Description

An open discussion about the OER movement, which offers materials for all to use freely. Learn how instructors can re-mix, repurpose and redistribute materials while saving students money. We will hear from UMass faculty who have successfully used OERs and touch on issues raised at the 9/21 event "How Can a Textbook be Free: Keeping Higher Education Affordable with Open Resources." Lunch included. RSVP requested to mcharney@library.umass.edu. Drop-ins also welcome.

University OER Event on September 21

Open Educational Resources Event

Open Educational Resources (OER) is a relatively new movement in education; educators and learners as well as learning institutions are driving its development. OER provides an alternative to the rising costs of education. For example, in some countries like South Africa, some educator and learners are tapping into OER as the only source for textbooks. OER provides an opportunity to try new ways of teaching and learning, many of which are more collaborative and participatory.

Some educator are using OER as a way to get students more involved, using the OER process as a way to collaborate with them on content creation. This process brings students into a larger context of learning and sharing knowledge beyond the four walls of their classroom.

Flexibility is a key concept in OER. Materials can be adapted for your specific needs. Because these materials can be searched by a wide variety of criteria, you can quickly find what you specifically need.

Scholarly Communication

Scholarly communication is an umbrella term that describes the many ways in which scholars and researchers share their work:

- Publishing in print and electronic journals
- Archiving their work in digital repositories or on subject-specific websites
- Using email listserv mailing lists and online communities
- Creating new venues for dissemination, especially online

Currently, the field of scholarly communication is undergoing major changes, as open access and copyleft philosophies have begun to impact scholars' attitudes about sharing their work in a major way.

ScholarWorks@UMass Amherst

Did you know that the **UMass Amherst Libraries** provide free services through **ScholarWorks** that can help you create and maintain **peer-reviewed e-journals**, **personal researcher websites**, and recruit and manage **conference materials**?

ScholarWorks@UMass Amherst is a digital repository for the research and scholarly output of members of the University of Massachusetts Amherst community. It is an excellent vehicle for working papers or copies of published articles and conference papers. Presentations, senior theses, and other works not published elsewhere can also be published in ScholarWorks.

Download a copy of the ScholarWorks brochure to find out how ScholarWorks can work for you.

Quick Guide

What are Open Educational Resources (OER)?

Open Educational Resources are educational materials and resources offered freely and openly for anyone to use and under some licenses to re-mix, improve and redistribute.

Open Educational Resources include:

- Learning content: full courses, course material, content modules, learning objects, collections, and journals.
- Tools: software to support the creation, delivery, use and improvement of open learning content including searching and organization of content, content and learning management systems, content development tools, and online learning communities.
- Implementation resources: Intellectual property licenses to promote open publishing of materials, design-principles, and localization of content.

Why OER?

OER is a relatively new movement in education; educators and learners as well as learning institutions are driving its development. OER provides an alternative to the rising costs of education. For example, in some countries like South Africa, some educator and learners are tapping into OER as the only source for
