From Weems to Graham: The Curious Evolution of Evolving Standards of Decency

Zachary Baron Shemtob

Available at: https://works.bepress.com/zachary_shemtob/1/
Since the 1958 case of Trop v. Dulles, the Supreme Court has held that grossly disproportionate punishments are cruel and unusual if they violate “the evolving standards of decency of a maturing society.” Traditionally, this was interpreted as prohibiting capital sentences for certain types of crimes and classes of offenders. More recently, in Graham v. Florida, the Court applied evolving standards to incarceration, banning the sentencing of juveniles who committed non-homicide crimes to life without parole.

This article breaks the Court’s understanding of evolving standards of decency into distinct periods. In each period the justices encountered a host of novel problems that they attempted, and often failed, to resolve. I discuss some additional complications in the wake of Graham, and conclude that this case’s inconsistent holding demands a more objective measure for what constitutes evolving standards of decency.

FROM WEEMS TO GRAHAM:
THE CURIOUS EVOLUTION OF EVOLVING STANDARDS OF DEGENCY

by Zachary Baron Shemtob*

I. INTRODUCTION

Few constitutional provisions have split the Supreme Court as consistently as the cruel and unusual punishments clause of the Eighth Amendment. Up until the twentieth-century, the Court exclusively interpreted this provision to ban “inherently barbaric punishments,” or those that involved “torture or a lingering death.”¹ This changed in Weems v. United States, where the Court struck a sentence as disproportionate to the crime committed.² Over time, constitutional concerns over disproportionality led to capital punishment’s restriction for certain types of crimes and classes of offenders.³ Most recently, in Graham v. Florida, the Court applied evolving standards to incarceration, banning the sentencing of juveniles who committed non-homicide offenses to life without parole.⁴

This article breaks the Court’s understanding of evolving standards of decency into different periods. In each period the justices encountered a host of novel problems that they attempted, and often failed, to resolve. These strains culminated in Graham v. Florida, which, by holding that punishments of incarceration and not just capital punishment can violate evolving standards of decency, represents a considerable shift in the Court’s evolving standards jurisprudence.

³ See infra Parts VI-VII.

I begin by outlining the categories of proportionality review. I then detail *Graham v. Florida*, summarizing this case’s four most important opinions. I discuss some remaining issues in the wake of *Graham*, and conclude that it is long past time for the Court to establish a more objective measure regarding what constitutes evolving standards of decency.

II. CASE TYPES

The Supreme Court has reviewed the cruel and unusual clause in three distinct types of cases. The first of these concern the method of punishment. In the 1879 case of *Wilkerson v. Utah*, for example, the Court concluded execution by firing squad was constitutional. More recently, in *Baze v. Rees*, the Court upheld the three-drug cocktail used in Kentucky’s lethal injection procedure.

The second types of cases concern jury discretion and appellate procedure. In the 1973 case of *Furman v. Georgia*, the Supreme Court struck existing capital punishment statutes for being arbitrarily and capriciously imposed. This led to the establishment of bifurcated trials and a more rigorous appellate review process. Subsequent case law has considered what mitigating and aggravating factors can be discussed in capital trials, and what factors are necessary for appellate courts to consider in such cases.

The final strain of cases, which are the focus of this article, center around the excessiveness of punishment, or if certain punishments are disproportionate when

---

9 See, e.g., *Lockett v. Ohio*, 438 U.S. 586 (1978) (where the Court held that sentencing authorities must be allowed to consider all possible mitigating evidence).
10 See, e.g., *Herrera v. Collins*, 506 U.S. 390 (1993) (where the Court held that the discovery of new evidence indicating a person’s innocence did not mandate federal habeas relief).
imposed for certain crimes or on particular types of offenders. The Court’s jurisprudence has varied considerably here. The following section details the most important cases, and some of the central questions raised in each.

III. THE PROPORTIONALITY QUESTION: WILKERSON AND O’NEIL

The first Supreme Court case to interpret the cruel and unusual punishments clause was Wilkerson v. Utah. In this case, a plaintiff sentenced to death for murder argued that being executed by firing squad, rather than by the standard method of hanging, was cruel and unusual.11 While a Court majority admitted it difficult to “define with exactness the extent of this “constitutional provision,” it declared this clause strictly “limited to” banning uniquely painful “modes of punishment” such as being drawn and quartered.12 The Court denied that execution by firing squad reached this level of cruelty, and held Wilkinson’s mode of death constitutional.13

Thirteen years later, a separate challenge emerged in O’Neil v. Vermont.14 In this case, John O’Neill was fined and sentenced to nearly eighty years incarceration for selling liquor without a license.15 While the majority dismissed O’Neill’s claim for lack of jurisdiction,16 the dissent, written by Justice Field and joined by Justice Harlan, found O’Neil’s punishment disproportionate and therefore unconstitutional.17 Justice Field admitted that the cruel and unusual provision generally applied to the method of punishment, such as “the rack and thumbscrew,” or those purposely “attended with acute

13 Id. at 137 (explaining that “other modes besides hanging were sometimes resorted to at common law.”).
14 144 U.S. 323 (1892).
15 Id. at 325.
16 Id. at 335 ("[T]he write of error must be dismissed for want of jurisdiction in this court.").
17 Id. at 337 ("It [O’Neil’s punishment] was one which, in its severity, considering the offences of which he was convicted, may justly be termed both unusual and cruel.").
pain and suffering.” Nevertheless, Field believed that the severity of O’Neill’s sentence was an exception, being “six times as great as a court in Vermont could have imposed for manslaughter, forgery or perjury.” While the Justice gave no historical or textual support for why disproportionate punishments were cruel and unusual, he declared O’Neil’s punishment “greatly beyond anything required by any humane law” and the plaintiff worthy of mercy.

IV. THE BIRTH OF EVOLVING STANDARDS: WEEMS, TROP, AND ROBINSON

Field’s dissent was resuscitated eighteen years later in the landmark case of Weems v. United States. In Weems, an American citizen serving in the Philippines was sentenced to fifteen years of cadena (or hard labor) and imprisonment for falsifying a government document. According to Justice McKenna’s majority, Weems’s punishment had no parallel in American legislation, and was thus cruel and unusual in both its penalty of hard labor and its “excess of imprisonment.” McKenna invoked Ex Parte Wilson, which addressed the Fifth Amendment’s provision that “no person shall be held to answer for a capital, or infamous crime” without going before a grand jury. In this case, the Court held that infamous crimes could change based on swings in “public opinion

25 Ex Parte Wilson, 114 U.S. 417 (1885).
from one age to another.”

If infamous crimes could historically vary, McKenna reasoned that cruel and unusual punishments could as well.

The dissent, written by Justice White and joined by Justice Holmes, refused to extend cruel and unusual punishments beyond their historical moorings. White argued that the majority’s opinion was groundless, relying on a separate amendment and a single dissent from nearly two decades previous. According to the Justice, the “cruel punishments against which the bill of rights provided were” exclusively “the atrocious, sanguinary, and inhuman punishments which had been inflicted in the past upon the persons or criminals.”

Nevertheless, Weems was invoked as precedent in the 1958 case of Trop v. Dulles. Here the petitioner had been stripped of his American citizenship for wartime desertion. The Court, in an opinion written by Chief Justice Warren, found Trop’s penalty grossly “excessive in relation to the gravity of” his crime. Expanding upon Weems, Warren declared the “basic concept underlying the Eighth Amendment” nothing less than the “dignity of man,” and stripping an individual of his citizenship was “the total destruction of the individual’s status in organized society.” While Warren admitted that gauging a punishment’s excessiveness could be difficult, he stated the cruel

26 Id. at 427.

28 Id. at 382.
29 Id. at 398-99 (“I find it impossible to fix with precision the meaning which the court gives to that provision.”).
30 Id. at 389-90.
32 See Trop, 365 U.S. at 87 (“The petitioner in this case, a native-born American, is declared to have lost his United States citizenship and become stateless by reason of his conviction by court-martial for wartime desertion.”).
33 Id. at 99.
34 And echoing Justice Field in O’Neil.
35 Id. at 100.
and unusual clause must ultimately “draw its meaning from the evolving standards of decency that mark the progress of a maturing society.”

Justice Frankfurter wrote in dissent. According to Frankfurter, Warren’s insistence “that denationalization is cruel and unusual punishment was to stretch that concept beyond the breaking point.” Wartime deserters were executed in the republic’s earliest days, a far more serious punishment than the one here under review. The Justice opposed the idea that time brought new meaning into the cruel and unusual clause.

Only four years later, in Robinson v. California, Frankfurter’s Eighth Amendment originalism was again rejected. In this case, the plaintiff had been imprisoned based on a California statute making it a criminal offense for persons to “be addicted to the use of narcotics.” The Court was mindful of narcotic trafficking’s “vicious evils,” but found punishing addicts to be an excessive response. According to Justice Stewart, addiction was more a disease than a criminal offense; “even one day in prison would be a cruel and unusual punishment for the “crime” of having a common cold.”

V. EVOLVING STANDARDS CODIFIED: FURMAN AND GREGG

While Weems and Robinson had concerned a punishment’s excessiveness for relatively minor crimes, in Furman v. Georgia the state’s most serious sanction, the death penalty, was challenged as cruel and unusual. The Furman plurality was unwilling to

41 Id. at 661.
42 Id. at 668.
43 Id.
declare capital punishment per se unconstitutional. The justices were troubled, however, by capital case’s lack of sentencing guidelines. According to Justice Douglas, two offenders who committed the exact same crime could face drastically different penalties, with one being executed and the other imprisoned.\textsuperscript{44} States either needed to make capital sentences less capricious, or cease executing people altogether.

Only Justice Brennan, in a concurrence, directly addressed capital punishment’s excessiveness.\textsuperscript{45} Brennan cited \textit{Trop}, stating any punishment that violated evolving standards of decency was cruel and unusual.\textsuperscript{46} Brennan argued that social standards could be measured in two ways: First, by analyzing public opinion,\textsuperscript{47} and second, by evaluating if a given punishment served any penological purpose.\textsuperscript{48} According to the Justice, a punishment was not unconstitutional merely for being pointless, but if the same goal could be achieved through less severe means.\textsuperscript{49} Based on these criteria, Brennan found capital punishment to be categorically disproportionate.\textsuperscript{50}

Brennan’s test would prove critical to the future of proportionality review. Only four years after \textit{Furman}, in \textit{Gregg v. Georgia},\textsuperscript{51} Justice Stewart used a modified version

\textsuperscript{44} See \textit{Furman}, 428 U.S. at 249-250 (“The death penalty is disproportionately imposed and carried out on the poor, the Negro, and the members of unpopular groups.”).

\textsuperscript{45} Id. at 257.

\textsuperscript{46} Id. at 270.

\textsuperscript{47} Id. at 278 (“The question under this principle, then, is whether there are objective indicators from which a court can conclude that contemporary society considers a severe punishment acceptable.”).

\textsuperscript{48} Brennan’s first prong, that punishments must be in accordance with public opinion, was undoubtably taken from \textit{Weems}, the first Eighth Amendment case to strike a punishment for its rarity. Brennan’s penology prong was likely influenced by \textit{Trop} and \textit{Robinson}’s holdings that human dignity was violated by pointless punishments. \textit{Id.} at 279 (“If there is a significantly less severe punishment adequate to achieve the purposes for which the punishment is inflicted, the punishment inflicted is unnecessary, and therefore excessive.”).

\textsuperscript{49} See supra note \_ (Of course, whether this necessarily followed from \textit{Trop} and \textit{Robinson} is open to debate).

\textsuperscript{50} Id. at 285 (“[D]eath is today a cruel and unusual punishment.”). I do not go over Brennan’s actual analysis since his methodology was revised by Stewart in \textit{Gregg}.

of Brennan’s excessiveness standard to reinstate capital punishment. Stewart’s *Gregg*
plurality compromised between the Court’s liberal and conservative wings. The Court’s
liberals, led by Justice Brennan, argued, as they had in *Furman*, that capital punishment
violated evolving standards of decency.52 The more conservative justices dismissed
evolving standards altogether, arguing that capital punishment had been practiced since
the nation’s founding and was therefore prima facie constitutional.53 Stewart split the
difference, accepting the need to gauge evolving standards of decency but finding that
this test, contrary to Brennan’s contentions, actually supported upholding the death
penalty.

According to Justice Stewart,

> When a form of punishment in the abstract (in this case, whether capital punishment may ever be
> imposed as a sanction for murder) rather than in the particular (the propriety of death as a penalty
> to be applied to a specific defendant for a specific crime) is under consideration, the inquiry into
> “excessiveness” has two aspects:54

First, the penalty must be supported by the public, and second, “the punishment must not
involve the unnecessary and wanton infliction of pain.”55 In order to determine public
support, Stewart considered two factors: (1) how many states allowed the punishment
under review,56 and (2) how many juries actively imposed this punishment.57

---

52 Id. at 230 (“[T]he punishment of death, like punishments on the rack, the screw, and the wheel, is no
longer morally tolerable in our civilized society.”).
53 See, e.g., *Woodson*, 428 U.S. at 308 (1976) (Rehnquist, J., dissenting) (“As an original proposition, it is
by no means clear that the prohibition against cruel and unusual punishments embodied in the Eighth
Amendment...was not limited to those punishments deemed cruel and unusual at the time of the adoption
of the Bill of Rights.”).
54 See *Gregg*, 428 U.S. at 173.
55 Id.
56 Id. at 179-80 (“The most marked indication of society’s endorsement of the death penalty for murder is
the legislative response.”).
57 Id. at 181 (“[T]he jury also is a significant and reliable objective index of contemporary values because it
so directly involved.”).
Furthermore, like Brennan, Stewart demanded that punishments needed a clear penological purpose to be constitutional.58

At first glance, Stewart’s test would seem nearly identical to Brennan’s. Both justices stressed the importance of public opinion and the need for punishments to have a penological goal. Brennan and Stewart also required both prongs be met for a sentence to be upheld. The justices’ difference lay in what counted as penologically sufficient. According to Brennan, a given punishment was unconstitutional if its goal could be accomplished through less severe means.59 Justice Stewart refused to “invalidate a category of penalties” merely “because we deem less severe penalties adequate to serve the ends of penology.”60 In Gregg, for example, Stewart found that society’s felt need for retribution and capital punishment’s likelihood to deter some murderers were more than adequate to satisfy this prong.61

* 

Justice Stewart’s test, like Brennan’s, left a great deal of questions. First was how many legislative enactments or jury decisions were needed to demonstrate a national consensus.62 Second, deciphering a punishment’s penological purpose required justices to evaluate policy rather than law, a task they were not obviously qualified to take on. Finally, the nature of Stewart’s distinction between “abstract” and “particular”

---

58 Id. at 182 (“[T]he sanction imposed cannot be so totally without penological justification that it results in the gratuitous infliction of suffering.”).  
59 See supra note ___ .  
60 See Gregg, 428 U.S. at 182-83.  
61 Id. at 187 (“[T]he moral consensus concerning the death penalty and its social utility as a sanction, require us to conclude, in the absence of more convincing evidence, that the infliction of death as a punishment for murder is not without justification.”).  
62 At the time of Gregg, at least thirty-five states allowed capital punishment, constituting a clear national consensus to Stewart. See Gregg, U.S. 428 at 179-180 (“The legislatures of at least 35 States have enacted new statutes that provide for the death penalty.”). Brennan tacitly agreed with this, but nevertheless found capital punishment unconstitutional in violating the penology prong.
punishments, and why they required separate standards of proportionality review, went unaddressed.

VI. EVOLVING STANDARDS AND TYPES OF CRIMES: 
COKER, ENMUND, TISON, AND KENNEDY

Coker v. Georgia was the first case to evaluate evolving standards for non-homicide offenses. 63 In this case, the plaintiff contended that capital punishment was disproportionate for the crime of rape. 64 The Court, in an opinion written by Justice White, agreed. First, of the sixteen states in which rape had been a capital offense prior to 1972, only three kept these statutes in place following Furman. 65 Furthermore, in nine out of ten cases, juries refused to impose the death sentence for this crime. 66 Regarding the penological prong, White argued that executing rapists was overly retributive. While rape was unquestionably a serious crime, life was not over for the victim. 67 Executing the rapist, however, was irrevocable.

Justice Powell concurred in the judgment but dissented in part. 68 Powell agreed that rape was disproportionate in most cases, but felt that the Court overstepped its boundaries by issuing a categorical ruling. 69 In Powell’s view, some violent rapes were

---

64 Id. at 586 (“Coker was granted a writ of certiorari…that the punishment of death for rape violates the Eighth Amendment.”).
65 Id. at 594.
66 Id. at 597.
67 Id. at 598 (“Life is over for the victim of the murderer; for the rape victim, life may not be nearly so happy as it was, but it is not over and normally is not beyond repair.”).
68 Id. at 601.
69 Id. at 601 (“In an opinion that ranges well beyond what is necessary, it holds that capital punishment always—regardless of the circumstances—is a disproportionate penalty for the crime of rape.”).
potentially heinous enough to warrant a death penalty,\textsuperscript{70} and a clear national consensus had not yet emerged to suggest otherwise.\textsuperscript{71}

Chief Justice Burger dissented.\textsuperscript{72} While skeptical of Stewart’s evolving standards of decency test, the Chief Justice accepted \textit{Gregg} as precedent.\textsuperscript{73} Going beyond Powell, however, Burger thought it premature to declare a national consensus existed against executing rapists at all.\textsuperscript{74} The Chief Justice also contended that executing such offenders had a penological purpose. According to Burger, the ultimate penalty potentially deterred such “serious and increasing” dangers to “public safety.”\textsuperscript{75}

\textit{Coker} was invoked as precedent five years later in \textit{Enmund v. Florida}, where the Court banned capital punishment for the crime of felony murder during the course of a robbery.\textsuperscript{76} Justice White, once again writing for the majority, observed that only eight states allowed the death penalty for “participation in a robbery in which another robber takes a life.”\textsuperscript{77} Furthermore, since 1954, juries had only sentenced a non-triggerman to death in six out of 362 cases.\textsuperscript{78} Regarding the penology prong, White argued that retribution was inherently linked to culpability; if one did not intend to kill his or her victim it was excessive to have him or her executed.\textsuperscript{79} White also dismissed the

\textsuperscript{70} \textit{Id.} at 604 (“It may be that the death penalty is not disproportionate for the crime of aggravated rape.”).
\textsuperscript{71} \textit{Id.} at 604 (“It has not been shown that society finds the penalty disproportionate for all rapes.”).
\textsuperscript{72} \textit{Id.} at 605.
\textsuperscript{73} \textit{Id.} (“I accept that the Eighth Amendment’s concept of disproportionality bars the death penalty for minor crimes.”).
\textsuperscript{74} \textit{Id.} at 618 (“The question of whether the death penalty is an appropriate punishment for rape is surely an open one.”).
\textsuperscript{75} \textit{Id.} at 621.
\textsuperscript{76} \textit{Enmund v. Florida}, 458 U.S. 782 (1982).
\textsuperscript{77} \textit{Id.} at 789.
\textsuperscript{78} \textit{Id.} at 794.
\textsuperscript{79} \textit{Id.} at 798 (“Enmund did not kill or intend to kill, and thus his culpability is plainly different from that of the robbers who killed; yet the State treated them alike, and attributed to Enmund the culpability of those who killed…This was impermissible under the Eighth Amendment”).
possibility that executing such offenders would “measurably deter one who does not kill and has no intention” of doing so.\(^{80}\)

The issue of felony murder resurfaced in *Tison v. Arizona*.\(^{81}\) In this case, the plaintiff had participated in a violent crime resulting in someone’s death, but had not committed the murder himself.\(^{82}\) Justice O’Connor, writing for the majority, concluded that the plaintiff’s offense could merit the death penalty.\(^{83}\) O’Connor first argued that *Enmund* did not categorically eliminate executions for all types of felony murder.\(^{84}\) She then performed a cursory review of evolving standards.\(^{85}\) The Justice observed that a majority of states allowed capital punishment for the plaintiff’s offense.\(^{86}\) O’Connor concluded that a death sentence was not overly retributive given Tison’s “reckless disregard for human life.”\(^{87}\)

*Kennedy v. Louisiana* was the most recent case to consider whether capital punishment was disproportionate for an abstract type of crime.\(^{88}\) Although *Coker v. Georgia* had explicitly banned executing offenders who raped adults, this ruling left it unclear if offenders could be executed for child rape. Justice Kennedy wrote for the majority, holding that sentencing these offenders to death was unconstitutional.\(^{89}\)

Kennedy first observed that only six of thirty-six death penalty states (plus the Federal

\(^{80}\) *Id.* at 799.

\(^{82}\) *Id.* at 138 (“The question presented is whether the petitioners' participation in the events leading up to and following the murder of four members of a family makes the sentences of death imposed by the Arizona courts constitutionally permissible although neither petitioner specifically intended to kill the victims and neither inflicted the fatal gunshot wounds.”).

\(^{83}\) *Id.* at 151 (“Only a small minority of those jurisdictions imposing capital punishment for felony murder have rejected the possibility of a capital sentence absent an intent to kill, and we do not find this minority position constitutionally required.”).

specifically allowed the death penalty for child rapists. Furthermore, no individual had been executed for this crime since 1964, with Louisiana the only state since Coker to even sentence such an offender to death.

Justice Kennedy admitted that he was uncertain if executing child rapists served the goals of retribution or deterrence. The Justice hinted that some child rapes could be so heinous as to potentially deserve the ultimate sanction. Children’s unreliable testimony, however, was too subject to “fabrication and exaggeration” to risk the defendant’s life upon. As for the matter of deterrence, Kennedy contended this policy could actually encourage homicides: The Justice speculated that child rapists might murder their victims in order to better their chances of never being caught and put to death.

Justice Alito’s Kennedy dissent echoed Burger’s in Coker. According to Alito, state legislatures did not actually oppose executing child rapists. Rather, they were unsure if Coker had banned capital punishment for all rapists or merely those involving adults. Furthermore, in the last few years five states had made committing child rape a capital crime, actually indicating a growing national consensus for executing child rapists.

Alito admitted that jury results were mixed, but noted that Louisiana had sentenced two

94 Id. at 2663.
95 Id. at 2664 (“A state that punishes child rape by death may remove a strong incentive for the rapist not to kill the victim.”).
96 Id. at 2665.
97 Id. at 2668 (“The Coker dicta gave state legislators a strong incentive not to push for the enactment of new capital child-rape laws even though these legislators and their constituents may have believed that the laws would be appropriate and reliable.”).
98 Id. at 2669 (pointing out that this “message is very different from the one that the Court perceives.”).
of four, or 50%, of such offenders to death. In the Justice’s view, it was premature to declare that a national consensus had developed either for or against executing child rapists.

Regarding the penology prong, Alito acknowledged that murder represented a “unique harm.” Nevertheless, raping a child could result in victims so brutally injured that life was effectively beyond repair. The Justice cited studies indicating as many as 40% of sexual abuse victims became “seriously disturbed” and were far more likely to commit sex crimes as adults than the average citizen. Finally, Alito attacked Kennedy’s claim that juries were unable to distinguish between child rapists who did and did not deserve to die, contending it was legislatures’ role, and theirs alone, to take such considerations into account.

*Coker, Enmund, Tison, and Kennedy, like Furman and Gregg before them, left numerous issues unresolved. The Court was consistent in striking or upholding capital statutes held by at least half the states, or when rarely imposed by juries. What constituted a national consensus in either department, however, remained unclear. Also unclear was the time span in which such a consensus was to be gauged: indeed, if a penalty increases in frequency, as in Kennedy, this would caution against treating public opinion as any sort of fixed variable.

99 Id. at 2672.
100 Id. (“Neither Congress nor juries have done anything that can plausibly be interpreted as evidencing the “national consensus” that the Court perceives.”).
101 Id. at 2776.
102 Id. at 2677 (quoting Coker that “[s]ome victims are so grievously injured physically or psychologically that life is beyond repair.”).
103 Id.
104 Id. at 2677 (“The Court provides no cogent explanation for why this legislative judgment should be overridden.”).
105 25 states? 26 States? What percentage of juries?
The Court’s treatment of the penology prong, or what counts as satisfying the goals of punishment, was even more mystifying. In Coker the majority only addressed the goal of retribution, never considering whether executing rapists had a deterrent aspect. Furthermore, while deterrence played some role in the majority’s Kennedy reasoning, this was based on the Court’s a priori judgment rather than any empirical analysis. Indeed, this subjective aspect of gauging evolving standards was even clearer in the Court’s decisions to not only ban the death penalty for types of crimes, but entire classes of offenders.

VII. EVOLVING STANDARDS AND CLASSES OF OFFENDERS: FORD, THOMPSON, STANFORD, ROPER, PENRY, AND ATKINS

In Ford v. Wainwright the Supreme Court expanded its proportionality analysis to include abstract classes of offenders, finding it unconstitutional to execute people who had gone insane while in prison. The majority opinion, written by Justice Marshall, argued that executing such defendants violated both prongs of the evolving standards test. First, no jurisdiction allowed sentencing the mentally insane to death. Second, executing such individuals served no discernible retributive or deterrence purpose. By the very definition of their illness, Marshall argued the insane were neither responsible for their actions nor rational enough to be deterred.

The following year the Court took age into account, considering in Thompson v. Oklahoma whether capital punishment was constitutional for defendants sixteen and

107 Id. at 399.
108 Id. at 409.
109 Id. (“The natural abhorrence civilized societies feel at killing one who has no capacity to come to grips with his own conscience or deity is still vivid today.”).
under.\textsuperscript{110} Justice Stevens, writing for the majority, observed that most legislatures had established no minimum age for imposing the death penalty.\textsuperscript{111} Nevertheless, among the eighteen that had established a threshold, none allowed the execution of anyone under sixteen.\textsuperscript{112} Jury behavior also indicated hesitancy in sentencing such individuals to death: Stevens admitted that it was impossible to know with any certainty how many persons under sixteen had been executed in the twentieth century, but cited a scholar’s work finding the number to be a paltry eighteen to twenty.\textsuperscript{113}

Regarding the penology prong, Stevens first questioned the retributive aspect of sentencing such young offenders to death.\textsuperscript{114} The Justice contended that retribution was predicated around punishing fully culpable actors.\textsuperscript{115} Children’s general inability to consider the full consequences of their actions, however, combined with their heightened emotional state, significantly reduced their culpability.\textsuperscript{116} For these reasons, deterrence was also inapplicable: According to Stevens, the idea of most sixteen-year olds making detailed cost-benefit analyses of their actions was “so remote as to be virtually non-existent”.\textsuperscript{117}

\textsuperscript{111} Id. at 826 (“Most state legislatures have not expressly confronted the question of establishing a minimum age for imposition of the death penalty.”).
\textsuperscript{112} Id. at 829 (“When we confine our attention to the 18 States that have expressly established a minimum age in their death penalty statutes, we find that all of them require that all of them require that the defendant have attained at least the age of 16 of the time of the capital offense.”).
\textsuperscript{113} Id. at 832. This is out of a total of approximately 6,000 executions. See ProCon.org, US Executions from 1608-2002: A Demographic Breakdown of the Executed Population, http://deathpenalty.procon.org/view.resource.php?resourceID=004087.
\textsuperscript{114} Id. at 833.

\textsuperscript{116} Id. at 835 (“Less culpability should attach to a crime committed by a juvenile than to a comparable crime committed by an adult…Inexperience, less education, and less intelligence make the teenager less able to evaluate the consequences of his or her conduct while at the same time he or she is much more apt to be motivated by mere emotion or peer pressure than is an adult.”).
\textsuperscript{117} Id. at 837-38.
The dissent, written by Justice Scalia, challenged Stevens's argument point-by-point. Scalia admitted that defendants under sixteen were rarely executed. This demonstrated nothing to Scalia, however, other than society’s belief that only the most heinous of these individuals deserved to die. Nor were juveniles always irresponsible for their actions: While Scalia admitted that some of these individuals might lack the requisite level of maturity, this was for juries rather than justices to decide upon.

Scalia’s view triumphed only two years later in Stanford v. Kentucky, where the Court found executing those under the age of eighteen to be constitutional. Scalia, writing for the majority, observed that of the thirty-seven death penalty states, over half permitted executing persons under the age of seventeen. The Justice acknowledged that such executions were rare. As he had before, however, Scalia contended that this reflected societies’ belief that juveniles should rarely, rather than never, be put to death. Scalia dismissed the penology prong altogether. In the Justice’s view, such an analysis relied too heavily on justice’s subjective opinions regarding the ends of criminal justice, and was therefore not even worthy of consideration.

118 Id. at 859.
119 Id. at 870 (“In this century all of the 18 to 20 executions of persons below 16 when they committed crimes occurred before 1948.”).

121 Id. (“There is no justification except our own predilection for converting a statistical rarity of occurrence into an absolute constitutional ban.”).
123 Id. at 371.
124 Id. at 374 (“[T]he last execution of a person who committed a crime under 17 year of age occurred in 1959.”).
125 Id. (“It is not only possible, but overwhelmingly probably, that the very considerations which induce petitioners and their supporters to believe that death should never be imposed on offenders under 18 cause prosecutors and juries to believe that it should rarely be imposed.”).
126 Id. at 379 (“[F]or us to judge…on the basis of what we think “proportionate” and “measurably contributory to acceptable goals of punishment”…is to replace judges of the law with a committee of philosopher kings.”).
Scalia’s *Stanford* opinion held for nearly two decades, before formally being overturned in *Roper v. Simmons*.\(^{127}\) According to Justice Kennedy’s majority, executing capital defendants under the age of eighteen was now grossly disproportionate.\(^{128}\) Kennedy observed that twenty states allowed juveniles to be executed, but countered that this event rarely occurred.\(^{129}\) Furthermore, Kennedy contended that executing juveniles served no relevant penological purpose.\(^{130}\) While Kennedy admitted that certain juveniles were morally culpable, he doubted that juries could adequately distinguish the appropriate levels of maturity.\(^{131}\) As Kennedy concluded, “the age of eighteen” was where society “draws the line for many purposes between childhood and adulthood, and this age is where “death eligibility ought to rest.”\(^{132}\)

Predictably, Justice Scalia assailed the majority’s logic.\(^{133}\) According to Scalia, there was clearly no national consensus against executing juveniles when over 50% of death penalty states permitted this.\(^{134}\) The Justice also attacked the majority’s categorical ruling. To Scalia, the contention that juries were incapable of separating culpable from

inculpable juveniles was both empirically specious and an example of judicial overreach.\textsuperscript{135}

The Court’s proportionality review of the mentally handicapped has engendered similar divisions. In \textit{Penry v. Lynaugh}, the Court found executing mentally retarded offenders to be constitutional.\textsuperscript{136} Justice O’Connor, writing for the Court majority, observed that only a single state specifically banned executing this class of offenders.\textsuperscript{137}

While O’Connor conceded that certain mentally retarded persons undoubtedly had diminished culpability, she felt this was a mitigating factor best left to jury discretion.\textsuperscript{138}

\textit{Penry} was reversed thirteen years later in \textit{Atkins v. Virginia}.\textsuperscript{139} In an opinion written by Justice Stevens and joined by both Justices O’Connor and Kennedy, the Court now ruled a national consensus existed against executing the mentally handicapped.\textsuperscript{140} Stevens observed that, while a majority of death penalty states did not specially disallow this practice, there was a clear and consistent trend against it.\textsuperscript{141} First, nearly ten states had banned executing the mentally handicapped since \textit{Penry}.\textsuperscript{142} Second, even among states that allowed such executions, only five had any offenders on death row with IQs less than seventy.\textsuperscript{143}

\textsuperscript{135} \textit{Id.} at 620-21 (“This assertion is based on no evidence.”).
\textsuperscript{137} \textit{Id.} at 333.
\textsuperscript{138} \textit{Id.} at 340 (“So long as sentencers can consider and give effect to mitigating evidence of mental retardation in imposing sentence, an individualized determination whether "death is the appropriate punishment" can be made in each particular case.”).

\textsuperscript{142} \textit{Id.}
\textsuperscript{143} \textit{Id.} at 316. Seventy being the cut-off point where one was considered mentally handicapped.
The majority of Justice Stevens’s opinion discussed the penological prong of evolving standards.\textsuperscript{144} According to the Justice, the mentally handicapped, like juveniles, were clearly less culpable than average citizens, and executing them was therefore unduly retributive.\textsuperscript{145} Regarding the goal of deterrence, Stevens argued that the “same cognitive and behavioral impairments that make these defendants less morally culpable” lessened, if not eliminated, any deterrent effect such executions might have.\textsuperscript{146} While Stevens hinted that not all the mentally handicapped lacked such culpability, he nevertheless found it necessary to draw a categorical line.\textsuperscript{147} Like Kennedy in \textit{Roper}, the Justice argued that only a full ban on executing the mentally handicapped could ensure juries would not mistakenly execute the undeserving.\textsuperscript{148}

Scalia wrote for the dissenters,\textsuperscript{149} labeling the majority’s use of evolving standards a “\textit{post hoc} rationalization” for their subjectively “preferred result.”\textsuperscript{150} First, Scalia declared it nothing short of “miraculous” that the Court could, once again, forge a national consensus from a practice allowed in more than half of death penalty states.\textsuperscript{151} Second, the Justice noted that the Court’s reliance on the “direction of change” was an entirely novel standard, based in neither previous precedent nor on any plausible textual interpretation.\textsuperscript{152} Finally, Scalia repeated his earlier contention that juries’ decision to

\textsuperscript{144} Id. at 318.  
\textsuperscript{145} Id. at 319 (“The lesser culpability of the mentally retarded offender surely does not merit that form of retribution.”).

\textsuperscript{152} Id. at 345.
infrequently impose capital punishment on a class of offenders merely implied that they felt this penalty should be reserved for the most heinous of them.\textsuperscript{153}

Regarding the penology prong, Scalia questioned the correlation between deservedness and culpability.\textsuperscript{154} While the Justice admitted that mentally handicapped offenders might have reduced culpability, this did not logically entail they were morally blameless.\textsuperscript{155} Regardless, Scalia argued these were matters for juries, not justices, to decide upon.\textsuperscript{156}

* 

The Court’s criterion for dealing with proportionality review for classes of offenders is not altogether clear. \textit{Thompson v. Oklahoma} was the first case to abolish a capital statute found in the majority of states, basing its holding on the infrequency of jury decisions. In \textit{Atkins}, the Court argued that legislative trends were most relevant in gauging a national consensus.\textsuperscript{157} Left uncertain was how much movement was needed here, and in what time frame this evaluation should take place. Regarding the infrequency of juries’ decisions to execute certain classes of offenders, the majority failed to address Scalia’s belief that this was the result of careful discretion rather than uniform disapproval.

The Court’s use of the penology prong also went under-explained. First, the Court never detailed why offenders must be \textit{fully} culpable for their punishment to be properly retributive (or how to gauge this.) Regarding deterrence, even if executing juveniles and

\hspace{1em}\textsuperscript{153} \textit{Id.} at 347.

\hspace{1em}\textsuperscript{154} \textit{Id.} at 350 (“Is there an established correlation between mental acuity and the ability to conform one’s conduct to the law in such a rudimentary manner as murder?”).

\hspace{1em}\textsuperscript{155} \textit{Id.} (“In my experience, the opposite is true: being childlike generally suggests innocence rather than brutality.”).

\hspace{1em}\textsuperscript{157} As they would later do in \textit{Kennedy}.  

21
the mentally handicapped failed to deter members of these groups, why should it have no impact on “regular” offenders? Why must deterrence have a strictly internal relationship here? The majority’s defense of a categorical ruling was even sketchier, again providing only vague justifications for juries’ incapability of separating deserving from undeserving offenders.

Scalia’s dissents also come off as somewhat disingenuous. Why should a self-proclaimed originalist respect the evolving standards test at all? The Justice seems to want it both ways, criticizing evolving standards foundations while contending only he applies it with the proper rigor.

VIII. PROPORTIONALITY AND INCARCERATION, ROUND I: RUMMEL AND SOLEM

As the Court expanded its evolving standards jurisprudence to capital offenders, it also began to consider proportionality requirements for incarceration. A plain reading of Gregg v. Georgia would indicate that evolving standards applied equally to capital and non-capital offenses. Here Justice Stewart drew his line of demarcation between punishment in “the abstract” (punishment imposed for a general sanction) and in “the particular” (punishment imposed on a specific defendant for a specific crime.)

Indeed, the earliest cases to challenge punishments’ disproportionally, O’Neil and Weems, revolved around excessive prison terms.

Nevertheless, in Rummel v. Estelle a Court majority led by Justice Rehnquist effectively restricted proportionality review to capital cases. In this case, a plaintiff had been given a life sentence under Texas’s three strikes laws for his third offense of

159 See supra note _.
obtaining $120.75 under false pretenses.\textsuperscript{161} According to Justice Rehnquist, the plaintiff’s punishment was constitutional; incarceration did not automatically trigger any sort of proportionality requirement.\textsuperscript{162}

According to the Chief Justice, capital punishment “differs in kind from any sentence of imprisonment.”\textsuperscript{163} For this reason, it “offered limited assistance in deciding” the constitutionality of incarceration.\textsuperscript{164} Rehnquist further contended that \textit{Weems} was primarily concerned with the defendant’s sentence of hard labor rather than his excessive imprisonment.\textsuperscript{165} And while Rehnquist acknowledged that some sentences of incarceration could be so outrageous to be disproportionate, he argued these instances should be “exceedingly rare.”\textsuperscript{166}

Justice Powell dissented, arguing that proportionality review had nothing to do with capital punishment’s unique nature.\textsuperscript{167} In Powell’s view, Rehnquist misinterpreted \textit{Weems}: The \textit{Weems} Court concerned itself with both the plaintiff’s length of imprisonment \textit{and} his sentence of hard labor.\textsuperscript{168} Furthermore, nothing in the Court’s precedent suggested “principles of disproportionality” applicable only to capital cases.”\textsuperscript{169} Powell thus formulated a narrowed evolving standards of decency test for cases of

\begin{itemize}
  \item \textsuperscript{161} \textit{Id.} at 263.
  \item \textsuperscript{162} \textit{Id.} at 264.
  \item \textsuperscript{163} \textit{Id.} at 272. \textit{Rummel} was invoked as precedent two years later in \textit{Hutto v. Davis}, 452 U.S. 370 (1982), where the Court found that a prison term of 20 years for nine ounces of marijuana possession did not trigger any sort of proportionality review.
  \item \textsuperscript{164} \textit{Id.}
  \item \textsuperscript{165} \textit{Id.} at 273-4 (“Its finding of disproportionality cannot be wrenched from the extreme facts of that case...The opinion consistently referred jointly to the length of imprisonment and its “accessories” or “accompaniments.””).
  \item \textsuperscript{166} \textit{Id.} at Fn. 11 (For example, if someone was sentenced to life imprisonment for overtime parking).
  \item \textsuperscript{167} \textit{Id.} at 285.
  \item \textsuperscript{168} \textit{Id.} at 289-90 (“The Court was attentive to the methods of punishment, but its conclusion did not rest solely upon the nature of the punishment.”).
  \item \textsuperscript{169} \textit{Id.} at 292-3.
\end{itemize}
imprisonment.\textsuperscript{170} According to Powell, the Court should first consider whether the crime under review seems \textit{prima facie} “grossly disproportionate” to the punishment meted out.\textsuperscript{171} Second, the Court should compare the sentence imposed for the same crime in other jurisdictions.\textsuperscript{172} Finally, the Court should compare the sentence imposed in the same jurisdiction.\textsuperscript{173} If a sentence violated all three prongs, it was grossly disproportionate and therefore cruel and unusual.\textsuperscript{174}

Only three years later, Powell was able to command a Court majority in \textit{Solem v. Helm}.\textsuperscript{175} In this case, the plaintiff was sentenced to life without parole for his seventh non-violent offense.\textsuperscript{176} Powell first reviewed the nature of the defendant’s seventh crime, that of passing a fake check.\textsuperscript{177} According to the Justice, this was “one of the most passive felonies a person could commit,” and Helm’s resulting sentence of “life without parole” was therefore \textit{prima facie} disproportionate.\textsuperscript{178} Intra-jurisdictionally, Powell could find no other offender in South Dakota punished as harshly for such a minor crime.\textsuperscript{179} Powell next compared the plaintiff’s sentence in South Dakota to those in other jurisdictions.\textsuperscript{180} According to the Justice, Helm’s harsh sentence was only possible in two of fifty states, making his punishment inter-jurisdictionally excessive.\textsuperscript{181} Based on these criteria, Powell concluded that Helm’s sentence was cruel and unusual.\textsuperscript{182}

\end{footnotesize}
Chief Justice Burger, joined by Justice Rehnquist, wrote in dissent. According to Burger, the lesson from Rummel was simple: “the Eighth Amendment did not authorize courts to review sentences of imprisonment (emphasis his) to determine whether they were “proportional” to the crime.” Burger stated that doing otherwise usurped legislative power, launching the Court into “uncharted and uncharitable waters.” Tempting as it may be, the Court had no business “overruling the considered actions of legislatures.”

*

Regarding whether Weems applied proportionality review to non-capital cases, most constitutional scholars have sided with Powell over Rehnquist and Burger. Less clear is why such cases require a narrower standard of review. If the reason for Powell’s modified standards of decency test is that death is different, Justice Powell effectively concedes Rehnquist’s and Burger’s point. Yet Powell makes it clear that the issue of disproportionality applies to both capital and noncapital sentences, seemingly in equal measure. In doing so, however, he fails to clarify what element of these punishments triggers different tiers of proportionality review.

183 Id. at 304.
184 Id. at 307.
185 Id. at 315.
186 Id. at 317.
IX. PROPORTIONALITY AND INCARCERATION, ROUND II: HARMELIN AND EWING

Eight years after *Solem*, the Court abruptly reversed track in *Harmelin v. Michigan*.\(^{188}\) A plurality led by Justice Scalia argued that *Solem* was built on a number of hollow premises.\(^{189}\) First, the framers had understood cruel and unusual punishments as “torturous and brutal” methods of punishment rather than disproportionate penalties.\(^{190}\) Second, according to Scalia, the holding in *Weems* was ambiguous. It was unclear if the Court majority in this case objected to the imposition of *cadena temporal* (hard labor) or “mere disproportionality.”\(^{191}\) While, for precedent’s sake, Scalia was willing to accept some sort of proportionality review in capital cases, he would “leave it there” and “not extend it further.”\(^{192}\)

Justice Kennedy’s concurrence,\(^{193}\) joined by Justices O’Connor and Souter, did not dismiss *Solem* altogether, but merely contended that Powell’s narrower test in *Solem* went too far. Kennedy argued that *Rummel* and *Solem* shared five principal themes.\(^{194}\) First, incarceration, as a general matter, was best left to “legislatures, not courts.”\(^{195}\) Second, the Eighth Amendment did not mandate any single penological goal.\(^{196}\) Third, divergences in sentences were inevitable, and their existence did not automatically make punishments grossly disproportionate.\(^{197}\) Fourth, legislatures should be given the benefit of the doubt; if they mandated certain punishments for certain crimes, the Court should

---

\(^{189}\) *Id.* at 965 (“*Solem* was simply wrong; the Eighth Amendment contains no proportionality guarantee.”).

\(^{197}\) *Id.* at 1000 (“The circumstance that a State has the most severe punishment for a particular crime does not by itself render the punishment grossly disproportionate.”).
be very cautious in striking these down. Finally, Kennedy argued that Solem’s three-pronged test should be replaced by a threshold review, requiring justices to only void sentences of incarceration without any “rational basis.”

In Ewing v. California, Justice O’Connor used Kennedy’s threshold requirement to review the sentence of a repeat felon given twenty-five years to life under California’s “three strikes law.” O’Connor first considered the reasons for California’s “three strikes” statute. In the Justice’s view, California legislators were motivated by the goals of incapacitation and deterrence; they sought to both prevent recidivism, and warn potential offenders that even relatively minor crimes would not be tolerated. O’Connor next considered the particular case of Ewing, who had stolen $1,200 worth of property. The Justice argued that Ewing’s sentence was justified “given his own long, serious criminal record.” O’Connor concluded that Ewing’s punishment reflected a “rational legislative judgment, entitled to deference.”

Scalia must be given some credit: His Harmelin opinion is direct and unambiguous. Indeed, the history of proportionality review would be a great deal less convoluted had Scalia had his way. Unfortunately, the Justice’s use of precedent is rather sloppy. Try as he might, Scalia cannot plausibly deny the Weem’s majority was

---

concerned with the excessiveness, and not just the method, of the plaintiff’s punishment. Indeed, this was the very thing that Weem’s dissenters objected to.\footnote{See Weems, 217 U.S. at 385 (“[T]he court interprets the inhibition against cruel and unusual punishment as imposing upon Congress the duty of proportioning punishment according to the nature of the crime, and casts upon the judiciary the duty of determining whether punishment have been properly apportioned in a particular statute, and if not to decline to enforce it.”).}

Justice Kennedy and O’Connor’s threshold requirement has the opposite problem, being overly complex. The justices’ five common principles in Rummel and Solem are too vague to lend much guidance. Some of them are empty truisms, such as their statement that punishment is best left to state legislatures. Other contentions, that Powell’s Solem test was optional, for example, are simply asserted rather than explained or defended.\footnote{See, e.g., Harmelin, 501 U.S. at 1019 (White, J., dissenting) (“Solem is directly to the contrary, for there the Court made clear that…”a combination of objective factors [rather than a simple rational basis test] can make such an analysis [of gross disproportionality] possible.”).} Furthermore, the threshold requirement shares the same foundational problem as Powell’s Solem analysis, offering no explanation for why incarceration requires a lower tier of review than capital punishment.

By asking judges to review the goals of punishment, Kennedy and O’Connor’s threshold standard also shares similar problems to the penology prong of evolving standards. Both tests transform judges into political theorists, asking them to select a preferred rationale of punishment and then apply it to a specific case.\footnote{See, e.g., Ewing, 538 U.S. at 32 (Scalia, J., dissenting) (“The plurality is not applying law but evaluating policy.”).} What criteria should judges use, however, when determining if certain penal goals are satisfied? No matter how draconian the results, legislators will always have some “rational basis” for passing a particular statute.\footnote{Which is, of course, a larger critique of the “rational basis” test itself (See, e.g., Jeffrey D. Jackson, \textit{Putting Rationality Back into the Rational Basis Test: Saving Substantive Due Process and Redeeming the Promise of the Ninth Amendment}, 45 U. RICH. L. REV. 491 (2011) (for an evaluation of this test and some of its weaknesses)).} The farther the Court wanders into the realm of public

\footnote{See Weems, 217 U.S. at 385 (“[T]he court interprets the inhibition against cruel and unusual punishment as imposing upon Congress the duty of proportioning punishment according to the nature of the crime, and casts upon the judiciary the duty of determining whether punishment have been properly apportioned in a particular statute, and if not to decline to enforce it.”).}
policy, the more its decisions risk being predicated by judicial fiat rather than on any principled criteria.

X. THE STRAINS CONVERGE: GRAHAM V. FLORIDA

In *Graham v. Florida*, the plaintiff challenged the constitutionality of life without parole for juveniles who had committed a non-homicide offense. The Court encountered a unique circumstance here: Though concerned with the penalty of incarceration, *Graham* involved an abstract class of offenders (juveniles) sentenced for an abstract crime (non-homicide offenses.) It was thus not immediately evident what tier of proportionality the Court should apply.

The majority, led by Justice Kennedy, chose the evolving standards test. 211 Justice Roberts concurred in the Court’s judgment, but argued that the threshold review was more appropriate. 212 Justice Thomas, joined by Justice Scalia, sought to reset the clock entirely, denying the cruel and unusual clause demanded any sort of proportionality review. 213 Finally was the brief opinion of Justice Alito, which seemed to implicitly endorse using the evolving standards test, but faulted the majority’s lack of rigor in applying this metric. 214

A. The Majority

Justice Kennedy’s majority opinion consisted of three parts. Kennedy first argued that *Graham* required an evolving standards analysis. The Justice then applied this test, arguing that sentencing juveniles to life without parole for non-homicide offenses

---

211 *See Graham*, 130 S. Ct. at 2017.
212 *Id.* at 2036.
213 *Id.* at 2043.
214 *Id.* at 2057. I ignore the opinion of Justice Steven’s, which is written solely to support proportionality review in the abstract and combat the preferred results of Justices Scalia and Thomas.
violated both the consensus and penological prongs. Kennedy concluded by justifying the necessity of a categorical ruling.

Justice Kennedy began his opinion by identifying the two classes of proportionality review, the first involving “challenges to the length of term-of-years sentences given all the circumstances in a particular case,” and the second involving “cases in which the Court implements the proportionality standard by certain categorical restrictions on the death penalty.” Kennedy admitted that, in all previous cases involving incarceration, the Court applied the threshold test. According to the Justice, however, this test’s usage was not based on the specific punishment of imprisonment, but the Court’s consideration of a particular offender for a particular crime. Since the present case involved an abstract class of offenders (juveniles) for an abstract penalty (non-homicide crimes), Kennedy posited that evolving standards of decency was the more appropriate standard of review.

According to Kennedy, sentencing juveniles to life without parole for a non-homicide offense violated evolving standards of decency. Regarding the national consensus prong, the Justice recognized that thirty-seven states currently allowed this sentencing practice. Kennedy observed, however, that such sentences were exceedingly rare: Only 129 juvenile offenders were currently serving life without parole for non-

homicide crimes.\textsuperscript{220} Furthermore, these offenders were located in only twelve jurisdictions.\textsuperscript{221}

Kennedy then analyzed the penology prong. In \textit{Roper v. Simmons}, the Court established that juveniles were less culpable than adults, and therefore less deserving of capital punishment.\textsuperscript{222} According to Kennedy, the penalty of life without parole shared unique similarities to the death penalty. First, both punishments permanently separate the offender from society.\textsuperscript{223} Second, life without parole, like capital punishment, condemns prisoners to die in captivity.\textsuperscript{224} Since youths’ cognitive immaturity prevented them from fully weighing the costs and benefits of their decisions, deterrence also provided a poor penological justification.\textsuperscript{225} Finally, Kennedy rejected the goal of incapacitation: The young have their whole life ahead of them, and thus countless opportunities to eventually change their ways.\textsuperscript{226}

Justice Kennedy concluded his opinion by justifying the necessity for a categorical ruling.\textsuperscript{227} Kennedy admitted that some juveniles’ crimes are so heinous many citizens may feel they deserve life without parole.\textsuperscript{228} According to the Justice, however, judges and juries lack the requisite expertise to distinguish appropriate levels of

\begin{itemize}

\end{itemize}
culpability.\textsuperscript{229} First, such citizens are not child psychologists, and will therefore have little idea which juveniles are capable of change.\textsuperscript{230} Second, juveniles are at a significant disadvantage in criminal proceedings: They often mistrust adults, and are less likely to “work effectively with their lawyers to aid in their defense.”\textsuperscript{231} Finally, even the most seemingly hardened juvenile may one day reform him or herself. In Kennedy’s view, allowing judges or juries to sentence juvenile offenders to life without parole removes their “opportunity to achieve maturity of judgment and self-recognition of human worth and potential.”\textsuperscript{232} According to the Justice, while states “need not guarantee the offender eventual release,” there must exist “some realistic opportunity” of freedom.\textsuperscript{233}

B. Chief Justice Roberts

Chief Justice Roberts concurred in the majority’s decision but rejected their underlying reasoning.\textsuperscript{234} According to Roberts, the Court had always applied evolving standards to capital cases and the threshold test to matters of incarceration.\textsuperscript{235} By basing proportionality review off of whether the plaintiff’s challenge was abstract or narrow, Kennedy argued that the majority adopted a novel criterion “of dubious provenance.”\textsuperscript{236}

The Chief Justice began his opinion by distinguishing the different criteria for evolving standards and threshold review. While Roberts acknowledged that previous Courts had failed to establish a “clear or consistent path” for applying each test, they had

\textsuperscript{229} Id. at 2032 (“[I]t does not follow that courts taking a case-by-case proportionality approach could with sufficient accuracy distinguish the few incorrigible juvenile offenders form the many that have the capacity for change.”).

\textsuperscript{236} Id.
consistently drawn the line at death. Precedent therefore dictated applying threshold review to the case of incarceration before them.

First, Robert’s compared Graham’s conduct to the severity of his sentence. The fifteen-year old Graham was sentenced to life without parole for a home invasion robbery. According to Roberts, Graham’s youth and immaturity, combined with his difficult upbringing, somewhat lessened his culpability. Furthermore, life without parole is the second-harshest sentence in the criminal justice system, and especially serious for someone of only fifteen. Given these factors, Roberts concluded Graham’s sentence was, at least prima facie, grossly disproportionate.

Roberts then proceeded to an intra-jurisdictional and inter-jurisdictional comparison. Intra-jurisdictionally, Florida law rarely sentenced juveniles to more than twenty-five years for burglary or robbery. Inter-jurisdictionally, Florida was unusual in allowing juveniles to be sentenced to life without parole for non-homicide offenses. Given the rarity of Graham’s sentence both within and outside Florida, as well as his youth and lack of a criminal record, Roberts thus found Graham’s punishment unconstitutional.

While Robert’s agreed with the Court’s judgment in the case of Graham, he opposed their categorical ruling. In Robert’s view, some non-homicide crimes committed

by juveniles (whether violent rapes or near-deadly assaults) may justify life without parole. \textsuperscript{246} Furthermore, such matters are for juries or judges to decide upon, who are better equipped than nine unelected justices. \textsuperscript{247} Roberts concluded that the majority erred “in using this case as a vehicle for unsettling our established jurisprudence and fashioning a categorical rule applicable to far different cases.”\textsuperscript{248}

C. Justice Thomas

Justice Thomas, joined by Justice Scalia, disagreed both with the majority’s use of evolving standards and Chief Justice’s Roberts’s application of the threshold test. In Thomas’s opinion, the penalty of incarceration does not require any sort of proportionality review, as the Eighth Amendment’s framers solely concerned themselves with “methods,” rather than the excessiveness, of punishment.\textsuperscript{249}

In principle, Thomas thus rejected proportionality review for both capital and non-capital cases.\textsuperscript{250} Even given this dubious precedent, however, Thomas argued the majority opinion was incoherent. Previously, the Court had restricted evolving standards to capital cases and the threshold review to incarceration: “Today’s decision” eviscerated “that distinction.”\textsuperscript{251} Even if one accepted applying evolving standards, however, Thomas argued that Graham’s challenge failed.\textsuperscript{252} First, no national consensus existed against sentencing juveniles to life without parole for non-capital offenses. Thirty-seven states

\textsuperscript{246} Id. (“The fact that Graham cannot be sentenced to life without parole for his conduct says nothing whatever about offenders “who commit homicide crimes far more reprehensible than the conduct at issue here.””).
\textsuperscript{247} Id. at 2042 (“[T]he whole enterprise of proportionality review is premised on the “justified assumption that “courts are competent to judge the gravity of an offense, at least on a relative scale. Indeed, “courts traditionally have made these judgment.””).

\textsuperscript{249} Id. at 2044.
\textsuperscript{250} Id. (“[T]here is virtually no indication that the Cruel and Unusual Punishments Clause originally was understood to require proportionality in sentencing.”).
\textsuperscript{251} Id. at 2046.
\textsuperscript{252} Id. at 2048.
allowed this practice, comprising 74% of the country.\footnote{253}{Id.} Never before had the Court banned a sentencing practice supported by so many states.\footnote{254}{Id. at 2049 ("[T]he Court has never banished into constitutional exile a sentencing practice that the laws of a majority, let alone a supermajority, of States expressly permit.").} Second, Thomas argued that this sentences’ rarity hardly implied the country stood against it. Equally likely was that judges and juries believed such a serious punishment should be only sparingly imposed.\footnote{255}{Id. at 2051 ("That a punishment is rarely imposed demonstrates nothing more than a general consensus that it should be just that—rarely imposed. It is not proof that the punishment is one the Nation abhors").}

Regarding the penological prong, Thomas dismissed the majority’s claim that Graham’s sentence served no legitimate goal of punishment.\footnote{256}{Id. at 2053 ("[B]y definition, such sentences serves the goal of incapacitation.").} First, life without parole removes some of the most dangerous felons from the streets.\footnote{257}{Id. ("The Court acknowledges that such sentences will deter future juvenile offenders, at least to some degree.").} Second, even the majority recognized such penalties will likely deter potential offenders.\footnote{258}{Id. at 2055 ("The integrity of our criminal justice system depends on the ability of citizens to stand between the defendant and an outraged public and dispassionately determine his guilt and the proper amount of punishment.").} Finally, while Thomas acknowledged that some juveniles were more culpable than others, this was for juries and judges, not justices, to determine.\footnote{259}{Id. at 2058 ("Petitioner argued for only a categorical rule banning the imposition of life without parole on any juvenile convicted of a nonhomicide offense. Because petitioner abandoned his as-applied claim, I would not reach that issue.").}

D. Justice Alito

Justice Alito offered an alternative stance to the majority and the dissent. Unlike Roberts, since the petitioner did not ask for the threshold test, Alito saw no reason to apply it here.\footnote{260}{Id. at 2058 ("Petitioner argued for only a categorical rule banning the imposition of life without parole on any juvenile convicted of a nonhomicide offense. Because petitioner abandoned his as-applied claim, I would not reach that issue.").} And unlike his fellow dissenters, Alito seemingly accepted the
application of evolving standards to non-capital offenses. The Justice applied this test with greater rigor than the majority, however, siding with Thomas and Scalia in dismissing the plaintiff’s challenge.

XI. GRAHAM’S UNCLEAR AFTERMATH

For good or ill, *Graham v. Florida* has altered the nature of the Court’s proportionality review. In this paper’s final section I address some remaining issues and how these may play into the Court’s future jurisprudence in this area.

1. What form of proportionality review is required for what types of cases?

Despite Justice Kennedy’s assertions in *Graham*, previous precedent clearly established evolving standards for capital cases and the threshold test for incarceration. This is not to say that *Graham* is without any foundation. Indeed, the very case that engendered the evolving standards review, *Gregg v. Georgia*, based its application around abstract versus individual challenges rather than capital versus non-capital offenses. Rehnquist’s *Rummel* majority unequivocally restricted proportionality review to death sentences, however, and *Graham* therefore reverses three decades of precedent.

Perhaps more troubling is the difficulty in drawing a clear line between abstract and individual challenges. Even the narrowest cases can be individualized if presented in a certain light. For example, let us take the case of *Ewing*, which Kennedy references as the type of narrow case worthy of only the threshold test. Here the defendant was sentenced to twenty-five years to life for his third offense of stealing three golf clubs.

---

261 *Id.* (“I join Parts I and III of JUSTICE THOMAS’s dissenting opinion.”). Note that Alito did not endorse part II, which challenged proportionality review altogether.

While the majority’s narrow reading focused on Ewing’s specific crime, one could also present this case more abstractly, as challenging the constitutionality of three strikes laws for minor, non-violent felonies. Indeed, had the Court found Ewing’s sentence unconstitutional, they would have established this very thing.

The reverse is also true, or that abstract crimes can be presented individually. *Graham* cites *Kennedy v. South Carolina*, which found it unconstitutional to execute child rapists, as an example of an abstract ruling. In this case, however, the plaintiff need not have challenged the death penalty as categorically excessive for all child rapists, but only in his specific case. It was ultimately the majority’s decision to treat this case abstractly.

The Court’s decision to apply a threshold standard to *Ewing* and evolving standards to *Kennedy* therefore had little to do with these cases’ individual versus abstract nature. Justice Kennedy himself made clear the latter deserved evolving standards review because the plaintiff was sentenced to death. Justice Thomas is correct in recognizing that, after *Graham*, “death is different no longer.” He is also correct in recognizing the reasons for this are not entirely consistent.

2. What is most important to look for in evaluating evolving standards of decency?

Despite nearly four decades of precedent the evolving standards test remains remarkably nebulous, as the standards for gauging a national consensus and adequate penological justifications have altered substantially throughout the years. Unfortunately, *Graham v. Florida* confuses things even further.

---

263 *See Kennedy*, 128 S. Ct. at 2650 (discussing why the evolving standards test was used in capital cases).

264 *See Graham*, 130 S. Ct. at 2046.
In *Gregg v. Georgia*, the Court established that a national consensus should be gathered by evaluating state legislation and jury decisions; sentences violated evolving standards of decency if few jurisdictions or juries allowed for them. The raw numbers necessary to satisfy this test, however, were never clarified. In *Coker*, only three states and one out of ten juries sentenced rapists to death. In *Enmund*, which banned the death penalty for felony murder during the course of a robbery, relied upon a similar consensus, although one more narrow in scope.

*Akins v. Virginia*, which banned the execution of mentally handicapped offenders, blurred this line. In this case, a plurality of states neither banned executing the mentally handicapped nor did juries clearly refuse to impose such sentences. The Court merely found a trend against executing such offenders, and declared this enough to satisfy a national consensus.

*Roper v. Simmons*, which invalidated capital punishment for children under eighteen, went beyond even *Atkins*’s loose criteria. Here a majority of states allowed the execution of juveniles, and there was a notably slower “rate of change.” The Court’s decision therefore relied on the sheer infrequency of jury sentences. As Justice Scalia pointed out, the majority failed to address whether this infrequency was based on juries’

267 See *Atkins*, 536 U.S. at 314.
268 Id. at 316 (Ten states had banned executing the mentally handicapped since *Penry*).
269 See 543 U.S. at 565.
270 Id at 565 (“Impressive in *Atkins* was the rate of abolition of the death penalty for the mentally retarded…By contrast, the rate of change in reducing the incidence of the juvenile death penalty…has been slower.”).
271 Id. at 564-565 (“[E]ven in the 20 States without a formal prohibition on executing juveniles, the practice is infrequent.”).
categorical opposition to executing juveniles, however, or conscious decisions to merely restrict it to the most heinous offenders.\textsuperscript{272}

Only three years later, \textit{Kennedy v. Louisiana}’s majority acknowledged that executing child rapists had actually become more popular.\textsuperscript{273} This trend was basically ignored, however, and the majority again fell back on the infrequency of jury sentences.\textsuperscript{274} In \textit{Graham v. Florida}, a clear majority of states (74\%) allowed for sentencing juveniles to life without parole for non-homicide offenses.\textsuperscript{275} Furthermore, while infrequently imposed, no clear indication suggested that juries categorically opposed this practice. Finally, over the past twenty years legislatures have consistently increased the harshness of juvenile punishments, suggesting a trend in the opposite direction to the majority’s.\textsuperscript{276} Justice Kennedy took little notice of these facts, however, basing his decision on the small amount of juveniles serving life without parole for non-homicide offenses.\textsuperscript{277} No explanation was given for why this was now the controlling standard.

The penological prong of evolving standards seemed more important to the \textit{Graham} majority. Unfortunately, this provision has an equally flexuous history. In \textit{Coker}, the Court found sentencing rapists to death overly retributive, as such offenders

\begin{itemize}
\item \textsuperscript{272} \textit{See Atkins, supra} note _.
\item \textsuperscript{273} \textit{See 128 S. Ct. at 2666 (“[I]t is true that in the last 13 years there has been change towards making child rape a capital offense.”}).
\item \textsuperscript{274} \textit{Id.} (Again, however, the majority refused to consider whether such sentence’s rarity was based on juries’ categorical opposition to executing child rapists or their belief only the most heinous of such offenders should be put to death).
\item \textsuperscript{275} \textit{See Graham, supra note _}.
\item \textsuperscript{276} \textit{Id.} at 2050 (Thomas, J., dissenting) (“States over the past 20 years have consistently \textit{increased} the severity of punishments for juveniles offenders.”).
\item \textsuperscript{277} \textit{Id.} at 2023 (“An examination of actual sentencing practices in jurisdictions where the sentence in question is permitted by statute discloses a consensus against its use.”).
\end{itemize}
did not take their victims’ life. In *Enmund*, like *Thompson, Roper*, and *Atkins*, the Court considered the goal of deterrence as well. In *Kennedy*, the majority admitted executing child rapists could be duly retributive and serve as a possible deterrent. Nevertheless, the Court held that this was impossible to decisively determine, and fell back on the national consensus prong in order to ban executing such offenders.

In *Graham*, the majority also raised, and then quickly dismissed, the relevance of incapacitation. Left unclear was why this important goal of punishment was irrelevant. Sentencing someone to life without parole is, above all else, a measure of incapacitation. As Justice Thomas recognized, such individuals will never again threaten their communities. Furthermore, the Court previously refused to strike a punishment because an equally effective, though less harsh, sentence was available.

Ultimately, the majority’s decision to dismiss the importance of incapacitation speaks to the larger flaws of the penology prong. This test allows the Court to pick and choose what goal of punishment is most important to them, with no objective criteria to lend much guidance. If a majority of justices are punitive, they will declare this measure satisfied. The *Graham* majority found the statutes before them overly harsh, however, given the immaturity and future potential of juvenile offenders. Scalia’s conclusion, that the penology prong asks judges to evaluate policy rather than apply law, is difficult to

argue with. The Court has refused to acknowledge, never mind even discuss, whether this is a good thing.

3. Why does finding evolving standards of decency have been violated necessitate a categorical ruling?

Perhaps nothing inflamed Graham’s dissenters more than the categorical nature of the majority’s ruling. This disagreement pivoted around justices’ faith in judge and jury discretion, or whether these actors are capable of separating deserving from undeserving offenders.

The necessity of a categorical ruling has been debated since Coker. Here Justice White found executing all rapists inherently disproportionate. Justice Powell disagreed, arguing that violent rapists should still be death-eligible. In Kennedy v. Louisiana, Justice Alito challenged the majority’s holding that every child-rapist, no matter how heinous their crime, should be spared. Atkins and Roper were decided on similar grounds, categorically banning capital sentences for juveniles and the mentally handicapped.

The majority’s logic has varied here. In Kennedy, the Court argued that juries might become so inflamed by the defendant’s crime they would fail to think straight. In Atkins and Roper, the majority stated that judges and juries lacked the professional

---

285 See Coker, supra note __.
286 See Coker, supra note __.
287 See Kennedy, supra note __.
288 See Atkins, supra note __; Roper, supra note __.
289 See 128 S. Ct. at 2660-1 (“In this context, which involves a crime that in many cases will overwhelm a decent person’s judgment, we have no confidence that the imposition of the death penalty would not be” unconstitutionally “arbitrary.”).
expertise to separate culpable from inculpable offenders, and a categorical ban was therefore necessary in order to prevent potential mistakes.\footnote{See Atkins, supra note _; Roper, supra note _.}

The dissent has offered two rebuttals, both of which have gone unanswered. First, there is no empirical evidence that juries become overly inflamed by child rape, or are inherently incapable of distinguishing culpable from inculpable offenders.\footnote{See Kennedy, supra note _.} Indeed, the majority has offered little concrete proof to support their contentions, principally relying on their own subjective (seemingly a priori) judgment.\footnote{See, e.g. Kennedy, supra note _.} If anything, the relative paucity of such offenders on death row would indicate juries take their roles quite seriously regarding these matters.

Even if we recognize the subjectivity of juries’ decisions, the need for special safeguards in such cases is unclear. Juries risk being influenced in any emotionally charged case; indeed, this is a risk inherent in nearly any jury trial. The most obvious counter is that capital cases are unique, and therefore require categorical rulings. This argument no longer holds following \textit{Graham}, however, which based proportionality review on abstract challenges rather than capital cases. As Justice Thomas recognized, with incarceration on the table, “no reliable limiting principle remains to prevent the Court from immunizing any class of offenders from the law’s third, fourth, fifth, or fiftieth most severe punishments.”\footnote{See Graham, 130 S. Ct. at 2046.} Thomas’s point was not that the Court \textit{will} issue such sweeping measures, but that it no longer has any principled, consistent criteria (other than judicial fiat) for why it should not.

4. What are \textit{Graham}’s larger implications?
Numerous scholars have already speculated on what *Graham* implies for the future, and I can add little more here.294 These accounts generally focus on this cases’ potential impact on (1) juvenile offenders who have committed homicide, and (2) mentally handicapped offenders sentenced to life without parole for non-homicide crimes.

Ultimately, *Graham* did not rely on the nature of juvenile’s crimes, but the infliction of such a severe punishment on such a vulnerable population. According to Justice Kennedy, sentencing juveniles to life without parole destroyed any hope of rehabilitation and the “chance to demonstrate maturity” and “self-recognition of human worth and potential.”295 There is no reason (nor does the Court provide one) for why juveniles who commit homicide are somehow beyond such hope.296 *Graham* would therefore seem to open the door to banning life without parole for all juvenile offenders no matter how heinous their crime.

Mentally handicapped offenders and their advocates can also find some hope in *Graham, Atkins v. Virginia*, which abolished the death penalty for the mentally handicapped, directly influenced *Roper v. Simmons’s* ban on executing juveniles. *Roper* drew various parallels between these types of offenders, arguing both were less culpable

---

295 See *Graham*, 130 S. Ct. at 2032.

296 Unless, of course, one argues that all juveniles who commit murder are somehow categorically different people than those who “merely” attempt murder, commit violent crimes, etc. The Court does not attempt to argue for this distinction, nor do I see how it could reasonably be made.
than the general population.\textsuperscript{297} If juveniles who commit non-homicide offenses are spared life without parole, expanding this to include the mentally handicapped would thus seem to logically (and legally) follow. Of course, the majority could argue that youth are uniquely malleable, whereas mentally handicapped offenders are already adults and have therefore fully matured. It is unclear, however, how critical a role this reasoning played in the Court’s decision. Kennedy took all four types of punishment into account—not just rehabilitation—in finding Graham’s sentence penologically unjustified. Of course, this again speaks to the Court’s failure to specify what exactly satisfies the penology prong.

\textbf{XII. CONCLUSION}

When Chief Justice Warren declared that punishments must satisfy the evolving standards of society, he likely had little idea where this proclamation would eventually lead. It is equally difficult to imagine that Justices Brennan and Stewart, when formulating how to analyze evolving standards, could foresee this test’s distortions. Even if all three judges agreed on the resulting case outcomes, less likely is that they would have much satisfaction in the tangled path to get there.

Of course, just because the Court’s proportionality review is convoluted,\textsuperscript{298} does not mean it should be ended altogether. Justices Scalia and Thomas may be correct in their assertions that the founding fathers, and the earliest courts, solely meant cruel and unusual punishments to restrict brutal and torturous penalties. Nearly a century of precedent clearly recognizes proportionality review, however, nor is the current Court likely to reverse course.

What the Court can, and should do, is establish a more objective standard.

\textsuperscript{297} \textit{Id.} at 571 (“The same conclusions follow from the lesser culpability of the juvenile offender.”).

\textsuperscript{298} If not, at times, downright contradictory.
A more objective standard would first establish the difference between abstract and individual offenses. A more objective standard would then better explain what constitutes a national consensus. A more objective standard would isolate what goals of punishment are most important for legislatures to satisfy. Finally, a more objective standard would detail the necessity of categorical rulings, rather than vaguely alluding to jury incompetence. Justice Scalia may overstate the case in his dismissal of evolving standards as little more than a “post hoc rationalization” for the majority’s subjective preferences. Until the Court at least attempts to provide a more objective standard of proportionality review, however, his criticism will rightly continue to sting.

299 See Roper, supra note _.
