### How Undergraduate Students’ Perceptions of Academic Librarians Can Inform Innovative Teaching

by Jody Fagan, Hillary Ostermiller, Elizabeth Price, and Lara Sapp

#### About the survey

**Purpose:** To better understand how undergraduate students perceive librarians at James Madison University. Of the 19,549 full-time students enrolled Fall 2017, 513 responded. Survey consisted of 6 open-ended questions and 20 closed-ended questions.

- The duties students think we perform most frequently:
  - Giving general directional help
  - Lending books, films, and equipment to users
  - Helping users to find books
  - When asked if they could tell which workers in JMU Libraries are librarians, 47% said Yes, 30% said No, and 23% said Not Sure
  - 65% said they never ask to speak to a librarian

#### Analysis

**How Often Students Think Academic Librarians Teach**

- Survey included 26 statements beginning “How often do you think academic librarians perform the following duties?”
- The chart shows responses to the 6 statements most related to teaching.
- The duties thought to be most frequent (Giving general directional help) and least frequent (Working in Starbucks) are included for reference.
- Students do know that we teach, and quite a few realize we do other things involved in teaching.

**Who Students Think Librarians Are**

- Terms students used to describe library resources, grouped by students’ disciplines.

**Why Students Ask Librarians for Help**

- Why students ask librarians for help.

**Skills Students Perceive as Valuable to Them or to the University**

- Highlighted skills students perceive as valuable.

**Other Things to Keep in Mind**

- Survey data suggests that students think:
  - You only have a bachelor’s degree.
  - Your education focused on English, Literature, and History classes.
  - You are an expert in citation styles and formatting.
  - Books are central to your work, but you aren’t a total luddite because technology plays a role in the modern library.
  - The Dewey Decimal System is the only classification system.

**Tip:** Consider preparing an elevator speech to help students understand what you do and how you can assist them. See handout for examples.
