Alternative Education

Although students currently enrolled in Deter's Alternative education program have been to bright, well-lighted, and technically advanced with average reading abilities at 8th grade level in reading, math, and English, the Alternative Education program is now providing more personalized and individualized teaching methods. Students are given the opportunity to work at their own pace and complete the curriculum requirements at their own convenience. However, students are encouraged to participate in extracurricular activities and to develop social skills in a relaxed and supportive environment. The Alternative Education program is designed to accommodate the diverse needs of students and to provide them with the necessary tools for academic and personal success.

The ‘nice thing about options is that they represent bright and shining promises on the horizon.’
