Preface

During the 16 years I served with the ARRB I worked with many people, introduced many ideas and was stimulated by many of ideas of others. Some of these resulted in printed and published work, and the various documents produced are listed here.

This short document records not only these contributions to the communications, output and intellectual life of this key organisation, but also provides an opportunity for me to recognise once again those with whom I have worked, collaborated and published over this time. All of the documents published during my period at ARRB are referenced here, with the co-authors where applicable.

I take this opportunity to reaffirm my appreciation for their collaboration, participation and assistance. They are, in strictly alphabetical order, as follows:
