Digital Commons Brochure

Richard James, Philadelphia College of Osteopathic Medicine
**Frequently Asked Questions**

**WHY SHOULD I CONTRIBUTE?**
Research indicates that articles are cited earlier and more often if they are available in an open access repository, such as DigitalCommons@PCOM, which serves as a showcase for the College’s intellectual output and is visible to a worldwide audience of potential students and faculty, funding agencies, and colleagues.

**WHAT ABOUT COPYRIGHT?**
Permission to deposit works in an institutional repository is usually specified in your agreement with your publisher. When an author submits a list of publications, we check to verify what can be made available on the Web. If a version of the article can’t be posted, listing the citation and abstract with a link to the full text will present your scholarly work to a worldwide audience.

**WHAT IS SELECTED WORKS?**
Selected Works provides faculty with a customizable professional website to store, manage, and highlight their work. Selected Works pages may include biographical information, areas of expertise, full text publications, honors/awards, grant project information and other professional or research-related materials and information.

**Current Content**

**SCHOLARLY PAPERS** presents intellectual output from PCOM faculty and staff.

**STUDENT DISSERTATIONS, THESES AND PAPERS** provides access to student research, scholarship, and capstone projects in psychology, biomedical sciences and physician assistant studies.

**COLLEGE COLLECTIONS** houses histories, images, and publications including yearbooks and catalogs, oral histories, and archival matter.

**Selected Works**

Administered and updated by library staff, PCOM’s Selected Works offers personalized Web pages for faculty showcasing their professional accomplishments. Content may include published work, as well as other formal or informal media and educational resources.

**Who Can Contribute?**

Faculty, students, staff, alumni, academic and administrative departments, research centers and programs are encouraged to contribute.

**Contribute to the Digital Commons!**

**DigitalCommons@PCOM Mission**

The DigitalCommons@PCOM collects, preserves and disseminates the history of the College, records of College life, and the intellectual output of students, faculty, and staff.

It offers permanent global accessibility to all deposited works.

**Reasons to Participate**

- Make your work more visible on Google and Google Scholar.
- Reach a wide audience through Open Access. Collect all your work in one place.
- Access statistics and receive monthly email reports on views and downloads of your work.
- Present a variety of content: published and unpublished papers, working papers, data sets, abstracts, posters, podcasts and instructional materials.
- Ensure stability: a persistent URL makes it easy to preserve and share your work.
- Enable colleagues to subscribe to your work and receive updates when new content is added. You can also receive alerts from authors and journals you choose.
- Meet National Institutes of Health and National Foundation requirements for access to funded research.

**IN ADDITION, DIGITALCOMMONS@PCOM:**

- Provides open access to digital materials of scholarly, educational, and historical interest.
- Advances scholarly communication by promoting student and faculty scholarship.
- Archives educational materials.
- Provides an electronic publishing platform.
- Showcases events.
- Preserves collections of research documents.
- Houses digitized collections.
- Enhances College prestige by showcasing academic research.

**Getting Started**

Contact the library for support in digitizing materials, researching, copyright questions, and submitting content.
