
Kritika Walia, Research
According to the global Medical Instrument Disinfectant Market report published by Value Market Research, the market is expected to touch USD 4.8 BN by 2024, with a CAGR of 7% growing from USD 3 BN in 2017. This is a tailored made research report providing informative data and various critical aspects of the market such as market outlook, market share, growth, and trends. Further, the report also offers evidence-based information that helps to transform clients business and achieve their business goals. Moreover, the report also highlights the key strategy of top players. Additionally, this report covers a wide spectrum of services such as the latest technology trend, market opportunity analysis, and competitive landscape.

The report also covers detailed competitive landscape including company profiles of key players operating in the global market. The key players in the medical instrument disinfectant market include 3M, Advanced Sterilization Products Division, Belimed AG, Bergen Group of Companies, BODE Chemie GmbH, Ecolab, Getinge Group, Halyard Health, Inc., Schulke & Mayr GmbH, Steelco S.p.A., Steris Plc., Tristel, and others. An in-depth view of the competitive outlook includes future capacities, key mergers & acquisitions, financial overview, partnerships, collaborations, new product launches, new product developments and other developments with information in terms of H.Q.

Market Dynamics

Rising prevalence of bacterial infections among the population leading to high demand of sterilization equipment and solutions is the prominent factor driving the market growth. Also, increased adoption of minimally invasive surgeries by medical professionals owing to its benefits is again fueling the market demand. In addition, favorable governmental initiatives on infection control are projected to push the market high in following years. On the flip side, growing use of disposable surgical instruments to reduce outbreak of infection is likely to hamper the market growth.

This detailed market study is centered on the data obtained from multiple sources and is analyzed using numerous tools including porter’s five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights of the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of medical instrument disinfectant.

Market Segmentation

The broad medical instrument disinfectant market has been sub-grouped into product type (disinfectant), environmental protection agency classification, product type (disinfector), end-user and distribution channel. The report studies these subsets with respect to the geographical segmentation. The strategists can gain a detailed insight and devise appropriate strategies to target specific market. This detail will lead to a focused approach leading to identification of better opportunities.
By Product Type (Disinfectant)

- Wipes
- Liquid
- Sprays

By Environmental Protection Agency Classification

- Low Level
- Intermediate Level
- High Level

By Product Type (Disinfector)

- Washer
- Single Chamber
- Multi Chamber
- Flusher
- UV Rays Disinfectors
- Endoscopic Reprocessor

By End-User

- Hospitals
- Medical Device Manufacturers
- Pharma Manufacturers
- Laboratory
- By Distribution Channel
- Tender
- Over The Counter

Regional Analysis

Furthermore, the report comprises of the geographical segmentation, which mainly focuses on current and forecast demand for medical instrument disinfectant in North America, Europe, Asia Pacific, Latin America, and Middle East & Africa. The report further focuses on demand for individual application segments in all the regions.
