Who’s the Fascist?
Uses of the Nazi Past at the Geert Wilders Trial

Robert A. Kahn

ABSTRACT: This essay looks at how, during his trial, Geert Wilders and his opponents used references to the Nazi era – including but not limited to the Holocaust – to frame debates over Muslim immigration, Wilders himself, and the acceptability of hate speech trials. The Wilders trial is especially interesting because each side sought to call the other a “fascist.” For Wilders, the Quran was a fascist book, an Islamic Mein Kampf. To his opponents, Wilders was a “prototypical” fascist, one who spoke to the gut not the mind. But perhaps the strongest use of the Nazi past involved victims. If a well-established Jewish community faced the Nazis largely without the support of their fellow Dutch citizens and today faces continued anti-Semitism, what should Muslim newcomers expect? On a broader level the multiple references to World War II, fascism, and the Holocaust in the Wilders case show how nearly seventy years after the Allied forces declared victory the Nazi past continues to play a major role in European discourse over hate speech laws.

to control their legacy of extremism should be respected, even if their methods are not ours.² Abraham Foxman, introduction to the Mariner Press edition of Mein Kampf (1999).

In the Netherlands Mein Kampf is outlawed. When it was outlawed, the politically correct leftist and liberal parties applauded it. My point was that for the same reasons and (legal) arguments that Mein Kampf was outlawed in the Netherlands, the Koran could and should be outlawed since both books are full of incitement to violence.

Geert Wilders, email interview with Human Rights Service, Jan. 2010.³

I. THE ANTI-FASCIST CONSENSUS

European hate speech laws rest in part on the idea that Europe’s past – in particular its Nazi past – creates a special situation, one that justifies restrictions on speech that would otherwise be incompatible with a liberal democracy. While this trend is most evident in laws that relate directly to the Nazi past (such as laws banning denial or trivialization of the Holocaust) the issue is broader.⁴ To take one example, there is considerable concern about what will happen in Germany (and Europe) when the Bavarian Finance Ministry loses its copyright over the German

³ I Have No Regrets: An interview with Geert Wilders, Jan. 22, 2010 (available on Wilders’ website (www.geertwilders.nl)).
language rights to *Mein Kampf*.\(^5\) With the copyright set to expire in 2015, the Finance Ministry has blocked an effort by German academics to release an annotated version of the book that would, through its comprehensive footnotes, “break the peculiar myth which surrounds *Mein Kampf*.\(^6\) The Finance Ministry justified its decision as “preventing the distribution of Nazi ideology” and to showing “responsibility and respect for victims of the Holocaust, for whom republication would always represent an affront to… their suffering.”\(^7\)

This is not the position of Abraham Foxman, who despite having some sympathy for the European perspective, was nevertheless willing to write an introduction to the Mariner Press edition of *Mein Kampf* appearing in the United States. Foxman counsels: “Commit the evil to memory in order to reject it; reject the evil, but do not let yourself forget it. *Zakhor* [Remember], and so we keep the Nazi bible in print.”\(^8\) Foxman is able to take this position because of “two centuries of secure borders and political stability.”\(^9\) By contrast, in *Faurisson v. France* the United Nations

9 *Id.*
Human Rights Committee upheld the French Gayssot Law, which makes it illegal to question the existence of the Holocaust, because of its potential to facilitate the spread of Nazism and anti-Semitism, both of which the court saw as continuing concerns in France.\(^{10}\)

The use of the Nazi past to justify European hate speech laws is not a doctrinal necessity. Hate speech laws predated the Holocaust and there are other ways of rationalizing them – including as offshoots of an earlier European tradition of using law to protect one’s honor.\(^{11}\) In fact, one can adopt bright line rules – the clear and present danger test, the gravity of the evil test – that, in theory at least are indifferent to the type of “danger” or “evil” on offer.\(^{12}\) For example, the Amsterdam trial court, in acquitting Geert Wilders of comparing the Quran to Mein Kampf and calling Islam a “fascist” religion, relied on the general principle that hate speech

---

\(^{12}\) For a brief overview of these doctrines, see HARRY KALVEN JR. A WORTHY TRADITION: FREEDOM OF SPEECH IN AMERICA, at 179-89; 195-99 (1988). For an example of this categorical approach to speech in action consider Flemming Rose, culture page editor of the *Jyllands Posten*, who played a major role in the publication of the Danish cartoons. Speaking in Jerusalem after the controversy, Flemming – who has become something of a free speech advocate – asked Israel to end its ban of Mein Kampf. See Robert A. Kahn, *Flemming Rose, the Danish Cartoon Controversy and the New European Freedom of Speech*, 40 CAL. W. INT’L L. J. 253, 258-65 (2010).
and group defamation charges cannot rest on insults directed at ideas or objects of religious veneration.\(^\text{13}\) So, clearly, there are other ways of defending (or critiquing) European hate speech laws besides focusing their responsiveness to the Nazi past.\(^\text{14}\)

Yet references to the Nazi past loomed large at the Geert Wilders trial. While this owes something to Wilders’ explicit comparison of the Quran and \textit{Mein Kampf}, it also reflects societies - the Netherlands and, more generally, Europe - that still view themselves through the prism of the Second World War. Thus Wilders was eager to portray himself as a participant in “the good fight” against Nazism.\(^\text{15}\) On the other side, opponents called Wilders a fascist\(^\text{16}\) and argued that Dutch Muslims were in the same situation as Dutch Jews before the Holocaust.\(^\text{17}\) These references, paradoxically, occurred in a country where anti-

\(^{13}\) Amsterdam District Court, Verdict (Jun. 23, 2011)(public prosecution number 12,425046-09) at sec. 4.3.2. [Hereinafter “Wilders Verdict”] (“Since the suspect addresses religion and not the people (Muslims) with these utterances it cannot be proven beyond a reasonable doubt that he incites to hatred against and/or discrimination with these utterances, as was charged against him”). For a brief overview of how Wilders’ acquittal was seen in Dutch society, see Robert A. Kahn, \textit{The Acquittal of Geert Wilders and Dutch Political Culture}, University of St. Thomas Legal Studies Research Paper No. 11-31 (posted on SSRN Nov. 8, 2011).

\(^{16}\) See infra notes 72-105 and accompanying text.

\(^{17}\) See infra notes 106-16 and accompanying text
Semitism remains prevalent in both the native Dutch and immigrant communities.18

Before proceeding, let me offer a caveat. I am not saying references to the Nazi past references drove the outcome of the trial – Wilders was acquitted and the Mein Kampf / Quran comparison was not the only charge Wilders faced.19 But the competing claims about Nazism and victimhood provide a way to frame the trial, one the participants seemed to care about a great deal. Was Geert Wilders a Nazi in training or were Muslim followers of the Quran the true Nazis? And were Dutch Muslims like Jews before the Holocaust, or was Israel continuing “the good war” the Western Allies waged against Hitler?

The rest of this essay explores these questions in greater depth. Part II looks at the extent to which Wilders fits the model of the typical hate speech defendant. While opponents tried to pin the “fascist” label on him, Wilders’ opposition to anti-Semitism (among Europeans as well as Muslims) complicates this effort. To put Wilders’ opposition to anti-Semitism in context, Part III looks at the complex role Jews play in Dutch society – a role that far

18 See infra 33-51 notes in accompanying text.
19 Wilders was also prosecuted for saying in an interview that if elected he would “close the borders, [and allow] no more Islamics in the Netherlands.” Wilders Verdict (describing comment 11). Other comments targeted immigrants and Moroccans. For example, comment 7 describes Moroccan boys as “violent,” while comment 8 talks about the Netherlands facing a “tsunami” of foreign cultures. Id. For a list in English of the charges against Wilders, see Summons of the Accused, District Court Office of the Public Prosecutor, dated Jan. 20, 2010 [hereinafter “Wilders’ Summons”].
outstrips the numerical importance of the small Dutch Jewish community.

Part IV looks at how Wilders, when discussing Islam, often makes references to the Second World War. In particular, he often represents himself as fighting the same struggle as the victorious Western Allied armies, especially the Americans. At times he also compares Muslims (and their leftist allies) to the defeated Nazi German forces.

The next two sections turn the tables and look at how his opponents describe Wilders. Part V looks at efforts by opponents who tried to label Wilders a fascist because of his blunt rhetorical style and his attacks on the left and Islam. Part VI then turns to an indirect argument. It does not necessarily matter if Wilders is a fascist if it turns out that his victims – the Muslims – are like Jews before the Holocaust.

Finally, the Conclusion looks at the implication of the Wilders trial for the anti-fascist consensus that helps uphold European hate speech laws. With the passage of time, it is tempting to suggest that the time for Europe’s hate speech laws has come and gone.20 The Wilders trial, however, points in a different direction – nearly seventy years after the end of World War II, European still find the Nazi past relevant.

II. GEERT WILDERS: A TYPICAL HATE SPEECH DEFENDANT?

Geert Wilders, leader of the anti-immigrant Party for Political Freedom (Partij voor de Vrijheid - PVV), faced hate speech charges for comments targeting Muslims and Islam.\(^{21}\) While many of these comments did directly invoke the Nazi era – as, for example, when Wilders said “walk in the street and see where this ends” and “a conflict is going on and we have to defend ourselves”\(^{22}\) – other counts were different. For example, in a 2007 article that ran in De Volkskrant, a center-left Amsterdam-based paper, Wilders called for a ban of the Quran, which he called a “fascist” book and an “Islamic Mein Kampf.”\(^{23}\) In his film Fitna, Wilders shows video clips in which Muslims are saying “God Bless Hitler” and “be prepared for the real Holocaust.”\(^{24}\)

Wilders’ comments, and the decision to prosecute them, raise an interesting question – who was the real fascist? Was it Wilders who, as the leader of a right-wing anti-immigrant party was often seen as following in the footsteps of Jean-Marie Le Pen

---

\(^{21}\) For an overview of the Wilders trial and how the acquittal was received in Dutch society, see Kahn, The Acquittal of Geert Wilders, supra note 13, at 2-4.

\(^{22}\) Wilders Verdict, sec. 4.3.2. at 14. The court found that these comments reached “the border of what is accepted pursuant to criminal law[.]” Id.

and Jorg Haider, to say nothing of the “original Nazis?” This was certainly how Henk Bovekerk saw it. Bovekerk was a college student who received a “10” (the highest score possible) for an undergraduate thesis concluding that Wilders was a “fascist” and the PVV a “fascist” party. Nor was he alone. Job Cohen, former Amsterdam mayor (2001-10) and current leader of the Dutch Labor Party (Partij van de Arbeid – PvdA) has compared the situation of Dutch Muslims to Jews in the 1930s, a comparison that carries weight given that two of Cohen’s grandparents died in the Holocaust.

At the same time, however, Wilders uses anti-fascist rhetoric against his Islamic foes. In explaining why the Quran, like Mein Kampf, should be banned Wilders says that the former “should never, absolutely never, be used as a source of inspiration

25 In France, Jean Marie Le Pen’s anti-immigrant National Front party rose to prominence in the 1980s. Since then Le Pen has repeatedly “let the mask drop” by referring to the Holocaust as “a point of detail in history” and noting that the name of a center-right Jewish minister rhymed with crematoria. See Jonathan Marcus, THE NATIONAL FRONT AND FRENCH POLITICS: THE RESISTIBLE RISE OF JEAN-MARIE LE PEN, 125-29 (1995). Likewise, in Austria Jorg Haider, who rose to prominence in the 1980s as the head of the Freedom Party, commented that the Third Reich had “an orderly employment policy” and that the Nazi SS should be honored. See Profile: Controversy and Joerg Haider, BBC NEWS, Feb. 29, 2000. For more on Haider, see Ruth Wodak and Anton Pelinka eds., THE HAIDER PHENOMENON IN AUSTRIA (2002).

or an excuse for violence” – a message on one level quite similar to the Bavarian Finance Ministries’ justification of its ban on Mein Kampf. In his email interview with Human Rights Service, Wilders made the same argument: “both books are full of incitement and violence.”

While one can argue that the very act of comparing between the Quran and Mein Kampf has Nazi overtones, Wilders’ framing of non-violence makes it harder to place him with right-wing extremists who see violence as acceptable and Mein Kampf as a source of inspiration.

But Wilders goes further. In a September 2011 speech in Berlin he said that Germany needed a right-wing party “not tainted with ties to neo-Nazis and by anti-Semitism,” adding a little later that the cause of the war was not Germany, but “national-socialism.” In January 2012 he supported the unsuccessful call on the Dutch government to issue a formal apology for its “passivity”

29 Wilders, I have No Regrets.
30 See Liz Fekete, The Muslim conspiracy theory and the Oslo massacre, 53 RACE & CLASS 30, 36 (2011)(comparing Fitna to Joseph Goebbels’ film The Eternal Jew in the way both send “subliminal messages” about the Other “through the juxtaposition of images”).
31 Compare Wilders to Anders Breivik, who killed seventy-seven people in Norway to defend against a Muslim conspiracy. Breivik cited Geert Wilders 30 times in a manifesto justifying the killings. Id. at 32. Wilders took great pains to disassociate himself from Breivik after the event, stating that “we must never use violence” and that “Islam can be successfully fought by democratic means.” Geert Wilders, Berlin Speech September 3, 2011(English version)(available at www.geertwilders.nl). This, however, did not upset Breivik who saw Wilders’ comments as “expected” and motivated primarily by Wilders’ need, as a politician, to protect his reputation. See Fekete, The Muslim Conspiracy Theory, supra note 30, at 32.
32 Wilders, Berlin Speech.
during the Holocaust. These statements would appear to separate Wilders from the kind of person the hate speech laws are supposed to protect against.

III. THE SYMBOLIC ROLE OF JEWS AND THE HOLOCAUST IN DUTCH SOCIETY

This brings us to the interesting role Jews and Israel play in Wilders’ discourse. One of the strange effects of the Holocaust has been to make the symbolic role of the Jews in postwar European societies increase, even as the absolute numbers decline. Protecting against anti-Semitism is a major reason for hate speech laws. For example, in 1979 the German Federal Supreme Court, in ruling that a Holocaust denial case could be brought under Germany’s laws against insult, held that the defendant’s estimate that only 2,000,000 Jews were killed in the Holocaust was a “direct attack” on the “self-conception” of Jews living in Germany. The well-

---

33 The issue came to a head in January 2012. One of the charges involved the failure of Queen Wilhelmina or the Dutch government in exile to speak out about the Holocaust. According to Els Borst, former deputy minister and member of the left-liberal D’66 party, the Queen “hardly concerned herself with the persecution of the Jews” and the prime minister did not believe the Jews were “real Dutchmen.” Will Holland Finally Apologize for Passivity in the Holocaust, Arutz Sheva (Israel National News), Jan. 5, 2012 (available at www.israelnationalnews.com). According to the Dutch News, Wilders was “scathing” in his remarks about the passivity of Queen Wilhelmina’s government. Dutch State, Sorry we’re not apologizing, DutchNews.nl. Jan. 11, 2012.

being of German Jews, in turn, helped reassure Germans they were following their moral obligations arising out of the Holocaust.\textsuperscript{35}

The same situation existed in the Netherlands where the large number of Jews who perished (74\% of the prewar Jewish population, the highest percentage in Western Europe),\textsuperscript{36} the use of the Dutch civil service to prepare lists of Jews to deport\textsuperscript{37} and the willingness of many Dutch to “accommodate” the Nazi occupier led, by the 1960s and 70s to considerable feelings of guilt.\textsuperscript{38} At the same time, however, a large minority of Dutch (31\%) think Jews talk too much about the Holocaust, and a majority (53\%) would find a Jewish prime minister unacceptable (even though Job Cohen was the Labor Party candidate for prime minister in 2003).\textsuperscript{39} To quote Manfred Gerstenfeld, a Holocaust survivor who grew up in the Netherlands, went into hiding, and is now one of the driving forces behind request for an official apology: “Dead Jews and their

\textsuperscript{38} For a good overview of the Holocaust in the Netherlands, see MOORE, VICTIMS AND SURVIVORS. For a discussion of the playing out of the Holocaust in postwar Dutch society see F.C. Brasz, \textit{After the Second World War from “Jewish Church” to Cultural Minority}, 336-91, in J.C.H. BLOM, R.G. FUKS-MANSELD AND I SCHÖFFER, THE HISTORY OF THE JEWS IN THE NETHERLANDS (English translation 2002), at 385-91 (describing the extent of guilt feelings). According to Brasz, sentiments about the registration led many to sabotage the 1971 Dutch census after which further censuses were discontinued. \textit{Id.} at 387.
\textsuperscript{39} Manfred Gerstenfeld, \textit{Symbolic and Other Roles of Jews in Dutch Society}, 20 JEWISH POL. STUD. REV. 3-4 (2008)
past indeed often play a more important role in the Netherlands than the living.”

There have also been incidents of anti-Semitism. The newspaper Trouw last year left an anonymous comment on its website blaming Jews for the rise of Hitler. Another set of anti-Semitic incidents involve young immigrants, especially Moroccans – some of which have led to violence against “visible” Jews, i.e. those wearing religious clothing. Finally there are a number of Holocaust related anti-Semitic slogans used by soccer fans. These are directed at fans of the Ajax Amsterdam soccer team, who refer to themselves as “the Jews.” These slogans have been picked up and embellished by Moroccan and Turkish rappers, who also use “the Jew” as a symbol of “hegemonic Dutch society.”

40 Id. A similar logic led the Anne Frank House Museum to refuse a screening of an award winning film about Anne Frank’s time in the concentration camps. The Museum director based her objection on the following argument (according to the director of the film): “Anne Frank is a symbol. Symbols should not be shown dying in a concentration camp.” Id.
42 See Manfred Gerstenfeld, Anti-Semitism and Hypocrisy in Dutch Society, supra note 36, at 5-6.
43 One of the main chants goes “Hamas, Hamas, Jews to the Gas.” Wim Dohrenbusch, Anti-Semitic incidents spark public debate in Netherlands, DeutscheWelle, Apr. 23, 2011.
44 Consequently, many of the fans and players who use the chant deny its anti-Semitic content. For example, Lex Immers, a midfielder for the ADO Den Haag team who was banned for five games for using the chant, explained that “he didn’t mean it the way they think,” explaining “the Jews” is a nickname for Ajax Amsterdam. Id. The problem of offensive slogans is not limited to the Netherlands or the postwar context. See Sarah Lyall, Taking on Derogatory Violence, One Derogatory Chant at a Time, NEW YORK TIMES, Jan. 27, 2012 (describing Scottish football slogans that refer back to seventeenth century events).
45 See Remco Ensel, The Sound of Anti-Semitism in Dutch Society. (Paper presented at Conference on Ethnic Relations, Racism and Anti-Semitism and Queen’s University Belfast, Sept. 2010) at 8. On the other hand, some rappers
There have been a variety of responses to the upsurge in anti-Semitism. On the one hand, the government has used “decoy Jews” to catch potential wrong-doers. Others have been less supportive. For instance, Fritz Bolkestein, notable for his 1991 call from a public critique of multiculturalism, has now called on “sensible Jews” to consider emigrating to Israel or the United States because “they have no future in the Netherlands.”

Perhaps unsurprisingly, Wilders takes issue with Bolkestein. It is not the Jews, but violent Muslims, who should leave the Netherlands. Protection of Jews is a theme of his speeches, especially those given in the United States. In Nashville, Tennessee, Wilders spoke about how “Jews are no longer safe on our streets. In Amsterdam, the city of Anne Frank.” At the Four Seasons Hotel in New York, just after he learned he would stand trial for hate speech, Wilders complained of a Dutch “elite” that had “lost its decency” by financing or participating in demonstrations where “settlers” shout “Death to the Jews.”

have rejected anti-Semitic appeals. According to Ali. B, a well-known rapper: “The Prophet Muhammad, by the way, has reproved of what these tough youngsters do. When you believe in Allah, you would never shout about ‘cancerous Jews.’”

Aliyah Shahid, An unorthodox approach: Dutch use decoy Jews to stop crime and anti-Semitic attacks in Amsterdam, DAILY NEWS, Jun. 23, 2010. The program, which has been successful, was the suggestion of a Moroccan born member of parliament. Id.

Dohrenbusch, Anti-Semitic incidents spark public debate, supra note 43.

“Seventy years after Auschwitz,” he continued “they know of no shame.”

Paul Sars, Dean of the Humanities Faculty at the University of Nijmegen, was also outraged at Bolkestein’s remarks but questioned Wilders’ motives: “He is against Islam...By taking this stance he can say he...is pro-Israel and against...everything that’s alien to the Netherlands.” But Wilders’ stance gets him something else as well. By opposing Bolkestein, who was once his mentor, Wilders reinforces his image as a defender of Dutch Jews – not just against Muslims but also against Dutch anti-Semitism and passivity. This reinforces his world view in which Dutch elites are unable to solve the nation’s problems be they Nazi occupation or Islamic immigration. This, as well, makes Wilders an atypical hate speech defendant.

IV. FIGHTING IN “THE GOOD WAR”

There is a second way Wilders uses the past to build sympathy for his position. He often makes references to the Western Allies during Second World War, especially to the

51 Id.
52 Dohrenbusch, Anti-Semitic incidents spark public debate, supra note 43.
Americans. In this way, he shows himself as fighting alongside the Americans in a “the good war” against Hitler and the Nazis.  

Some of the references relate to Israel, where Wilders lived for two years as a teenager. On a grand historical level, these comparisons are not hard to follow. To the extent one views Islam as the next totalitarian movement, and Israel as a “frontline” state, it is not hard to see the Israelis fighting to protect “the West” from Islamic encroachment. But Wilders’ references to the Second World War are much more specific. For example, at an October 2009 speech at Columbia University, he compared young men and women defending Israel to “those brave American soldiers who landed in Sicily in 1943 and stormed the Normandy beaches in 1944[.]”

Nor is this an isolated instance. Speaking again in New York City, this time on the ninth anniversary of 9/11 Wilders

55 For example, Tom A. Trento, founder of “The United West” has issued a call to “Stand with Israel” to “Protect Freedom and Democracy…In America, In Israel, and throughout Western Civilization.” Trento, STAND WITH ISRAEL, May 23, 2011 (blog post)(available at www.theunitedwest.org). The group was formed by national security professionals “to change the ground game on how America protects liberty and freedom…from Shariah Islam.” Id.

invoked the words of Ronald Reagan forty years after the D-Day landings: “We will always remember. We will always be proud. We will always be prepared, so that we may always be free.”

Speaking to a Nashville, Tennessee audience in May 2011, Wilders noted that “[m]any American soldiers, including many young Tennesseans, played a decisive role in the liberation of the Netherlands from Nazi tyranny” and, speaking on behalf of the Dutch people, expressed thanks.

Now one might be tempted to dismiss these references as an attempt to please American audiences or, in the Nashville speech, as simple politeness. This is harder to do with Wilders’ remarks at the Four Seasons Hotel in 2009, in which he made an extended comparison between American forces during the Battle of the Bulge and the fight against Islam. It is worth quoting Wilders at length:

Late December 1944 the American army was suddenly faced with a last-ditch effort by the Germans in the Ardennes, in the Battle of the Bulge. Hitler and his national socialists-fought for their last chance. And they were very successful. Americans faced defeat and death.

In the darkest of winter, in the freezing cold, in a lonely forest with snow and ice as even fiercer enemies than the Nazi war machine itself, the American army was told to surrender. That might be their only chance to survive. But General

58 Geert Wilders, A Warning to America –Speech at Cornerstone Church, Nashville, Tennessee, May 12, 2011.
McAuliffe thought otherwise. He gave the Germans a short message. This message contained just four letters. Four letters only, but never in the history or freedom was a desire for liberty and perseverance in the face of evil expressed more eloquently than in that message: it spelled N-U-T-S “Nuts.”

My friends, the national-socialists got the message. Because it left no room for interpretation.

I suggest we walk in the tradition of giants like General McAuliffe and the American soldiers who fought and died for the freedom of my country and for a secular and democratic Europe, and we will tell the enemies of freedom just that: NUTS! Because that’s all there is to it. No explanations. No beating around the bush. No caveats.

Our enemies should know: we will never apologize for being free men, we will never bow for the combined forces of Mecca and the left. We will never surrender.\(^{59}\)

The passage is noteworthy for several reasons. For one thing, the wealth of detail about a World War II battle given in a speech about Islam is impressive.\(^{60}\) Furthermore, Wilders knows how to exaggerate to tell a good story. While the 1944 Ardennes offensive has been called Hitler’s last chance, and the 101\(^{st}\) Airborne division was surrounded at Bastogne, it was only that unit, and not the entire American army, that was faced with “defeat.

\(^{60}\) Wilders’ self-identification with the victorious American forces also distinguishes him from other far-right supporters of Israel. For example, Filip Dewinter, head of the Vlaams Belang party in Belgium, combines his support of Israel with visits to the graves of Nazi soldiers and the use of the SS oath to open a 2001 speech. *See, e.g.*, Robert Mackey, *Support for Israel’s Settlements from Europe’s Right*, NEW YORK TIMES, Dec. 22, 2010 (blog post).
and death." He also picked a battle that has played a major role in American popular culture, as films like *Battle of the Bulge* (1965) and *Patton* (1970) attest. Not only that, in choosing to focus on General McAuliffe’s rejection of the German surrender offer, Wilders selected an iconic memory from the Second World War.

The way Wilders lionizes General McAuliffe helps to distinguish Wilders from traditional figures of the extreme right who seek to rehabilitate Hitler and the Nazis. This, in turn, makes it harder to cast him as a typical hate speech defendant. In addition, Wilders used the brevity of McAuliffe’s response – “Nuts!” – to undercut his cultural relativist foes who seek “explanations” and “caveats” when it comes to responding to the Islamic threat. Like McAuliffe, Wilders is a man of action. Finally, the passage directly links the German forces in the Ardennes to “Mecca” and “the left.” In taking this step, Wilders goes beyond his earlier passages, in

---

62 Miles in her review referred to McAuliffe’s response as “now famous.” *Id.*
64 Apparently, when McAuliffe originally received the surrender order, he told a fellow soldier “aw, us surrender, nuts.” After a while, he realized some response was necessary at which point the soldier suggested McAuliffe use his original response. *See “NUTS!” Revisited; An Interview with Lt. General Harry W. O. Kinnard,* (blog post)(available at www.thedropzone.org).
which he identifies himself as the victorious Allies, and now compares his foes to the vanquished National Socialists.

A final reference to “the good war” concerns one specific way Wilders justifies the Quran with Mein Kampf. He notes that Winston Churchill, who in the 1930s advocated standing up to Hitler, made the same comparison. For example, in his 2009 Columbia University speech, Wilders said that “the great Winston Churchill was fully right when he, in his book the Second World War, called Adolf Hitler’s Mein Kampf the new Koran of faith and war.”

To be sure, Wilder’s invocation of Churchill is subject to question. Churchill was referring to the Quran to call attention to Mein Kampf. Wilders is using a different understanding of Mein Kampf – one shaped by the Holocaust – to tarnish the Quran. Furthermore, Churchill – like Wilders – has very little to say about the comparison itself, aside from noting the “turgid, verbose [and] shapeless” nature of the prose in each book. This suggests a

---

67 See WINSTON CHURCHILL, THE SECOND WORLD WAR, VOLUME I: THE GATHERING STORM, at 50 (1948). In a page long description of Mein Kampf, the only reference to the Quran is in the “faith and war” sentence. Id.
68 Churchill does have other negative comments about Muslims, which Wilders has used in other places. For example, in a speech entitled, “My message to Muslims,” explaining how he became anti-Islam, Wilders quoted Churchill’s description of the “fearful fatalistic apathy” of Muslims and his (Churchill’s) conclusion about the Quran that “No stronger retrograde force exists in the world.” Geert Wilders, My Message to Muslims, Jul. 19, 2010 (available at www.geertwilders.nl). The Churchill reference appears to be from THE RIVER WAR, Vol. II. 247 (1899). The book describes the British campaign against the Madhist revolution in the Sudan.
69 CHURCHILL, THE GATHERING STORM, at 50.
larger problem the Quran / Mein Kampf comparison (and with the use of the term “Islamofascism” more generally): it is hard to compare “an 800 page monologue exposing Hitler’s insane worldview” to the founding text of a major religion.\footnote{The comment comes from Wolfgang Benz, director of the Center for Antisemitism Research at the Technical University of Berlin, who was arguing against releasing a version of Mein Kampf with commentary. Smith, Should Germany ban Mein Kampf?, supra note 5.}

On the other hand, just as Churchill was an early opponent of Hitler, Wilders can cast himself as an early opponent of Islam. This fits well with Wilders’ references to the Normandy beaches, the Battle of the Bulge, his support for Israel, and his call for the Dutch to re-examine their passivity during the Holocaust. Each of these references associates Wilders with the “good guys” in World War II. This positioning, in turn, not only makes it easier lump Islam and national-socialism together, it makes it harder for Wilders’ political opponents to cast him as a right-wing extremist in the mold of Jean-Marie Le Pen or Jorg Haider.\footnote{For a criticism of Islamofascism along these lines, see Gabrielle Marranci, A Wolf in Sheep’s Clothing: the neologism ’Islamofascism,’ 8-13 in S. Sayyid and Abdoolkarim Vakil ed. THINKING THRU’ ISLAMOPHOBIA, Centre for Ethnicity and Racism Studies (2008). Marranci, an Italian anthropologist, argues that fascism – unlike radical Islam – is characterized by “a nationalist movement based on the strong leadership of a Dux” and a “an autarkic and protectionist view of the economy and is very suspicious of any form of religion[.].” Id. at 9. She does, however, find an element of pre-fascist rhetoric in the tendency of neo-conservative proponents of the Islamofascism concept to speak of “Civilization,” “intellectual enemies” and “real Truths.” Id. at 10.}

\footnote{One interesting aspect of Wilders’ speeches about Islam is the absence of references to Soviet Communism, a comparison often made by proponents of the Islam = fascism position. For example, Andrew Bostom in a 2010 blog post about Wilders invokes a 1954 article from Bernard Lewis which spoke of the similarities between Islam and Soviet-style totalitarianism. See Andrew Bostom, Geert Wilders, Bernard Lewis, Free Speech and Totalitarian Islam, Oct. 17, 2010 (blog post)(available at www.andrewbostom.org). This also distinguishes}
V. PERHAPS WILDERS IS A FASCIST AFTER ALL

And yet they do. As we have seen, Henk Bovekerk, a Dutch college student, received a “10” for a thesis stating that Wilders is a fascist. He is not alone. Bovekerk’s thesis relies heavily on a pamphlet titled, The Eternal Return of Fascism, a pamphlet Dutch philosopher Rob Riemen wrote and distributed to all members of the Dutch parliament in 2010. Riemen writes:

What you clearly see with Wilders is the cultivation of feelings of unease and fear in society. Societal unease is blamed on a single scapegoat: Muslims. He is also an authoritarian, charismatic leader who has little time for democracy. As with the fascists of the 1930s, the Freedom Party is more a movement than a party and Wilders avoids all debate with his opponents outside of parliament.

In response historian and former MP for the center-right Party for Freedom and Democracy (Partij voor Vrijheid en Demokratie – VVD) Arend-Jan Boekestijn called the comparison a “conversation killer” noting that it would “cast doubts on the motives of the one

Wilders from Flemming Rose, who in describing his views about Muslims draws on his experiences as a journalist in the Soviet Union. See Kahn, supra note 12, at 258-60. The difference here may relate to the historical experiences of the Netherlands and Denmark. While Denmark was a frontline state during the Cold War, the Netherlands was somewhat insulated from Cold War tensions. Conversely, the Nazi occupation was much harsher in the Netherlands than in Denmark.

Bovekerk, Prototypical Fascism in Contemporary Dutch Politics, supra note 26 at, at 5-6. For more on Riemen, see Wilders is a fascist, Radio Netherlands Worldwide, Nov. 8, 2010 (available at www.rnw.nl). Riemen is founder of the Nexus Institute which has invited speakers such as Jurgen Habermas and Francis Fukuyama.

Id. (quoting Riemen).
and a half million Wilders voters.” He added that “[f]ascism is a serious accusation” which involves “glorification of violence, political dictatorship, and – in the German variety – racism.”

Boekestijn does a great job of highlighting the stakes of an accusation of fascism. A fascist supports violence, is a potential dictator, and supports “German” racism. Wilders, who sides with the Americans in the Battle of the Bulge, opposes the Quran for its violence and opposes Dutch passivity during the Nazi occupation seems fairly insulated from this charge. And yet the charge persists.

The question is why. To explore this, a look at recent Dutch history is helpful. In 1995 Hans Janmaat was tried, and convicted of hate speech charges. His offense was to say “we shall abolish the multicultural society as soon as we get a chance and get in power.” A 2008 op-ed piece running in the NRC, looking back on the Janmaat trial from the perspective of Wilders, called Janmaat’s comments “almost polite” and said that the prosecution was now seen as unwarranted. Yet the same author also pointed out that

---

75 Id. (quoting Boekestijn).
76 Id.
77 There are other arguments about Wilders’ potential fascism that do not involve World War II. For example, a writer from a socialist perspective argued against the comparison given the PVV’s lack of a “street presence” – a key part of earlier fascist movements. See Marina Van der Zwan, *Geert Wilders and the rise of the new radical right*, INTERNATIONAL SOCIALISM, Issue 131 (Jun, 28, 2011)(available at www.isj.org.uk).
79 Folkert Jensma, *Freedom of expression or freedom to insult*, NRC, Mar. 27, 2008 (available at ww.nrc.nl).
Janmaat was “an extreme right wing member of parliament with an anti-immigrant message”\textsuperscript{80} – qualities that before the rise of Pym Fortuyn and Geert Wilders were outside the anti-fascist consensus.

A brief description of Janmaat and his Centre Democrat party may explain why. In addition to imposing curbs on immigration, Janmaat sought to restrict cabinet positions to Dutch nationals, a category that excluded Jews.\textsuperscript{81} This led to a perception that the Centre Democrats were a rightwing extremist party and led to a variety of actions being taken against them, including a concerted effort by mainstream parties to prevent the Centre Democrats from achieving parliamentary representation.\textsuperscript{82} This was not unusual – the electoral successes of right-wing extremists, such as Jean-Marie Le Pen and Jorg Haider met with a similar response.\textsuperscript{83} In a Europe traumatized by the Second World War, Nazi occupation and the Holocaust, there was great effort placed on avoiding the type of elite compromise scholars like Robert O. Paxton saw as easing Hitler’s path to power.\textsuperscript{84} As a result

\textsuperscript{80} Id.

\textsuperscript{82} Hans Janmaat (1934-2002), Historiek.net, Jan. 17, 2008.

\textsuperscript{84} Bovekerk, who relies heavily on ROBERT O. PAXTON’S THE ANATOMY OF FASCISM (2004), makes this argument. See Prototypical Fascism in Contemporary Dutch Politics, supra note 26, at 25 (citing PAXTON, THE ANATOMY OF FASCISM at 96-97). Whether this argument is historically accurate – there are many competing explanations for Hitler’s rise to power (Versailles,
politicians in Europe (and the Netherlands) were suspicious of parties that appear to follow in Hitler’s footsteps.

While Janmaat seemed to fall in this category, applying this label to Wilders poses a much greater challenge. And yet a number of people made just that argument. For example, Jérôme Jamin, who studies politics and philosophy at the University of Liege, described Wilders as part of a “new” right-wing extremism in which racist appeals play a more covert role.\(^{85}\) This new images is well suited to a country like the Netherlands, which views itself as “open” and “tolerant.”\(^{86}\) But any change on Wilders’ part, says Jamin, is superficial – while the words and faces have changed, the need to identify an “other” as an enemy has not.\(^{87}\)

The desire to unmask Wilders as a “fascist” can lead to interesting results. For example, Boverkerk describes one of the qualifying aspects of fascism as an emphasis on “the gut rather than the brain” and idea he takes from Paxton’s *The Anatomy of Fascism*.\(^{88}\) To show that Wilders satisfies this standard, Boverkerk relates how a journalist who infiltrated Wilders’ media operation was told not “to go too deep into the material” and not to discuss “nuance” with “outsiders” lest “[e]verybody…fall asleep” starting

---

86 Id. at 43.
87 Id. at 45.
with journalists.\textsuperscript{89} Another article, while not directly calling Wilders a fascist, noted his tendency to use short, direct sentences that lack clauses that attribute meaning away from the author of the sentence.\textsuperscript{90}

Bovekerk has other arguments, however, that carry more weight – even if some of them apply better to Wilders’ supporters than to Wilders himself. For example, he argues that fascist leaders and parties have a tendency to “discredit” the left, the way Fascist parties did during the interwar years.\textsuperscript{91} In making the argument with regard to the PVV, Bovekerk relies on \textit{De Schijn-Elite van de Valse Munters} [The Fake Elite of Counterfeiters] a book written by Martin Bosma, a PVV member who argues that the real lesson of the Second World War was not the racism, authority or hostility of the Nazi state. Rather, it was, to use Bovekerk’s summary, that “[e]conomically Hitler was a socialist and therefore a Left-winger.”\textsuperscript{92} Bovekerk also quotes J.J. De Ruiter who describes Bosma’s world view in similar words: “The current Left is the heir of Hitler and his band, and of the guilt of many of the deaths of

\textsuperscript{89} \textit{Id.} at 49.
\textsuperscript{91} Bovekerk, Prototypical Fascism in Contemporary Dutch Politics, \textit{supra} note 26, at 41.
\textsuperscript{92} \textit{Id.} at 47.
World War II.”93 Rob Riemen noted a similar trend in a PVV party document that said: “On May 4, we commemorate the victims of (National) socialism[.]”94

While none of these comments are attributable to Wilders, he speaks of the “combined forces of Mecca and the left” as enemies in his Four Seasons speech where he took up the Battle of the Bulge. Moreover, the Hitler = Socialist formula takes on a revisionist, neo-Nazi cast to the extent it shifts responsibility for Hitler’s crimes away from the National Socialists.95 This may be one reason why, despite his support for Israel, Dutch Jewry and an apology for Dutch passivity during the Holocaust, Wilders anti-fascist bona fides are still suspect.96

Bovekerk’s final argument is that fascists have an “us vs. them” view of the world.97 According to Bovekerk, Wilders distinguishes between “good, tolerant and democratic Holland”

---

93 Id. at 46 (quoting De Ruiter).
94 Id. at 12 (quoting THE ETERNAL RETURN OF FASCISM at 45).
95 In this regard, Bosma’s arguments bear some resemblance to efforts the far right to deny the Holocaust, restrict Hitler’s involvement in it, in order to undermine any “taboo” on anti-Semitism the Holocaust may have created.
96 The clash between the competing images of Wilders – participant in the Good War against Nazi Germany or potential fascist – came to a head following a visit by Wilders to Monschau, Germany a town on the northern shoulder of the Battle of the Bulge. The mayor, citing Wilders’ right-wing populism, asked that he not return. Wilders niet meer welkom in Monschau, DE TELEGRAAF, Mar 16, 2010. In response, Diana West wrote a letter to the mayor saying that her father visited the town in 1944 as part of the 102nd Cavalry Reconnaissance Squadron where, like Wilders today, he fought to preserve liberty against “supremacist totalitarianism.” Letter from Diana West to Margareta Ritter, Mayor of Monschau, Mar. 16, 2010 (available on www.geertwilders.nl).
97 Bovekerk, Prototypical Fascism and Contemporary Dutch Politics, supra note 26, at 31.
and “bad, intolerant and undemocratic Islam.” To that end, Wilders favors preventative detention of Muslims who threaten the state, closing the border to “non-western immigrants (Turks and Moroccans)” for five years, a ban on the construction of mosques, and a replacement of the ban in the Dutch constitution on religious discrimination with a statement that “Christian/Jewish/humanistic culture should remain dominant in the Netherlands.” According to Bovekerk, these “exclusionary policies toward the ‘alien and impure’” show how the PVV, “driven by nationalism and racism, divides the world along Manichean lines.” This characteristic, along with Wilders’ discrediting of the left and his penchant for speaking to the gut, qualifies Wilders as a prototypical fascist.

But hidden in Bovekerk’s language there is a caveat. By “prototypical,” Bovekerk means “early stage.” In fact, in defending his thesis that Wilders is a “fascist” he is careful to explain that one should not expect him to act like Mussolini or Hitler, this only comes much later, if at all. It also turns out that, for Bovekerk at least, “Fascism exists at the level of Stage One [i.e. prototypical Fascism] within all democratic countries” – a concession that weakens his conclusion. What is more, there are

101 Id. at 59.
102 Id. at 26.
103 Id. at 19.
104 Id. at 27.
other, rather critical ways of viewing Wilders that do not rely on fascism. For instance, John Bowen makes the argument that Wilders’ anti-Islamic arguments – especially those about toleration of gays and women’s rights – reflect how not too long ago “most Dutch people held religious views on homosexuality and women’s rights that were not too different from those now ascribed to Muslims by their opponents.” According to Bowen, Wilders – and others like him – are using the Muslim migrant as a space in which to work out their own heritage. One might argue with some force that the Dutch opponents of Wilders do much the same when they debate about whether or not he is a fascist.

VI. LIKE JEWS IN THE 1930S

But there is a second, more telling parallel to the Nazi past. Are Muslims the new Jews? As we have seen, this comparison was made by Labor Party leader Job Cohen, who put an emphasis on the “singling out” process. Interestingly, he made this statement despite being well aware, as former mayor of Amsterdam, of the

106 Id.
anti-Semitism of some Muslim youth. Manfred Gerstenfeld, who has written at length about Muslim anti-Semitism, also gives credence to the comparison. He relates how Liesbeth van der Horst, director of the Resistance Museum in Amsterdam has to comfort Moroccan children who visit the Museum and conclude: “The Jews were a group that stood apart in Dutch society and were deported. We are today a separate group so that could happen to us.” To hammer home the point, Gerstenfeld asks: If “supposedly well-integrated Jews, those who resemble other Dutchmen so closely that they are often hardly recognizable as Jews are not seen as authentic Dutch by many Dutchmen...what can Muslims expect regarding their integration into Dutch society?”

From this perspective, Arend-Jan Boekestijn’s explanation that more than a million and a half Dutch voted for Wilders is less reassuring. To the contrary, it reinforces the concern that anti-Muslim measures Wilders endorses have a fair measure of public support. The argument is further reinforced by public opinion

---

108 For example, as mayor of Amsterdam Cohen had to determine what slogans could be allowed at a pro-Palestinian rally. Cohen accepted “anti-Israel slogans, but not anti-Jewish ones.” He rejected “a banner equating a swastika to a Star of David” because “the swastika is so connected to racism that it crosses a line.” Quoted in Manfred Gerstenfeld, Anti-Semitism and Hypocrisy in Dutch Society, supra note 36.

109 Manfred Gerstenfeld, The Symbolic and Other Roles of Jews in Dutch Society, supra note 33. According to Gerstenfeld, van der Horst reassures the children by pointing out that the Germans, not the Dutch, organized the mass killings of Jews. Id.

110 Id.
surveys registering the fear of Wilders in the Muslim community. For example, Wilders’ weblog contains an article from the English language website of *NRC: Handelsblad*, entitled “Half of Dutch Muslims wants [sic] to leave because of Wilders.”

The article reports that 57% of Dutch Moroccans and Turks feel less comfortable given the growing popularity of the PVV, 75% thought Wilders had intensified negative feelings against Muslims, while nine in ten thought a Wilders government would be a “fiasco.” Moreover, the same survey that found only 53% of Dutch citizens would accept a Jew as prime minister, was even worse for Muslims – only 27% would accept a Muslim prime minister.

When one views the Nazi past not through Wilders status as a fascist, but from the perspective of Muslims as potential victims, the logic of a hate speech prosecution becomes clearer. If the 75% of the survey were correct in thinking that Wilders “intensified negative feelings” against them, and this could be traced to specific comments Wilders made, then one has the basis of a hate speech prosecution. The prosecution would rest on the power of Wilders’ comments to inspire acts of hate and

---

112 Id.
114 The threat is even greater given that Wilders posted an article about the polling data on his weblog, in effect sending the message that he is glad Muslims are scared.
discrimination against violence. The charges would not depend on whether Wilders satisfied Henk Bovekerk’s (or Robert Paxton’s) criteria for fascism. Nor could Wilders escape the charges by pointing to his support of Jews, his opposition to Muslim anti-Semitism, or his appreciation of the acts of valor for the Western Allied soldiers in World War II.

To a large extent, this is how the prosecution unfolded. Most of the charges against Wilders involved statements about immigration, street crime and other subjects that – unlike the Mein Kampf / Quran comparison – did not directly invoke the Nazi past. And, as noted above, the court that ultimately acquitted Wilders had the most trouble with his call to Dutch citizens to confront Muslims in the streets.115 (On the other hand, the Amsterdam Appeals court – which authorized the charges in 2009 – placed great emphasis on Wilders use of the Mein Kampf and fascist labels. It mentioned “Mein Kampf,” “fascist” or “Nazi” 38 times in its opinion – although most of these references were not substantive).116

And yet the prosecution of Wilders still took place in the shadows of the Holocaust. One of the legacies of the Holocaust is a heightened sensitivity to the power of words to cause harm. Small

115 Wilders Verdict, sec. 4.3.2. at 14.
116 In reading the opinion one gets the sense that the judges were shocked by the comparison – which may be why, when the court turned to its analysis of the case it introduced “Nazi” into the analysis, a word Wilders never used. See Amsterdam Appeals Court Ruling sec. 12.1.3, 12.2.2 and 13.
things that would not otherwise attract attention do so if they involve the Nazi past. For example, last winter a number of branches of the British bookstore Waterstones placed stickers on *Mein Kampf*, describing it as “the perfect Christmas present.” After complaints and newspaper coverage, the bookstore apologized. Likewise, the Amsterdam trial court’s conclusion that Wilders’ call to confront Muslims in the streets was at the border of the acceptable might reflect a sensitivity to the special status of Dutch Muslims in a society that has yet to fully work out its own issues with the Holocaust.

VII. CONCLUSION: THE CONTINUING RELEVANCE OF THE NAZI PAST

The debate over “fascism” at the Wilders’ trial raises an additional, more general question, one about the discourse over European hate speech laws in the United States, home of the First Amendment. At first, this would seem to be a match made in heaven. Wilders’ himself has called for a First Amendment for Europe. In addition, proponents of free speech libertarianism, such as Robert Post, tend to down play role of Europe’s Nazi past in explaining the persistence of hate speech laws there. For

---

example, in a recent book chapter Post traces Europe’s hate speech laws to a number of factors including “European habits of deference to political authority” but does not make direct reference to the Holocaust or the Nazi occupation.119 He adds that Holocaust denial bans are not only “problematic” but also “rare.”120 Treating such laws as rare is part of a larger strategy of placing European hate speech laws in a broader context – one that makes them seem unreasonable.121

Peter Teachout, writing about Holocaust denial, takes a slightly different tack. He concedes that “[d]uring the period immediately following the war there was real and important urgency in establishing once and for all that civilization would never again tolerate what had been done in the name of Aryan superiority.”122 Now, however, more than sixty years after World War II, there have been “profound changes,”123 ones that make anti-denial laws less urgent. These include greater documentation of the Holocaust, the use of the European Union to bind Germany into a web of connections that make the re-emergence of the Nazi past inconceivable, and greater Holocaust education.124 This leads

119 See Robert Post, Hate Speech, supra note 14, at 137.
120 Id. at 127.
121 For instance, Post’s analysis of hate speech laws refers to the first English translation of Machiavelli’s The Prince (which contained an admonition to avoid stirring up hatred) and the 1792 conviction of Tom Paine for seditious libel. Id. at 125, 126.
122 Teachout, Making Holocaust Denial a “Crime,” supra note 14, at 688.
123 Id. at 692.
124 Id. at 688-89.
Teachout to wonder if anti-denial laws “have not become anachronistic.”

Whatever one thinks of Post and Teachout’s views of hate speech laws from a normative perspective, they underestimate the extent to which the Nazi era, including the Holocaust, plays in European understanding of hate speech laws. Laws against Holocaust denial are not rare in Europe – to the contrary a number of European countries have such laws, and for a while Europe-wide bans were seriously considered. And while Teachout is free to call the need for anti-denial laws “anachronistic,” the laws themselves came into play relatively recently. For example, the French Gayssot Law was passed in 1990, a time when – according to Teachout – concerns about the Holocaust should have been in decline.

125 Id.
126 Some scholars in the United States take a more favorable view of permissibility of hate speech laws in the United States. For instance, Alex Tsesis suggests the First Amendment might not protect “forms of hate speech” that, even if not intimidating, could “incite an audience to commit discrimination at work or in other public places[].” See Alexander Tsesis, Dignity and Speech: The Regulation of Hate Speech in a Democracy, 44 WAKE FOREST L. REV. 497 (2009); see also ERIK BLEICH, FREEDOM TO BE RACIST? HOW THE UNITED STATES AND EUROPE STRUGGLE TO PRESERVE FREEDOM AND COMBAT RACISM, (2011)(noting how differences between United States and European regulation of speech diminish when one looks at “hostile environment” claims brought in the employment law context).
127 Currently a number of European countries including Belgium, France, the Netherlands, Germany and Austria ban Holocaust denial. See Kahn, Holocaust Denial and Hate Speech, supra note 4, at 96, n. 104 (2011)(noting situation as of 2011). For an overview of efforts to establish a European ban on Holocaust denial, see Laurent Pech, The Law of Holocaust Denial in Europe, Toward a (qualified) EU-Wide Criminal Prohibition, 185-234 in Thomas Hochmann and Ludovic Hennebel eds. GENOCIDE DENIALS AND THE LAW (2011).
128 For a brief overview of the passage of the Gayssot Law, see Kahn, HOLOCAUST DENIAL AND THE LAW, supra note 34, at 105-08.
The repeated references to the “fascists,” “Mein Kampf” and the situation of the Jews in the 1930s at the Wilders’ trial suggest that fears about the Holocaust and the Nazi past, far from being “anachronistic,” are alive and well in postwar Europe nearly seventy years after V-E day.\(^{129}\) This does not mean one has to approve of this state of affairs\(^ {130}\) – one might, from a libertarian perspective, bemoan the impact that the events of the 1930s and 1940s have had on European hate speech law. In his book about Holocaust-related trials, Lawrence Douglas has questioned whether law is capable of speaking “adequately on behalf of humanity’s most traumatic histories.”\(^ {131}\) One can ask the same question about speech regulation. Is a post-Holocaust Europe ready for a First Amendment? Or is the anti-fascist consensus behind hate speech laws a sign of how the Holocaust has left a continuing rupture in the fabric of European society?\(^ {132}\)

\(^{130}\) Likewise, one can question whether the fear of a Nazi or fascist resurgence in current day Europe is a realistic possibility. On this issue, Teachout is right to point out that times have changed since 1945. Teachout, *Making Holocaust Denial a Crime*, *supra* note 14, at 688-92. On the other hand, even if fears of a Nazi resurgence are irrational, they are an important part of European discussions about hate speech laws.

\(^{132}\) Perhaps the strongest evidence for a continuing rupture – one related to hate speech laws – comes from Germany where anti-Semitic incidents and judicial opinions favoring Holocaust denial led to calls for tougher enforcement hate
The key in answering the question is the recognition that the memory of the Nazi past and the Holocaust plays a role in European debates over hate speech laws. One can argue that Europeans should try to move beyond the past, or – to use Teachout’s words – that “it is time [for Europe] to trust again in democracy.”133 And one can agree with Teachout and Post that laws against Holocaust denial should be “rare.” In fact, the competing charges of “fascism” at the Wilders trial could very well lead someone to express hope that, with time, the National Socialist past plays less of a role in European public life.

But the time has not yet come. In 2012 Europeans are still dealing with the Holocaust. This year has already seen Manfred Gerstenfeld’s call for a Dutch apology for passivity during the Holocaust.134 In addition, a Dutch filmmaker is currently standing trial for filming a former Dutch Nazi in a German nursing home.135 Meanwhile, a German prosecutor is seeking prison for an 89 year speech laws. KAHN, HOLOCAUST DENIAL AND THE LAW, supra note 34, at 67, 73-77. While these events date back to the 1960s, perhaps the largest scandal arose in 1994 when Judge Ranier Orlet was placed on emergency medical leave after praising defendant Günter Deckert – who he had just found guilty of racial incitement by denying the Holocaust – for raising questions about “Jewish pretensions about the Holocaust.” Id. at 73-77. In the ensuing debate concerns were raised about “Germany’s reputation abroad,” id. at 73 (quoting then Chancellor Helmut Kohl), as well as the impact of denial on the political legitimacy of the Federal Republic of Germany. Id.

133 Teachout, Making Holocaust Denial a “Crime,” supra note 14, at 692.
134 See supra note 33 and accompanying text.
old man accused of war crimes in the Netherlands. Perhaps it will take another generation – one in which the last victims, perpetrators or bystanders have passed away – to move to a genuinely post-Holocaust perspective on hate speech law.

This may happen one day. But even here doubts remain, in part because of the way the Nazi past (and especially the Holocaust) has become part of a broader discourse about the rejection of “racial and religious bigotry.” Here Khaled Abou El Fadl’s essay on Geert Wilders written while he was in the Netherlands as a visiting professor is enlightening. He begins by discussing the rise of Geert Wilders. He notes that Islam bashing has become a “lucrative industry” and asks whether Wilders realized that he and his supporters were “marching down the same path of every other fanatic who used fear and hate to demonize millions of people.”

El Fadl refers the Bosnian Genocide, the Serbian rape camps, and the Armenian Genocide, before concluding his article by describing how in the 1930s “an extreme and puritanical nationalism” led to the Holocaust. So even if the Europe is ready to move beyond the Nazi past, that past will still

be part of a larger discourse about genocide and racism that supporters and opponents of hate speech laws will have to take account of.\textsuperscript{143}

In the meantime, sweeping the past under the rug in the name of a universal theory of speech protection (one based largely on the historically contingent experiences of the United States)\textsuperscript{144} will not advance our understanding of the Wilders trial or of the current efforts by Flemming Rose\textsuperscript{145} and Geert Wilders to challenge hate speech laws and expand protections for freedom of speech in Europe. Nor will it fully explain the sensitive position of Muslims in Europe who are simultaneously seen as potential Nazi censors eager to rob Europeans of their liberties and, at the same time, as the new Jews, victims of the Nazis whom hate speech laws are meant to protect.\textsuperscript{146}

\footnote{143}{To give another example of a writer who places hate speech in a broader perspective, consider Uladzislau Belavusau, an assistant professor at the VU University in Amsterdam, who sees regulation of hate speech as based on not only “a traditional post war ethos of militant non racism” but also “a newer telos of the peaceful integration of migrants.” Uladzislau Belavusau, \textit{Fighting Hate Speech Through EU Law}, 4 AMSTERDAM LAW FORUM 20, 34 (2012). Interestingly, Belavusau describes the Wilders acquittal as “controversial” and against the grain of recent punitive measures taken against right-wing politicians. \textit{Id.}}
\footnote{144}{According to Samuel Walker, the departure of the United States from traditional norms – ones that allow for some punishment of hate speech – occurred as a result of the movements in the 1960s for Civil Rights and against the Vietnam War. \textit{Samuel Walker, Hate Speech: The History of an American Controversy}, 104-13 (1994).}
\footnote{145}{For more on Rose, see Kahn, \textit{Flemming Rose, The Danish Cartoon Controversy and the New European Freedom of Speech}, supra note 12.}
\footnote{146}{See, e.g., David A. Jacobs, Note, \textit{The Ban of Neo-Nazi Music: Germany Takes on the Neo Nazis}, 34 HARV. INT’L L. J. 563, 572-73 (1993)(describing how anti-Semitic songs from the 1930s were reprised with Turks as the new victims).}
To return to Abraham Foxman, Europeans have “experienced Nazism and other destructive social movements on their soil.”\textsuperscript{147} The depth of discussion about fascism at the Geert Wilders trial is a reminder that these movements have had a continuing impact. The same applies to Dutch (and European) hate speech laws. One can object to the methods and (speaking from the United States) point out that they are “not ours.”\textsuperscript{148} But the “legacy of extremism”\textsuperscript{149} these laws are meant to protect against is still – at least for many Europeans – quite real.\textsuperscript{150}
