STARS REPORT

Date Submitted: Preview
Provisional Rating: Bronze
Provisional Score: 34.59
Online Report: Dominican University of California
STARS Version: 1.2

This is a preview of the final STARS Report.
The final version of the STARS Report will be available after submission.
A STARS Rating (including STARS Reporter) will be given at the time of submission and the data contained in the report will become publicly available on the STARS website.
To reduce paper consumption, this document has been designed to be browsed quickly and easily on computer screens using Adobe Reader. The following special features have been embedded:

**Moving Around in the Document**

- **Summary of Results Links** - Headings in the Summary of Results are links, which can be clicked to take you directly to the referenced page.

- **Bookmarks** - You can jump to segments of the document quickly and easily using the Bookmarks provided in the document. To access the Bookmarks, click on the "Bookmarks" tab on the left side of the Adobe Reader window – it's the icon that looks like a sheet of paper with a blue ribbon hanging over the upper left corner.

- **Pages** - You can quickly go to any page listed in the Table of Contents simply by typing the page number into the box that displays the current page number in the Adobe Reader window, and pressing "Return/Enter."

**Searching**

- Adobe Reader's search tool allows you to see the results of your search in a menu format, similar to web search engines. Using the menu, you can choose to go directly to the occurrence of the search term that is most relevant to your interest. To access this search tool, press Shift+Ctrl+F, or choose "Search" from the "Edit" menu.

If these features don’t meet your on-screen reading needs, please consider printing only the sections you need, printing double-sided, and using recycled-content paper or paper that has already been printed on one side.
The Sustainability Tracking, Assessment & Rating System (STARS®) is a transparent, self-reporting framework for colleges and universities to gauge relative progress toward sustainability. STARS was developed by AASHE with broad participation from the higher education community.

STARS is designed to:

- Provide a framework for understanding sustainability in all sectors of higher education.
- Enable meaningful comparisons over time and across institutions using a common set of measurements developed with broad participation from the campus sustainability community.
- Create incentives for continual improvement toward sustainability.
- Facilitate information sharing about higher education sustainability practices and performance.
- Build a stronger, more diverse campus sustainability community.

The STARS framework is intended to engage and recognize the full spectrum of colleges and universities in the United States and Canada – from community colleges to research universities, and from institutions just starting their sustainability programs to long-time campus sustainability leaders. STARS encompasses long-term sustainability goals for already high-achieving institutions as well as entry points of recognition for institutions that are taking first steps toward sustainability.

**STARS 1.0**, which launched on January 19, 2010, after a three-year development process, is the first version of STARS in which participants can earn a rating.

**About AASHE**

STARS is a program of AASHE, the Association for the Advancement of Sustainability in Higher Education. AASHE is a member-driven organization with a mission to empower higher education to lead the sustainability transformation. Learn more about AASHE.

Co-Curricular Education

**Points Claimed** 3.50  
**Points Available** 18.00

This subcategory seeks to recognize institutions that provide their students with sustainability learning experiences outside the formal curriculum. Engaging in sustainability issues through co-curricular activities allows students to deepen and apply their understandings of sustainability principles. Institution-sponsored co-curricular sustainability offerings, often coordinated by student affairs offices, help integrate sustainability into the campus culture and set a positive tone for the institution.

Criteria

Institution coordinates an ongoing peer-to-peer sustainability outreach and education program for degree-seeking students. The institution:

- Selects or appoints students to serve as educators and formally designates the students as educators,
- Provides formal training to the educators in how to conduct outreach, and
- Offers faculty or staff and/or financial support to the program.

This credit focuses on programs for degree-seeking students enrolled in a for-credit program. Continuing education and/or non-credit students are excluded from this credit.

Student clubs or groups, which are covered by Co-Curricular Education Tier Two Credit 1, are not eligible for this credit unless the group meets the criteria outlined above.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Student Sustainability Outreach Campaign

<table>

<tr>
<td>0.00 / 5.00</td>
<td>Vania Coelho</td>
</tr>
<tr>
<td></td>
<td>Associate Professor, Faculty Coordinator for the Center for Sustainable Natural Sciences and Mathematics</td>
</tr>
</tbody>
</table>

Criteria

Institution holds at least one sustainability-related outreach campaign directed at students. The campaign yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution, a student organization, or students in a course.

To measure if the campaign yields measurable, positive results, institutions should compare pre-campaign performance to performance during or after the campaign.

The campaign could take the form of a competition (such as a residence hall conservation competition), or a collective challenge (such as a campus-wide drive to achieve a specific sustainability target).

The campaign may focus on one or more sustainability issues, but educating students is a primary feature of the campaign.

The campaign may reach additional campus members (faculty, staff, visitors, etc.) as long as students are one of the audiences of the campaigns.

The following impacts are not sufficient for this credit:

- Increased awareness
- Additional members of a mailing list or group

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Sustainability in New Student Orientation

Provisional Score

0.00 / 2.00

Criteria

Institution includes sustainability prominently in its new student orientation activities and programming. Sustainability activities and programming are made available to all new students and are intended to educate about the principles and practices of sustainability.

Because orientation activities vary from one institution to another, prominent inclusion of sustainability may not take the same form on each campus. When reporting for this credit, each institution will determine what prominent inclusion of sustainability means given its particular context.

As this credit is intended to measure sustainability being infused throughout the institution, program or discipline-level orientations are not included in this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
### Criteria

Institution produces outreach materials and/or publications that foster sustainability learning and knowledge. The publications and outreach materials may include the following:

- A central sustainability website that consolidates information about the institution’s sustainability efforts
- A sustainability newsletter
- A vehicle to publish and disseminate student research on sustainability
- Building signage that highlights green building features
- Food service area signage and/or brochures that include information about sustainable food systems
- Signage on the grounds about sustainable groundskeeping strategies employed
- A sustainability walking map or tour
- A guide for commuters about how to use alternative methods of transportation
- A guide for green living and incorporating sustainability into the residential experience
- Regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat
- Other

"---" indicates that no data was submitted for this field

**Does the institution have a central sustainability website that consolidates information about the institution's sustainability efforts?**

Yes

**A brief description of the central sustainability website that consolidates information about the institution's sustainability efforts:**

Web site created to promote environmental awareness and sustainability among students, faculty and staff members at Dominican University of California.

**The website URL for the central sustainability website that consolidates information about the institution's sustainability efforts:**

**Does the institution have a wilderness or outdoors program that organizes hiking, backpacking, kayaking, or other outings for students and follows Leave No Trace principles?**

Yes

**A brief description of the program:**

Student Health Hiking Group: The purpose is for students to get exercise, discuss any health topics, appreciate the environment and learn how to respect and preserve it, reduce stress and get to know other students.

**The website URL where information about the program is available:**

---
Themed Semester or Year

Has the institution chosen a sustainability-related theme for its themed semester, year, or first-year experience during the past three years?:

Yes

A brief description of the themed semester, year, or first-year experience:

The theme of Dominican's first-year experience is "Big History," which explores the story of humans as Earth's dominant species and our role in shaping possible futures for the planet. It is a multi-disciplinary theme that employs many fields, including biology, geology, ecology and sociology. It's designed to give students the relevant, applicable information they need to be informed and productive global citizens; students become agents for the health of planet Earth and its inhabitants. The goals of the First Year Experience “Big History” program are to promote critical and creative thinking; recognition of the personal, communal, and political implications of the Big History story; and the ability to evaluate and articulate understanding of one’s place in the unfolding universe. The immense fourteen billion-year framework of this course sequence communicates the natural and cultural history of our universe and emphasizes global interconnectivity.

The sustainability-related book that was chosen, if applicable:

---

The website URL where information about the theme is available:

http://www.dominican.edu/academics/big-history
This subcategory seeks to recognize institutions that have formal education programs and courses that address sustainability. One of the primary functions of colleges and universities is to educate students. By training and educating future leaders, scholars, workers, and professionals, higher education institutions are uniquely positioned to prepare students to understand and address sustainability challenges. Institutions that offer courses covering sustainability issues help equip their students to lead society to a sustainable future.

Criteria

Part 1

Institution has developed a definition of sustainability in the curriculum. The definition was developed by a committee comprised of at least three faculty members who teach courses in different departments. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

In order to report on other STARS Curriculum credits, the definition of sustainability in the curriculum should distinguish between courses that focus or concentrate on the concept of sustainability throughout the course and courses that relate to an aspect of sustainability or include sustainability as part of the course.

- **Sustainability-focused courses** concentrate on the concept of sustainability, including its social, economic, and environmental dimensions, or examine an issue or topic using sustainability as a lens.
- **Sustainability-related courses** incorporate sustainability as a distinct course component or module or concentrate on a single sustainability principle or issue.

Part 2

Institution has identified its sustainability-focused and sustainability-related course offerings. A course is either sustainability-focused or sustainability-related; no course should be identified as both sustainability-focused and sustainability-related. Each institution is free to choose a methodology to identify sustainability courses that is most appropriate given its unique circumstances. Asking faculty or departments to self-identify sustainability courses using the definition in Part 1 or looking at the stated learning outcomes and course objectives associated with each course may provide a richer view of sustainability course offerings than simply reviewing course descriptions, but it is not required.

Part 3

Institution makes its sustainability course inventory publicly available online. The identification can be incorporated into the course catalog or posted as a stand-alone document.

"---" indicates that no data was submitted for this field

Has the institution developed a definition of sustainability in the curriculum? :

Yes
A copy of the institution's definition of sustainability in the curriculum? :

Sustainability is broadly defined as the ability to meet the needs of the present and future generations while conserving the planet’s life support systems.

Has the institution identified its sustainability-focused and sustainability-related course offerings? :

Yes

A brief description of the methodology the institution followed to complete the inventory :

The University's sustainability-focused and sustainability-related courses were identified by employing two different strategies. First, a survey was sent out to all faculty members requesting that they self-identify their courses that are either sustainability-focused and sustainability-related according to the definitions provided to them. Second, STARS assessment team members reviewed all the most current course descriptions available and identified those that appeared to be sustainability-focused and sustainability-related based on the descriptions. These determinations were used when instructor self-identification wasn't available. Once the final inventory was compiled, it was sent out to faculty members for their review. The inventory was revised according to faculty feedback.

Does the institution make its sustainability course inventory publicly available online? :

Yes

The website URL where the sustainability course inventory is posted :

http://www.dominican.edu/about/facts/campus-culture/campus-wide-sustainability/images-and-docs/sustainability-course-inventory

Sustainability Learning Outcomes

Provisional Score

4.52 / 10.00

Responsible Party

Vania Coelho
Associate Professor, Faculty Coordinator for the Center for Sustainability
Natural Sciences and Mathematics

Criteria

Institution’s students graduate from programs that include sustainability as a required learning outcome or include multiple sustainability learning outcomes.

For this credit, learning outcomes at the course level count if the course is required to earn the degree. This credit includes graduate as well as undergraduate programs. For this credit, "programs" include majors, minors, concentrations, certificates, and other academic designations. Programs that include co-curricular aspects may count as long as there is an academic component of the program.

The number of graduates covered by the sustainability learning outcomes:
168

Total number of graduates:
372

A list of degree programs that have sustainability learning outcomes:

MBA Sustainable Enterprise; MBA Global Management; MS Education; MS Counseling Psychology; All Undergraduate Programs (First Year Experience/FYE)

The website URL where the publicly available sustainability course inventory that includes a list of degree programs that have specified sustainability learning outcomes is available:

---

A list or sample of the sustainability learning outcomes associated with the degree programs:

---
Undergraduate Program in Sustainability

Provisional Score
0.00 / 4.00

Criteria

Institution offers at least one sustainability-focused undergraduate major, degree program, or equivalent.

The degree program does not have to include sustainability in its name to count for this credit. Environmental Studies programs, for example, count as long as the program covers the social, economic, and environmental dimensions of sustainability. A program that focuses exclusively on environmental or social issues, however, would not be sufficient to earn this credit.

Concentrations within a major (e.g. a concentration on sustainable business within the business major) do not count for this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Graduate Program in Sustainability

Sustainability Immersive Experience

Provisional Score

2.00 / 2.00

Responsible Party

Vania Coelho
Associate Professor, Faculty Coordinator for the Center for Sustainability
Natural Sciences and Mathematics

Criteria

Institution offers at least one immersive, sustainability-focused educational study program. The program(s) may take place off-campus, overseas, or on-campus.

For this credit, the program meets one or both of the following criteria:

- it concentrates on sustainability, including its social, economic, and environmental dimensions or
- it examines an issue or topic using sustainability as a lens.

Immersive programs offered in partnership with outside entities may count for this credit. Programs offered exclusively by outside entities do not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution offer a program that meets the criteria for this credit?:

Yes

A brief description of the sustainability-focused immersive experience(s) offered by the institution:

The Sustainable Practices Certificate program offers affordable and flexible education to adults who share a commitment to sustainability issues and seek to make positive change by implementing sustainable practices in their workplaces, lives and communities.

Geared toward working professionals, those in career transition, community and environmental advocates, and recent graduates, this non-degree program provides a firm grounding in sustainable and regenerative practices. The unique curriculum structure combines in-class coursework with practical application through capstone projects and internships with partner organizations throughout the Bay Area and beyond.

Sustainability Literacy Assessment

<table>
<thead>
<tr>
<th>Provisional Score</th>
<th>Responsible Party</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.00 / 2.00</td>
<td></td>
</tr>
</tbody>
</table>

Criteria

Part 1

Institution conducts an assessment of the sustainability literacy of its students. The sustainability literacy assessment focuses on knowledge of sustainability topics, not values or beliefs.

Part 2

Institution conducts a follow-up assessment of the same cohort group using the same instrument.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Incentives for Developing Sustainability Courses

Provisional Score
0.00 / 3.00

Criteria

Institution has an ongoing program or programs that offer incentives for faculty in multiple disciplines or departments to develop new sustainability courses and/or incorporate sustainability into existing courses or departments. The program aims to increase student learning of sustainability.

Incentives may include release time, funding for professional development, and trainings offered by the institution.

Incentives for expanding sustainability offerings in academic, non-credit, and/or continuing education courses count for this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Research

**Points Claimed**  9.47  
**Points Available**  27.00  

This subcategory seeks to recognize institutions that are conducting research related to or focused on sustainability. Conducting research is a major function of many colleges and universities. By researching sustainability issues and refining theories and concepts, higher education institutions can continue to help the world understand sustainability challenges and develop new technologies, strategies, and approaches to address those challenges.

Criteria

Part 1
Institution has developed a definition of sustainability research. The definition was developed by a committee comprised of at least three faculty members from different departments who conduct research. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

Part 2
Institution has identified its sustainability research activities and initiatives. This research inventory should include all research centers, laboratories, departments, and faculty members whose research focuses on or is related to sustainability.

Part 3
Institution makes its sustainability research inventory publicly available online.

"---" indicates that no data was submitted for this field

Has the institution developed a definition of sustainability research? :
Yes

A copy of the institution's definition of sustainability research :
Sustainability research focuses on a key principle of sustainability (such as social equity or environmental stewardship); addresses a sustainability challenge (such as climate change or poverty); or furthers our understanding of the interconnectedness of societal and environmental challenges. Sustainability research leads toward solutions that support economic prosperity, social well-being, and/or ecological health.

Has the institution identified its sustainability research activities and initiatives? :
Yes

A brief description of the methodology the institution followed to complete the inventory :
Faculty were asked to complete an online survey in Spring 2012, and in Fall 2012 a summary with the results was submitted via e-mail and a final request was made for faculty to review the document and submit their information in case they had not done so yet or if there were any mistakes.
Does the institution make its sustainability research inventory publicly available online? :
Yes

The website URL where the sustainability research inventory is posted (required if claiming Part 3 of the credit) :
http://www.dominican.edu/about/facts/campus-culture/campus-wide-sustainability/images-and-docs/
sustainability-research-inventory
Faculty Engaged in Sustainability Research

Provisional Score

4.18 / 10.00

Responsible Party

Vania Coelho
Associate Professor, Faculty Coordinator for the Center for Sustainability
Natural Sciences and Mathematics

Criteria

Institution’s faculty members conduct research on sustainability topics.

Any level of sustainability research by a faculty member is sufficient to be included for this credit. In other words, a faculty member who conducts both sustainability research and other research may be included.

Submission Note:

This listing includes only tenure-track and tenured faculty because research is expected and required from them for tenure and promotion. However we do have other full time and part time faculty on campus that also conduct sustainability research but were not included in this calculation, as research is not necessarily taken into account for promotion in their case.

"---" indicates that no data was submitted for this field

The number of faculty members engaged in sustainability research :

7

The total number of faculty members engaged in research :

67

Names and department affiliations of faculty engaged in sustainability research :

John Duvall, Communications and Media Studies
Laura Stivers, Religion and Philosophy
Jacob Massoud, Business and Leadership
Rajeev Sooreea, Business and Leadership
Kelly Weidner, Business and Leadership
Vania Coelho, Natural Sciences and Mathematics
Sibdas Ghosh, Natural Sciences and Mathematics

</tr>
</tbody>
</table>

Criteria

Institution's academic departments include faculty members who conduct sustainability research.

Any level of sustainability research by a faculty member in a department is sufficient for this credit.

Submission Note:

We are only including departments with tenure and tenure-track faculty members as they are required for tenure and promotion to conduct research. If a faculty member is associated with more than one department they are counted as part of their primary department only. For example the Department of Graduate Humanities is not included as a separated department in this calculation, as it does not have faculty that belong exclusively to it. Also we are not counting the Department of Public Health, the Department of Humanities and Cultural Studies, and the Department of Gender Studies here, because they have no tenured or tenure-track faculty.

Operations

Provisional Score 23.41%

Buildings

Points Claimed 0.17
Points Available 13.00

This subcategory seeks to recognize institutions that are taking steps to improve the sustainability performance of their buildings. Buildings are generally the largest user of energy and the largest source of greenhouse gas emissions on campuses. Buildings also use significant amounts of potable water. Institutions can design, build, and maintain buildings in ways that provide a safe and healthy indoor environment for inhabitants while simultaneously mitigating the building’s impact on the outdoor environment.

Criteria

Institution owns and operates buildings that are:

1) Certified under the LEED® for Existing Buildings: Operations & Maintenance (O&M) Green Building Rating System, and/or

2) Operated and maintained in accordance with sustainable operations and maintenance guidelines and policies that cover the following:

- Impacts on the surrounding site
- Energy consumption
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Building Design and Construction

Provisional Score
0.00 / 4.00

Criteria

Institution-owned buildings that were constructed or underwent major renovations in the past three years are:

1) Certified under the LEED® for New Construction and Major Renovations, LEED for Commercial Interiors, and/or LEED for Core and Shell Green Building Rating Systems,

and/or

2) Designed and built in accordance with green building guidelines and policies that cover the following topics:

- Impacts on the surrounding site
- Energy consumption
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption

Criteria

Institution has adopted an indoor air quality management policy, plan, and/or practices that include regular auditing or monitoring and a mechanism for occupants to register complaints. Policies and plans adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Occupied building space covered by an indoor air quality plan, policy, and/or practices that include regular auditing or monitoring and a mechanism for occupants to register complaints:

35000 Square Feet

Total occupied building space:

420958 Square Feet

A brief description of the institution's indoor air quality plan, policy, and/or practices:

Dominican's Science Center was constructed and is maintained according to California Title 24. This policy requires indoor air quality management and practices including regular maintenance and monitoring of the air.

The website URL where information about the institution's indoor air quality initiatives is available:

---
Climate

Points Claimed  1.75

Points Available  16.50

This subcategory seeks to recognize institutions that are measuring and reducing their greenhouse gas emissions. Global warming is expected to have myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are expected to be particularly pronounced for poor communities and countries.

Greenhouse Gas Emissions Reduction

Provisional Score

0.00 / 14.00

Responsible Party

Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

Criteria

Institution reduced its net Scope 1 and Scope 2 GHG emissions per weighted campus user compared to a 2005 baseline.

For this credit, off-site, institution-catalyzed carbon offsets (i.e. those popularly known as “local offsets”) count in full. Purchased carbon offsets that have been verified by a third party may count towards a portion of the reduction. Purchased offsets that have not been third-party verified do not count.

To conduct a GHG emissions inventory, campuses may use any methodology and/or calculator that is consistent with the Greenhouse Gas Protocol's Corporate Accounting and Reporting Standards.

The baseline GHG emissions inventory should include the same emissions sources as the performance year emissions inventory.

Submission Note:

The timeframe for the GHG Inventory for the 2005 baseline year is Dec 2005 to Nov 2006.

The Campus Users figure for the baseline year is the average number of students per semester in the 2005-2006 academic year plus the number of faculty and staff in the FY2005-06; and for the performance year, the campus users figure is the average number of students per semester in the 2010-2011 academic year plus the number of faculty and staff in the FY2010-11.

The on-campus residents figure was calculated using the same methodology (average number of on-campus residents per semester in the academic year) for both baseline and performance year.

Dining Services

Points Claimed  2.09
Points Available  8.50

This subcategory seeks to recognize institutions that are supporting a sustainable food system. Modern industrial food production often has deleterious environmental impacts. Pesticides and fertilizers used in agriculture can contaminate ground and surface water, which has potentially dangerous impacts on wildlife and human health. Furthermore, the often long-distance transportation of food to institutions produces greenhouse gas emissions and other pollution. Additionally, farm workers are often paid substandard wages, subjected to harsh working conditions, and exposed to dangerous pesticides. Institutions can use their food purchases to support their local economies; encourage safe, environmentally-friendly farming methods; and help alleviate poverty for farmers.

Please note that while dining services can also play an important role in conserving energy and water, reducing waste, and purchasing environmentally preferable materials other than food, STARS measures these impacts across the institution instead of by department; therefore, the benefits of these actions are captured in the Energy, Water, Waste, and Purchasing subcategories, respectively.

Food and Beverage Purchasing

Provisional Score

1.34 / 6.00

Responsible Party

Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

Criteria

This credit includes food and beverage purchases for on-campus dining services operated by the institution or the institution’s primary on-site contractor. Institution purchases food and beverages that meet at least one of the following criteria:

- Grown and processed within 250 miles of the institution
- Third-party certified (USDA Certified Organic, Marine Stewardship Council Blue Ecolabel, Food Alliance, Fair Trade, Certified Humane Raised and Handled)

Food and beverage purchases that meet multiple criteria listed above should not be double-counted.

This credit includes food and beverage purchases for on-campus dining operations and catering services operated by the institution or the institution’s primary dining services contractor (e.g. Aramark, Bon Appétit Management Company, Chartwells, Sodexo). On-site franchises, convenience stores, vending machines, or concessions are excluded from this credit unless they are operated by the institution or the institution’s primary on-site contractor.

Submission Note:

The 11.17% reported for sustainable food expenditures may not accurately reflect purchasing practices. This percentage is only for local food purchases and does not include separate certified organic purchases or certified humane purchases, because the information for these purchases was not provided. It may be that the percentage is actually slightly higher.

"---” indicates that no data was submitted for this field

Percentage of food expenditures that meet one or more of the criteria for this credit (0 - 100) :

11.17

A brief description of the sustainable food and beverage purchasing program :

Dominican’s dining services contractor, Bon Appetit, has a Farm to Fork Program that aims to purchase food and beverages that are grown or processed within 150 miles. The Farm to Fork Program is top priority if there is not a large difference in cost. Seasonal, local produce is offered on all menus. Bon Appetit also purchases certified organic produce whenever possible, follows the guidelines of the Monterey Bay Aquarium’s Seafood Watch Program for seafood purchases and requires that all their shell eggs are Certified Humane.

Does the institution use frying oil that does not include trans-fats and seek to avoid foods that include trans-fats in its dining operations? :

Yes

A brief description of the trans-fats avoidance program, policy, or practice :

Dominican's dining services provider, Bon Appetit, does not use any trans-fats in any of their cooking. There may be a few pre-prepared foods available that have trans-fats, but they are not in anything made in the kitchen. Using only heart-healthy oils and fats in all of their cooking is a policy of Bon Appetit's.

Reusable To-Go Containers

Provisional Score  |  Responsible Party
0.00 / 0.25       |  Jacob Massoud
                   |  Assistant Professor of Strategic Management
                   |  School of Business and Leadership

Submission Note:

Although Dominican does not currently have a reusable to-go container program, it does have them available to faculty and staff. Dominican is open to exploring the potential for implementing a program in the future, possibly requiring that students provide deposits for containers.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Energy

Points Claimed  0.75

Points Available  16.50

This subcategory seeks to recognize institutions that are reducing their energy consumption through conservation and efficiency, and switching to cleaner and renewable sources of energy such as solar, wind, geothermal, and low-impact hydropower. For most institutions, energy consumption is the largest source of greenhouse gas emissions, which cause global warming. Global warming is expected to have myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are expected to be particularly pronounced for poor communities and countries. In addition to causing global warming, energy generation from fossil fuels, especially coal, produces air pollutants such as sulfur dioxide, nitrogen oxides, mercury, dioxins, arsenic, cadmium and lead. These pollutants contribute to acid rain as well as health problems such as heart and respiratory diseases and cancer. Coal mining and oil and gas drilling can also damage environmentally and/or culturally significant ecosystems. Nuclear power creates highly toxic and long-lasting radioactive waste. Large-scale hydropower floods habitat and disrupts fish migration.

Implementing conservation measures and switching to renewable sources of energy can help institutions save money and protect them from utility rate volatility. Renewable energy may be generated locally and allow campuses to support local economic development. Furthermore, institutions can help shape markets by creating demand for cleaner, renewable sources of energy.

Building Energy Consumption

Provisional Score

0.00 / 8.00

Responsible Party

Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

Criteria

Institution has reduced its total building energy consumption per gross square foot of building space compared to a 2005 baseline.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

1 kWh = 0.003412 MMBtu
1 MWh = 3.412 MMBtu
1 therm = 0.1 MMBtu
1 kBtu = 0.001 MMBtu
1 ton-hour = 0.012 MMBtu
1 MJ = 0.000948 MMBtu

"---" indicates that no data was submitted for this field

Total building energy consumption, 2005 :
21439 MMBtu

Building space, 2005 :
370608 Gross Square Feet

Total building energy consumption, performance year :
35027 MMBtu

Building space, performance year :
420958 Gross Square Feet

List the start and end dates of the energy consumption performance year :
Data for one year 07/01/10 - 06/30/11
Clean and Renewable Energy

Criteria

Institution supports the development and use of clean and renewable energy sources using any one or combination of the following options.

Option 1: Generating electricity from clean and renewable energy sources on campus and retaining or retiring the rights to the environmental attributes of such electricity. (In other words, if the institution has sold Renewable Energy Credits for the clean and renewable energy it generated, it may not claim such energy here). The on-site renewable energy generating devices may be owned and/or maintained by another party as long as the institution has contractual rights to the associated environmental attributes.

Option 2: Using renewable sources for non-electric, on-site energy generation, such as biomass for heating.

Option 3: Catalyzing the development of off-site clean and renewable energy sources (e.g. an off-campus wind farm that was designed and built to supply electricity to the institution) and retaining the environmental attributes of that energy.

Option 4: Purchasing the environmental attributes of electricity in the form of Renewable Energy Certificates (RECs) or other similar renewable energy products that are either Green-e Energy certified or meet Green-e Energy’s technical requirements and are verified as such by a third party, or purchasing renewable electricity through the institution’s electric utility through a certified green power purchasing option.

Option 5: Using cogeneration technologies to generate electricity more efficiently. Note: generating electricity using cogeneration technology and a renewable fuel, such as biomass, is considered Option 1 and should not be counted twice.

Since this credit is intended to recognize institutions that are generating new sources of clean and renewable energy, neither the electric grid mix for the region in which the institution is located nor the grid mix reported by the electric utility that serves the institution count for this credit.

Technologies that reduce the amount of energy used but do not generate renewable energy do not count for this credit. For example, daylighting, passive solar design, and ground-source heat pumps are not counted in this credit. The benefits of such strategies are captured by OP Credit 5: Greenhouse Gas Emissions Reductions and OP Credit 7: Building Energy Consumption.

Transportation fuels, which are covered by OP Credit 14: Campus Fleet, are not included in this credit.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

1 kWh = 0.003412 MMBtu

1 MWh = 3.412 MMBtu

1 therm = 0.1 MMBtu

1 kBtu = 0.001 MMBtu
1 ton-hour = 0.012 MMBtu

1 MJ = 0.000948 MMBTU

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Timers for Temperature Control

Provisional Score

0.25 / 0.25

Responsible Party

Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

"---" indicates that no data was submitted for this field

Does the institution use timers to regulate temperatures based on occupancy hours in at least one building? :
Yes

A brief description of the technology used :

Time clocks technology is used to regulate the temperature in 89% of Dominican’s building space. Currently, the following buildings have this system: Alemany Library, Angelico Hall, Bertrand Hall, Caleruega Hall, Fanjeaux Hall, Guzman Hall, Meadowlands, Pennafort Hall, Conlan Recreation Center, Science Center and Magnolia House.
In these buildings, 100% of the occupied space is covered by this control system. Facilities authorized staff only manage and control the time clocks, the authorized employee manages the boilers in order to turn on and off the heat in the buildings.

The percentage of building space (square footage) with timers for temperature control :
76

"---" indicates that no data was submitted for this field

Does the institution meter all energy consumption (electricity, natural gas, purchased steam, etc.) for at least one building?:

Yes

A brief description of the metering system:

92% of the building space of Dominican has energy metering, however, 30% of the building space has building-level energy meter, which use the PG&E SmartMeter technology.

The following buildings have the PG&E SmartMeter technology to meter all energy consumption: Edgehill Mansion, Edgehill Village, Conlan Recreation Center, Bertrand Hall, and the Facilities' building. All other buildings also have PG&E Meters but not SmartMeters.

The SmartMeter™ electric meter records hourly meter reads and periodically transmits the reads via a dedicated radio frequency (RF) network back to PG&E. Each SmartMeter™ electric meter is equipped with a network radio, which transmits meter data to a electric network access point. The system uses RF mesh technology, which allows meters and other sensing devices to securely route data via nearby meters and relay devices, creating a "mesh" of network coverage. The system supports two-way communication between the meter and PG&E. The electric network access point collects meter data from nearby electric meters and periodically transfers this data to PG&E via a secure cellular network. Source: PG&E Website

The SmartMeter™ gas system uses point-to-point RF technology to transmit gas usage data from SmartMeter™ gas modules back to PG&E over a dedicated, secure wireless network. Due to the simpler data requirements of the gas system, the SmartMeter™ gas system supports only one-way communication from customers to PG&E. This module is outfitted with a radio frequency (RF) transmitter. The module records daily meter reads and then uses an RF signal to transmit the reads to a data collector unit in the vicinity. The data collector unit (DCU), in turn, collects meter reads from many meters and securely transmits the gas usage data over a secure wireless network back to PG&E. Source: PG&E Website

The percentage of building space with energy metering:

92

Criteria

Institution’s grounds are developed and maintained in accordance with an integrated pest management plan that adheres to the following four-tiered approach:

1) Set action thresholds
2) Monitor and identify pests
3) Prevention
4) Control

"---" indicates that no data was submitted for this field

The size of the campus grounds:

81.39 Acres

The size of campus grounds that are maintained in accordance with a four-tiered IPM plan:

60 Acres

A brief description of the IPM plan(s):

Dominican’s facilities department follows the 4-tiered Integrated Pest Management System. Action thresholds are set depending on the type of pest and its location. Student safety is a determining factor; if student safety is an issue, then control will be an issue. Trees are also prioritized in the landscape, so if pests are attacking trees, control may be employed. Pests are monitored and identified to ensure accurate and appropriate decisions are made. Focus is on prevention, keeping the plants very healthy, since healthy plants tend to be less susceptible to pests. In the case of infestation, many plants will be replaced with something that would resist the pest, rather than implementing pest control. To keep weeds out, lawns are aerated, and mulch is used as a preventative throughout the grounds. With deer, one of the major pests, their behavior is studied and then strategies are put in place to discourage that behavior. If pest control is required, it is targeted and specific, and no broadcast spraying is done. Organic horticulture oil is used for pests on trees, a systemic insecticide is used for a specific pest and spot spraying of herbicides is done on pathways. Scotch broom is removed by hand, and then some specific, targeted spraying of herbicides may be done on thistles that come up.

Does the institution prioritize the use of native plant species in landscaping? :
Yes

A brief description of the native plant program, policy, or practice :
Native plants are used in the landscape throughout campus when they fit in with the design of an area. Native plants are also used in new plantings along Dominican’s two creeks. Non-native eucalyptus trees are being replaced with native redwoods and oaks. Currently, approximately 30% of the campus landscape consists of native plants, but with the continued replacement of eucalyptus, eventually more of the landscape will be native.

Does the institution compost or mulch waste from grounds keeping, including grass trimmings? :
Yes

A brief description of the composting or mulching program :
Dominican’s facilities department is composting and mulching the waste from landscaping, including grass trimmings. All leaf debris is blown onto the lawns, and the lawn mower picks up grass clippings and leaf debris, which are then brought to the compost area. If there is no lawn nearby, leaf debris is collected in tarps and brought to the compost area. All grass clippings are either composted or left on the lawn for grass cycling. There is a compost pile system consisting of five piles, with compost at different stages. It takes about 3 months to create a pile, which then gets turned and is used to create a new pile. Another pile grows in its place. When they start to break down, piles move along in this fashion and each gets turned 4-5 times total. Typically, it takes approximately 12-15 months for the compost to be ready to be used in the landscaping on campus. Downed branches and pruning debris are brought to the chip pile, where a tree company hired by Dominican chips the branches to create mulch. The mulch is then distributed throughout campus.

The percentage of landscape waste that is mulched or composted onsite :
100

The percentage of landscape waste that is mulched or composted off-site :

Assistant Professor of Strategic Management
School of Business and Leadership

Submission Note:

Although Dominican doesn't currently state a preference for local products and businesses in its procurement policy, it does make many of its purchases from local businesses. The Facilities Department, which makes the bulk of Dominican's purchases, attempts to use local businesses as much as possible, and currently most of the businesses utilized are within the county. A recommendation is being made that Dominican add a preference for local purchases to its procurement policy.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Transportation

Points Claimed 1.18

Points Available 11.50

This subcategory seeks to recognize institutions that are moving toward sustainable transportation systems. Transportation is a major source of greenhouse gas emissions and other pollutants that contribute to health problems such as heart and respiratory diseases and cancer. Due to disproportionate exposure, these health impacts are frequently more pronounced in low-income communities next to major transportation corridors. In addition, the extraction, production, and global distribution of fuels for transportation can damage environmentally and/or culturally significant ecosystems and may financially benefit hostile and/or oppressive governments.

At the same time, campuses can reap benefits from modeling sustainable transportation systems. Bicycling and walking provide human health benefits and mitigate the need for large areas of paved surface, which can help campuses to better manage storm water. Institutions may realize cost savings and help support local economies by reducing their dependency on petroleum-based fuels for transportation.

Criteria

Institution supports alternative fuel and power technology by including in its motorized vehicle fleet (cars, trucks, tractors, buses) vehicles that are:

1. Gasoline-electric hybrid
2. Diesel-electric hybrid
3. Plug-in hybrid
4. 100 percent electric
5. Fueled with Compressed Natural Gas (CNG)
6. Hydrogen fueled
7. Fueled with B20 or higher biofuel for more than 6 months of the year; and/or
8. Fueled with E85 or higher ethanol for more than 6 months of the year.

For this credit, the institution’s motorized fleet includes all institution-owned and operated vehicles that are used for transporting people and/or goods. Heavy construction equipment (e.g. excavators and pavers) and maintenance equipment (e.g. lawn-mowers and leaf blowers) are not included in this credit.

"---" indicates that no data was submitted for this field

Waste

Points Claimed  2.86

Points Available  12.50

This subcategory seeks to recognize institutions that are moving toward zero waste by reducing, reusing, recycling, and composting. These actions mitigate the need to extract virgin materials, such as trees and metals. It generally takes less energy and water to make a product with recycled material than with virgin resources. Reducing waste generation also reduces the flow of waste to incinerators and landfills which produce greenhouse gas emissions, can contaminate air and groundwater supplies, and tend to have disproportionate negative impacts on low-income communities. Waste reduction and diversion also save institutions costly landfill and hauling service fees. In addition, waste reduction campaigns can engage the entire campus community in contributing to a tangible sustainability goal.

Criteria

Institution has implemented source reduction strategies to reduce total waste generation (garbage, recycling, and compost) per weighted campus user compared to a 2005 baseline.

Total waste generation includes all materials recycled, composted, and disposed of as trash except construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP Credit 19: Construction and Demolition Waste Diversion, OP Credit 20: Electronic Waste Recycling Program, and OP Credit 21: Hazardous Materials Management.

Submission Note:

The following activities have been contributing to the waste reduction at Dominican: limited printing to students; double-sided printing capability for most printers; an informal program to exchange materials among the University staff; and the adoption of a paperless strategy for forms, instructions, class calendars, schedules, and catalogs; a recycling program for the entire campus (excluding the dining hall); residence halls move-out waste reduction (donation of unwanted items to local charities); and an on-site green waste composting system.

The timeframe for the Baseline Year is Dec 05 to Nov 06.

The Weight of Material disposed as garbage in 2005 was computed as follow:
For the timeframe of Dec 05 to Mar 06 - the weight of materials disposed as garbage was estimated using a trendline based on 5 years worth of data. And, for the timeframe of April 06 to Nov 06 - the weight of the materials disposed as garbage is the actual data from the sanitation company.

The Campus Users figure for the baseline year is the average number of students per semester in the 2005-2006 academic year plus the number of faculty and staff in the FY2005-06; and for the performance year, the campus users figure is the average number of students per semester in the 2010-2011 academic year plus the number of faculty and staff in the FY2010-11.

The on-campus residents figure was calculated using the same methodology (average number of on-campus residents per semester in the academic year) for both baseline and performance year.

--- indicates that no data was submitted for this field

Weight of materials recycled, 2005 baseline year:

0 Tons
Weight of materials composted, 2005 baseline year:
0.06 Tons

Weight of materials disposed as garbage, 2005 baseline year:
234.70 Tons

Weight of materials recycled, performance year:
43.72 Tons

Weight of materials composted, performance year:
0.06 Tons

Weight of materials disposed as garbage, performance year:
241.20 Tons

List the start and end dates of the waste reduction performance year:
July 2010 - June 2011

On-campus residents, 2005:
522

Non-residential/commuter full-time students, faculty, and staff members, 2005:
1088

Non-residential/commuter part-time students, faculty, and staff members, 2005:
723

On-campus residents, performance year:
434

Non-residential/commuter full-time students, faculty, and staff members, performance year:
1353

Non-residential/commuter part-time students, faculty, and staff members, performance year:
837

Time period for weighted campus user (list the consecutive 12 month period that most closely overlaps with waste reduction performance year):
July 2010 - June 2011

Indication of whether institution has a stated commitment to waste-reduction goals, such as zero waste:
No

A brief description of the plan of action to achieve waste reduction goals:

</table>

**Criteria**

Institution diverts materials from the landfill or incinerator by recycling, composting, reusing, donating, or re-selling.

This credit does not include construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in *OP Credit 19: Construction and Demolition Waste Diversion, OP Credit 20: Electronic Waste Recycling Program*, and *OP Credit 21: Hazardous Materials Management*.

"---" indicates that no data was submitted for this field

**Materials recycled, composted, reused, donated, re-sold, or otherwise diverted**:

61.61 Tons

**Materials disposed in a solid waste landfill or incinerator**:

241.20 Tons

**A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate**:

In 2008 Dominican's custodial service provider presented a recycling plan proposal to implement a recycling program in the entire campus, excluding only the Dining Hall - which is managed by a third party company. According to the plan it was estimated to recycle an average of 18 tons of debris annually. For the FY2010-11 it is estimated that Dominican diverted from the landfill an average of 31.72 tons of debris.

Other programs, such as residence halls move-out waste reduction (donation of unwanted items to local charities) and an on-site composting pile have been contributing to the additional tons of trash diverted from the landfill, respectively, 12 tons and 17.89 tons.
Construction and Demolition Waste Diversion

<table>
<thead>

</tbody>
</table>

**Assistant Professor of Strategic Management**

**School of Business and Leadership**

**Criteria**

Institution diverts non-hazardous construction and demolition waste from the landfill and/or incinerator.

Soil and organic debris from excavating or clearing the site do not count for this credit.

"---" indicates that no data was submitted for this field

**Amount of construction and demolition materials recycled, donated, or otherwise recovered:**

2009.03 Tons

**Amount of construction and demolition materials landfilled or incinerated:**

2.29 Tons

**A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contribute to the diversion rate for construction and demolition waste:**

California as well as the City of San Rafael have strict regulation regarding construction and demolition waste. According to San Rafael Green Building Requirements - ordinance #1879 & 1881 - pg 11 - "at least 50% of all construction and demolition debris generated by the project will be diverted.” However, Dominican made a greater effort and diverted 78.2% of its construction and demolition waste in the year of 2010.
# Electronic Waste Recycling Program

## Criteria

### Part 1

Institution has a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution. Institution takes measures to ensure that the electronic waste is recycled responsibly.

### Part 2

Institution has a program in place to recycle, reuse, and/or refurbish electronic waste generated by students. Institution takes measures to ensure that the electronic waste is recycled responsibly.

"---" indicates that no data was submitted for this field.

---

**Does the institution have a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution and take measures to ensure that the electronic waste is recycled responsibly?**

Yes

**Does the institution have a program in place to recycle, reuse, and/or refurbish electronic waste generated by students and take measures to ensure that the electronic waste is recycled responsibly?**

No

**A brief description of steps taken to ensure that e-waste is recycled responsibly, workers’ basic safety is protected, and environmental standards are met:**

1st step - Electronic waste (computers, monitors, printers, keyboards, mice, cables, refrigerators, and scales) is brought to the IT department.
2nd step - A local technology recycler company collects, roughly bi-monthly, all the e-waste.
3rd step - Once the electronic waste is collected at DUC it is reused or transferred to a State approved recycler.

**A brief description of the electronic waste recycling program for institution-generated materials:**

Staff and Faculty are aware they can bring their e-waste to the IT department for recycling. As reinforcement, in the week that the recycler comes to the University to collect Dominican's electronic waste, IT sends an informative email to remind people to bring their material.
A brief description of the electronic waste recycling program for student-generated materials:

Does the institution limit free printing for students in all computer labs and libraries? :
Yes

A brief description of how printing is limited :

Students can print their work at printing stations located in the libraries; to authorize the printing students need to swipe their I.D. card in the printer. Each student receives every semester a limited number of 100-page free printing credits, which are controlled through their I.D. card. After that amount every printing is charged. Art students and others who use the small computer labs and classrooms, pays an additional fee along with their tuition to allow them a larger amount of printing during class work, which is then controlled by the professor.

The website URL where information about the program, policy, or practice is available :
---
Is the institution's default not to print course catalogs, course schedules, and directories, but instead make these materials available online? :
Yes

A brief description of the practice :
To support University efforts to achieve financial sustainability and to align with its strategic goals Dominican has been going paperless since 2010. The Registrar office digitizes all paper forms and printed instructions as well as publishes online all class calendars, schedules, and catalogs.

The website URL where information about the practice is available :

Does the institution have a program to reduce residence hall move-out waste? :
Yes

A brief description of the program :

Program is coordinated by Sister Carla Kovack - Campus Ministry. In the end of the academic year, a group of students, normally, from the Residential Advisory group, collect the waste from the dorms, bring it to a central place - within the University boundaries, sort the material, and distribute it at different local non-profit organizations, such as home shelters. Each year they divert around 60-100 cubic yards of unwanted materials which includes blankets, bedspreads, cleaning supplies, food, books, school supplies, microwaves, fridges and others.

The website URL where information about the program is available :

**Water**

**Points Claimed**  8.18  
**Points Available**  10.25  

This subcategory seeks to recognize institutions that are conserving water and making efforts to protect water quality. Pumping, delivering, and treating water is a major energy user, so institutions can help reduce energy consumption and the greenhouse gas emissions associated with energy generation by conserving water. Likewise, conservation and effective stormwater management are important in maintaining and protecting finite groundwater supplies. Water conservation and effective stormwater management also reduce the need for effluent discharge into local surface water supplies, which helps improve the health of local water ecosystems.

</tr>
</tbody>
</table>

Criteria

Institution has reduced its total water consumption per weighted campus user compared to a 2005 baseline.

Total water consumption includes both potable and non-potable water.

Submission Note:

The Campus Users figure for the baseline year is the average number of students per semester in the 2005-2006 academic year plus the number of faculty and staff in the FY2005-06; and for the performance year, the campus users figure is the average number of students per semester in the 2010-2011 academic year plus the number of faculty and staff in the FY2010-11.

The on-campus residents figure was calculated using the same methodology (average number of on-campus residents per semester in the academic year) for both baseline and performance year.

To calculate the water consumption the following methodology was used:

For the performance year: the water consumption figure for the FY2010-11 (July 2010-June 2011) is the average water usage of the calendar years 2010 and 2011.

For the baseline year: the water consumption figure for the FY2005-06 (July 2005-June 2006) is the average water usage of the calendar years 2005 and 2006.

"---" indicates that no data was submitted for this field

**Water consumption, 2005 baseline year:**
14067262 Gallons

**Water consumption, performance year:**
11303402 Gallons

**List the start and end dates of the water consumption performance year:**
July 2010 to June 2011

**On-campus residents, 2005:**
522
Non-residential/commuter full-time students, faculty, and staff members, 2005:
1088

Non-residential/commuter part-time students, faculty, and staff members, 2005:
723

On-campus residents, performance year:
434

Non-residential/commuter full-time students, faculty, and staff members, performance year:
1353

Non-residential/commuter part-time students, faculty, and staff members, performance year:
837

Time period for weighted campus user (list the consecutive 12 month period that most closely overlaps with water consumption performance year):
July 2010 to June 2011

Indication of whether institution has a stated commitment to water use reduction goals:
No

A brief description of the plan of action to achieve water use reduction goals:
Even though Dominican does not have a formal commitment to achieve water use reduction this practice is been pursued by Facilities; this department has the following strategies for water reduction: use of non-potable water for irrigation, replacement of foreign plants for California native plants, and use of weather-informed irrigation.

**Assistant Professor of Strategic Management**  
**School of Business and Leadership**

### Criteria

#### Part 1

Institution has adopted a stormwater management policy, plan, and/or strategies that mitigate the stormwater runoff impacts of new construction, major renovation, and other projects that increase paved surface area on campus or otherwise significantly change the campus grounds.

The policy, plan, and/or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

The policy, plan, and/or strategies cover the entire campus. While the specific strategies or practices adopted may vary depending on project type and location, this credit is reserved for institutions that mitigate stormwater runoff impacts consistently during new construction. Implementing a strategy or strategies for only one new development project is not sufficient for this credit.

Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

#### Part 2

Institution has adopted a stormwater management policy, plan, or strategies that mitigate the stormwater runoff impacts of ongoing campus operations.

The policy, plan, or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

Though specific practices adopted may vary across the campus, the policy, plan, and/or strategies cover the entire institution. Implementing strategies for only one building or area of campus is not sufficient for this credit.

---

"---" indicates that no data was submitted for this field

**Does the institution have a policy, plan, and/or strategies to reduce stormwater runoff from new development projects?**

No

**Does the institution have a policy, plan, and/or strategies to reduce stormwater runoff from ongoing campus operations?**

Yes
A brief description of the institution's stormwater management initiatives:

Dominican has stone and vegetated swales and three retention basins in order to manage the storm water. A medium size basin is located close to the Edgehill Village Dorms and two large basins are located along the soccer field.

In general, water runoff is diverted to a swale. The swale directs water to a large basin allowing water to percolate into the ground what ends up in the University well. Which then, DUC uses this water to irrigate the landscaping.

During heavy rains, if basins fill with water, there is an overflow allowing water to go to the creek. This process holds the water and slowly drains it into the creek rather than it all going once swelling the creek to high levels.

In the new athletic field, water is diverted to the two large trenches - which are the length of the field - these are filled with drain rock. Near the bottom of the trench there is a small pipe that diverts the water, at a slow rate, out to the creek.

All these initiatives were thought of in the design of new development projects, which was laid out in the architectural plans.

The website URL where information about the institution's stormwater management initiatives, plan or policy is available:

---

Does the institution have a living or vegetated roof?

No

A brief description of the institution's living or vegetated roof:

---

Does the institution have porous paving?

No

A brief description of the institution's porous paving:

---

Does the institution have retention ponds?

Yes

A brief description of the institution's retention ponds:

DUC has three retention basins - 2 large and 1 medium - there is one close to the Edgehill Village Dorms and two close to the soccer field.

In the newest athletic field, water is diverted to two large trenches - which are the length of the field - these are filled with drain rock. Near the bottom of the trench there is a small pipe that diverts the water, at a slow rate, out to the creek.
Does the institution have stone swales? : Yes

A brief description of the institution's stone swales :
Stones are placed along the swales to allow water to flow into the creeks when it rains.

Does the institution have vegetated swales? : Yes

A brief description of the institution's vegetated swales :
As with stone swales, vegetation is placed along the swale to allow water to flow into the creeks in case of heavy rains.

Does the institution employ any other technologies or strategies for stormwater management? :
---

A brief description of other technologies or strategies for stormwater management employed :
---

Cooperation and Planning

Points Claimed 12.00
Points Available 18.00

This subcategory seeks to recognize colleges and universities that are institutionalizing sustainability by dedicating resources to sustainability coordination, incorporating sustainability into their primary campus plans, and developing plans to move towards sustainability. Staff and other resources help an institution organize, implement, and publicize sustainability initiatives. These resources provide the infrastructure that fosters sustainability within an institution. Strategic and physical campus plans guide an institution and its physical development. These important documents establish an institution’s priorities and influence budgeting and decision making. Incorporating sustainability into these plans is an important step in making sustainability a campus priority and may help advocates implement sustainable changes. Sustainability plans and climate plans provide a road map for how to achieve sustainability goals.

**Criteria**

Institution has a sustainability committee, office, and/or coordinator that are tasked by the administration or board of trustees to advise on and implement policies and programs related to sustainability on campus.

The committee, office, and/or coordinator focus on sustainability broadly (i.e. not just one sustainability issue, such as climate change) and cover the entire institution. A committee, office, or coordinator that focuses on just one department or school within the institution does not count for this credit.

---

**Does the institution have a sustainability committee?**

Yes

**The charter or mission statement of the committee or a brief description of the committee's purview and activities:**

Dominican has a committee named the Campus Sustainability and Utilization Policy Committee (CSUPC), which is an umbrella for the Greener Dominican Task Force. The purpose of the task force is to support Dominican University of California in becoming an environmentally sustainable campus. Its role is to serve as a resource to the University’s governance system by assessing environmentally-focused policies, procedures and practices leading to the development of plans of action that will help Dominican to become a model of environmental sustainability. The CSUPC meets approximately eight times per year. Some of its accomplishments have been: developing a "green statement" for the university, recommending an integrated pest management system, conducting a campus tap water survey, developing a recycling program, implementing light bulb replacements and establishing a "Green Heroes" program.

**Members of the committee, including affiliations:**

Arthur Scott, Faculty, Humanities; Vania Coelho, Sustainability Coordinator, Faculty, Natural Science; Mary Croby, Faculty, Education; Jane Lorand, Faculty, Business and Leadership; John Duvall, Faculty, Communications; Susan Briski, Adjunct Faculty, Business and Leadership; Elaine McCarty, Staff, Green MBA Program; Jennifer Krengel, Staff, Marketing and Public Relations; Brandon Ernst, Student, Green Club

Does the institution have a sustainability coordinator? :
Yes

Sustainability coordinator's name :
Vania Coelho

Sustainability coordinator's position title :
Faculty Coordinator for the Center for Sustainability

A brief description of the sustainability coordinator’s position :
The Sustainability Coordinator at Dominican is a faculty member who works out of Dominican’s Center for Sustainability. The responsibilities of the position include providing support to the Center that will lead to an understanding of its clients and markets, conducting qualitative and quantitative assessments for determining client needs and measuring client satisfaction. They also include managing external relationships, with a focus on relationships within the University, including the Center’s public relations program and working on funding issues. With the assistance of the advisory board, the coordinator leads the design of new programs and services to be offered by the Center, building pilot programs and services, as well as evaluating and refining existing programs and services. Responsibilities also include managing the Center’s improvement and change by improving processes and systems. Additionally, the coordinator administers sustainability education and research grants for Dominican faculty.

Criteria

Institution’s current, formally adopted strategic plan or equivalent guiding document includes sustainability at a high level. The plan covers the entire institution.

An amendment to the strategic plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a physical campus plan (which is covered in PAE Credit 3: Physical Campus Plan) nor an independent sustainability plan (which is covered in PAE Credit 5: Sustainability Plan) counts for this credit.

"---" indicates that no data was submitted for this field

Year the strategic plan or equivalent was completed or adopted:
2009

Does the institution's strategic plan or equivalent guiding document include the environmental dimensions of sustainability at a high level?
Yes

A brief description of how the strategic plan or amendment addresses the environmental dimensions of sustainability:
Although environmental sustainability isn’t addressed at the highest level as one of the vision themes for the strategic plan, it is included in the key performance indicators for Vision Theme 7: State-of-the-Art Facilities and Processes. The key performance indicator is Carbon Footprint, which sets goals for reductions in emissions. The strategic initiative developed to help meet this performance goal reads, “Develop and adopt a campus-wide greening project, including transportation plan, leading to a Sustainability Campus Leadership Award from the Association to Advance Sustainability in Higher Education.”

Does the institution's strategic plan or equivalent guiding document include the social dimensions of sustainability at a high level?
Yes

A brief description of how the strategic plan or amendment addresses the social dimensions of sustainability:
The mission statement included in the strategic plan addresses social sustainability, as it reads, “Dominican University of California educates and prepares students to be ethical leaders and socially-responsible global citizens who incorporate the Dominican values of study, reflection, community, and service into their lives.”

The strategic plan at a high level is infused with social sustainability by emphasizing and prioritizing the experience and welfare of the people at the institution, namely the students. The highest level of the Strategic Plan consists of nine vision themes, and Vision Theme 4 is Student Intellectual and Personal Growth. It states, “Student development will encompass intellectual, physical, and spiritual growth,” and outlines measurable performance goals to track progress toward this objective, including student satisfaction surveys. It also includes two strategies initiatives that were developed to accomplish the performance goals. They are as follows: 1) Redesign system for career and life planning, internship, and placement assistance to ensure that all students have had at least two internships and at least three competitive job offers or graduate school admission offers by the time of graduation and 2) Design, develop, and implement Student Center, living-learning communities, and opportunities for well-rounded university life, thereby promoting total wellness through the integration of the academic, spiritual, social, emotional, and physical dimensions of student lives.

Three of the other vision themes address social sustainability as well: Vision Theme 3: Engaged Students and Alumni, Vision Theme 6: Motivated and Developed Faculty and Staff Aligned with Institutional Need and Vision Theme 8: Visionary, Effective, and Mission-Driven Leadership and Culture.

Does the institution's strategic plan or equivalent guiding document include the economic dimensions of sustainability at a high level? : Yes

A brief description of how the strategic plan or amendment addresses the economic dimensions of sustainability :

The executive summary for Dominican’s Strategic Plan states: “The Strategic Plan will be the roadmap for achieving a financially sustainable university that is fully prepared to face the challenges of the 21st century.”

The highest level of the Strategic Plan consists of nine vision themes, and Vision Theme 1 is Financially Sustainable University. The plan provides an explanation of how the realization of each of the other vision-themes will create the end result of financial sustainability for the university. There are key performance indicators listed that are used to assess progress toward achieving a financially sustainable university. Performance goals are given for each of the key performance indicators of financial sustainability, as well as the strategic initiatives that will be implemented to accomplish the goals.

The website URL where information about the strategic plan is available :

Physical Campus Plan

Provisional Score | Responsible Party
--- | ---
0.00 / 4.00 | Jacob Massoud

Assistant Professor of Strategic Management
School of Business and Leadership

Criteria

Institution’s current plan for its physical campus (commonly referred to as the campus master plan) includes sustainability at a high level.

An amendment to the plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a strategic plan (which is covered in PAE Credit 2: Strategic Plan) nor an independent sustainability plan (which is covered in PAE Credit 4: Sustainability Plan) counts for this credit.

Plans developed at the system level are eligible for this credit. Likewise, multiple plans which together cover the institution’s entire physical campus are eligible for this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Sustainability Plan

---

Provisional Score

3.00 / 3.00

Responsible Party

Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

---

Criteria

Institution has a sustainability plan that was developed with input from faculty, staff, and students. The plan includes measurable goals with corresponding strategies and timeframes to achieve the goals. The plan need not be formally adopted.

The plan covers multiple sustainability topics and issues. Plans focused exclusively on climate change, which are covered by PAE Credit 5: Climate Plan, are not eligible for this credit.

Strategic or master plans that cover sustainability may count for this credit if they meet the other criteria outlined above.

---

"---" indicates that no data was submitted for this field

---

Does the institution have a sustainability plan that meets the criteria for this credit? :

Yes

A brief description of how multiple stakeholder groups were involved in developing the plan :

Faculty, Staff and Students were involved in the development of the initial plan in 2007. The plan was modified in 2010 and approved by a committee of faculty, staff and students.

A brief description of the plan’s measurable goals :

Dominican’s sustainability action plan includes 3 main strategic initiatives, with measurable goals for each of the initiatives. For each of the strategic initiatives below, the desired outcome or goal is as follows: Achieve the highest rating possible for Dominican in 5 years at the Sustainability Tracking Assessment and Rating System (STARS) developed by the Association for the Advancement of Sustainability in Higher Education (AASHE) in this particular area.

• Sustainability Strategic Initiative # 1 (SS1): Infusing sustainability in the campus-wide education (including curriculum and co-curriculum) and research
  o Campus-wide curriculum action plan
  o Campus-wide co-curriculum action plan
  o Campus-wide research action plan

• Sustainability Strategic Initiative # 2 (SS2): Transforming campus operations to incorporate sustainability principles
• Sustainability Strategic Initiative # 3 (SS3): Sustainability planning, administration and engagement

The plan includes detailed implementation steps for each of the initiatives, with measures of success, responsible parties, a timeline and resources needed for each of the steps.
A brief description of how progress in meeting the plan’s goals is measured:

Progress will be measured using the STARS assessment over the next five years. A Strategic Initiative Fund Grant was written and awarded to fund participation in the STARS assessment and to hire a team of personnel to perform the necessary data collection and information gathering for the assessment. This team will identify what is already being done in terms of the three initiatives and develop recommendations for further actions.

The website URL where more information about the sustainability plan is available:

**Criteria**

Institution has a formal plan to mitigate its greenhouse gas emissions. The plan includes a measurable, numerical goal or goals and a corresponding date or dates by which the institution aims to achieve its goal(s). The plan has been adopted by the institution’s administration.

A formal sustainability plan (i.e. a plan that has been adopted by the administration) counts for this credit if it includes climate change goals, strategies, and corresponding timeframes. Such a plan may also count toward *PAE Credit 4: Sustainability Plan.*

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Diversity and Affordability

Points Claimed 4.50
Points Available 13.75

This subcategory seeks to recognize institutions that are working to advance diversity and affordability on campus. In order to build a sustainable society, diverse groups will need to be able to come together and work collaboratively to address sustainability challenges. People of color and low-income communities tend to suffer disproportionate exposure to environmental problems. This environmental injustice happens as a result of unequal and segregated communities. To achieve environmental and social justice, society must work to address discrimination and promote equality. The historical legacy and persistence of discrimination based on racial, gender, religious, and other differences makes a proactive approach to promoting a culture of inclusiveness an important component of creating an equitable society. Higher education opens doors to opportunities that can help create a more equitable world, and those doors must be open through affordable programs accessible to all regardless of race, gender, religion, socio-economic status and other differences. In addition, a diverse student body, faculty, and staff provide rich resources for learning and collaboration.

Measuring Campus Diversity Culture

Criteria

Institution assesses attitudes about diversity and equity on campus and uses the results to guide policy, programs, and initiatives.

Institution may measure its culture of diversity and equity using one assessment for the entire institution or using separate assessments that taken together cover the entire institution.

Assessments conducted during the previous five years are eligible for this credit.

---

Has the institution assessed attitudes about diversity and equity on campus in a way that meets the criteria for this credit? :

Yes

A brief description of the assessment(s) :

The Diversity Campus Climate Survey was last conducted in Fall 2011, and the plan is to conduct it every 2-4 years. The validated instrument contractor is Educational Benchmarking. There is one version for students and another for faculty and staff. It consists of questions that deal with all aspects of diversity on campus, such as race & ethnicity, sex & gender, harassment, and disabilities, and the experience and climate around these issues. It also provides an opportunity to share examples of specific experiences.

Year the assessment was last administered :

2011

A brief description of how the results of the assessment(s) are used in shaping policy, programs, and initiatives :

The Diversity Coordinator works with the Diversity Action Committee (advocacy and advisory committee) to present the findings from the survey and make recommendations. The Diversity Coordinator also ensures that the administration supports the plan and provides directives campus wide. Data from the survey was used to inform the Diversity Plan for 2011-2015, which consists of action-oriented pieces.

The website URL where information about the assessment(s) is available :

Support Programs for Underrepresented Groups

Provisional Score 0.00 / 2.00

Responsible Party
Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

Criteria
Institution has mentoring, counseling, peer support, affinity groups, academic support programs, or other programs in place to support underrepresented groups on campus.

Submission Note:
Although Dominican has programs to support underrepresented groups within the student body, it is not pursuing the credit at this time, because it currently does not have programs for underrepresented groups within the faculty and the staff. The Campus Diversity Coordinator is available to faculty and staff for counseling, though. It is hoped that Dominican will offer programs for faculty and staff in the future.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.

</tbody>
</table>

*Assistant Professor of Strategic Management*

*School of Business and Leadership*

**Criteria**

Institution administers and/or participates in a program or programs to help build a diverse faculty throughout higher education.

Such programs could take any of the following forms:

- Teaching fellowships or other programs to support terminal degree students from underrepresented groups in gaining teaching experience. (The terminal degree students may be enrolled at another institution).
- Mentoring, financial, and/or other support programs to prepare and encourage undergraduate or other non-terminal degree students to pursue further education and careers as faculty members.
- Mentoring, financial, and/or other support programs for doctoral and post-doctoral students from underrepresented groups.

**Submission Note:**

Dominican has made a general commitment to a diverse faculty. Although it doesn't have programs that help increase the diversity of higher education faculty specifically as described by the credit, there are a couple departments on campus that have programs to introduce students to the activities of faculty members. The Center for Diversity Initiatives has two internships each semester for students of color to allow them to experience the work of faculty in this area. There is also a faculty-initiated program in the science department targeted at underrepresented groups of undergraduate students for working with faculty to learn research skills.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

Criteria

Institution has policies and programs in place to make it accessible and affordable to low-income students. Such policies and programs may include, but are not limited to, the following:

- Policies and programs to minimize the cost of attendance for low-income students
- Programs to equip the institution’s faculty and staff to better serve students from low-income backgrounds
- Programs to prepare students from low-income backgrounds for higher education such as the federal TRIO programs
- Scholarships for low-income students
- Programs to guide parents of low-income students through the higher education experience
- Targeted outreach to recruit students from low-income backgrounds
- Other admissions policies or programs
- Other financial aid policies or programs

Institutions are not required to have programs or policies in each of the above areas in order to earn this credit. They may pursue the policies and programs that are appropriate for their context.

**Does the institution make cultural competence trainings and activities available to all students?**

Yes

**A brief description of the cultural competence trainings and activities:**

The Director of Campus Diversity Initiatives offers two volunteer internships every semester to work in the Center for Diversity, and then those students act as agents of change on campus, educating other students. The Director of Campus Diversity Initiatives also goes to clubs and conducts cultural competency workshops. He is the general adviser for all Culture Focus Clubs, providing trainings and resources for them. Additionally, there are many educational, cultural events on campus that promote cultural competency.

**The website URL where information about the trainings and activities are available:**

---
Human Resources

Points Claimed  13.64

Points Available  19.75

This subcategory seeks to recognize institutions that have incorporated sustainability into their human resources programs and policies. This includes recognition for treating and remunerating their workers responsibly and fairly. An institution’s people define its character and capacity to perform; and so, an institution’s achievements can only be as strong as its community. An institution can bolster the strength of its community by making fair and responsible investments in its human capital. Such investments include offering benefits, wages, and other assistance that serve to respectfully and ethically compensate workers. Investment in human resources is integral to the achievement of a healthy and sustainable balance between human capital, natural capital, and financial capital.

In addition, this subcategory recognizes faculty and staff training and development programs in sustainability. Faculty and staff members’ daily decisions impact an institution’s sustainability performance. Equipping faculty and staff with the tools, knowledge, and motivation to adopt behavior changes that promote sustainability is an essential activity of a sustainable campus.

Sustainable Compensation

### Provisional Score

7.14 / 8.00

### Responsible Party

**Jacob Massoud**  
Assistant Professor of Strategic Management  
School of Business and Leadership

### Criteria

Institution evaluates, and updates as appropriate, its wages and benefits policies and its guidelines for contractors operating on campus to ensure that total compensation (wages plus benefits) for all on-campus workers is sufficient to enable these employees to meet their basic needs, as defined by the institution. This evaluation is completed at least once every three years.

Student workers are not covered by this credit.

While wages and total compensation set in the following ways may constitute sustainable compensation, institutions should conduct a basic needs assessment to ensure that the total compensation is adequate before claiming points for this credit:

- Paying prevailing wages for job type or classification
- Paying average or above average wages for the region or city where the institution is located
- Paying minimum wages or a set amount above the minimum wage

Policies and practices adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

"---" indicates that no data was submitted for this field

**Total number of employees working on campus (including contractors) :**

705

**Number of employees (including contractors) that the institution ensures earn sustainable compensation :**

629

**A brief description of how the institution ensures that its lowest-paid workers (including contractors, if applicable) receive sustainable compensation :**

Dominican follows the San Francisco Living Wage for all employees, the SF minimum wage is updated yearly and is above the federal minimum wage of $7.25/hour, according to the National Center for Policy Analysis.

http://www.ncpa.org/pub/ib105
Moreover, every three years Dominican studies the labor market to assess how much other colleges in the region are paying for their employees. It is a practice at DUC that employees are paid according to the labor market or above it.

The most recent year total compensation for the institution’s lowest-paid workers (including contractors, if applicable) was evaluated to ensure that it was sustainable:

2012

The website URL where information about the institution’s compensation policies and practices is available:
Employee Satisfaction Evaluation

Provisional Score

2.00 / 2.00

Responsible Party

Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

Criteria

Institution conducts a survey or other evaluation that allows for anonymous feedback at least once every five years to measure employee satisfaction. The survey or equivalent may be conducted institution-wide or may be done by individual departments as long as all departments are covered by a survey. The institution has a mechanism in place to address issues raised by the evaluation.

"---" indicates that no data was submitted for this field

Does the institution evaluate employee satisfaction in a way that meets the criteria for this credit?:

Yes

A brief description of the institution’s methodology for evaluating employee satisfaction:

Dominican utilizes the survey, "Great Colleges to Work For," every year. It covers issues like compensation, job satisfaction, benefits, work/life balance, shared governance, communication, fairness and respect. The results of the survey are addressed in the following manner: The Human Resources Director reviews the current survey and compares with the past year to look for declines to address; she then makes a proposal/recommendations to the President’s cabinet to try and implement changes(e.g. Communication scores went down, so a task force was created to address this and a program entitled “campus conversations” was started by the President).

The year the employee satisfaction evaluation was last administered:

2011

</tbody>
</table>

Criteria

Institution makes available training and/or other professional development opportunities in sustainability to all staff at least once per year.

Separate training opportunities for each department would count for this credit, as long as each staff member has an opportunity to learn about sustainability at least once per year.

It is not necessary that each staff member attend such trainings; the credit is based on making training available to all staff.

This credit applies to staff members only; it does not include faculty members.

The following training opportunities are not sufficient for this credit:

- Specialized training for a small group of staff
- The opportunity to participate in an institutional sustainability committee or group

Submission Note:

Dominican will hold a professional development workshop this year on the STARS assessment and how employees can participate in further promoting sustainability on campus. Future workshops will be supported by CSUPC.

"---" indicates that no data was submitted for this field

Does the institution make training and professional development opportunities in sustainability available to all staff? : Yes

A brief description of the sustainability trainings and professional development opportunities available to staff :

One sustainability-themed workshop per year supported by the Campus Sustainability and Utilization Policy committee.

The website URL where information about staff training opportunities in sustainability are available :

Sustainability in New Employee Orientation

Provisional Score

2.00 / 2.00

Responsible Party

Jacob Massoud
Assistant Professor of Strategic Management
School of Business and Leadership

Criteria

Institution covers sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff.

"---" indicates that no data was submitted for this field

Does the institution cover sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff? :

Yes

A brief description of how sustainability is included in new employee orientation :

The Human Resources Department includes sustainability information in its quarterly New Employee Welcome Lunch. It distributes and discusses guidance materials containing information on campus sustainability practices and principles.

The website URL for the information about sustainability in new employee orientation :

"---" indicates that no data was submitted for this field

Does the institution have an employee assistance or wellness program that provides counseling, referral, and well-being services to employees? :
Yes

A brief description of the employee wellness program, policy, or practice :
Dominican’s wellness program is named ‘Penguin Passport to Wellness’ after the university’s mascot and attempts to put wellness at employees’ fingertips through activities, policies and partnerships to foster a culture of wellness in the university community. It consists of a variety of opportunities offered by professionals such as health educators, nutritionists and exercise teachers and made available to employees. Some examples of wellness program offerings are yoga classes, a weekly healthy lifestyle discussion group and a health and wellness fair. Dominican also offers a service called Ability Assist, which is a confidential hotline for counseling on personal, legal and financial matters and for obtaining referrals.

Investment

Points Claimed  0.00

Points Available  16.75

This subcategory seeks to recognize institutions that make investment decisions that promote sustainability. Most institutions invest some of their assets in order to generate income. Together, colleges and universities invest hundreds of billions of dollars. Schools with transparent and democratic investment processes promote accountability and engagement by the campus and community. Furthermore, institutions can support sustainability by investing in companies and funds that, in addition to providing a strong rate of return, are committed to social and environmental responsibility. Investing in these industries also supports the development of sustainable products and services. Finally, campuses can engage with the businesses in which they are invested in order to promote sustainable practices.

Throughout this subcategory, the term “sustainable investment” is inclusive of socially responsible, environmentally responsible, ethical, impact, and mission-related investment.

Criteria

Institution has a formally established and active CIR or similar body that makes recommendations to the Board of Trustees on socially and environmentally responsible investment opportunities across asset classes, including proxy voting. The body has multi-stakeholder representation, which means its membership includes faculty, staff, and students and may include alumni, trustees, and/or other parties.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

A general committee that oversees the institution's investments does not count for this credit unless social and environmental responsibility is an explicit part of its mission and/or agenda.

This credit applies to institutions with endowments of US $1 million or larger. Institutions with endowments totaling less than US $1 million may choose to omit this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.

<td>School of Business and Leadership</td>
</tr>
</tbody>
</table>

Criteria

There are two possible approaches to earning this credit.

1) Institution filed or co-filed one or more shareholder resolutions that address sustainability or submitted one or more letters about social or environmental responsibility to a company in which it holds investments, during the previous three years.

and/or

2) Institution has conducted a negative screening of its entire investment pool within the last three years. This could take the form of prohibiting investment in an industry (e.g. tobacco or weapons manufacturing) or participating in a divestment effort (e.g. companies operating in South Africa during apartheid). The negative screen includes selling all but $2,000 or less of the affected direct holdings and writing a letter to all fund managers encouraging them to remove affected holdings as well.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the shareholder advocacy activities of those entities.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.

<td>School of Business and Leadership</td>
</tr>
</tbody>
</table>

Criteria

Institution invests in any of the following:

- Sustainable industries, such as renewable energy or sustainable forestry
- Businesses selected for exemplary sustainability performances
- Sustainability investment funds, such as a renewable energy investment fund
- Community development financial institutions (CDFI)
- Socially responsible mutual funds with positive screens.

Investment in a socially responsible mutual fund with only negative screens (i.e. one that excludes egregious offenders or certain industries, such as tobacco or weapons manufacturing) does not count for this credit.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

Public Engagement

Points Claimed  8.04
Points Available  31.75

This subcategory seeks to recognize institutions that give back to their communities through community service, engagement, and partnerships. Volunteerism and the sense of compassion that community service helps develop are fundamental to achieving sustainability. From tutoring children to removing invasive species to volunteering at a food bank, students, faculty, and staff can make tangible contributions that address sustainability challenges through community service. Community engagement can help students develop leadership skills while deepening their understandings of practical, real-world problems. Institutions can contribute to their communities by harnessing their financial and academic resources to address community needs. For example, faculty research and courses can focus on how to address community problems. In addition, colleges and universities can offer incentives for their graduates to pursue careers that fill community needs, and schools can use their prominence to advocate for sustainability outside of their institutions.

</tr>
</tbody>
</table>

Criteria

1) Innovation credits are reserved for new, extraordinary, unique, groundbreaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.

3) The innovative practice, policy, program, or outcome should have occurred within the past three years.

4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.

5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.

6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

7) Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

8) While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit.

9) Outcomes, policies, and practices that are innovative for the institution’s region or school type are eligible for innovation credits.

10) When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

"---" indicates that no data was submitted for this field

A brief description of the innovative policy, practice, program, or outcome:

The University has developed The Venture Greenhouse, an early-stage incubator for budding social and environmental entrepreneurs, a learning laboratory for the University’s business students, and a community resource for innovators, investors, sustainability advocates and new ventures. The Venture Greenhouse is located near the University and houses up to 12 companies at a time, with the goal of graduating them within one year. The mission of the Venture Greenhouse reads as follows: "Our mission is to accelerate the success of environmentally and socially beneficial ventures by providing a broad array of resources to entrepreneurs from Dominican University of California."
California and beyond. Our globally collaborative network of enterprises, professionals and partners will contribute to vibrant and sustainable economic development for Marin County and the Bay Area.

Criteria

1) Innovation credits are reserved for new, extraordinary, unique, ground-breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.

3) The innovative practice, policy, program, or outcome should have occurred within the past three years.

4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.

5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.

6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

7) Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

8) While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit.

9) Outcomes, policies, and practices that are innovative for the institution’s region or school type are eligible for innovation credits.

10) When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
