Research Bio:

Over the course of more than 25 years of service as a university professor I have served as principal investigator, project director, lead author, or senior supervising economist on numerous scholarly works, technical reports, policy studies, and regional economic development plans. I am honored to have received the 2005 Scholar of the Year award at HSU for my work relating to environmental and natural resource economics, energy economics, and the economics of sustainability. My work is collaborative, interdisciplinary, and focused on resolving significant policy dilemmas. My research affiliations have included the Workshop in Political Theory and Policy Analysis at Indiana University and the Schatz Energy Research Center at HSU. My research has been supported by organizations such as the National Science Foundation, the California Sea Grant College program, NOAA Fisheries, the California Department of Fish and Wildlife, the California Energy Commission, and the Headwaters Fund. I have served as a senior consulting economist with ICF, H.T. Harvey & Associates, LACO Associates, Planwest Partners, and Conservation Strategy Fund, among others. I have also supervised a large number of students who have gone on to positions of leadership in business, government, nonprofits, and higher education.
