*Projects Ongoing and Completed (selected)*

- Apurba Shee et al (2021-24) *Economic and Empowerment Impacts of Millet Processing and Value Addition Enterprises by Women SHGs in Tribal Areas of Odisha*, 3ie Swashakt, This is a joint project with collaborators from University of Greenwich (lead), Brunel University London, IGIDR, University of Kent, and WASSAN. Srijit Mishra is one of the co-investigators.
- Howard Griffiths et al (2018-22) *Transforming India's Green Revolution by Research and Empowerment for Sustainable food Supplies* (TIGR2ESS) being led by University of Cambridge, Global Challenge Research Fund, Research Council UK. This is an interdisciplinary learning experience involving multiple research organisations in the UK and in India. Srijit Mishra is one of the co-investigators.
- Srijit Mishra, Sarthak Gaurav and Hippu Salk Kristle Nathan (2019) *Macroeconomic Impact and Human Impact Assessment Post-Cyclone Fani*, United Nations Development Programme, India. This contribution led to two chapters in the report prepared by Government of Odisha with United Nations, Asian Development Bank and The World Bank. The methodological innovations and the policy suggestions have been appreciated.
- Srijit Mishra et al (27 Feb 2017-10 Sep 2020, refers to my association) *Special Programme for Revival of Millets in Tribal areas of Odisha* (Odisha Millets Mission) is an action research initiated during my secondment as Director, NCDS, which has been funded by Government of Odisha. A unique aspect of the programmes is its institutional architecture where the Government, Civil Society and the Academia have come together to complement and supplement each other for a pro-people initiative. Started in 2017-18 in 30 blocks across seven districts, the programme has expanded to 76 blocks across 14 districts by September 2020. Many reports and policy briefs have been put up till September 2020. An analysis of year one of intervention (2017-18), compared to baseline, indicates that yield has more than doubled and value of produce has more than trebled. The initiative has been appreciated by National Institution for Transforming India (NITI) Aayog and has envisaged interest among other state governments and multi-lateral institutions for global lessons in the International Year of Millets.
- Srijit Mishra et al (27 Feb 2017-10 Sep 2020, refers to my association) *Special Programme for Promotion of Integrated Farming in Tribal Areas*. This is another action research during my secondment that started with me as its principal investigator with similar institutional architecture as the millet initiative. It facilitates convergence across line functionaries. In September 2020, the Government of Odisha had taken an in principle decision to expand this to additional areas. Subsequently, it has been operational in nine districts of Odisha.
- Rajeswari Raina, Srijit Mishra, A Ravindra (2017-2022) *Millet-Based Nutrition Programmes: Theoretical Challenges and Policy Problems in Rainfed Agriculture*, ICSSR, New Delhi. This engagement tries to bring together knowledge, practise and policy in a comparative study examining recent initiatives in Andhra Pradesh and Odisha. A publication from this is Raina et al. (2022) Reorienting India's Agricultural Policy, *Journal of Ecological Society*, 34 (1): 1-15.

- Srijit Mishra, Hippu Salk Kristle Nathan, Laxmikanth Hari (2016-date) *Analysing Poverty Change in India: Decomposition, Inclusiveness and Multidimensional Nutritional Deprivation*, ICSSR, New Delhi. This study has three broad parts using data from 1993-94, 2004-05 and 2011-12 rounds of National Sample Survey. First, it decomposes poverty change into growth, inequality and population effects across states of India. Second, it measures inclusiveness for poverty change through a notion of shortfall sensitivity. Third, it computes nutritional deprivation by using nutrition-specific and household-specific norms. The data analysis is completed and we are now writing the report.
- Hippu Salk Kristle Nathan and Srijit Mishra (2016) *Inclusiveness of Human Development in India*, Global Development Network, New Delhi. This examines the different parameters of human development – health, education and livelihood – among different sub-groups like gender or rural-urban over time and across states of India to evaluate their inclusiveness.
- Srijit Mishra and Nirmal Sengupta (2013), *Impact Assessment Study of PRADAN's Interventions at the Grassroots*, PRADAN, New Delhi. The study examined and evaluated PRADAN's work. It has an important methodological contribution to evaluate impact of organisations working for rural development and also to understand the challenges that they face leading to suggestions and introspection within the organisation.
- Jean-Frederic Levesque et al. (2007-2009), Vulnerability and Inequalities in health in South Asia: Analysis of World Health Survey, Sponsoring Agency: Canadian Institutes of Health Research. One of the outcomes of the project with me as the senior author has been a paper published in Levesque et al. (2013) Measuring the Prevalence of Chronic Diseases using Population Surveys by Pooling Self-reported Symptoms, Diagnosis and Treatments: Results from the World Health Survey of 2003 for South Asia, *International Journal of Public Health* 58 (3): 435-447.
- Srijit Mishra (2006), *Suicide of Farmers in Maharashtra*, Government of Maharashtra. This was a systematic study involving households, communities and other stakeholders. The suggestions were implemented by the Government of Maharashtra as 'Vasantrao Naik Kshetkari Swabhilambhan Mission' as also leading to other initiatives by the Government of India.
