The fall of BSP after 2007 win

Vikas Kumar
Racial hatred is not new in the US. The debate over globalization and nationalism started by Trump has accelerated racial division.  
By Sudhish Ranjan

There is a long overdue recognition that racial hatred has been unleashed in the US in the past month by President Donald Trump. Trump has repeatedly attacked the Mexican government, and his chief strategist, Stephen K. Bannon, has called the Mexican president’s wife a “whore.”

The President-elect has also made a series of threats against Mexico, including demanding that Mexico pay for a wall on the US-Mexico border. These comments have raised concerns about the potential for violence and instability in the region.

In recent days, Trump has shifted his focus to other countries, including China, Iran, and Russia, criticizing them for their policies and leaders. Despite this, his rhetoric has continued to be inflammatory and divisive.

The American people have a right to expect a leader who respects all citizens, regardless of race, religion, or nationality. It is unclear if Trump will be able to fulfill this expectation, but his comments and actions so far have done little to suggest that he will.

In the end, it may be left to the courts to decide whether Trump’s words and actions have crossed the line into criminal activity. But the damage has already been done, and the country will have to work to repair the divisions that have been sown.

RACE AGAINST NON-WHITES

The party failed to rethink its ideology and retreated slowly from support base it had built already.

By Vikas Kumar

The BJP is a thug (con man), who lied to the people to form his government. You should resign! M. C. Srivastava, Singraul Singh, Ganchakar

Politics, not all lies are all lies. And not all truths.

SPORTS IN SCHOOL, A GAME-CHANGER

The central government’s proposal to integrate sports in the school curriculum is a welcome move. The government’s aim is to promote sports and games in students’ education. At present, physical education is an optional subject in most schools but they are mostly optional. The facilities and incentives to promote sports are not adequate.

The proposal will create opportunities for students to participate in a variety of sports and games. It will encourage students to pursue sports and develop an interest in the sport. It will also create awareness among students about the importance of regular physical activity.

In addition, the proposal will help in the development of teamwork and discipline among students. It will improve their mental and physical health. It will also help in the development of leadership skills among students.

However, the proposal needs to be implemented properly. The government must allocate adequate funds and create proper infrastructure to implement the proposal.

There should also be a proper mechanism to evaluate the impact of the proposal. The government should conduct regular surveys to assess the impact of the proposal.

In conclusion, the proposal to integrate sports in the school curriculum is a welcome move. It will help in the development of students and also promote sports in the country. But the government must implement the proposal properly to achieve its objectives.

Froth and Flammes: solution eludes Bellandur lake

Sir, I am an ordinary citizen of Bellandur lake. I have been living in the area for the past 10 years. I have seen the lake change from a beautiful water body to a dirty and polluted one. The lake is now full of froth and fire. The lake is no longer a place where people can enjoy the beauty of nature.

The government has not taken any serious steps to clean the lake. The lake is now a breeding ground for mosquitoes and other water-borne diseases. The lake is also a eyesore to the people living nearby.

The lake is now a dumping ground for waste. The people living around the lake are forced to breathe in the foul smell of the waste. The lake is also a source of water for the people living around the town.

I appeal to the government to take serious steps to clean the lake. The lake is an important water resource for the people living around the area.

The government should also take steps to control the use of fertilizers and other chemicals in the area. These chemicals are polluting the lake and other water bodies.

The government should also take steps to control the use of plastic and other waste. These waste are polluting the lake and other water bodies.

The government should also take steps to control the use of motor vehicles near the lake. The noise and pollution from the vehicles are polluting the lake and other water bodies.

The government should also take steps to control the use of fireworks near the lake. The fireworks are polluting the lake and other water bodies.

The government should also take steps to control the use of fireworks near the lake. The fireworks are polluting the lake and other water bodies.

The government should also take steps to control the use of fireworks near the lake. The fireworks are polluting the lake and other water bodies.
