Emerging Technologies: What's around the corner? And why should we care?

Robert L Nunez, II, *Marquette University*
What's around the corner?

And why should we care?

Rob Nunez
How far have we come?
How far have we come?
What do they all have in common?
Contextual Awareness

- Client environment (location, device, relationship)
- Network conditions (local, remote, public, private)
- Content (type, size, security)
- Site status (performance, location, capacity)
Specialized Search
Data Mashups

Biomedical Sciences

Because the program provides a strong science background, professional management skills, and technical expertise, our graduates consistently score in the top 25th percentile on national certifying exams, and almost without exception, pass the first time they take them. You'll learn from distinguished faculty with diverse backgrounds who actively engage in research and service activities.
