share governance provisions. Bankruptcy law gives corporate managers the breathing room they need to make organizational decisions¹⁴⁰ and some of the tools necessary to do so, such as the power to assume or reject executory contracts.¹⁴¹ A municipal debtor likewise receives these bankruptcy benefits.¹⁴² Bankruptcy also allows both categories of debtors to impose a plan of debt restructuring on non-consenting creditors.¹⁴³ As a result, Chapter 9 borrows plan confirmation provisions from Chapter 11.¹⁴⁴

Because corporate reorganization implies a transfer of assets to the persons best able to maximize their value, the goal of corporate reorganization does not seem to apply well to municipal bankruptcy. Chapter 9, without state intervention in the debtor municipality's affairs, can provide only debt relief and a fresh start. Bankruptcy law therefore governs municipal debtors in a manner that is closer to individual governance than entity governance and leaves rehabilitative governance to state law. Just as the Code manages an individual debtor's behavior through its entry and discharge rules, it governs municipal debtors primarily through its entry rules.¹⁴⁵ If the state wants to participate in the Chapter 9 case, it can do so by conditioning its Chapter 9 authorization on the debtor's participation in a state oversight program. If the state does not want to do so, the court can ensure that only worthy municipalities – those that are insolvent and that have negotiated in good faith with their creditors – can file.

The proponents of the original municipal bankruptcy legislation had no intention of creating a governance vacuum. Instead, they recognized that a federal procedure was necessary only to provide the relief that a state alone could not provide to a municipal debtor. They did not ignore organizational governance over the debtor, rather, they designed the federal bankruptcy law to provide the federal benefits of debt relief as a complement to state-led efforts to rehabilitate municipalities. In the next

section, I will explain that history to show how Congress intended that municipal financial relief be provided by a system integrating state governance over municipalities with federal debt relief.

III. A HISTORY OF CHAPTER 9 FROM A GOVERNANCE PERSPECTIVE

A. *Why Municipal Bankruptcy?*

Congress enacted the predecessor statute to today's Chapter 9 in 1934, in emergency legislation passed as the United States was recovering from the Great Depression.¹⁴⁶ Thousands of municipalities defaulted on their debt obligations during the Depression,¹⁴⁷ and in 1933, about seven percent of the municipal debt outstanding was in default.¹⁴⁸ Although municipalities started to issue bonds in the early 1800s,¹⁴⁹ in the years preceding the Depression, municipal securities were more widely distributed among investors than they had ever been.¹⁵⁰

The distribution of municipal securities among a wide range of investors increased the need for federal involvement in the resolution of municipal financial distress for two reasons. First, because many types of investors held such securities, the effect of a municipal default would be felt throughout the nation's economy.¹⁵¹ Second, creditors began to appreciate the benefits of a collective proceeding to collect municipal

¹⁴⁶ In 1934, Congress amended the Bankruptcy Act of 1898, 30 Stat. 544 to include Chapter IX, titled *Provisions for the Emergency Temporary Aid of Insolvent Public Debtors and to Preserve the Assets Thereof and for Other Related Purposes*. See 48 Stat. 798 (1934). The Supreme Court, in *Ashton v. Cameron County Water Improvement Dist.*, 298 U.S. 513 (1936), ruled the original municipal bankruptcy act to be unconstitutional and Congress replaced it in 1937. The Court upheld the 1937 act in *U.S. v. Bekins*, 304 U.S. 27 (1938). Congress made municipal bankruptcy law a permanent part of bankruptcy law in 1946. See Kenneth N. Klee, *Introduction*, 32 CAL. BANKR. J. 221, 221 (2012) (explaining the early federal legislation in his introduction to a special journal issue on municipal bankruptcy).

¹⁴⁷ Almost 5,000 cities defaulted on their debts during the Great Depression. See Philo, *supra* note 106, at 80 (explaining that 4,770 cities defaulted on their debt during that time).

¹⁴⁸ See Harold Gill Reuschlein, *Municipal Debt Readjustment: Present Relief and Future Policy*, 23 CORNELL L. Q. 365, 365 (1938) (reporting that "out of \$14,000,000,000 invested in securities of local state government units, \$1,000,000,000 were reported to be in default").

¹⁴⁹ See A.M. HILLHOUSE, *MUNICIPAL BONDS: A CENTURY OF EXPERIENCE* 31 (1936) (stating that although the exact date of the first municipal bond is unknown, New York City began to issue bonds in about 1812).

¹⁵⁰ See Reuschlein, *supra* note 148, at 365 fn. 5 (setting forth the distribution of municipal and state bonds among individuals, banks, insurance companies and other entities in December, 1932).

¹⁵¹ *Id.*

Municipal Bankruptcy

debts over the uncontrolled use of lawsuits by creditors seeking to be the first to collect their claims.¹⁵²

Municipal finance experts in the 1930s recognized that traditional creditor remedies were ineffective to deal with the problem of municipal defaults. The nature of a municipality as a public service provider has several debt collection ramifications. The first is that a municipality cannot be liquidated in the traditional sense. A state might have a mechanism by which to dissolve and consolidate municipalities, but that is not a remedy that creditors can pursue.¹⁵³ While creditors of private entities can seize and sell the assets of the defaulting entity to satisfy their claims through processes such as levy and execution,¹⁵⁴ creditors of a municipality are barred from seizing municipal assets because municipalities are deemed to hold their assets devoted to public use in trust for their citizens.¹⁵⁵ Because a municipality's assets are often immune from creditor process, they are worthless to the creditors of the municipality.¹⁵⁶ A municipality's taxing power is valuable to creditors, but creditors cannot assume control over that power.¹⁵⁷

In the 1930s, as now, the only viable collection remedy against a municipality was the mandamus action. Creditors brought mandamus actions against municipalities to force the responsible municipal officers to either pay the creditor's claim out of tax collections, or to levy a sufficient tax to pay the creditor's judgment.¹⁵⁸ These actions had the potential to place the municipality's essential services in peril.¹⁵⁹ Although the mandamus remedy was available to creditors, it was effective mainly as a threat device; sometimes the officers subject to the mandamus action would leave the jurisdiction in order to avoid the writ or allow themselves

¹⁵² See Edward J. Dimock, *Legal Problems of Financially Embarrassed Municipalities*, 22 VA. L. REV. 39, 40-41 (1935) (Dimock, *Legal Problems*) (comparing the creditors of private corporations to those of municipalities and explaining that the need of corporate creditors for a collective proceeding led to the development of the equity receivership).

¹⁵⁵ Reuschlein, *supra* note 148, at 367; see also Jeff B. Fordham, *Methods of Enforcing Satisfaction of Obligations of Public Corporations*, 33 COLUM. L. REV. 28, 28-30 (1933) (discussing statutes and case law that protected municipal assets from seizure by creditors).

¹⁵⁶ See *City of Chicago v. Hasley*, 25 Ill. 485, 487 (1861) (explaining that the seizure of city assets could cause great harm to a city's residents); *Buell v. Arnold*, 102 N.W. 338 (Wisc. 1905) (explaining that the property of municipal corporations cannot be seized or sold upon execution); McConnell & Picker, *supra* note 3, at 429-34 (explaining laws prohibiting the seizure of municipal assets).

¹⁵⁷ Dimock, *Legal Problems*, *supra* note 152, at 40.

¹⁵⁸ See Fordham, *supra* note 155, at 39 – 47 (explaining the different types of mandamus actions).

¹⁵⁹ Dimock, *Legal Problems*, *supra* note 152, at 40-41.

to be jailed for contempt of court.¹⁶⁰ The benefit of mandamus was therefore primarily in its value as a catalyst to negotiation and settlement among the municipality and its creditors. Even that benefit was limited; a court would refuse to issue an order of mandamus if the failure to pay debts was due to the inability to do so rather than the unwillingness to do so, or if the municipality had already reached its constitutional or statutory tax limits.¹⁶¹

In the 1930s, lawyers recognized that they could look to the states, the federal government, or both for a solution to the problem of widespread municipal defaults. Both sovereigns were limited in their ability to solve the problem. A state could actively supervise the finances of its municipalities either by imposing a receivership¹⁶² or by establishing a municipal finance commission.¹⁶³ A receiver or commission could actively manage a city's budget and supervise its borrowing.¹⁶⁴ As one commentator at the time explained, the state could provide "the very kind of active, aggressive leadership in rehabilitating the finances of an insolvent [municipality] that is needed."¹⁶⁵

Although the states could impose fiscal discipline on their municipalities, their ability to impose a plan of composition on dissenting creditors was constitutionally suspect for two reasons. The first was the Contracts Clause of the Constitution, which prohibits states from "passing any Law impairing the Obligation of Contracts."¹⁶⁶ The Contracts Clause therefore prohibits the states from passing laws that would force a creditor to accept less than what it is owed on a claim without that creditor's consent. Although the Contracts Clause does not prohibit a state from passing a law prospectively impairing contracts because all contracts executed after the enactment of such a law would incorporate such an impairment,¹⁶⁷ municipalities were in crisis in the 1930s, and needed a

Municipal Bankruptcy

mechanism to adjust their existing debts, not the obligations that they would incur in the future.¹⁶⁸

Even a state proceeding that would operate only prospectively was suspect, however. A state proceeding could relieve a debtor municipality from its obligations only if it could bind all of the municipality's creditors, wherever located. Yet a long line of cases beginning with the Supreme Court's opinion in *Ogden v Saunders*¹⁶⁹ had held that a discharge from debt granted pursuant to one state's laws could not be enforced against a creditor from another state who did not participate in the discharge proceeding.¹⁷⁰ As a result, a collective proceeding under state law would be effective to bind only those out-of-state creditors who voluntarily participated in the proceeding.

A federal collective proceeding to resolve municipal financial distress was not free from constitutional objections, however. Under the Bankruptcy Clause, Congress has the power to pass "uniform Laws on the subject of Bankruptcies throughout the United States."¹⁷¹ Commentators expressed some skepticism as to whether a federal process to adjust the debts of a municipality was within the purview of the Bankruptcy Clause, positing that the "subject of bankruptcies" was limited to "proceedings contemplating surrender of the debtor's assets for distribution to his creditors and discharge of the debtor."¹⁷² Because a municipality's assets cannot be forcibly distributed to its creditors, it was possible that a municipal debt adjustment statute was not within the subject of bankruptcies.¹⁷³ This view of the Bankruptcy Clause was not limited to its extension to municipal insolvency; Congress also added railroad reorganizations and corporate reorganizations to the bankruptcy laws in the 1930s¹⁷⁴ and its power to do so was similarly questioned. One

¹⁷³ Asa G. Briggs, *Shall Bankruptcy Jurisdiction be Extended to Include Municipalities and Other Taxable Subdivisions?*, 19 A.B.A. J. 637, 637-38 (1933). For a contrary view at the time, see Dimock, *Legal Problems supra* note 152, at 53 (stating that "Congress in the exercise of its bankruptcy power is not confined to giving the federal courts the power to make adjudications and to grant discharges").

¹⁷⁴ See Hon. Samuel L. Bufford, *What is Right About Bankruptcy Law and Wrong About Its Critics*, 72 WASH. U. L. Q. 829, 837-838 (1994) (discussing the 1933 and 1934 amendments to the Bankruptcy Act of 1898).

objection to the extension of the federal bankruptcy to corporate and railroad reorganizations was that the power to legislate on the subject of bankruptcies did not include the power to adjust the obligations of entities that were merely insolvent in the sense that they could not meet their obligations but did not meet the common law definition of bankrupt.¹⁷⁵

Given the expansion of the term “bankruptcy” from its original eighteenth century meaning, the Bankruptcy Clause objection to a federal law to resolve municipal financial distress was fairly weak. A much more serious objection to extending Congress’ bankruptcy power to municipalities was rooted in the Tenth Amendment. The Tenth Amendment of the Constitution reserves to the states all powers not granted to the federal government nor prohibited to the states by the Constitution.¹⁷⁶ When a private entity files for bankruptcy, all of its property becomes part of the bankruptcy estate, over which the court has some control.¹⁷⁷ Because a federal proceeding could intrude on a state’s power to govern its cities, some feared that a bankruptcy chapter for municipalities would violate the Tenth Amendment.¹⁷⁸

The constitutional restrictions on both the state and federal powers to resolve a municipal debt crisis that had the potential to contaminate the national economy led to calls for a combination of state and federal action. States could provide active fiscal oversight, but could not impose binding debt adjustments on non-consenting creditors. Federal legislation could force debt reductions on creditors, but could not provide the active fiscal guidance that was needed to ensure that a municipality could both resolve its current problems and avoid future problems.¹⁷⁹ In the 1930s, therefore, experts in municipal finance recognized a need for a combination of federal and state action to resolve a municipal debt crisis that had the potential to contaminate the economy of the entire country. Those experts recognized that cooperative action could overcome the legal limitations placed on each sovereign.¹⁸⁰ As a result, they designed the original

¹⁷⁸ McConnell & Picker, *supra* note 3, at 427.

¹⁷⁹ See Reuschlein, *supra* note 148, at 385 (recognizing municipal debt crisis would not be resolved if debt readjustment was not accompanied by state plans controlling local credit).

¹⁸⁰ See, e.g. HILLHOUSE, *supra* note 149, at 353 (urging complementary measures because each sovereign could “supply the major limitation in the other”); Comment, *supra* note 161, at 1005 (recognizing that both federal legislation and “careful state supervision of

Municipal Bankruptcy

bankruptcy legislation to be just one component of their desired mechanism for resolving the financial crisis then facing American municipalities.

B. *The 1930s Wish List and Resulting Statutes*

Chapter IX, the original municipal bankruptcy statute, allowed any municipality or any other political subdivision of a state to file a voluntary petition for readjustment of its debts.¹⁸¹ Congress had a modest goal, that of solving the holdout problem, in passing the legislation.¹⁸² The act required the debtor municipality to prepare and acquire consent from a prescribed number of creditors to the plan of adjustment before filing for bankruptcy.¹⁸³ Although the act contained no automatic stay of litigation against the municipality,¹⁸⁴ the court could order a stay of actions both against the municipality and against its officers who might be the targets of a mandamus action.¹⁸⁵ The court could approve a plan upon the vote of the necessary number of creditors, so long as the plan was “fair, equitable, and for the best interests of creditors.”¹⁸⁶ A confirmed plan would bind all creditors, including those who did not accept the plan.¹⁸⁷ The law explicitly rejected any limits on the power of states to control their municipalities and also allowed the states to decide whether their municipalities could take advantage of its provisions.¹⁸⁸

Two years later, the Supreme Court struck down the 1934 act as unconstitutional. In *Ashton v. Cameron County Water Improvement District*, the Court found the original municipal bankruptcy legislation to be “inconsistent with the idea of sovereignty.”¹⁸⁹ The fact that states

local credit are . . . essential to proper solution of the vital and complex problem presented by . . . municipal insolvencies”).

¹⁸⁹ *Ashton v. Cameron Cnty. Water Improvement Dist.*, 298 U.S. 513, 531 (1936).

retained the power to prevent their municipalities from filing for bankruptcy did not remedy the act's constitutional infirmities, for the Court stressed that "neither consent nor submission by the States can enlarge the power of Congress."¹⁹⁰ In the Court's view, allowing the federal courts to interfere with the obligations of states and their political subdivisions was impermissible, even with state consent.¹⁹¹

During the short life of Chapter IX, 88 municipalities filed for bankruptcy, 24 of which were cities, towns or counties.¹⁹² One writer on municipal finance, A.M. Hillhouse, observed that the mere existence of the legislation alleviated the problem of holdout creditors, because the knowledge that a municipality might resort to a bankruptcy filing to force a plan on such creditors was enough to bring recalcitrant creditors to the bargaining table.¹⁹³ The utility of the act as a vehicle for cooperation between a state and the federal court went untested, however. One of the many petitions pending at the time of the *Ashton* opinion was that of North Bergen, New Jersey. By the time North Bergen filed for bankruptcy in 1936, the New Jersey Municipal Finance Commission had assumed control over the township's fiscal affairs.¹⁹⁴ Most commentators at the time called for complementary state and federal legislation to address municipal financial distress; to them, North Bergen could have been an ideal case. Had the case been allowed to proceed, it might have provided some guidance on questions regarding the relationship between the federal court and the state oversight commission as well as the nature of the commission's control both during and after the case.¹⁹⁵

Both before Congress passed the first municipal bankruptcy act and after the Court held it to be unconstitutional, commentators suggested components of an ideal system to resolve the municipal debt crisis. An early commentator on municipal insolvency, Edward J. Dimock,¹⁹⁶ set forth the essential elements of any comprehensive scheme to alleviate municipal financial distress. He analogized his ideal municipal debt resolution process to the equity receivership that had been developed in the late 19th century to restructure financially troubled railroads during a period in which there was no uniform federal bankruptcy statute.¹⁹⁷

Municipal Bankruptcy

Dimock's list of elements included: outside control of the insolvent debtor's finances,¹⁹⁸ concerted action by all creditors, accompanied by a stay of litigation to secure a "period of peace" to develop and evaluate a plan of debt adjustment,¹⁹⁹ and a settlement binding on all creditors.²⁰⁰

Dimock and others recognized that both state and federal action were needed for a well-balanced approach to the municipal debt problem. Some federal action was clearly necessary, whether it be by granting full faith and credit to state debt adjustment proceedings²⁰¹ or by extending Congress' bankruptcy power to municipalities.²⁰² The federal power was necessary for one reason – to overcome the "obdurate minority" of dissenting creditors.²⁰³

The early commentary makes clear, however, that although a municipal bankruptcy chapter may have been a necessary tool to resolve the national municipal debt crisis, it was an implement with a very limited use. All of the writers in the 1930s called for robust state intervention in municipal fiscal affairs. Writers recognized that the binding debt adjustment facilitated by a bankruptcy chapter would be useless without some plan to control local finances.²⁰⁴ Only a state could provide the necessary administrative supervision over its localities in order to enable the municipalities to maximize revenues and borrow money at reasonable rates.²⁰⁵ Although commentators recognized that some might object to oversight of a municipality by state officials unfamiliar with local conditions, they also recognized the possibility that the problems of one municipality could have a negative impact on the credit of other

REV. 485, 511 fn. 156 (1938). *See also* Reuschlein, *supra* note 148, at 368 (noting that a state could not enforce a debt adjustment plan against dissenting creditors because of the Contracts Clause of the Constitution).

²⁰⁴ *See* Dimock, *Progress, supra* note 163, at 204 - 05 (writing that, in order for bankruptcy to provide the same benefits for municipalities that it does for private entities, the state power to control municipalities must supplement the federal bankruptcy process); Reuschlein, *supra* note 148, at 385 (warning that debt adjustment without a state plan to control local credit might lead to "more serious predicaments" than doing nothing).

²⁰⁵ *See* HILLHOUSE, *supra* note 149, at 353 (explaining that the state can "collect taxes, revise the local budget, and approve or disapprove new borrowing"); Kirkpatrick, *supra* note 182, at 287 (observing that even if federal courts were constitutionally permitted to exercise fiscal oversight, they are poorly equipped to do so); Reuschlein, *supra* note 148, at 386 (noting that a readjustment plan cannot establish permanent mechanisms for the supervision of fiscal management).

municipalities in the same state. Only state oversight could mitigate this possibility of contagion.²⁰⁶

Several commentators called for formal cooperation between the states and the federal courts in municipal bankruptcy proceedings. Some suggested that the debt adjustment apparatus provided by federal law be available only to municipalities in state in which the state government exercised positive oversight with respect to local defaults.²⁰⁷ Others promoted a mechanism through which the state would be involved both before bankruptcy in formulating the plan of adjustment and after bankruptcy in supervising the municipality until its finances sufficiently improved.²⁰⁸ Experts considered state oversight such an essential complement to federal legislation that some suggested that the state be given the power to file the bankruptcy petition for its municipality.²⁰⁹

Although experts expressed an appetite for a formal role for states in the federal municipal bankruptcy framework, Congress' second attempt at municipal bankruptcy legislation, passed in 1937,²¹⁰ was very similar to its first. Despite the similarities between the two acts, the Supreme Court in *United States v. Bekins* upheld the second.²¹¹ In upholding the 1937 act, known as Chapter X, the Court stressed that in order for a court to approve a debt readjustment plan, the debtor municipality must have been authorized by state law to take all action necessary to implement the plan.²¹² Moreover, the Court recognized that the statute, by deferring to the states' control over their fiscal affairs, was narrowly drawn so as not to interfere with state sovereignty.²¹³ Therefore, federal bankruptcy law did not unconstitutionally constrain the states' powers to govern their municipalities. The Court emphasized the policy of cooperation implied by the bankruptcy law, explaining that the state "invites the intervention of the bankruptcy power to save its agency which the State itself is powerless to rescue," adding that through the state's "cooperation with the national government the needed relief is given."²¹⁴ Mindful of the municipal debt

Municipal Bankruptcy

crisis facing the nation, the Court refused to hold that the Constitution had rendered both the states and the federal government helpless to alleviate the problem.²¹⁵

The foregoing discussion illustrates that the early municipal bankruptcy commentary called for cooperation between states and the federal government in dealing with municipal financial failure. Congress fashioned the predecessor to Chapter 9 within this framework in order to solve the one problem that states alone could not: the holdout problem.²¹⁶ No one intended for federal legislation to operate alone to solve the municipal debt problem; as Edward Dimock noted in his 1940 article assessing the progress made in addressing the municipal debt crisis there was “plenty left to be done when trouble comes again.”²¹⁷ Trouble came again in the 1970s, when New York City fell into financial disrepair, presenting a municipal default scenario potentially as serious as the one the United States faced in the aftermath of the Depression.²¹⁸

C. Congress Revisits Municipal Financial Distress in 1976

Three decades passed without any attention to municipal bankruptcy. Very few municipalities filed for bankruptcy during that period, and the municipalities that filed were special purpose districts rather than large general-purpose municipalities.²¹⁹ The financial crisis facing New York City in the mid-1970s, however, caused policy makers to take a fresh look at the federal municipal bankruptcy legislation. When its crisis hit in 1975, closing the municipal bond markets,²²⁰ experts considered bankruptcy an unsuitable option for a city of New York’s size. Indeed, several elements of the federal municipal bankruptcy statute, then known as Chapter IX, made its use by a large city impractical.²²¹

²¹⁵ *Id.*

²¹⁶ See Fred E. Neef, *Consent of State as Affecting Jurisdiction in Municipal Bankruptcy*, 15 *ICTA* 301, 302 (1938) (observing that as a result of the early municipal bankruptcy legislation the “defeat of a fair composition agreement by a selfish minority cannot be accomplished”); Comment, *supra* note 161, at 974 (“some method of enforcing readjustments of municipal debt structures against minority creditors seems essential, and . . . utilization of the federal bankruptcy structure appears to be the most feasible device for accomplishing such enforcement”).

²²⁰ See generally Donna E. Shalala & Carol Bellamy, *A State Saves a City: The New York Case*, 1976 *DUKE L.J.* 1119 (1976).

²²¹ See, e.g. King, *supra* note 21, at 1158 (explaining that the then-existing municipal bankruptcy legislation was not “realistically available to major public entities”); Patchan

The main concern about Chapter IX was that its entry requirements made its use by cities such as New York unfeasible. The law required a municipality to submit, with its bankruptcy petition, its plan of debt adjustment, agreed to by a majority in dollar amount of its creditors.²²² Many saw this requirement as an impediment to speedy relief for a municipality because by the 1970s, many cities had a large number of bondholders, many of whom held their bonds in bearer form and were therefore difficult to identify.²²³

The 1976 act simplified the entry requirement. Rather than requiring a pre-petition plan, the 1976 legislation made a plan one of four alternative prerequisites to filing. If the debtor municipality did not negotiate a plan with its creditors before filing for bankruptcy, it could still file if it showed that it negotiated in good faith with its creditors before filing or that negotiating with its creditors was impracticable.²²⁴

Loosening the entry requirement addressed the major concern about the utility of Chapter IX for a large city such as New York. Congress went further, however, and incorporated several features of private entity reorganization into the municipal bankruptcy chapter. The 1976 amendments added an automatic stay, which by then was a feature of other chapters of the Bankruptcy Act, and which allowed the municipal debtor to avoid the extra time and expense of separately petitioning the court to stay proceedings against it.²²⁵ Congress also added avoiding powers to Chapter IX that mirrored the trustee's power in other bankruptcy chapters to avoid prepetition transfers of the debtor's property shown to be fraudulent, preferential, or unperfected.²²⁶ The power to avoid preferential transfers proved problematic with respect to municipal bonds when Cleveland fell into financial distress in 1979, leading to further amendments to municipal bankruptcy law in 1988 to inject some certainty into the treatment of municipal bondholders in Chapter 9.²²⁷

& Collins, *supra* note 218, at 291-92 (explaining that structural deficiencies in the municipal bankruptcy chapter, such as its lack of an automatic stay and its requirement that the debtor municipality submit a plan of adjustment with its petition, made its use by large cities impracticable).

Municipal Bankruptcy

One rehabilitative provision added to Chapter IX in 1976 was the power of the debtor to reject executory contracts. This power was available to private debtors in other bankruptcy chapters,²²⁸ but was potentially controversial when exercised by public debtors. From its initial enactment, the federal municipal bankruptcy chapter respected and yielded to each state's right to govern its cities,²²⁹ and the 1976 act did not change this. Like its predecessors, the 1976 municipal bankruptcy act provided that nothing in the act "shall be construed to limit or impair the power of any State to control, by legislation or otherwise, any municipality or any political subdivision of or in such State in the exercise of its political or governmental powers."²³⁰ Because the power to reject executory contracts encompassed the power to reject labor contracts, which are often subject to state collective bargaining laws, this new power created a potential federalism problem.²³¹

Although Kimhi suggested that the inclusion of the power to reject executory contracts was evidence of Chapter 9's broader restructuring goal,²³² there is another way to look at the 1976 additions to the municipal bankruptcy chapter. By the 1970s, the municipal bankruptcy law drafted in the 1930s was unsuitable for larger cities, largely because of its entry requirements. When Congress liberalized the entry requirements, it also added some elements of private bankruptcy law, such as the automatic stay and the powers to avoid preferential and fraudulent transfers. All of these powers relate to debt adjustment, not to reorganizational governance. By giving a municipal debtor some additional bankruptcy benefits, Congress provided the states with additional tools for resolving the financial distress of their cities if they chose to accept the assistance of federal law. Rather than rejecting Congress' original municipal bankruptcy goal of solving the holdout problem, the 1976 amendments strengthened it.

²²⁸ See Patchan & Collins, *supra* note 218, at 299.

²²⁹ See notes 211 - 214 *supra* and accompanying text.

²³¹ See King, *supra* note 21, at 1169 (recognizing that the inclusion of the power to reject executory contracts could be controversial in the municipal bankruptcy context); Patchan & Collins, *supra* note 218, at 299 - 300 (explaining a potential conflict between bankruptcy law and a state law prohibiting rejection of pension agreements); Winograd, *supra* note 24, at 277 - 80 (discussing the congressional debates about the application of the debtor's power to reject executory contracts to labor contract subject to state law restrictions).

²³² See Kimhi, *Solution*, *supra* note 15, at 368. The legislative history of the 1976 amendments can be read to support his contention, because Congress expressed the goal of providing a federal procedure by which a municipality could "restructure its indebtedness in such fashion as to avoid continuing insolvency." Preamble to Pub. L. No. 94-260, 90 Stat. 315 (1976).

New York did not resort to bankruptcy. Instead, the state legislature established the Municipal Assistance Corporation (MAC), and authorized MAC to issue debt for the city and draft a rescue program for the city.²³³ The city's finances were placed under the supervision of a control board that included city and state officials, and the federal government deemed New York's problems to be significant enough nationally to enter into a credit agreement with the city.²³⁴ New York's recovery was successful because the state acted quickly and drastically.²³⁵

The 1970s saw two parallel developments. In one, New York State, with the financial help of the federal government, orchestrated a recovery plan for New York City without resort to the bankruptcy laws. In the other, Congress amended the bankruptcy law to make its municipal bankruptcy chapter a workable alternative for large general-purpose municipalities and in the process, added some features of corporate bankruptcy. At the same time, the municipal bankruptcy scholarship focused primarily on what the federal bankruptcy law standing alone could do for cities, and thus differed from the 1930s scholarship, which promoted a federal municipal bankruptcy chapter as a complement to state intervention. Although two commentators pronounced the 1976 act as deficient in that it did not provide for a mechanism to involve the state in the formulation of a city's bankruptcy plan,²³⁶ two writers involved in the rescue of New York City attributed the city's avoidance of bankruptcy in part to "the strong belief that elected and not appointed officials ought to put the city's fiscal matters in order."²³⁷ After the 1970s, scholarship about municipal bankruptcy tended to present it as an alternative to state intervention,²³⁸ and because of some of its differences from Chapter 11, a poor alternative at that.

This turn in the scholarship is unfortunate, because it leaves state policy makers with few recent resources as they decide whether and how to allow their municipalities to file for bankruptcy. Detroit's filing is likely to lead other states with struggling cities to reevaluate the conditions that they place on Chapter 9 filings. It is important that states not lose sight of the role of Chapter 9 in an integrated state-federal approach to municipal

Municipal Bankruptcy

financial distress. In the next section, I explain how Congress has invited states to play a role in Chapter 9 debtor governance and the extent to which states have chosen to do so.

IV. SPECIFIC AUTHORIZATION TO FILE FOR CHAPTER 9: AN INVITATION TO GOVERN

The specific authorization requirement gives the states a gatekeeper role by allowing the states to choose whether, and under what conditions, their municipalities can file for bankruptcy. Chapter 9 does not grant municipalities the power to file for bankruptcy; rather, it presents to the states the choice of giving their municipalities the power to seek bankruptcy protection.²³⁹ By granting the states this gatekeeper role, Congress not only exercised care to ensure that the municipal bankruptcy chapter passed constitutional muster, it also provided a mechanism for state participation in the federal bankruptcy process.

The authorization requirement is a governance control that reflects the hybrid fresh start/rehabilitation goal of Chapter 9. All Chapter 9 can do on its own is give debt relief. Combined with state intervention, however, Chapter 9 can both give debt relief and facilitate municipal rehabilitation. Although the original intention of Congress was for Chapter 9 to support state governance over the debtor, the invitation to states to exercise that governance was not explicit until Congress amended Chapter 9 in 1994 to condition entry on specific, rather than general, authorization by the state. In this section, I explain the evolution of the authorization requirement and the role that it plays in inviting state governance over Chapter 9 debtors.

A. *Reasons for and Evolution of the Authorization Requirement*

A municipality may file for bankruptcy only if it is “specifically authorized, in its capacity as a municipality or by name, to be a debtor [under Chapter 9] by state law or by a governmental officer or organization empowered by state law” to authorize a Chapter 9 filing.²⁴⁰ The requirement that a state authorize its municipalities to file is one that has developed over the lifetime of the municipal bankruptcy law. The act that the *Bekins* Court found to be constitutional contained no requirement of state authorization, but the Court nevertheless found that the statute was consistent with the Tenth Amendment because it prohibited “interference with the fiscal or governmental affairs” of a municipality, and because it required that the debtor municipality be permitted by state law to carry out

²³⁹ *In re Bridgeport*, 128 B.R. 688, 692 (Bankr. D. Conn. 1991).

²⁴⁰ 11 U.S.C. § 109 (c)(2) (2010).

its plan of adjustment.²⁴¹ Courts after *Bekins* interpreted the municipal bankruptcy law as an opt-out statute: a state was not required to affirmatively authorize a municipality to file for bankruptcy, but it could prohibit its municipalities from doing so.²⁴²

The 1976 amendments to Chapter IX included state authorization as a requirement for entry into the municipal bankruptcy process. As a result of those amendments, a municipality was required to allege that it was generally authorized by state law to file for bankruptcy.²⁴³ Lawrence King, a leading bankruptcy scholar at the time, viewed this as an opt-in requirement that necessitated an affirmative state act. He expressed concern that the general authorization requirement might deprive a state of flexibility in determining whether a municipality within the state should file. King speculated that a city facing an unexpected financial crisis in a state that had no authorizing legislation on its books might unnecessarily languish in its financial crisis while the state legislature acted to pass the necessary legislation.²⁴⁴ According to King, the prior requirement that a city could file unless prohibited from filing was a superior way to ensure that states played an affirmative role in deciding how to resolve their cities' financial crises.

Not all courts interpreted the general authorization requirement as a mandate that a state opt in to the federal bankruptcy regime, resulting in a non-uniform standard for state consent. Although some courts interpreted the general authorization requirement to require an affirmative act by the state allowing municipalities to file,²⁴⁵ others found authorization to file for bankruptcy if the state had authorized a municipality to borrow money, enter into contracts, or sue and defend suits.²⁴⁶ When Bridgeport filed for bankruptcy, the court found that the city was authorized to file, despite

²⁴¹ *United States v. Bekins*, 304 U.S. 27, 51 (1937). The debtor in *Bekins* had been authorized by its state, California, to file for bankruptcy. *Id.* at 47.

²⁴⁶ *See, e.g. In re Villages at Castle Rock Metro. Dist. No. 4*, 145 B.R. 76, 82 (1990) (concluding that a special district was generally authorized to file for bankruptcy because Colorado law allowed it to, among other things, bring suits, borrow money, and manage, control, and supervise all of its business affairs); *In re Greene Cty. Hospital*, 59 B.R. 388, 391 (Bankr. S.D. Miss. 1986) (interpreting the legislative history to require a broad reading of the general authorization requirement).

Municipal Bankruptcy

objections by both the state Attorney General and a review board that the state created to oversee the city's finances.²⁴⁷ The bankruptcy court held that although the general authorization requirement necessitated some affirmative act by the state to allow the city to file for bankruptcy, the state had given such authorization by granting the city home rule authority over its borrowing, finances, and property.²⁴⁸

Congress resolved the confusion over the meaning of the general authorization requirement in 1994. The 1994 amendments to the Code added the current requirement that a municipality be specifically authorized by its state to file for bankruptcy.²⁴⁹ The specific authorization requirement implements the original vision for a municipal bankruptcy chapter as stated by the Court in *Bekins*: it allows the state to “invite[] the intervention of the bankruptcy power to save its agency which the State itself is powerless to rescue.”²⁵⁰ A state may impose its own conditions on access to Chapter 9, and thus design a framework state participation in developing a rehabilitation plan for its municipalities with the help of the bankruptcy court. In the next section, I discuss the various ways in which states have implemented this specific authorization requirement and discuss how they further, or fail to further, the goals of Chapter 9.

B. *Implementation of State Authorization*

Although Congress enacted the original municipal bankruptcy law to allow states to invite the power of federal law to remedy financial problems that the states, on their own, could not remedy, not all states have laws that reflect this purpose. Twenty-seven states permit at least some of their municipalities to file for bankruptcy.²⁵¹ The remaining states have no statute addressing the issue, with the exception of Georgia, which prohibits its municipalities from filing,²⁵² and Illinois, which does not authorize its cities to file, but gives a Financial Planning and Supervision Commission the power to recommend that a municipality file a Chapter 9 petition.²⁵³ Many states that do not authorize their municipalities to file for

²⁴⁷ Dubrow, *supra* note 139, at 555.

²⁴⁸ *In re Bridgeport*, 128 B.R. 688, 696 (Bankr. D. Conn. 1991). The court later dismissed Bridgeport's petition because it found that the city was not insolvent as required by § 109. *In re Bridgeport*, 129 B.R. 332 (Bankr. D. Conn. 1991).

²⁴⁹ Tung, *supra* note 3, at 890.

²⁵⁰ *U.S. v. Bekins*, 304 U.S. 27, 54 (1938).

²⁵¹ For a list of state statutes authorizing Chapter 9 filings, see H. SLAYTON DABNEY, *ET AL.*, *MUNICIPALITIES IN PERIL: THE ABI GUIDE TO CHAPTER 9* (2ND ED. 2013) 75.

²⁵³ 50 ILL. COMP. STAT. ANN. 320/9(b)(4) (West 2012).

bankruptcy also lack a state program to intervene in municipal financial distress.²⁵⁴

Even in states that authorize their municipalities to file for Chapter 9, bankruptcy authorization and state oversight do not always go hand in hand. Several states allow their municipalities to file for bankruptcy without any restrictions other than those imposed by the Bankruptcy Code.²⁵⁵ These statutes contemplate no pre-bankruptcy state fiscal oversight, nor do they mandate any role for the state during the Chapter 9 case. The absence of a pre-bankruptcy state oversight requirement does not mean that the state cannot provide fiscal oversight in bankruptcy,²⁵⁶ but it means that the extent of such oversight will be uncertain until a municipality files for bankruptcy. It is in the states that require no state involvement in a municipality's decision to file for bankruptcy that the fear that Chapter 9 will do nothing to remedy the conditions that led to a municipality's financial ills rings most true. Alabama, the home of the largest municipal bankruptcy ever filed until Detroit's filing, is one of those states.²⁵⁷ Not only does Alabama lack a municipal oversight program, but the state refused to intervene to help Jefferson County resolve its financial difficulties without filing for bankruptcy.²⁵⁸

Some states impose stronger bankruptcy governance controls by requiring a municipality to obtain the approval of a public official before filing for bankruptcy. Some of these statutes are unclear as to the level of governance that the state will provide. For example, Connecticut's statute requires that a municipality obtain the written consent of the governor before filing for bankruptcy, but says nothing about the state's

²⁵⁴ See generally Pew Report, *supra* note 104, at 9-10 (providing a state-by-state listing of bankruptcy authorization and state oversight programs).

²⁵⁵ See, e.g. ARIZ. REV. STAT. § 35-603 (Arizona statute authorizing any taxing district in the state to file for bankruptcy); KY. REV. STAT. § 66.400 (West 2012) (Kentucky statute authorizing municipalities other than counties to file for bankruptcy without any conditions); MO. ANN. STAT. § 427.100 (West 2012) (Missouri statute authorizing any municipality or political subdivision to file for bankruptcy); OKLA. STAT. ANN. Tit. 62, § 283 (authorizing municipal corporations and political subdivisions to file).

²⁵⁶ 11 U.S.C. § 903.

²⁵⁷ See CODE OF ALA. § 11-81-3 (declaring that the governing body of any county, city, town, or municipal body has the power to file a bankruptcy petition and giving the state's permission for such a filing). The language of this statute raised an eligibility question in Jefferson County's case because the statute allows municipalities that "shall authorize the issuance of funding or refunding bonds" to file for bankruptcy and Jefferson County had issued warrants, not bonds. See *In re Jefferson County*, 469 B.R. 92 (Bankr. N.D. Ala. 2012).

²⁵⁸ Pew Report, *supra* note 104, at 9, 27. In one important respect, the state of Alabama exacerbated Jefferson County's financial problems when it refused to allow the county to impose an occupational tax. See *In re Jefferson County, Alabama*, 474 B.R. 228, 237 (Bankr. N.D. Ala. 2012) (explaining the rejection of the county's tax by the Alabama Supreme Court and the legislature's subsequent refusal to enact a replacement tax).

Municipal Bankruptcy

involvement in a Chapter 9 case.²⁵⁹ Louisiana's statute requires both the governor and the attorney general to approve the petition before any municipality can file for Chapter 9.²⁶⁰ The Louisiana statute also requires the governor and attorney general to approve the plan of adjustment, although it does not require that the governor and attorney general be involved in developing the plan.²⁶¹ Moreover, the Louisiana statute provides no guidelines for the approval or disapproval of a petition or plan.²⁶² In these states, there is a loose tie between state oversight and bankruptcy authorization in that the state must be involved in the municipality's decision to file for Chapter 9, although it does not appear that bankruptcy is incorporated into a state municipal oversight program.

Several states have oversight programs that allow the state to intervene in municipal finances. North Carolina, whose municipal financial oversight program is considered to be the "gold standard" for such programs, and New Jersey, which is also known for providing more assistance to its cities than most states, implemented their programs soon after the Great Depression brought a wave of municipal bond defaults.²⁶³ These programs provide budget oversight and intervention in the event of a default on the part of a municipality.²⁶⁴ Kentucky also has a Depression-era statute that allows the state to "assist counties whose financial affairs have become so involved that they have seemed to be beyond local solution and . . . to curb deplorable practices due to inefficiency,

²⁵⁹ See, e.g. CONN. GEN. STAT. ANN. § 7-566 (2012) (requiring the written consent of the governor).

²⁶⁰ LA. REV. STAT. ANN. § 39:619 (2012) (prohibiting a municipality from filing for bankruptcy without the "consent, approval and authority of the state through the governor and the Attorney General").

²⁶¹ LA. REV. STAT. ANN. § 39:620 (2012) (giving the governor and attorney general the discretion to approve or disapprove the plan of adjustment). The statute raises an interesting federalism issue in that it allows the state officials to reject a plan of adjustment after its confirmation by the bankruptcy court.

²⁶² LA. REV. STAT. ANN. § 39:620 (2012). See Lauren M. Wolfe, Note, *The Next Financial Hurricane? Rethinking Municipal Bankruptcy in Louisiana*, 72 LA. L. REV. 555, 577 (2012) (explaining that the statute lacks any factors for the State Bond Commission to consider in deciding whether a municipality should file for Chapter 9).

Elliott, *Proposed Fiscal Monitoring Legislation in New York: A Comparative Analysis*, 8 FORDHAM URB. L.J. 113-9 (1979) (explaining New Jersey's fiscal oversight of its municipalities).

carelessness, or in some instances, quasi criminality in the handling of county finances in utter disregard of the public welfare.”²⁶⁵

Kentucky and New Jersey have integrated the bankruptcy process into their state oversight programs. In Kentucky, a county may file for bankruptcy only if two state officials approve its petition and proposed plan of adjustment. Once the county files, it may amend its plan only if the same state officials approve of the amendments.²⁶⁶ Although Kentucky law does not require that a county participate in a state oversight program before filing for bankruptcy, a county may ask the state for its assistance in restructuring county debt, and the state may intervene in a county’s finances if the county is in default on any indebtedness.²⁶⁷ New Jersey has a similar statute, which requires the state’s municipal finance commission to approve both the petition and the plan of adjustment.²⁶⁸ A municipality that is unable to pay its debts can apply for state oversight,²⁶⁹ and the state can place a defaulting municipality under state supervision on the request of the holder of the unpaid bonds or notes.²⁷⁰ When a municipality is placed under state oversight, the municipal finance commission appoints an auditor to recommend a budget for the municipality and to approve contracts and capital improvements.

The existence of a state oversight program does not necessarily mean that the state integrates Chapter 9 into that program. North Carolina requires approval of the Local Government Commission before any municipality can file for bankruptcy, but the statute is unclear regarding any involvement by the commission in the Chapter 9 case.²⁷¹ Moreover, some states that have an intervention program have no legislation authorizing their municipalities to file for Chapter 9.²⁷²

Municipal Bankruptcy

Recent municipal bankruptcies and threats of same have caused some states to revisit their authorizing legislation. California amended its authorization statute after Vallejo filed for bankruptcy. Vallejo's bankruptcy was expensive and time-consuming, and some question whether it brought any benefits at all to the city.²⁷³ California's statute, enacted at the behest of the public employee unions,²⁷⁴ requires that a municipality contemplating bankruptcy must first enter into a confidential mediation process with its creditors.²⁷⁵ Although its detractors criticize the statute for potentially delaying a necessary Chapter 9 filing for a distressed city,²⁷⁶ its supporters contend that if a municipality is required to negotiate in good faith with its creditors before filing, it might either avoid Chapter 9 or develop a pre-negotiated plan, thus reducing the duration and cost of the Chapter 9 case.²⁷⁷ California continues to eschew state oversight of municipal finances; during the legislative process preceding the enactment of the new statute, state leaders insisted that the bill could not increase the financial burdens on the state.²⁷⁸ Therefore, although California accepted the Bankruptcy Code's invitation to place conditions on the ability of its municipalities to file, its legislation does nothing to further the foundational goal of municipal bankruptcy law, which was to invite the federal power to solve a problem that the state could not solve on its own.

Other states whose cities have suffered financial threats have modified their authorization statutes to more explicitly link the authorization to file for bankruptcy with state oversight. The Rhode Island legislature enacted its Fiscal Stability Act out of a concern that Central Falls' 2010 receivership petition would lead to other receivership petitions by Rhode

²⁷³ See Denniston, *supra* note 19, at 273 (explaining that Vallejo's Chapter 9 took three years, cost \$13 million, and left a \$3.4 million shortfall in the city's first post-bankruptcy budget).

²⁷⁸ Denniston, *id.*, at 282.

Island municipalities.²⁷⁹ A Rhode Island city cannot file for bankruptcy without taking three intermediate steps, each of which requires the city to submit to increasing levels of fiscal oversight.²⁸⁰ It is only after the appointment of a receiver, the third and last of the intermediate steps, that a city can file for bankruptcy, and the authorizing statute grants the receiver the power to file the Chapter 9 petition.²⁸¹

Michigan's law has a tortured history. In 1988, to respond to the effects that the 1980s recession had on its cities, Michigan enacted a law that allowed the state to appoint an emergency financial manager for a municipality experiencing a financial emergency.²⁸² Although the statutory allocation of authority between the emergency financial manager and the municipality's elected officials was somewhat unclear, it was widely understood that the law permitted local officials to exercise all of their powers other than the budget and fiscal powers that the statute gave to the emergency financial manager.²⁸³ In 2011, as the financial picture in Detroit and other Michigan cities became increasingly dire, Michigan enacted a law giving transforming the emergency financial manager into an emergency manager. The effect of that law was to allow the state to replace all of a financially stressed municipality's elected officials with an official appointed by the governor.²⁸⁴ Under that law, only the emergency manager had the power to file a bankruptcy petition for the municipality with the governor's approval.²⁸⁵ Michigan voters rejected that law in 2012 and the legislature quickly responded with a statute that gives a financially-distressed city four choices: the appointment of an emergency manager, Chapter 9 bankruptcy, mediation with its creditors, or a consent agreement with the state to reduce its debt.²⁸⁶

On March 14, 2013, the governor of Michigan appointed an emergency manager for Detroit. Matthew Dolan & Jeff Bennett, *Manager Tapped for Detroit*, WALL ST. J., March 15, 2013, at A2.

Municipal Bankruptcy

Michigan law grants the emergency manager broad powers. As under the 2011 law, the emergency manager replaces all of the affected municipality's elected officials, who possess only the powers granted to them by the emergency manager.²⁸⁷ As was illustrated in the Detroit case, if an emergency manager is appointed, the emergency manager decides whether to file a Chapter 9 petition for the city, and can only do so with the approval of the governor.²⁸⁸ Only the emergency manager has the authority to act for the municipality during the Chapter 9 case.²⁸⁹ A city in Michigan can file for bankruptcy even if it does not choose the emergency manager option, but it needs the governor's approval to do so, and the governor may condition approval on the appointment of someone to act for the municipality in its Chapter 9 case.²⁹⁰

The Rhode Island and Michigan approaches to Chapter 9 illustrate that some of the academic concerns about Chapter 9 governance can be and have been alleviated by states. In these states, the question is not whether there is restructuring oversight of a dysfunctional city, it is whether the oversight is appropriate. Receivership and emergency manager statutes have been criticized and challenged on several grounds: such statutes violate home rule statutes that give the citizens of municipalities the right to govern themselves;²⁹¹ they have a disproportionate impact on communities with large poor²⁹² and African-American²⁹³ populations; and they do not anticipate or facilitate the kind of non-financial structural reform, such as the consolidation of municipalities, that might be necessary to truly alleviate a city's financial distress.²⁹⁴ Although these are

important criticisms, they are unrelated to the efficacy of Chapter 9. When viewed alone, all Chapter 9 can do is reduce a municipality's debt. In enacting municipal bankruptcy legislation, however, Congress did not intend for bankruptcy law to stand alone in resolving municipal financial distress. In the next section, I explain Pennsylvania's still-evolving process of revising its distressed municipalities statute in order to illustrate what happens when business and political leaders lose sight of the fact that Chapter 9 was enacted to assist, rather than thwart, state efforts to rehabilitate their municipalities.

V. AUTHORIZATION MEETS GOVERNANCE, EVENTUALLY:
PENNSYLVANIA'S STORY

The story of Pennsylvania's response to its capital city's financial problems contains several lessons about municipal bankruptcy. It shows how confusion reigns when little-used laws are dusted off and considered as tools to solve pressing problems. Because Chapter 9 is so rarely used, decision makers may be unaware of its interplay with state oversight laws. Harrisburg's business and government leaders viewed bankruptcy and state intervention as competing, rather than complementary, methods for resolving municipal financial distress. Their misunderstanding of the interaction between Chapter 9 and state recovery schemes led, for a short time, to an undesirable legislative result in Pennsylvania.

Pennsylvania's body of law regarding authorization to file for bankruptcy illustrates both the reactive nature of state oversight laws and their interplay with bankruptcy authorization. The bankruptcy authorization rules for most cities, counties and towns in Pennsylvania²⁹⁵ are found in the Municipalities Financial Recovery Act, also known as Act 47.²⁹⁶ Enacted in 1987 to address the municipal financial distress caused by the contraction of the steel industry in the western part of the state,²⁹⁷ Act 47 established a financial intervention program administered by the Pennsylvania Department of Community and Economic Development (DCED). A municipality that receives a distress determination must work with a coordinator appointed by the state to

²⁹⁵ Philadelphia is the exception. It cannot file for bankruptcy without the Governor's approval, a restriction placed upon the city in 1991, when the state enacted a recovery statute for that city. *See* 53 P.S. § 12720.211 (West 2012); *see also* Drew Patrick Gannon, *Comment, An Analysis of Pennsylvania's Legislative Programs for Financially Distressed Municipalities and the Reaction of Municipal Labor Unions*, 98 DICK. L. REV. 281, 291-294 (1993) (explaining the history of the Pennsylvania Intergovernmental Cooperation Act).

²⁹⁷ Gannon, *supra* note 295, at 281.

Municipal Bankruptcy

develop a financial recovery plan.²⁹⁸ Although commentators lauded Act 47 as an example of proactive state oversight over its cities,²⁹⁹ it has not been a great success in reviving Pennsylvania's municipalities. The state has accepted twenty-seven municipalities into the program, but only six have exited.³⁰⁰ Six cities have been in the program for more than 25 years.³⁰¹

The original proponents of Act 47 did not design the program as an exclusive alternative to Chapter 9. The legislature revisited Pennsylvania's bankruptcy authorization statute at the time it developed Act 47 and included the preconditions for Chapter 9 filing in Act 47.³⁰² Before June 2011, municipalities could file for Chapter 9 if one of five conditions was met, and the law at that time allowed a municipality to file for bankruptcy without the prior approval of any state officer.³⁰³ Not only does Act 47 set forth the conditions under which a municipality may file for Chapter 9, it mandates that if a city is not in the Act 47 program at the time it files for bankruptcy, the bankruptcy filing will trigger a distress determination that

²⁹⁸ 53 P.S. § 11701.221. A municipality in the program may receive permission to raise its taxes above the legal limits and is eligible for loans and grants from the state. 53 P.S. § 11701.123

²⁹⁹ See McConnell & Picker, *supra* note 3, at 473 (explaining some of the benefits of state intervention, using Scranton's Act 47 status as an example). In 2002, Fred Tung cited Act 47 as possibly "particularly instructive insofar as it has actually gotten some use," and also used Scranton as an example. Tung, *supra* note 3, at 917, fn. 146.

³⁰⁰ See Pennsylvania Department of Community and Economic Development List of Act 47 Distress Determinations, <http://www.newpa.com/local-government/services-we-provide-local-governments/request-assistance/list-of-act-47-distress-determinations>. Twenty years after its entry into Act 47, Scranton not only remained distressed, but was frequently reported to be considering a Chapter 9 filing. See, e.g. David Falchek, *Some tout bankruptcy as Scranton's way out, others say it's no picnic*, SCRANTON TIMES-TRIBUNE, June 27, 2012, <http://thetimes-tribune.com/news/some-tout-bankruptcy-as-scranton-s-way-out-others-say-it-s-no-picnic-1.1335580>; *Municipal Bankruptcy: The sadness of Scranton*, THE ECONOMIST, July 21, 2012, <http://www.economist.com/node/21559382>; Mary Williams Walsh, *Crushed by Promises*, N.Y. Community, Economic, and Recreational Development Committee, and the Senate Local Government Committee, 2011 Leg., 195th Sess.* (Pa. 2011), http://www.legis.state.pa.us/cfdocs/legis/tr/transcripts/2011_0110T.pdf (*Act 47 Hearing*) (Statement of Michael Gasbarre, Executive Director, Local Government Commission of the Pennsylvania General Assembly) (explaining that one of the original objectives of the task force that proposed Act 47 was the "creation of an updated procedure to enable distressed municipalities to file for municipal debt readjustment action under Federal law").

³⁰³ See Moringiello, *supra* note 19, at 249 (explaining Pennsylvania law before June 30, 2012).

will place the city in the program.³⁰⁴ The distress determination allows the state to appoint an Act 47 coordinator, who must develop a debt adjustment plan that can be confirmed by the bankruptcy court.³⁰⁵ Act 47 therefore anticipated both that a municipality under state oversight might be required to resort to bankruptcy, and that a municipality not yet under state oversight that decided to file for bankruptcy would then receive state guidance in the bankruptcy. The original Act 47 included the possibility of a municipal bankruptcy filing as a necessary component of a municipal financial recovery scheme with the state providing the necessary reorganizational governance in Chapter 9.

The possibility of a bankruptcy filing by Harrisburg started to emerge in the press roughly two years before the city filed its petition. The mere mention of Chapter 9 triggered a deluge of opposition from state officials and business leaders. Sprinkled throughout those press accounts were reports of high-level misunderstandings about the effects of a bankruptcy filing.³⁰⁶ Business leaders and politicians seemed unable to distinguish bankruptcy from insolvency, expressing concern about the effect of Chapter 9 on the city's bond rating when Harrisburg's bonds had been rated five grades below investment grade for over a year.³⁰⁷ The very highest level of state government revealed a fundamental misunderstanding of Act 47's integration of bankruptcy law and state oversight when then-Governor Ed Rendell warned that if Harrisburg filed

³⁰⁴ 53 P.S. § 11701.262. This provision of the statute has been used only once, in the bankruptcy of Westfall Township, a small municipality that was rendered insolvent by a large judgment. *See Act 47 Hearing, id.* (Statement of James H. Roberts)(explaining that Westfall Township was the first municipality in the history of Act 47 to invoke its bankruptcy provisions).

³⁰⁵ 53 P.S. § 11701.262.

³⁰⁶ For example, the mayors of three distressed Pennsylvania cities, Harrisburg, Reading and Scranton described bankruptcy "as creating a perception to the business community, the people and the rest of the world that Harrisburg isn't solvent and would be unable to pay its bills," Scott La Mar, *Mayors of Harrisburg, Reading, and Scranton say that bankruptcy is not the answer*, WITF SMART TALK, November 1, 2011, <http://www.witf.org/smart-talk/2011/11/mayors-of-harrisburg-reading-and-scranton-say-bankruptcy-is-not-the-answer.php>. *See also* Sharon Smith, *Bankruptcy for Harrisburg could help taxpayers but taint region, state*, HARRISBURG PATRIOT-NEWS, June 13, 2011, http://www.pennlive.com/midstate/index.ssf/2011/06/bankruptcy_could_help_taxpayer.html (quoting David Black, the president and CEO of the Harrisburg Regional Chamber of Commerce as saying that "[t]he impact of bankruptcy is more than just the city of Harrisburg. It's on the commonwealth of Pennsylvania, and it's on every municipality in Pennsylvania").

Municipal Bankruptcy

for bankruptcy, a bankruptcy judge, not the citizens of Harrisburg, would control the city's destiny.³⁰⁸

When Harrisburg entered the Act 47 program a year before it filed for bankruptcy political leaders at the state and local level split into two camps: the Act 47 camp and the bankruptcy camp. Business leaders were firmly in the Act 47 camp.³⁰⁹ This split illustrates the fact that even in states like Pennsylvania, where the authorization to file for bankruptcy is contained within the statute providing for state intervention in the fiscal affairs of its municipalities, policy makers can lose sight of the relationship between state intervention and Chapter 9. Harrisburg's city council was at an impasse; a majority of the council members were unable to agree with the mayor on almost anything, having rejected both the Act 47 coordinator's proposed plan as well as an alternative Act 47 plan proposed by the mayor. The standoff culminated in a late-night bankruptcy filing unsupported by the mayor that was dismissed six weeks later because of the city's failure to meet the Chapter 9 eligibility requirements.³¹⁰ For that reason, the state was justifiably concerned that a bankruptcy proceeding would burn through money without a successful resolution. If the council could not agree on whether to file for bankruptcy, it certainly would not have been able to agree on a Chapter 9 plan to adjust the city's debts.

In June, 2011, three and a half months before Harrisburg filed for bankruptcy, the state legislature passed a law prohibiting Harrisburg and other cities that had received a distress determination from the DCED pursuant to Act 47 from filing for Chapter 9 altogether.³¹¹ The proponents

³⁰⁸ See Heather Long, *Harrisburg and bankruptcy: The facts and the myths*, HARRISBURG PATRIOT-NEWS (Sept. 18, 2010), http://www.pennlive.com/editorials/index.ssf/2010/09/harrisburg_and_bankruptcy_the.html (quoting Governor Rendell as saying "if the city goes into bankruptcy, it will be the bankruptcy judge who decides. This step is to be avoided so that Harrisburg and its elected officials can control their own destiny"). As explained above, nothing could be farther from the truth.

³⁰⁹ See Charles Thompson, *Most at Harrisburg fiscal hearing want bankruptcy*, Pennlive.com, October 20, 2010, http://www.pennlive.com/midstate/index.ssf/2010/10/most_at_harrisburg_fiscal_hear.html (quoting the president of the chamber of commerce as favoring Act 47 because it could "provide just the guidance that city leaders need to get past their political and personal divisions and begin focusing on solutions").

³¹⁰ I have discussed the circumstances leading up to Harrisburg's filing elsewhere. See Moringiello, *supra* note 19, at 243-44.

³¹¹ 72 P.S. § 1601 – D.1 (2012). Pennsylvania classifies its cities by population, and this prohibition was limited to cities of the Third Class. Although most Pennsylvania cities are cities of the Third Class, the prohibition was enacted as a reaction to Harrisburg's financial crisis. See *In re City of Harrisburg*, 465 B.R. 744, 763 (2011)(explaining the temporary prohibition on filing applicable to cities of the Third Class). Moringiello, *id.*, at 243.

of the ban claimed that Harrisburg could adequately solve its problems in Act 47.³¹² Rather than strengthening its financial governance over its distressed cities, Pennsylvania left its most troubled cities to languish in a state program of dubious success without the leverage over recalcitrant creditors that a bankruptcy threat can provide. In hindsight, the state government was trying to solve an obvious governance problem; the mayor of Harrisburg and the majority of the City Council were at an impasse, and they could not agree on an Act 47 plan. If they could not agree on an Act 47 plan outside of bankruptcy, it was unlikely that they could ever agree on a Chapter 9 plan of adjustment with their creditors.

Act 47, in its pre-2011 form, left the mayor and other members of the municipality's government in their roles with full powers in all cases. On the one hand, this feature of Act 47 respected the democratic process by allowing those chosen by a municipality's residents to govern the municipality. On the other, however, Act 47 presumed the existence of a functioning city government led by leaders who agreed to cooperate with state intervention. The reality in Harrisburg did not mirror these assumptions. As a result, Pennsylvania moved to strengthen governance over its distressed cities shortly after Harrisburg filed for bankruptcy. Immediately after Harrisburg filed for bankruptcy, the legislature passed a bill allowing the governor to appoint a receiver for a city if that city is insolvent and has not adopted an Act 47 plan.³¹³ If a receiver is appointed, only the receiver can file a Chapter 9 petition for the city.³¹⁴

Receiverships are controversial. They should be; they remove the choice of leaders from the residents of a city.³¹⁵ Pennsylvania, however, had an almost toothless state intervention scheme. The state was unable to do anything to resolve Harrisburg's problems because of the acrimony on the City Council. The drafters of Act 47 never anticipated that a city would reject a plan.³¹⁶ The receivership provision therefore provided governance controls that were missing from the state intervention program. Although Pennsylvania has strengthened its ability to intervene in a city's financial matters, Act 47 still does nothing to address the problems that

³¹² Marc Levy, *Bill to stop Harrisburg bankruptcy goes to Corbett*, yorkdispatch.com, July 8, 2011, http://www.yorkdispatch.com/news/ci_18387764.

³¹³ 53 P.S. § 11701.702 (2012).

³¹⁴ 53 P.S. § 11701.706 (2012). Today, no municipality in Pennsylvania may file for bankruptcy without the approval of DCED. 53 P.S. § 11701.261 (2012).

³¹⁵ See notes 291–294 *supra* and accompanying text.

³¹⁶ See *Act 47 Hearing*, *supra* note 302 (Statement of Michael Gasbarre, Executive Director, Local Government Commission of the Pennsylvania General Assembly) (explaining that “[i]t is an accurate statement that those who crafted Act 47 never envisioned a situation where a distressed municipality would fail to adopt either the coordinator’s solvency plan or an alternative that could be drafted by a municipality’s chief executive officer or governing body”).

Municipal Bankruptcy

arise from the state's highly fragmented municipal structure in which thousands of municipalities, some very small, each provide their own public services.³¹⁷

Pennsylvania's story clarifies a rationale that some authors have ascribed to municipal bankruptcy. Several scholars have suggested that Chapter 9 exists as a political tool. Both Adam Levitin, writing about the wisdom of a bankruptcy chapter for states, and Clayton Gillette, writing about Chapter 9, have surmised that one use of a bankruptcy chapter for public entities could be to provide political cover for state or city officials in making unpopular decisions.³¹⁸ Gillette has cited Harrisburg's failed bankruptcy as an example of a strategic use of Chapter 9 by a city to escape unfavorable conditions placed by the state on its assistance.³¹⁹ Bankruptcy can indeed be a political tool, but in a different way from that suggested by Gillette and Levitin. A city's credible threat to file for Chapter 9 can serve as a wake-up call to state officials who have paid little attention to their state's authorization statutes. In Pennsylvania, a state with many distressed municipalities, the bankruptcy threat by the state capital did just that. Harrisburg's dispute with the state led to a short-lived absolute ban on bankruptcy filings by certain cities, but it also forced the state to grapple with the governance deficiencies in its municipal distress intervention program. Once the state restored Chapter 9 as an option, Harrisburg's creditors moved towards an out-of-bankruptcy resolution of the city's debt problems.³²⁰

VI. WHERE THE HOLES ARE: ISSUES FOR JUDICIAL OR LEGISLATIVE RESOLUTION

Because so few general-purpose municipalities of any size had filed for Chapter 9 before Vallejo, California filed in 2008, it is difficult to evaluate, as an empirical matter, the success of Chapter 9 in relieving a city of its financial distress so that the city, with the help of its state, can return to viability. Vallejo, a city in a state that has refused to provide

reorganizational oversight, continues to struggle,³²¹ and the bankruptcy of Central Falls, in a state that provided robust rehabilitative governance, had a positive effect on that city's credit and that of other Rhode Island cities.³²² Harrisburg is on track to solve its problems under Pennsylvania's strengthened oversight statute without resort to bankruptcy.³²³

The foregoing illustrates that Chapter 9 may only be effective as the state municipal oversight structure within which it operates. This is not a new observation; in the 1930s, the original proponents of a municipal bankruptcy law feared that any such law would be useless without it being integrated into state plans for municipal rehabilitation.³²⁴ Because the design of municipal bankruptcy law anticipates that the states will provide reorganizational governance over the debtor, concerns about the effectiveness of Chapter 9 should not focus its absence of Chapter 11-style governance controls. Rather, questions about the efficacy of Chapter 9 should fall into three categories: those about each state's acceptance of the Code's invitation to exercise Chapter 9 governance, those about what the state is accepting if it allows its cities to file for Chapter 9, and those about the extent to which a court can exercise bankruptcy governance over a municipal debtor if a state allows municipal bankruptcy but declines the invitation to participate in the debtor's rehabilitation. In Part IV above, I addressed the first category of questions. In this section, I will address the second and third categories.

A. *Continuing Questions about the Relationship between State and Federal Law*

The relationship between state law and bankruptcy law is one that scholars have studied and questioned for decades. Uncertainty about the

Municipal Bankruptcy

relationship between the two is not unique to municipal bankruptcy; over thirty years ago, shortly after the passage of the current Code, Theodore Eisenberg pronounced the Code a failure because of its “inadequate coordination with preexisting federal and state laws.”³²⁵ The proper function of all types of bankruptcy depends on the interplay between bankruptcy law and myriad state and other federal laws.³²⁶

Uncertainty surrounds Chapter 9 because its rare use has produced few published judicial opinions interpreting and applying its provisions. The history of Chapter 9 illustrates an attempt to strike a careful balance between state and federal interests, and as large municipalities file for bankruptcy, the relationship between state and federal law in resolving municipal financial distress requires further refinement.

The constitutional foundations of municipal bankruptcy law raise a question of how far bankruptcy law can go to upset state law entitlements. For example, before Detroit filed for bankruptcy, several groups sued in state court claiming that because the Michigan constitution protects employee pensions, a bankruptcy filing would be unconstitutional.³²⁷ Although the mere act of filing for Chapter 9 should not violate this constitutional provision because a plan of adjustment does not necessarily impair pension rights, the Emergency Manager’s stated intention to reduce pensions will ensure that questions regarding the relationship between state and federal law will not disappear.

One bankruptcy court has provided an answer to this question. Retirees in Stockton, California claimed that the contracts clause in the California constitution protected their health benefits even in bankruptcy. In that dispute, the court looked at bankruptcy authorization as an all-or-nothing proposition. If a state authorizes municipal bankruptcy, it must accept all of Chapter 9’s provisions, which include the possibility of a cramdown plan that forces creditors to accept less than what they are owed.³²⁸ In short, a state can condition its cities’ entry into Chapter 9, but it cannot revise it.³²⁹

³²⁵ Theodore Eisenberg, *Bankruptcy Law in Perspective*, 28 U.C.L.A. L. REV. 353, 355 (1981).

³²⁶ There are many examples of bankruptcy law’s dependence on state law. Perhaps the two most prominent are the Code’s definitions of property of the estate and of claims. 11 U.S.C. §§ 502, 541. See Karen Gross, *A Response to J.J. White’s Death and Resurrection of Secured Credit: Finding Some Trees But Missing the Forest*, 12 AM. BANKR. INST. L. REV. 203, 216-17 (2004) (explaining that all Chapter 11 cases “involve the interplay of other bodies of law, other disciplines, and the market.”).

³²⁹ *Id.* at 17.

Assuming that a state must accept Chapter 9 *in toto*, it is often unclear exactly what total acceptance means. Where Chapter 9 incorporates Chapter 11 standards the incorporation is sometimes poorly tailored to the realities of municipal financial distress. For example, in order for a Chapter 9 plan to be confirmed, the plan must be in the best interests of creditors.³³⁰ To meet that standard, a Chapter 11 plan must pay all creditors at least what they would receive in a Chapter 7 liquidation.³³¹ That standard is unworkable in a Chapter 9 case because a municipality cannot be liquidated, nor can its assets be sold outside of bankruptcy in a forced sale.³³² As a result, courts hold that a plan of adjustment meets the best interests standard when the plan is better than all alternatives.³³³

Although Chapter 9 permits a cramdown plan, a court may confirm such a plan only if it is “fair and equitable.”³³⁴ In Chapter 11, that standard requires that unsecured creditors be paid in full before shareholders get anything.³³⁵ The standard does not translate well to Chapter 9; cities do not have shareholders. Courts have therefore interpreted it to mean that Chapter 9 creditors will receive all that they “can reasonably expect under the circumstances.”³³⁶ There is very little case law interpreting the standard, however, justifying creditor uncertainty about Chapter 9 treatment. The vague confirmation standards may play a key role in encouraging creditor cooperation in Chapter 9.³³⁷

The confirmation standards also implicate the relationship between state and federal law. The Code states that in order for a Chapter 9 plan to be confirmed, the debtor must not be “prohibited by law from taking any action necessary to carry out the plan.”³³⁸ That raises the question of whether a municipal debtor in a state with constitutional pension protections can confirm a plan that modifies pensions. If bankruptcy authorization is an all-or-nothing proposition, the answer should be yes, but again, case law is scant. In one of the few cases interpreting this requirement, the court held that reading it to prohibit a plan of adjustment from reducing payments to bondholders in contravention of state law

Municipal Bankruptcy

would defeat the entire purpose of Chapter 9.³³⁹ According to that court, the plan going forward must comply with state law.³⁴⁰ As a result, Detroit should be able to restructure its pension obligations in its Chapter 9 plan, but any restructured employee benefits would be subject to Michigan's constitutional protections after plan confirmation.

B. *Debtor Governance in Weak Governance States*

Although municipal bankruptcy law was designed to facilitate state rehabilitation schemes, Chapter 9 does not require that a state play any role in a municipal bankruptcy case other than to authorize filing. Some states, such as Alabama and California, have declined to exercise reorganizational governance over their Chapter 9 debtors. In those states, a Chapter 9 filing can only result in a fresh start unless the municipality itself has a plan to resolve the structural problems that led to the filing.

If the fresh start is the goal of Chapter 9 in states that do not provide reorganizational governance, it may be up to the bankruptcy courts to ensure that only worthy municipal debtors file for bankruptcy, just as they do when an individual files for bankruptcy. The Code lets them do so; although some of the entry requirements are objectively determinable, such as whether the debtor is insolvent and whether it is authorized by its state to file, others leave more discretion in the bankruptcy judge. The Chapter 9 eligibility requirements both invite the state to provide rehabilitative governance over the debtor and allow a court to exercise a measure of bankruptcy governance.³⁴¹ For example, a municipality can be a debtor only if it “desires to effect a plan to adjust” its debts,³⁴² if it first negotiates in good faith with its creditors,³⁴³ and if it files its petition in good faith.³⁴⁴ These entry requirements give a court some discretion in determining whether a filing is likely to have some benefit for the city or will simply result in a drawn-out process with little benefit to the debtors or its creditors.³⁴⁵ When the state plays no role in the bankruptcy, the court

³⁴² 11 U.S.C. § 109 (c)(4).

³⁴³ 11 U.S.C. § 109 (c)(5). The municipality may be excused from this requirement if it shows that negotiation with creditors would be impracticable.

³⁴⁴ See 11 U.S.C. § 921 (c) (allowing the court to dismiss a petition that is not filed in good faith).

³⁴⁵ See *In re City of Stockton*, 493 B.R. 772, 794 (Bankr. E.D. Cal. 2013) (stating that the good faith requirement “serves a policy objective of assuring that the Chapter 9 process is

may play a larger role in encouraging negotiation, such as by the appointment of a mediator.³⁴⁶ Each state must decide whether municipal bankruptcy should facilitate more than a fresh start; in states where the fresh start is the only goal of a Chapter 9 case, the court must ensure that the case can achieve that goal.

CONCLUSION

A city's descent into financial distress forces a new look at rarely used laws. Municipal bankruptcies are rare, and because Chapter 9 filings are few and far between, the body of case law that has developed to govern them is small. Because decades passed between the passage of the first municipal bankruptcy legislation and the possibility that a major city would have to use it, the original purpose Chapter 9 was forgotten.

Chapter 9 was never intended to serve as a comprehensive scheme to solve municipal financial problems; it was designed to complement state efforts to solve those problems. Chapter 9 does indeed anticipate restructuring governance over a municipal debtor, but in the hands of the state, not in the hands of a bankruptcy judge. That governance concession is consistent with the original goals of the predecessor to Chapter 9.

Concluding that Chapter 9 accommodates appropriate debtor governance, however, does not answer the question of whether Chapter 9 is an effective financial restructuring tool for cities. Chapter 9 may only be as effective as each state's plan for municipal fiscal oversight. This conclusion does, however, allow researchers and policy makers to focus on the role of each state in developing an effective mechanism to not only resolve the financial distress of its municipalities but develop sensible structures for their municipalities going forward. This mechanism should include both robust state oversight and the safety valve of Chapter 9 if necessary to overcome holdout creditors.

being used in a manner consistent with the reorganization purposes of the Bankruptcy Code").

³⁴⁶ Courts have appointed mediators in both Stockton and Detroit. *See id.* at 783; Mediation Order, *In re City of Detroit*, Michigan, Case No. 13-53846 (Aug. 13, 2013). In the latter case, the state is responsible for developing the Chapter 9 plan through Detroit's Emergency Manager.
