3D Motion Capture System Market Size, Trends, Segments and Growth Report Till 2025

Kritika Walia, Research

Available at: https://works.bepress.com/kritika-walia/195/
According to the global 3D Motion Capture System Market report published by Value Market Research, the market is expected to touch USD 243.6 MN by 2024, with a CAGR of 10% growing from USD 125 MN (by revenue) in 2017. This is a tailored made research report providing informative data and various critical aspects of the market such as market outlook, market share, growth, and trends. Further, the report also offers evidence-based information that helps to transform clients business and achieve their business goals. Moreover, the report also highlights the key strategy of top players. Additionally, this report covers a wide spectrum of services such as the latest technology trend, market opportunity analysis, and competitive landscape.

The report also covers detailed competitive landscape including company profiles of key players operating in the global market. The key players in the 3D motion capture system market include Charnwood Dynamics Ltd (Codamotion), Leyard (Opti Track), Motion Analysis Corporation, Noraxon USA Inc., Notch Interfaces Inc., PhaseSpace Inc., Phoenix Technologies Inc., Qualisys AB, Synertial UK Ltd, Vicon Motion Systems Ltd and Xsens Technologies BV. An in-depth view of the competitive outlook includes future capacities, key mergers & acquisitions, financial overview, partnerships, collaborations, new product launches, new product developments and other developments with information in terms of H.Q.

Market Dynamics

Rising demand of better visual effects and animations from entertainment industry is driving the market growth. Growing demand across various industries for architectural visualization, biomedical study, sports analysis, weapon training and virtual crime scene simulation is further fueling the market growth. Also, ability to provide high quality, rapid, accurate, real time data is boosting its demand across military and healthcare sector. However, specific data processing for specific hardware and software is the major restrain impacting the market growth.

This detailed market study is centered on the data obtained from multiple sources and is analyzed using numerous tools including porter’s five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights of the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of 3d motion capture system.

Market Segmentation

The broad 3D motion capture system market has been sub-grouped into type, application and end-user. The report studies these subsets with respect to the geographical segmentation. The strategists can gain a detailed insight and devise appropriate strategies to target specific market. This detail will lead to a focused approach leading to identification of better opportunities.
By Type

1. Hardware
   - Cameras
   - Sensors
   - Accessories

2. Software

3. Service

By System

1. Optical 3D System
   - Active 3D motion capture system

2. Passive 3D motion capture system

3. Non-Optical 3D System
   - Inertial 3D motion capture system
   - Electromagnetic 3D motion capture system
   - Motorized 3D motion capture system

By Application

- Biomechanical Research And Medical
- Media & Entertainment
- Engineering & Industrial Application
- Education
- Others

Regional Analysis

Furthermore, the report comprises of the geographical segmentation which mainly focuses on current and forecast demand for 3D motion capture system in North America, Europe, Asia Pacific, Latin America, and Middle East & Africa. The report further focuses on demand for individual application segments in all the regions.

About Us:

Value Market Research was established with the vision to ease decision making and empower the strategists by providing them with holistic market information.

We facilitate clients with syndicate research reports and customized research reports on 25+ industries with global as well as regional coverage.
